Why Celebrate the Roszels?

When Jacque and Cyndee Roszel came to teach Agricultural Education at Allentown High School little did they know how many lives they would touch. Teaching at Allentown High School for 64 combined years, Jacque and Cyndee have truly made a positive difference in the lives of over 5000 students.

Jacque and Cyndee's devotion to the agricultural education profession has been exemplified by their commitment to student success. The agricultural education program has been in existence at Allentown High School since 1938, but for many years only included production agriculture classes for males. In 1974, with the support of the Advisory Committee, Jacque and Cyndee began the work of converting the traditional program into a modern Ag Education format. With classes such as Animal Science, Plant Science, Equine Science and Environmental Science, Allentown was one of the first agricultural education programs in the state and region to change to this innovative layout. The teaching methods of Jacque and Cyndee have emphasized student responsibility and confidence by providing students with both knowledge and hands on experience. Jacque and Cyndee's students have been taught through real world experience by participation in debates, hands-on demonstrations, and various projects. Because of the learning approach, the achievements of the Allentown FFA Chapter are numerous, including over 100 first place finishes in State Career Development Events. With the guidance of the Roszels, more than 85 of Allentown's FFA members have attained the State FFA Degree, over 15 members have received their American Degree, and greater than 40 members have served as state FFA officers. Jacque and Cyndee have been an inspiration to their students and all those around them. Join us on August 15 to celebrate their contributions to agricultural education and FFA.
