

Technical Notes for January 4, 2004 – January 1, 2005 New Jersey Reportable Communicable Disease Summary Report (excludes sexually transmitted diseases [chancroid, chlamydia, granuloma inguinale, gonorrhea, lymphogranuloma venereum, syphilis] and tuberculosis)

- The report includes **NJDHSS-approved confirmed** cases for the following diseases. Please consult the Communicable Disease Service at 609-588-7500 for case definitions of reportable diseases listed in the report.

Amebiasis (<i>Entamoeba histolytica</i>)
Babesiosis (<i>Babesia</i> spp.)
Botulism - other
Botulism - foodborne
Botulism - infant
Brucellosis (<i>Brucella</i> spp.)
Campylobacteriosis (<i>Campylobacter</i> spp.)
Creutzfeld-Jakob disease
Cryptosporidiosis (<i>Cryptosporidium</i> spp.)
Cyclosporiasis (<i>Cyclospora</i> spp.)
Dengue fever
Ehrlichiosis - HGE (human granulocytic)
Ehrlichiosis - HME (human monocytic)
Enterohemorrhagic <i>E. coli</i> (not serogrouped)
Enterohemorrhagic <i>E. coli</i> O157:H7
Enterohemorrhagic <i>E. coli</i> non-O157:H7
Giardiasis (<i>Giardia lamblia</i>)
Guillain-Barre syndrome
<i>Haemophilus influenzae</i> - invasive disease
Hemolytic uremic syndrome
Hepatitis A
Hepatitis B, acute
Hepatitis B, perinatal, infant (1 - 24 months)
Hepatitis C, acute

Hepatitis C, chronic
Kawasaki disease
Legionellosis (<i>Legionella pneumophila</i>)
Listeriosis (<i>Listeria monocytogenes</i>)
Lyme disease (<i>Borrelia burgdorferi</i>)
Malaria (<i>Plasmodium</i> spp.)
Measles (Rubeola)
Meningococcal disease (<i>Neisseria meningitidis</i>)
Mumps
Q fever (<i>Coxiella burnetii</i>)
Rubella
Salmonellosis - non-typhoid (<i>Salmonella</i> spp.)
Shigellosis (<i>Shigella</i> spp.)
<i>Streptococcus agalactiae</i> (Group B), invasive disease
<i>Streptococcus pneumoniae</i> - invasive disease
<i>Streptococcus pyogenes</i> (Group A), invasive disease
Toxic shock syndrome, streptococcal
Tularemia (<i>Francisella tularensis</i>)
Typhoid fever (<i>Salmonella typhi</i>)
<i>Vibrio</i> spp. other than <i>Vibrio cholerae</i>
Yersiniosis (<i>Yersinia enterocolitica</i>)

- This report includes both **NJDHSS-approved confirmed AND probable** cases for the following diseases. Please consult the Communicable Disease Service at 609-588-7500 for case definitions of reportable diseases listed in the report.

Pertussis (*Bordetella pertusis*)
Rocky Mountain spotted fever
West Nile Virus

- Streptococcus pneumoniae* invasive disease - MMWR includes only cases among persons aged less than 60 months (5 years) old; New Jersey reports cases at all age groups. In 2004, a total of 168 *Streptococcus pneumoniae* invasive disease cases reported in New Jersey among all age groups.
- Data sources
 - For diseases reported to CDC, data were generated from CDRS as of May 19, 2005, with correction of case counts by adding 1 giardiasis case, 2 hepatitis C chronic cases, and 7 *Streptococcus pneumoniae* invasive disease cases; and removing 2 rubella cases and 1 salmonellosis - non-typhoid case.
 - For diseases reportable in New Jersey only, data were generated from the CDRSS database as of August 7, 2007, including amoebiasis, babesiosis, campylobacteriosis, Creutzfeldt-Jakob disease, dengue fever, Guillain-Barre syndrome, hepatitis C-acute, Kawasaki disease, *Streptococcus agalactiae* (Group B)-invasive disease, *Vibrio* spp. other than *Vibrio cholerae*, and Yersiniosis.
 - For West Nile virus, the data source is from the U.S. Geological Survey, http://diseasemaps.usgs.gov/wnv_nj_human.html
