FOR IMMEDIATE RELEASE
October 16, 2008

ALLIANCE SUPPORTS GOVERNOR'S ECONOMIC PLAN

The New Jersey Alliance for Action wholeheartedly endorses Governor Corzine's strong and decisive plan for the state's economic resurgence and pledges its support for early implementation.

We especially commend the Governor's emphasis on infrastructure investments to create jobs, grow our economy and increase the state's revenue resources. This was the essential recommendation the Alliance Board presented to the Governor during a recent meeting at Drumthwacket.

Infrastructure investment has been the mission of the Alliance since it was created over three decades ago as a non-profit, non-partisan statewide coalition that now numbers more than 600 business, labor, government, academic and professional organizations. New Jersey now has the funding for an early start with some $5 billion (including local matches) for school construction and $8 billion in new toll revenues for transportation projects. As people travel to work over improved roads and see new schools rising, the Alliance is confident that they will understand the importance of these projects to their lives.
