Breakout Table Discussion Questions

1. Which initiatives, projects and/or programs presented in the Scoping Document should the state prioritize for funding? Why?

2. Are there other funding priorities not listed in the Scoping Document that should be considered? Why?

3. How can municipalities best reduce greenhouse gas emissions in their communities? How can RGGI funding be utilized to support these efforts?

4. Are you aware of any current or planned coastal salt marsh creation, enhancement or restoration projects that could utilize future RGGI funding?

5. How should the 10% of RGGI funding allocated to coastal marshes and forests be split between the two programs? Why?

6. How should we measure the success of the projects once they are implemented? What metrics are most effective? What would success look like to you?

7. Any other feedback?
