Solid Waste Facility Permit

Under the provisions of N.J.S.A. 13:1E-1 et seq. known as the Solid Waste Management Act, this permit is hereby issued to:

The Mercer County Improvement Authority

Facility Type:	Transfer Station
Lot No.:	3, 10, 16, 17, and 37
Block No.:	13
Municipality:	Ewing Township
County:	Mercer
Facility Registration No.:	1102000450

This permit is subject to compliance with all conditions specified herein and all regulations promulgated by the Department of Environmental Protection.

This permit shall not prejudice any claim the State may have to riparian land, nor does it allow the permittee to fill or alter or allow to be filled or altered in any way, lands that are deemed to be riparian, wetlands, stream encroachment areas or flood plains, or that are within the Coastal Area Facility Review Act (CAFRA) zone or are subject to the Pinelands Protection Act of 1979, nor shall it allow the discharge of pollutants to waters of this State without prior acquisition of the necessary grants, permits, or approvals from the Department of Environmental Protection.

Scope of Permit

The permitted facility is a public solid waste transfer station leased by the Mercer County Improvement Authority (MCIA) from Ewing Township and operated by the current operator Longview of Mercer, Inc., under a contract with MCIA. The facility is located approximately 0.6 miles south the North Olden Avenue Extension, opposite Arctic Parkway.

The facility is authorized to accept solid waste types 10, 13, 13C, 23, 25 and 27 for transfer Monday through Saturday, with a maximum of 1,000 tons of material on any given day. The facility is also authorized to perform weighing of loaded vehicles transporting the same solid waste types, as well as solid waste type 27A and source separated recyclable materials.

The facility is authorized to offload incoming shipments of the approved solid wastes on the floor inside a building, where the wastes (other than vegetative wastes) are compacted and reloaded into trailers for shipment to the GROWS, Inc. sanitary landfill in Tullytown, Pennsylvania. Vegetative wastes are reloaded into trailers and shipped to the Atlantic County Compost Facility in Egg Harbor Township. Incoming shipments of solid wastes arriving for weighing purposes only are transported directly to the Geological Reclamation and Operations Waste Systems, Inc. sanitary landfill by the original collection vehicles.

All vehicles enter and exit the facility via an access road which connects the facility with the North Olden Avenue Extension.

The storage/maintenance of empty solid waste vehicles is allowed on Lot 16. Lot 16 was certified by Administrative Action pursuant to N.J.A.C. 7:26-6.11(f) by the Department on November 19, 1997.

An emergency access gate is located on Lot 16. This access point can be used by the truck traffic only in the case of emergencies.

This permit is a renewal of the Solid Waste Facility (SWF) permit issued to the MCIA on October 31, 1990.

This permit does not convey any property rights of any sort, or any exclusive privilege. Failure to comply with all of the conditions specified herein may result in revocation of this permit and/or may result in such other regulatory or legal actions which the Department is authorized by law to institute.

08/08/00: The permit was modified to authorize replacement of the existing scales and scale house trailer with new scales and a scale house.

Section I

General Conditions Applicable to All Permits

1. Duty to Comply

   (a) Pursuant to N.J.A.C. 7:26-2.8(i), the permittee shall operate the facility in compliance with the requirements of N.J.A.C. 7:26-2.11.

   (b) Pursuant to N.J.A.C. 7:26-2.8(j), the permittee shall operate the facility in conformance with all of the conditions, restrictions, requirements and any other provisions set forth in this permit.

   (c) Pursuant to N.J.A.C. 7:26-2.8(k), except for minor modifications as set forth at N.J.A.C. 7:26-2.6(d), the permittee shall not modify, revise or otherwise change any condition of this permit without prior written approval of the Department.

2. Duty to Reapply

   (a) Pursuant to N.J.A.C. 7:26-2.7(b)1, if the permittee wishes to continue the operation of this facility after the expiration date of this permit, the permittee shall apply for permit renewal at least 90 days prior to the expiration date of this permit, and the facility must be included in the District Solid Waste Management Plan at the time of such application.

   (b) Pursuant to N.J.A.C. 7:26-2.7(c), the conditions of this permit shall continue in force beyond the expiration date of this permit pursuant to the Administrative Procedure Act, N.J.S.A. 52:14B-11, until the effective date of a new permit if:

      1. The permittee has submitted a timely and complete application for a renewal permit pursuant to (a) above; and

      2. The Department, through no fault of the permittee, does not issue a new permit with an effective date on or before the expiration date of this permit, due to time or resource constraints.

   (c) Pursuant to N.J.A.C. 7:26-2.7(d), permits continued under said section remain fully effective and enforceable, and if the permittee is not in compliance with any one of the conditions of the expiring or

expired
permit the Department may choose to do any or all of the following:

1. Initiate enforcement action based on the permit which has been continued;

2. Issue a notice of intent to deny the new permit under N.J.A.C. 7:26-2.4. If the permit is denied, the permittee would then be required to cease activities and operations authorized by the continued permit or be subject to an enforcement action for operating without a permit;

3. Issue a new permit under N.J.A.C. 7:26-2.4 with appropriate conditions; or

4. Take such other actions as are authorized by N.J.A.C. 7:26-1 et seq. or the Solid Waste Management Act, N.J.S.A. 13:1E-1 et seq.

3. Need to Mitigate

(a) Pursuant to N.J.A.C. 7:26-2.8(p), should the Department determine that the facility is operating in an environmentally unsound manner, the permittee shall:

1. Within 90 days of notification by the Department, submit a plan to close or environmentally upgrade the facility in conformance with the applicable standards, as determined by the Department and set forth in N.J.A.C. 7:26-1 et seq.;

2. Within 90 days of receipt of written approval by the Department of the submitted plan, begin to close or construct the environmental upgrading at the facility; and

3. Within one year of receipt of written approval by the Department of the submitted plan, complete closure or construction of the environmental upgrading at the facility.

(b) Pursuant to N.J.A.C. 7:26-2.8(q), a one time extension of the compliance schedule established by N.J.A.C. 7:26-2.8(p) shall be granted by the Department provided the permittee demonstrates that it has made good faith effort to meet the schedule.

(c) Pursuant to N.J.A.C. 7:26-2.8(r), should the environmental upgrading required pursuant to N.J.A.C. 7:26-2.8(p) not be completed or should continued

operations be determined by the Department to be environmentally unsound despite the implementation of the plan approved pursuant to N.J.A.C. 7:26-2.8(p), the facility shall temporarily or permanently cease operations and close or enter into receivership, as provided for in N.J.S.A. 13:1E-9, for that period of time necessary to rectify the environmentally unsound conditions.

4. Permit Actions

(a) Pursuant to N.J.A.C. 7:26-2.6(a)1, if cause exists, the Department may modify, or revoke and reissue this permit, subject to the limitations of that section, and may require the permittee to submit an updated or new application in accordance with N.J.A.C. 7:26-2.6(e), if appropriate.

(b) Pursuant to N.J.A.C. 7:26-2.6(b), the Department may modify or, alternatively, revoke and reissue this permit if cause exists for termination under N.J.A.C. 7:26-2.6(c) and the Department determines that modification or revocation and reissuance is appropriate.

(c) Pursuant to N.J.A.C. 7:26-2.6(d), upon the request of the permittee, an interested party or for good cause, the Department may make certain minor modifications to a permit without issuing a tentative approval, providing public notice thereof or holding a public hearing thereon.

(d) Where the permittee becomes aware that it failed to submit any relevant facts in a permit application, or submitted incorrect information in a permit application or in any report to the Department, the permittee shall promptly submit such facts or information.

5. Signatory Requirements

(a) All completed registration statements submitted by the permittee shall be signed as specified at N.J.A.C. 7:26-2.4(e)1.

(b) All engineering designs and reports, the environmental and health impact statement, other information requested as "Addendums" by the Department pursuant to N.J.A.C. 7:26-2.4(f) and (g)4 and documents required to be submitted pursuant to N.J.A.C. 7:26-2.9 and 2.10, submitted on behalf of the permittee, shall be signed by a person described in N.J.A.C. 7:26-2.4(e)1 or by a duly

authorized representative of that person, as specified at N.J.A.C. 7:26-2.4(e)2.

(c) Any person signing a registration statement, engineering design or report, environmental and health impact statement or addendum mentioned in N.J.A.C. 7:26-2.4 (e)1 or (e)2, submitted on behalf of the permittee, shall make the certification specified at N.J.A.C. 7:26-2.4(e)3.

6. Transfers

(a) Pursuant to N.J.A.C. 7:26-2.8(l), the permittee shall not transfer ownership of the permit without receiving prior written approval of the Department, in accordance with N.J.A.C. 7:26-2.7(e).

(b) Pursuant to N.J.A.C. 7:26-2.7(e)1, a written request for permission to allow any transfer of ownership or operational control of the facility must be received by the Department at least 180 days in advance of the proposed transfer. The request for approval shall include the following:

1. A registration statement, completed by the prospective new permittee on forms provided by the Department;

2. A disclosure statement as required by N.J.A.C. 7:26-16.4 completed by the proposed transferee;

3. A written agreement between the permittee and the proposed new permittee containing a specific future date for transfer of ownership or operations.

(c) Pursuant to N.J.A.C. 7:26-2.7(e)2, a new owner or operator may commence operations at the facility only after the existing permit has been revoked and a permit is issued pursuant to N.J.A.C. 7:26-2.4.

(d) Pursuant to N.J.A.C. 7:26-2.7(e)3, the permittee of record remains liable for ensuring compliance with all conditions of the permit unless and until the existing permit is revoked and a new permit is issued in the name of the new owner or operator.

(e) Pursuant to N.J.A.C. 7:26-2.7(e)4, compliance with the transfer requirements set forth in that subsection shall not relieve the permittee from the separate responsibility of providing notice of such transfer

pursuant to the requirements of any other statutory or

regulatory provision.

7. Registration Statement

(a) Pursuant to N.J.A.C. 7:26-2.8(b), prior to May 1 of each calendar year the permittee shall submit to the Department a statement updating the information contained in the permittee's initial registration statement. This update shall be on forms furnished by the Department. In no case shall submission of an updated statement alter conditions of this permit.

(b) Pursuant to N.J.A.C. 7:26-2.8(c), the permittee shall notify the Department in writing within 30 days of any change in the information set forth in the permittee's current registration statement.

(c) Pursuant to N.J.A.C. 7:26-2.8(d), failure of the permittee to submit an updated registration statement and to submit all applicable fees, required by N.J.A.C. 7:26-4, on or before July 1 of each calendar year shall be sufficient cause for the Department to revoke this permit or take such other enforcement action as is appropriate.

8. Duty to Update Disclosure Statement

(a) Pursuant to N.J.A.C. 7:26-16.6(b), the permittee and/or facility operator shall report to the Department and the Attorney General within 30 days any changes or additions in the information required to be included in the disclosure statement, as specified at N.J.A.C. 7:26-16.6.

(b) Pursuant to N.J.A.C. 7:26-16.6(c), the permittee and/or facility operator shall report any other changes in the information contained in the permittee's disclosure statement currently on file with the Department and the Attorney General in an annual update to be filed with the Department at the time of the permittee's annual renewal of its registration with the Department, as specified at N.J.A.C. 7:26-16.6.

9. Operating Record and Reporting Requirements

(a) The permittee shall maintain a daily record of wastes received. The record shall include the information specified at N.J.A.C. 7:26-2.13(a).

(b) The daily record shall be maintained, shall be kept, and shall be available for inspection in accordance with N.J.A.C. 7:26-2.13(b).

(c) The permittee shall verify, retain and make available for inspection a waste origin/disposal (O and D) form for each load of solid waste received in accordance with N.J.A.C. 7:26-2.13(c).

(d) The permittee shall submit monthly summaries of wastes received to the Division of Solid and Hazardous Waste, Bureau of Recycling and Planning and the Solid Waste Coordinator for the Mercer County District, on forms provided by the Department (or duplicates of same), no later than 20 days after the last day of each month. The monthly summaries shall include the information specified at N.J.A.C. 7:26-2.13(e).

(e) Pursuant to N.J.A.C. 7:26-6.4, upon request by the Department, the permittee shall submit, in such form as the Department may deem appropriate, information concerning the sources of wastes received and the transportation or disposal patterns associated with such wastes.

10. Conformance to the District Solid Waste Management Plan

Pursuant to N.J.A.C. 7:26-6.12(b), the permittee shall operate the facility in compliance with any applicable district solid waste management plan(s) as well as any amendments to and/or approved administrative actions concerning such plan(s). Should the permittee fail to comply with any applicable district solid waste management plan(s) as well as any amendment to or approved administrative actions concerning such plan(s), the permittee shall be deemed in violation of N.J.S.A. 13:1E-1 et seq. and N.J.A.C. 7:26-1 et seq. and shall be subject to applicable penalties provided thereunder, and any other applicable laws or regulations.

11. Compliance with Other State Regulations and Statutes

Pursuant to N.J.A.C. 7:26-2.8(h), the issuance of this permit shall not exempt the permittee from obtaining all other permits or approvals required by law or regulations.

12. No Change to Waste Identification

(a) Pursuant to N.J.A.C. 7:26-2.13(j), solid waste shall be identified at the point of generation. The facility permitted herein is not the point of generation of waste received. Solid waste received by the facility shall retain the ID type identified in the O and D form received by the facility. The type of solid waste shall not change due to the removal of recyclable materials or the processing of the solid waste.

(b) Pursuant to N.J.A.C. 7:26-2.13(c):

1. The permittee shall designate waste remaining after processing, within the O and D form and the daily record of the facility, as the same waste type as originally received at the facility; and

2. The permittee shall not subject ID 27 solid waste to mechanized processing, such as grinding, shredding or baling, such that the physical appearance of the material is altered prior to disposal at a designated district facility.

13. Computerized Scales Requirement

Pursuant to N.J.A.C. 7:26-2.13(a)8, the permittee shall install and operate computerized scales for the reporting requirements in N.J.A.C. 7:26-2.13.

14. Weighing Facility Operation

Pursuant to N.J.A.C. 7:26-2.13(l), the permittee shall ensure that all weighing performed as a designated district weighing facility is conducted in a manner that facilitates proper operation of the permitted facility and minimizes systems interruptions.

End of Section I

Section II

General Operating Requirements

1. General Operating Requirements For All Solid Waste Facilities

Pursuant to N.J.A.C. 7:26-2.11, the facility must be operated in compliance with the following general operating requirements:

(a) Within each 24 hour period the operator shall clean each area where waste has been deposited or stored.

(b) No waste shall be stored overnight at the facility without effective treatment to prevent odors associated with putrefaction.

(c) Facility property surrounding the actual disposal area shall be maintained free of litter, debris, and accumulations of unprocessed waste, process residues and effluents. Methods of effectively controlling wind-blown papers and other lightweight materials such as fencing shall be implemented at the facility.

(d) Methods of effectively controlling dust shall be implemented at the facility in order to prevent offsite migration.

(e) The operation of the facility shall not result in odors associated with solid waste being detected off site in any area of human occupancy.

(f) The operator shall maintain all facility systems and related appurtenances in a manner that facilitates proper operation and minimizes system downtime. When requested, the operator of the facility shall furnish proof that provisions have been made for the repair and replacement of equipment which becomes inoperative.

(g) An adequate water supply and adequate fire-fighting equipment shall be maintained at the facility or be readily available to extinguish any and all types of fires. Fire-fighting procedures as delineated in the approved O and M manual, including the telephone numbers of local fire, police, ambulance and hospital facilities, shall be posted in and around the facility at all times.

(h) The operator shall effectively control insects, other

arthropods and rodents at the facility by means of a program in compliance with the requirements of the New Jersey Pesticide Control Code, N.J.A.C. 7:30, and implemented by an applicator of pesticides, certified in accordance with the New Jersey Pesticide Control Code, N.J.A.C. 7:30.

(i) Only solid waste vehicles properly registered, pursuant to N.J.A.C. 7:26-3, with the Division of Solid and Hazardous Waste, unless exempt from the registration requirement pursuant to N.J.A.C. 7:26-3.3, and displaying the appropriate registration number and solid waste decal shall be admitted for loading and unloading of any solid waste at the facility. Solid waste vehicles exempt from registration shall not be admitted to the tipping area when registered, commercial type solid waste vehicles including, but not limited to, compactor trucks, trailers or any solid waste vehicle that tilts or uses other mechanical means to discharge its solid waste are being unloaded, or when other heavy equipment is being operated in the tipping area. The facility shall be sufficiently staffed to ensure that this requirement is not violated.

(j) The operator shall designate a secure area under the facility's control, located a safe distance from the tipping area, where solid wastes may be unloaded from those solid waste vehicles which are exempt from the registration requirements of N.J.A.C. 7:26-3.3. Bulky items and recyclable materials may be provided for in this manner. It shall be the operator's responsibility to remove the bulky items, recyclable materials or other waste from the designated area at a frequency so as not to exceed the storage capacity of the areas.

(k) The operator shall at all times comply with the conditions of the SWF permit, as well as all other permits or certificates required and issued by the Department or any other governmental agency. The operator shall not receive, store, handle, process or dispose of waste types not specifically identified in the SWF permit or other permit or certificate issued by the Department.

(l) The operator shall designate a secure area under the facility's control, located a safe distance from the active disposal area, where solid waste, including suspected hazardous waste, which the facility is not permitted to receive shall be deposited until the operator receives instruction from the Department as to

the proper disposal of the unpermitted waste.

(m) The operator shall maintain a record of the quantity of each authorized waste type accepted for disposal, in accordance with N.J.A.C. 7:26-2.13 and 3.2.

(n) Departmental inspectors shall have the right to enter and inspect any building or other portion of the facility, at any time. This right to inspect includes, but is not limited to:

1. Sampling any materials on site;

2. Photographing any portion of the facility;

3. Investigating an actual or suspected source of pollution of the environment;

4. Ascertaining compliance or non-compliance with any statutes, rules, or regulations of the Department, including conditions of the SWF permit or other permit or certificate issued by the Department; or

5. Reviewing and copying all applicable records, which shall be furnished upon request and made available at all reasonable times for inspection.

(o) The quantity of waste received by the facility operator shall not exceed the system's designed handling, storage, processing or disposal capacity as identified in the SWF permit or other permit certificate. The designed processing and disposal capacity approved within the solid waste facility permit, or any other permit certificate or approval conditions as a ton per day operational maximum shall be inclusive of all solid waste received at the facility as well as all tonnages of source separated recyclables received.

(p) The facility shall be operated in a manner that employs the use of the equipment and those techniques for the receipt, storage, handling, processing or disposal of incoming waste and process residues that are specifically authorized by the SWF permit.

(q) The operator shall provide a means of removing mud, solid waste or other debris from the tires of all vehicles. Vehicle tires shall be cleaned prior to the vehicle's departure from the facility's boundaries.

(r) The approved final O and M manual shall be maintained at the facility. A written description of any proposed changes to

the approved, final O and M manual shall be submitted to the Department for review. These proposed changes shall not be implemented at the facility until the Department approves the changes.

2. General Operating Requirements for Transfer Stations and Materials Recovery Facilities

(a) Pursuant to N.J.A.C. 7:26-2B.5(b)2, facility processing, tipping, sorting, storage and compaction areas shall be located within the confines of an enclosed building.

(b) Pursuant to N.J.A.C. 7:26-2B.5(b)12, the installation, maintenance, operation, and repair of all systems identified within the interior layout of the facility shall comply with the requirements established by the Federal Occupational Health and Safety Administration and the New Jersey Worker and Community Right to Know Act.

End of Section II

Section III

Specific Conditions Applicable to the Facility

1. Permitted Waste Types

The permittee is authorized to accept the following waste types:

ID	Description
10	Municipal waste (household, commercial and institutional)
13	Bulky waste
13C	Construction and demolition waste
23	Vegetative waste
25	Animal and food processing wastes
27	Dry industrial waste

The permittee is not authorized to accept any other type or description of solid waste as defined at N.J.A.C. 7:26-2.13(g) and (h), regulated medical waste as defined at N.J.A.C. 7:26-3A.6(a), or hazardous waste as defined at 40 CFR 261.3.

2. Approved Designs, Plans and Reports (Modified 08/08/00)

(a) The permittee shall operate the facility, and construct or install associated appurtenances thereto, in accordance with the provisions of N.J.A.C. 7:26-1 et seq., the conditions of this permit, and the following permit application documents which are incorporated herein by reference:

1. The Solid Waste Facility (SWF) permit renewal application for the Mercer County Improvement Authority (MCIA) transfer station dated June 15, 1995, submitted by Henry R. Boucher, Project Manager for Camp Dresser & McKee on behalf of the MCIA. The submittal included a registration statement, an updated engineering design report, an updated environmental and health impact statement, an operations and maintenance (O and M)

manual and as-built engineering drawings of the facility.

2. The amended SWF permit renewal application for the MCIA transfer station dated April 23, 1997, submitted by Allan C. Collins, Chief of Planning, MCIA. The submittal included the following:

   i. Addendum to the June 15, 1995 application for the SWF permit renewal.

   ii. Registration statement (Solid Waste Facility Permit Application Form) dated April 22, 1997.

   iii. Updated engineering design.

   iv. Updated Environmental and Health Impact Statement.

   v. O and M manual dated April 1997.

   vi. As-built drawings of the facility.

3. Correspondence dated June 25, 1997 submitted by Allan C. Collins, Chief of Planning, MCIA which included a copy of the Certificate of Occupancy issued on June 16, 1997 by the Ewing Township for the MCIA Transfer Station.

4. Additional information on the SWF permit renewal application dated November 12, 1997, submitted by Allan C. Collins, Chief of Planning, MCIA. The submittal included a request for inclusion of Lot 16 as a part of the MCIA transfer station activities (storage/maintenance) in the Mercer County District Solid Waste Management Plan.

5. Additional information on the SWF permit renewal application dated November 25, 1997, submitted by Allan C. Collins, Chief of Planning, MCIA. The submittal included a certification of construction of the facility dated November 25, 1997, provided by Mr. Steven J. Golembuski, P.E., Director of Engineering, MCIA; revised pages for the April 1997 O and M manual to address the ancillary operational activities on lot 16; and the November 19, 1997 approval by Administrative Action of the inclusion of Lot 16 in the Mercer County District Solid Waste Management Plan.

6. The revised pages 2-2 and 2-6 to the O and M manual dated September 30, 1998 clarifying the storage of empty solid waste vehicles on Lot 16 and incorporating the revised traffic routes to the ACUA compost facility.

7. The following engineering drawings signed and sealed by Richard A. Alaimo, P.E.:

   Sheet 1, Rev. 2, dated 4/1/92: "Title Sheet & Location Plan"

   Sheet 2, Rev. 1, dated 10/26/90: "Existing Site Plan"

   Sheet 3, Rev. 1, dated 10/26/90: "Site Plan"

   Sheet 4, Rev. 2, dated 4/3/92: "Construction Sequence Plan"

   Sheet 5, Rev. 0, dated 3/90: "Soil Erosion & Sediment Control Plan"

   Sheet 6, Rev. 0, dated 3/90: "Soil Erosion & Sediment Details"

   Sheet 7, Rev. 2, dated 7/8/91: "Building Elevations"

   Sheet 8, Rev. 3, dated 2/19/92: "Elevations"

   Sheet 9, Rev. 1, dated 10/26/90: "Roof Plan"

   Sheet 10, Rev. 3, dated 4/1/92: "Floor Plan"

   Sheet 11, Rev. 2, dated 7/8/91: "Building Section"

   Sheet 12, Rev. 3, dated 4/1/92: "Building Section"

   Sheet 13, Rev. 1, dated 10/26/90: "Framing Sections & Details"

   Sheet 14, Rev. 1, dated 10/26/90: "Framing Sections & Details"

   Sheet 15, Rev. 1, dated 10/24/90: "Roof Framing Plan"

   Sheet 16, Rev. 2, dated 7/8/91:

"Miscellaneous Details"

Sheet 17, Rev. 1, dated 1/16/91: "Miscellaneous Details"

Sheet 18, Rev. 1, dated 10/26/90: "Architectural Details"

Sheet 19, Rev. 2, dated 7/8/91: "Architectural & Miscellaneous Details"

Sheet 20, Rev. 0, dated 3/90: "Pile Location Plan, Section & Details"

Sheet 21, Rev. 3, dated 4/1/92: "Foundation Plan, Sections & Details"

Sheet 22, Rev. 2, dated 7/8/91: "Foundation Sections"

Sheet 23, Rev. 1, dated 10/26/90: "Sheet Pile Retaining Wall"

Sheet 24, Rev. 1, dated 4/1/92: "Sheet Pile Wall Details"

Sheet 27, Rev. 2, dated 7/8/91: "Sprinkler System Elevation"

Sheet 28, Rev. 3, dated 2/5/92: "Air Pollution Control Plan"

Sheet 29, Rev. 1, dated 5/30/91: "Stair Plans & Details"

Sheet 30, Rev. 1, dated 5/30/91: "Stair Plans & Details"

Sheet E-1, Rev. 1, dated 6/22/91: "Plot Plan Service Feeder, Single Line Diagram, Grounding Schematic"

Sheet E-2, Rev. 3, dated 4/1/92: "Electrical Power & Lighting"

Sheet E-3, Rev. 3, dated 2/4/92: "Schematic &

Wiring Diagram, Blowers & Fire Pump"

Sheet E-4, Rev. 2, dated 2/4/92: "General Notes, Bill Of Materials, Panel Schedules & Sections"

8. The following engineering drawings signed and sealed by Steven J. Golembuski, P.E.:

   Sheet 10A, Rev. 2, dated 4/4/97: "Floor Plan"

   Sheet 10B, Rev. 0, dated 4/8/97: "Traffic Control Plan"

   "Paving Plan-Lower Level", updated on 3/19/97

9. "Solid Waste Transfer Station Plan & Profile" engineering drawing signed and sealed by Albert J. Mellini, P.E., dated September 16, 1988.

10. Document dated June 29, 2000 prepared by Tri-State Architects of Mount Holly, New Jersey. The document was submitted on behalf of MCIA which requested an approval to replace the existing scales and scale house trailer with new scales and scale house at the adjacent location. The response document also included the engineering drawings identified at Condition 2(a)11 of this Section.

11. The following engineering drawings prepared, signed and sealed by Richard A. Alaimo, P.E.:

    Sheet SW1 dated 6/29/00: "Scale House and Scales, Site Plan"

    Sheet A101 dated 6/29/00: "Scale House and Scales, Floor Plan"

    Sheet A103 dated 6/29/00: "Scale House and Scales, Building Elevations and Cross sections"

    Sheet E105 dated 6/29/00: "Scale House and Scales , Electrical Site Plan"

In case of conflict, the provisions N.J.A.C. 7:26-1 et

seq. shall have precedence over the conditions of this permit, the conditions of this permit shall have precedence over the SWF permit application documents listed above, and the most recent revisions and supplemental information approved by the Department shall prevail over prior submittals and designs.

(b) One complete set of the permit application documents listed in Condition 2(a) above, this Solid Waste Facility Permit, and all records, reports and plans as may be required pursuant to this permit shall be kept on-site and shall be available for inspection by authorized representatives of the Department upon presentation of credentials.

3. Approved Operations (Modified 08/08/00)

(a) The permittee may accept a maximum of 1,000 tons of material, which material shall include solid waste and/or source separated recyclable materials, on any operating day, for processing through the transfer station. The material accepted for processing through the transfer station shall be deposited only on those areas within the building which have been specifically identified in the approved design drawings for such purposes. The permittee shall process the amount of material received by the end of each operating day. No material shall remain on the tipping floor overnight.

(b) The permittee shall accept and process waste at the facility in accordance with the following schedules:

Monday through Friday:	7:00 a.m. to 4:00 p.m.
Saturday:	7:00 a.m. to 12:00 noon

The acceptance of vegetative waste from landscapers shall be limited to the hours of 2:00 p.m. through 4:00 p.m. on weekdays and 10:00 a.m. through 12:00 noon on Saturdays.

(c) The permittee shall schedule the waste deliveries to the facility in such a manner as to minimize truck queuing on the facility property. The permittee shall stage vehicles in accordance with the queuing plan provided in the O and M manual referenced in Condition 2(a)2v of this Section. Under no circumstances shall delivery trucks and/or transfer trailers accessing or exiting the facility be allowed to park or queue on any public road.

(d) The permittee shall inspect each incoming waste load to identify the incidence of designated recyclable

materials mandated to be source separated by the District Recycling Plan applicable to the point of origin of the waste load. The permittee shall consult with each county recycling coordinator for the facility's service area on a quarterly basis to review those recyclable materials that are designated by each county to be source separated pursuant to N.J.S.A. 13:1E-99.13(b)2. Should any designated recyclable materials be detected in a delivered waste load, the appropriate county recycling coordinator shall be notified in writing. The permittee shall maintain a copy of each such notification at the facility. Whenever possible, the generator who failed to source separate the recyclable materials shall also be identified and reported to the county recycling coordinator.

(e) In the event of a facility outage or other significant malfunction which would result in the facility's inability to process waste at a rate equal to or exceeding the rate of incoming waste, the operator shall immediately report such situation or event to the Department at 1-877-WARNDEP (1-877-927-6337).

(f) The permittee shall post at the facility, and provide to the users of the facility, a copy of the traffic routes described in section 2.1.5 of the O and M manual referenced in Condition 2(a)6 of this Section.

(g) In the event that the New Jersey Department of Transportation (NJDOT) determines that traffic utilizing the facility has caused a degradation of the safety and/or operation of the surrounding roadway network, the permittee shall implement such measures as are deemed necessary by the NJDOT to mitigate such degradation.

(h) The storage/maintenance of empty solid waste vehicles is allowed on Lot 16.

(i) The permittee may also use the scales at the facility for the weighing of loaded waste vehicles destined for other disposal facilities. Such weighing may be performed on waste vehicles transporting any of the waste types authorized in Condition 1 of this Section, as well as waste vehicles transporting waste types 27A (waste material consisting of asbestos or asbestos containing waste) or source separated recyclable materials.

4. Construction/Installation Requirements (Added 08/08/00)

(a) The permitte is authorized to construct and install new scales and scale house and all utilities thereto, and

parking spaces for employees and visitors identified in the engineering designs as referenced in Condition 2(a)10 and 2(a)11 of this Section. The construction and installation activities are subject to the following requirements:

1. Prior to initiating any construction activity, the permittee shall obtain all necessary permits and approvals required for construction.

2. Within thirty (30) days from the date of issuance of this modified permit, the permittee shall submit to the Department, for review and approval, a schedule for the construction and installation of the proposed scales and scale house and parking spaces for employees and visitors at the facility.

3. Within thirty (30) days from the date of issuance of this modified permit, the permittee shall submit to the Department, for review and approval, an interim operations plan which include the procedures to be implemented in order to minimize vehicular and equipment noise, dust generation and traffic impacts associated with construction vehicles.

4 Certificate of Construction

Within thirty (30) days of completion of the construction project, the permittee shall submit to the Department, by certified mail or hand delivery, written certification from both the permittee and a licensed professional engineer registered in the State of New Jersey, that the construction has been completed in accordance with the approved designs. The written certifications shall be in conformance with the requirements cited in Condition 5(c) of Section I of this permit, and shall be accompanied with a set of "as-built" drawings signed and sealed by the New Jersey licensed professional engineer.

5. The existing scales and scale house trailer shall remain operational until new scale house and scales are operational.

6. After completion of all construction activities, all paved areas which have been disturbed due to

construction shall be repaved with concrete or asphalt. All unpaved areas disturbed due to construction shall be repaired as required.

7. Certificate of Occupancy

A Certificate of Occupancy shall be obtained from Ewing Township, which serves notice that the building (structure and equipment) has been constructed/installed in accordance with the New Jersey Uniform Construction Code, N.J.A.C. 5:23 and is approved for use and/or occupancy. A copy of such Certificate of Occupancy shall be submitted to the Bureau of Hazardous Waste and Transfer Facilities within thirty (30) days of being obtained.

5. Final Operations and Maintenance Manual (Added 08/08/00)

Within thirty (30) days of completion of the construction project, the permittee shall submit to the Department, for review and approval, such revisions to the final Operations and Maintenance Manual as may be necessary (such as revised equipment list, equipment specifications, on-site traffic control plan etc.) as a result of the installations of new scales and scale house.
