Definitions:

Class B Recycling Facility

Class B materials are source separated, meaning they are separated at the point of generation, not the recycling site. Materials include: concrete & concrete materials (such as pipes, brick, or blocks), asphalt, asphalt shingles, unpainted and untreated wood materials, tree parts (limbs, branches, trunks, etc.), leaves (not composted), used tires, petroleum contaminated soil, and waste materials from construction and demolition activities.

Firewood Dealer

A Firewood dealer utilizes trees with poor form for the purpose of firewood distribution.

Logger

A logger is a person who fells trees for timber; a lumberjack. Trees are typically felled using chainsaws or larger scale harvesting equipment.

Mulch Producer

A mulch producer is a business that chips branches and less desirable tree parts to make mulch. Tree chippers and tub grinders are typically used in mulch making.

Portable Sawmill

A portable sawmill is a mechanized saw that cuts logs into lumber. The sawmill can be trailered to a site where there are logs.

Sawmill

A sawmill is a facility where logs are sawed into lumber by machine. The logs are trucked from the harvest site to the facility.

Tree Farm

A tree farm is a privately owned forest-land dedicated to the growing of forest crops for commercial purposes. It is protected and managed for continuous production of forest products.

Tree expert

A tree expert is a person skilled in the science of tree care that engages in the business of the treatment, care, or removal of trees.

Tree Service

A tree service employs arborists and tree care professionals trained in the art and science of planting, caring for, and maintaining individual trees. Arborists and tree care professionals are knowledgeable about the needs of trees and are trained and equipped to provide proper care.

Wood Manufacturer

A wood manufacturer is a person or company that makes wood products to sell.
