

FEBRUARY 2007 FUEL ADJUSTMENT ADD-ON

December Diesel price \$2.720 *Base Diesel Price (2002)* \$1.403

CALCULATION

Price Difference \$2.720 - \$1.403 = \$1.317

Premium Calculation

3 cents for every 10 cent increase/decrease \$1.317 / 10 = \$0.1317 Round to \$0.13

\$0.13 x 3 = \$0.39

*Adjust for Class I Utilization** \$0.39 x =

* Please note that the calculations for the percent Class I utilization will be posted on the Department's website by close of business on **March 14, 2007**. Licensed processors can calculate the actual cost of the fuel adjustment add-on by adjusting the fuel adjustment add-on by the percentage of their individual Class I utilization.

Please be advised that revisions were made to the Department's fuel adjustment add-on rule that were not reflected in the proposed rule posted on the website on January 19, 2007. Please note that the revisions are marked on the Department's website in red, bold and underlined letters. Due to the proposed changes to the rule text, it is no longer necessary to announce the Class I Utilization for February's fuel adjustment add-on at this time. February's Class I utilization will now be announced on March 14, 2007. See rule text for further information.
