IN THE MATTER OF THE FILING BY UNITED)	TELECOMMUNICATIONS
TELEPHONE COMPANY OF NEW JERSEY,)	
INC. TO REVISE ITS TARIFF N.J.B.P.U. NO. 3)	
TO ADD ATM SERVICE OFFERING)	ORDER OF APPROVAL
)	
)	DOCKET NO. TT00120988

(SERVICE LIST ATTACHED)

BY THE BOARD:

On December 19, 2000, United Telephone Company of New Jersey, Inc. (United) filed a tariff N.J.B.P.U. No. 3. United proposes to introduce ATM service, as a new service offering.

According to United, ATM Service is a connection-oriented fast packet local, intraLATA and InterLATA network service that permits the transmission of high-speed data and voice traffic. United stated that ATM Service is a more enhanced service than the existing Frame Relay Service.

According to United, the main differences between ATM and Frame Relay are bandwidth and Quality Of Service (QOS) that makes ATM a better choice over Frame Relay when higher speed and better quality is required to transmit voice and video traffic. Frame Relay, according to United, cannot support the high and constant bandwidth needs of voice and video data traffic. ATM Service will be used where voice and video traffic is required at a higher speed than Frame Relay Service.

Since the introduction of ATM Service will meet the need of business customers that require faster speeds and higher quality service than the currently available services for voice and video transmission, the Board, therefore ORDERS that the United's filing be APPROVED as filed.
