

Resilience Finance Symposium

Building Resilient and Sustainable Energy Solutions for New Jersey's Key Infrastructure

The Christie Administration, Environmental Defense Fund (EDF) and the New Jersey Institute of Technology invite you to join us and prominent national experts to explore and discuss innovative ways that New Jersey and the country are financing resilient energy systems.

In addition to a luncheon keynote address given by John MacWilliams, Senior Advisor to the Secretary of Energy at the U.S. Department of Energy, our discussions will be framed by: Terrence Brody, Executive Director of New Jersey Governor's Office of Recovery and Rebuilding; Mitch Carpen and Thomas Walker, Executive Director and Deputy Director of the New Jersey Energy Resilience Bank; and Cheryl Roberto, Associate Vice President of Clean Energy at the Environmental Defense Fund. In addition to other senior administration officials, our discussion panels will include leaders in the energy, finance, and public policy fields.

November 12th, 2014

8:00am - 8:45am Registration

9:00am - 5:00pm Convening

Draft agenda will follow.

Seating is limited.

Location

New Jersey Institute of Technology

College of Architecture + Design

Weston Hall

University Heights

Newark, NJ 07102

Workshop will address:

- The impacts of Superstorm Sandy and the State's immediate and long-term resilience response.
- Microgrid success stories in the face of widespread outages, with a focus on the potential for future market deployment opportunities.
- The designing and deployment of energy storage systems, and technological advances within this sector.
- The inclusion of energy efficiency standards to insure long-term energy resilience.
- Financing energy resilience, including the potential to engage private capital sources.
