RE: Verizon New Jersey, Docket No. TO12020155

Dear Board Members:

I would like to declare my support for the proposed stipulation between your Board Staff and Verizon as it relates to Opportunity New Jersey. The stipulation will help ensure continued deployment of advanced communications services. Access to these services will not only benefit New Jersey's businesses and nonprofits, but consumers of all ages as well. I'm sure you will agree that advanced communications technologies have revolutionized how all residents and businesses in the Garden State communicate and we must ensure that future innovations by this industry find a home here in New Jersey.

New Jersey has benefitted from the significant investments Verizon has made here to build a robust communications network. Our state is now the most wired broadband state in the country and continued investment in broadband technologies will be critical to New Jersey's ongoing economic competitiveness.

New Jersey is already behind the curve when it comes to job recovery -- still behind the national average. Verizon and its services are leaders in this form of communication. We must, you must ensure that New Jersey stays on top of high speed communication -- we depend on you to make the right decisions for our state --- vote to keep technologies in the forefront --do not create a negative swing by moving away from the excellent service we have and do receive from Verizon

Thank you for considering my views and for examining this issue so closely. I strongly urge you to approve the proposed stipulation without further delay.

Sincerely,  
Tom Smith

RE: Verizon New Jersey, Docket No. TO12020155

Dear Board Members:

I would like to declare my support for the proposed stipulation between your Board Staff and Verizon as it relates to Opportunity New Jersey. The stipulation will help ensure continued deployment of advanced communications services. Access to these services will not only benefit New Jersey's businesses and nonprofits, but consumers of all ages as well. I'm sure you will agree that advanced communications technologies have revolutionized how all residents and businesses in the Garden State communicate and we must ensure that future innovations by this industry find a home here in New Jersey.

New Jersey has benefitted from the significant investments Verizon has made here to build a robust communications network. Our state is now the most wired broadband state in the country and continued investment in broadband technologies will be critical to New Jersey's ongoing economic competitiveness.

To be objective:

I understand the proposal that Verizon is implementing for future expansion, but I also have to acknowledge that this "future" won't be cheap.

It appears as if the push for a Verizon monopoly will exist by asking for support - While benefiting consumers, but at what cost?

When FCC agreed to go "Digital" many lost complete touch with News because of it - those who can't afford to pay for service, live in the dark, creating a "privilege" of those who can [afford] to pay for this service, vs. those who can't.

I believe, to be fair, a model review of "future" impact should happen just so the end will justify the \$\$ means.

As long as total "cost" is taken into consideration, I'm fine, but you also don't state if those services will be "free" as to NJ Public Schools, etc.

If all of these factors WEREN'T considered, it may not be in the best interest of those poor, less fortunate people who may currently have free, or, a cheaper Internet Provider to be forced to Switch to Verizon because of an 'Exclusive' contract in their area, may pose more harm than good.

Q: How much of their Broadband service (in terms of service) is being subcontracted? If the investment in providing jobs becomes real - and those in the community will get to profit from those jobs created.

Lastly, Verizon already outsources their telephone operating service. They should also guarantee that U.S. Citizens are given preference in the "job growth" they ensure will happen.

Thank you for considering my views and for examining this issue so closely. I strongly urge you to approve the proposed stipulation without further delay.

Sincerely,  
Paula Thomas

RE: Verizon New Jersey, Docket No. TO12020155

Dear Board Members:

I would like to declare my support for the proposed stipulation between your Board Staff and Verizon as it relates to Opportunity New Jersey. The stipulation will help ensure continued deployment of advanced communications services. Access to these services will not only benefit New Jersey's businesses and nonprofits, but consumers of all ages as well. I'm sure you will agree that advanced communications technologies have revolutionized how all residents and businesses in the Garden State communicate and we must ensure that future innovations by this industry find a home here in New Jersey.

New Jersey has benefitted from the significant investments Verizon has made here to build a robust communications network. Our state is now the most wired broadband state in the country and continued investment in broadband technologies will be critical to New Jersey's ongoing economic competitiveness.

As a healthcare business owner and practitioner I support continued access to broadband technologies

Thank you for considering my views and for examining this issue so closely. I strongly urge you to approve the proposed stipulation without further delay.

Sincerely,  
Paul vessa

The stipulation will help ensure continued deployment of advanced communications services. Access to these services will not only benefit New Jersey's businesses and nonprofits, but consumers of all ages as well. I'm sure you will agree that advanced communications technologies have revolutionized how all residents and businesses in the Garden State communicate and we must ensure that future innovations by this industry find a home here in New Jersey.

New Jersey has benefitted from the significant investments Verizon has made here to build a robust communications network. Our state is now the most wired broadband state in the country and continued investment in broadband technologies will be critical to New Jersey's ongoing economic competitiveness.

Thank you for considering my views and for examining this issue so closely. I strongly urge you to approve the proposed stipulation without further delay.

Sincerely,  
Tom Scott

RE: Verizon New Jersey, Docket No. TO12020155

Dear Board Members:

I would like to declare my support for the proposed stipulation between your Board Staff and Verizon as it relates to Opportunity New Jersey. The stipulation will help ensure continued deployment of advanced communications services. Access to these services will not only benefit New Jersey's businesses and nonprofits, but consumers of all ages as well. I'm sure you will agree that advanced communications technologies have revolutionized how all residents and businesses in the Garden State communicate and we must ensure that future innovations by this industry find a home here in New Jersey.

New Jersey has benefitted from the significant investments Verizon has made here to build a robust communications network. Our state is now the most wired broadband state in the country and continued investment in broadband technologies will be critical to New Jersey's ongoing economic competitiveness.

I am 100% for this proposal.

Thank you for considering my views and for examining this issue so closely. I strongly urge you to approve the proposed stipulation without further delay.

Sincerely,  
Mercedes B. Goldfarb

New Jersey has benefitted from the significant investments Verizon has made here to build a robust communications network. Our state is now the most wired broadband state in the country and continued investment in broadband technologies will be critical to New Jersey's ongoing economic competitiveness.

When I first switched to Verizon, it was a very good, very fast product. After one year it began to slow down tremendously. It is right now no faster than comcast, and may even be slower. I called to complain that someone in my neighborhood is broadcasting a defaming statement about me. I asked that they triangulate the signal so I could contact the proper authorities. They refused. I also noticed a speed reduction after a neighbor starting working for comcast. I have seen him climb a telephone pole across my street several times. I do not know if he has done something to damage service or if he is responsible for the " broadcast" . I strongly suspect so because he is of that nature. So much for my feelings about Verizon. Ralph

Thank you for considering my views and for examining this issue so closely. I strongly urge you to approve the proposed stipulation without further delay.

RE: Verizon New Jersey, Docket No. TO12020155

Dear Board Members:

I would like to declare my support for the proposed stipulation between your Board Staff and Verizon as it relates to Opportunity New Jersey. The stipulation will help ensure continued deployment of advanced communications services. Access to these services will not only benefit New Jersey's businesses and nonprofits, but consumers of all ages as well. I'm sure you will agree that advanced communications technologies have revolutionized how all residents and businesses in the Garden State communicate and we must ensure that future innovations by this industry find a home here in New Jersey.

New Jersey has benefitted from the significant investments Verizon has made here to build a robust communications network. Our state is now the most wired broadband state in the country and continued investment in broadband technologies will be critical to New Jersey's ongoing economic competitiveness.

Thank you for considering my views and for examining this issue so closely. I strongly urge you to approve the proposed stipulation without further delay.

Sincerely,  
penny weaver

Our state is now the most wired broadband state in the country and continued investment in broadband technologies will be critical to New Jersey's ongoing economic competitiveness.

Hello,

My first job in 1958 was with NJ Bell Telephone Company as a switchboard operator in Mt. Arlington NJ. For those of you that are not 71 years old that was a time for pay phones with the money collected by the operator with the push of a button on the keyboard. Party lines were the norm with up to 4 people on the same line. That same NJ Bell eventually became Verizon in NJ. My family and I have been with this company through all the growths. We need to support Verizon's efforts to "lead the way" with NJ at the forefront of their technologies.

Thanks so much,  
Judith M Stoma

Thank you for considering my views and for examining this issue so closely. I strongly urge you to approve the proposed stipulation without further delay.

Sincerely,  
Judith Stoma

As much as I cannot in support of one service provider over another. To advance the availability of broadband service in NJ. I would urge the Board to keep the playing field as open as possible. If Verizon has chosen to make a large investment in its infrastructure I suggest that nothing be done to limit there doing this. As long as each player has the ability to expand there own infrastructure in the same manner. I am opposed to exclusive territories. I think that a system to share poles and lines among players by allowing them to charge back to defray cost is necessary. That Regulation should be aimed at controlling these charged so that they do not become excessive. To any one vender, yet allow all participates to be able to recover there investments over time.

Thank you for considering my views and for examining this issue so closely. I strongly urge you to approve the proposed stipulation without further delay.

Sincerely,  
bill messmer

I only wish something could be done about Comcast. They are the worst cable company ever and I live in an adult community and had Direct tv for 5 years but was told I had to get rid of it so it cost me more money and Comcast is the pits. Verizon will never be allowed to run internet cable in here. I support Verizon and hope you will do the same.

**To:** Secretary, Board  
**Subject:** "Verizon New Jersey, Docket No. TO12020155".

Dear BPU,

My family has been fighting for equal rights !

We live in a rural section of Hopewell Township, that's Cumberland County, not Northern N J.

All we would like is the ability to have the basics of family and business life through the use of cable TV, high speed internet and quality phone service.

In 2005 I sent a letter to BPU concerning the refusal of Comcast to offer us service, eight months later, they found the money to run the cable one half a mile! We are not a densely populated areas, we are what is left of agriculture in Cumberland County, clean green, and striving to continue my grandfathers dream of owning his property, not as a share cropper, and enjoying the fruits of his labors. Currently we are only able to receive a high speed internet from Comcast, so there is NO competition, and we gave up Verizon for phone service due to outdated copper lines that are poorly maintained and required service calls monthly if not quarterly. We would like the same services that others in more densely populated already have and the ability to choose and shop for the best service.

If you were to travel seven miles south, you would find that low income apartments in the City of Bridgeton are able to connect without any problems, this as far as I am able to see is reverse recrimination. Just because I live in a less dense area, and am currently unemployed due to the results of surgery, why can't I receive the same benefits?

I would ask that the Board of the BPU hold Verizon to their original plan of providing high speed service to us in the open spaces.

By the way, we are unable to get Fios or DSL!

Robert P. Mixner

RE: Verizon New Jersey, Docket No. TO12020155

Dear Board Members:

I would like to declare my support for the proposed stipulation between your Board Staff and Verizon as it relates to Opportunity New Jersey. The stipulation will help ensure continued deployment of advanced communications services. Access to these services will not only benefit New Jersey's businesses and nonprofits, but consumers of all ages as well. I'm sure you will agree that advanced communications technologies have revolutionized how all residents and businesses in the Garden State communicate and we must ensure that future innovations by this industry find a home here in New Jersey.

New Jersey has benefitted from the significant investments Verizon has made here to build a robust communications network. Our state is now the most wired broadband state in the country and continued investment in broadband technologies will be critical to New Jersey's ongoing economic competitiveness.

Thank you for considering my views and for examining this issue so closely. I strongly urge you to approve the proposed stipulation without further delay.

Sincerely,  
Margaret Swanson

New Jersey has benefitted from the significant investments Verizon has made here to build a robust communications network. Our state is now the most wired broadband state in the country and continued investment in broadband technologies will be critical to New Jersey's ongoing economic competitiveness.

Opportunity New Jersey would be a great program for NJ if the right provider is given the job. I have reservations with Verizon. Verizon was given a variance to install fiber optic cable in NJ to expand and improve their wireless network and compete with ComCast. Once they installed fiber optic cable in all of the local town municipal buildings as a requirement of the granting of the variance, Verizon stopped installing fiber optic cable entirely and the majority of towns in NJ are without it even though Verizon advertises how great FIOS is. I hope that if Verizon is given the task for Opportunity New Jersey that check and balances are built into their contract to see that they finish the job adequately and not terminate installation.

Thank you for considering my views and for examining this issue so closely. I strongly urge you to approve the proposed stipulation without further delay.

Sincerely,  
Joseph Sundra

RE: Verizon New Jersey, Docket No. TO12020155

Dear Board Members:

I would like to declare my support for the proposed stipulation between your Board Staff and Verizon as it relates to Opportunity New Jersey. The stipulation will help ensure continued deployment of advanced communications services. Access to these services will not only benefit New Jersey's businesses and nonprofits, but consumers of all ages as well. I'm sure you will agree that advanced communications technologies have revolutionized how all residents and businesses in the Garden State communicate and we must ensure that future innovations by this industry find a home here in New Jersey.

New Jersey has benefitted from the significant investments Verizon has made here to build a robust communications network. Our state is now the most wired broadband state in the country and continued investment in broadband technologies will be critical to New Jersey's ongoing economic competitiveness.

John Russo

Thank you for considering my views and for examining this issue so closely. I strongly urge you to approve the proposed stipulation without further delay.

Sincerely,  
John Russo

Dear Ms. Kristi Izzo, Secretary:

New Jersey Board of Public Utilities  
C/O Ms. Kristi Izzo, Secretary  
44 South Clinton Avenue, 9th Floor  
Post Office Box 350  
Trenton, N.J. 08625-0350

To the Members of the New Jersey Board of Public Utilities:

As a New Jersey resident and Verizon employee, I am expressing my support for the proposed stipulation between BPU Staff and Verizon. The proposed stipulation is fair and balanced and, under your guidance, will build on the success that the Board and Verizon have achieved in making the Garden State one of the most wired broadband states in the country.

Access to advanced communications technologies is no longer a luxury; it's a necessity. Thanks to Verizon, New Jersey consumers and businesses can harness the power of these technologies like never before. By leveraging new and innovative technologies like 4G LTE and fiber, Verizon has helped put the power of the Internet into more consumers' hands across the state and fulfilled its Opportunity New Jersey obligations. The future holds even more promise.

Few companies have made the kind of critical infrastructure investments in New Jersey that Verizon has made and you can count on Verizon to continue working with communities across the State to deliver the benefits of broadband services through this program.

Please approve the proposed stipulation without further delay. Thank you for taking the time to consider my view and for all you do for the people of New Jersey.

Sincerely,

Beverly Buonomo

**To:** Secretary, Board  
**Subject:** No Internet Service in Parts of Hopewell Township

Dear BPU Board Members,

This email is being sent in opposition of the stipulation in Agreement 12020155 which allows Verizon to stop running Fios to areas which currently have 4G coverage. I am a resident of Hopewell Township, the only internet access available to me is through Verizon Wireless. This type of internet connection can not be compared to a "hard wired" type like Fios or a Comcast. Wireless internet service is charged by the Giga Byte. Where as Fios or Comcast is unlimited usage. This means we are limited with the things we can do. We can only use so much internet or we are charged ridiculous overage fees. Streaming videos, movies, music, online gaming are all out of the question. Service is not the best either. My daughter was online just last week doing homework, lost the signal and ended up having to call a friend to finish her assignment. Please have Fios available to all residents of Hopewell Township! If not them, try to find a company that will. It's 2014, everyone should have internet access.

Thank You,  
Joe Cook

Back in the earlier days when Verizon was battling with Comcast for rights in NJ, Verizon said that they would bring fiber optic to NJ. But the politicians in Trenton said they had to bring it to the county seats of each county first. It is always the consumer that gets ripped off, The bpu authority should take a stand against Verizon and make them honor their commitment to NJ and install fios to everyone They are forcing channel on us that we don't want but have to take. Make them live up to the original agreement.

Thank You

**Sent:** Saturday, March 22, 2014 10:25 AM  
**To:** Secretary, Board  
**Subject:** Verizon New Jersey, Docket No.TO12020155

To Whom it May Concern,

I am writing in regards to the agreement Verizon made with the state Of New Jersey to have the state wired in by 2010.

I live in the township of Hopewell, Bridgeton, NJ. Currently the wiring for FIOS runs directly in front of my home. I have called Verizon repeatedly to have my residence hooked up to FIOS and they have refused. All surrounding areas including the road I live on has this service. I believe the Board of Public Utilities should hold Verizon to the original contract so that all of New Jersey will be included in up to date broadband services.

It is unfair to limit our businesses by not giving them the option to have better service through FIOS.

Thank you,  
Denise Thompson

**Sent:** Saturday, March 22, 2014 10:19 AM  
**To:** Secretary, Board  
**Subject:** Verizon New Jersey, Docket No. TO12020155

Board Members,

I am very opposed to drawing back on Verizon's commitment to supply High speed Internet to Hopewell Twp. I have called them numerous times to get FIOS connected to my home/business. They keep saying that FIOS is not available in my area, but the FIOS lines that supply Greenwich TWP run past my house. I found a home down the street from me that had FIOS connected, and called them again. I stopped a Verizon Service truck, and talked to the rep, who verified that FIOS lines run right past my house, The rep said all they would have to do, would be to schedule a bucket truck to install a junction, and then he would be scheduled to hook up the house, so he would see about getting it hooked up with his boss. A week later I called his boss, and he stated that since we were Hopewell they could not or would not connect us, and it would have to be authorized by "the engineers"

Secondly,  
Do not let them lead you Board Members into believing the falsity of wireless internet is a viable option. among the many downsides already stated in the paper, the most glaring problem is, with satellite internet, we are limited on our download data, for example, My household/small business is limited to 15Gb/ month! which is a little more than most cell phone plans!  
If you exceed the limit, you are then given dial up speeds for the rest of the month.  
This is then not satisfactory, as I use email to bill customers, download service and installation manuals.

So please, make them Hook Up Hopewell

Thank You  
Jim Thompson

**From:** Will Martin <[wmartin@martindyeing.com](mailto:wmartin@martindyeing.com)>  
**Sent:** Saturday, March 22, 2014 10:16 AM  
**To:** Secretary, Board  
**Subject:** Verizon New Jersey, Docket No. TO12020155

To whom it may concern regarding "**Verizon New Jersey, Docket No. TO12020155**".

I live in Hopewell township in Cumberland county, NJ. Our property is about 180 acres of which about 80 acres is devoted to for profit commercial farming.

Our property is not served by high speed communications to include telephone or cable. Verizon has copper wiring that barely functions for telephone and will not allow present internet service because the service is so poor internet connections time out. We are also at the limit of Verizon cellular service which is only about 50% reliable in certain locations in or around my house. Any use of the internet for business or research must be conducted at our other business in the city of Bridgeton. We are unable to install any advanced security system to real time monitor our property for the necessary security of our equipment and land.

Both Verizon and Comcast (cable) have no interest in providing adequate service to me or my neighbors and dismiss customer's requests. I am not necessarily against wireless access, but based on the attitude of both Verizon and Comcast who are the approved franchises, I do not believe that the wireless systems would provide the functionality necessary for dependable and efficient communications.

Please review the present situation that exists in less densely populated areas that allow this disparity between neighborhoods to exist. Thank you,

Will Martin

I am writing to see about getting verizon fios at my house. It is only about 1 mile from my home but they wont run it to my house. For 20 years i have been trying to get internet service at my home. My address is 632 Roadstown Rd Bridgeton NJ 08302 in Hopewell Township Cumberland County. My phone number is 609-774-0277. Thank you. Michael Smith

I am writing this to voice my concerns regarding this settlement. Verizon, then Bell Telephone Company, proposed running fiber optic cable to every household in New Jersey. They have failed to do so. They have been given \$15,000,000,000 dollars by the taxpayers of New Jersey to do this. I urge the board to not pass this settlement. Hold Verizon to their agreement to provide fibre optic service to every household in New Jersey. It will be better for the voters and the economy of the state.

I live in Pilesgrove Township less than 2 miles from Woodstown Borough Salem County which has city water, sewage, and high internet. I am forced to pay over \$100 a month for satellite internet that stinks to say the least. I have 4 kids that need the internet for school and home work. By the time they do their homework there is no internet left because we have reached our data cap placed on use by the satellite internet provider. I have used DSL which places the same data caps on your internet and charges high fees for overages. I attempted to have Comcast run to my residence and they advised I was able to get it there for a fee of \$18,000 for them to run the line less the one mile to my residences. As a public employee I do not have the means to pay \$18,000 for internet. I think the state needs to push Verizon to run Fios through out the state. Because I live less than 2 miles from a populated area I should not be forced to pay \$18,000 for high speed internet.

thanks you

Just wanted to let you know Verizon is not available in Pennsville Township NJ. I have COMCAST the mega giant company that is taking over the world. I'm forced to pay them 72 dollar a month for internet only because they are the only option out here. It has always bothered me that Verizon will not run fiber optic to our town but now knowing they made a promise and collected funds to do so is, in my opinion, a crime. They should put up the lines or pay back all the money to the townships that do not have their service so folks can improve the technology at the school. Maybe establish some high speed wireless for the school area so at least their students can use it during class and breaks. WE are being inundated with FIOS email, tv ads, mail you name it. Many of these towns are considered opportunity zones why can our elected officials and Verizon create a way to make this happen. Believe it or not high speed wireless is like tv back in the day when I was young only now with the proper re is so much more our children can gain from it. My granddaughter is amazing at some of the thing she can do on my wifes kindle and she is only 21 months old. These are the kids that will be in your shoes one day. She is fortunate enough that we can afford (barely) COMCAST THE EVIL GIANT. But what about the millions of kids that don't have it. Forcing Verizon to make good on a promise will force to Comcast to provide reasonable rates. I do not have Comcast as a cable provider because satellite 100 dollars and I get more for the money. Thanks for listening.

I am a Hopewell Township, Cumberland County, NJ resident and I want to comment on Verizon's backing down on their pledge to provide all of New Jersey with FIOS. I have complained numerous times to the Board of Public Utilities and to Verizon about the lack of phone service and internet service where I live. I was promised by Verizon employees on at least four occasions that ALL of New Jersey was to receive FIOS. First it was 2007, then 2008, 2009 and finally 2010. So far nothing! My problem with this is that Verizon is a PUBLIC utility who is not serving the public while its CEO received MILLIONS of dollars in bonuses. How can the Board of Public Utilities allow this to continue to happen? My neighbors who live in Greenwich and Stow Creek Townships are getting FIOS yet while I live even closer to more urban Bridgeton I don't have it. There are many things I cannot do because of the lack of proper internet service. Also I am forced to use a cell phone and my calls are frequently dropped. I have worse telephone service now than I did in the 1950's! This situation is unacceptable! Make Verizon keep to their pledge even when it isn't "convenient" for them or stop giving their CEO a bonus for unacceptable service to the customers.

Sincerely,

Sharon D. Hetzell

**From:** Sandie Pokalo <sandie926@comcast.net>  
**Sent:** Saturday, March 22, 2014 7:43 AM  
**To:** Secretary, Board  
**Subject:** Verizon New Jersey, Docket No. TO12020155

Good Morning. I am currently a customer of Comcast which I switched to from Verizon so I would have access to high-speed broadband service. I have been waiting patiently for many years until I could once again return as a Verizon customer and connect to FiOS since I much prefer the way Verizon does business. Now it has come to my attention that Verizon is renegeing on their commitment to service Hopewell Township, Cumberland County, where I reside. This is not only disappointing, but it is infuriating.

I urge Verizon to reconsider and stand behind their commitment to provide myself and my neighbors who reside in Hopewell Township with the superior FiOS service that we have been anticipating for years.

Thank you for your consideration.

Sandra M. Pokalo  
Hopewell Township, Cumberland County

**Sent:** Saturday, March 22, 2014 1:38 AM  
**To:** Secretary, Board  
**Subject:** Verizon New Jersey, Docket No. TO12020155

Dear Ms. Kristi Izzo, Secretary:

New Jersey Board of Public Utilities  
C/O Ms. Kristi Izzo, Secretary  
44 South Clinton Avenue, 9th Floor  
Post Office Box 350  
Trenton, N.J. 08625-0350

To the Members of the New Jersey Board of Public Utilities:

As a New Jersey resident and Verizon employee, I am expressing my support for the proposed stipulation between BPU Staff and Verizon. The proposed stipulation is fair and balanced and, under your guidance, will build on the success that the Board and Verizon have achieved in making the Garden State one of the most wired broadband states in the country.

Access to advanced communications technologies is no longer a luxury; it's a necessity. Thanks to Verizon, New Jersey consumers and businesses can harness the power of these technologies like never before. By leveraging new and innovative technologies like 4G LTE and fiber, Verizon has helped put the power of the Internet into more consumers' hands across the state and fulfilled its Opportunity New Jersey obligations. The future holds even more promise.

Few companies have made the kind of critical infrastructure investments in New Jersey that Verizon has made and you can count on Verizon to continue working with communities across the State to deliver the benefits of broadband services through this program.

Please approve the proposed stipulation without further delay. Thank you for taking the time to consider my view and for all you do for the people of New Jersey.

Sincerely,

Curtis Howe  
644 Rutherford Ave  
Trenton, NJ 08618-4456

New Jersey Board of Public Utilities  
44 South Clinton Avenue, 9th Floor  
Post Office Box 350  
Trenton, N.J. 08625-0350

RE: Verizon New Jersey, Docket No. TO12020155

Dear Board Members:

I would like to declare my support for the proposed stipulation between your Board Staff and Verizon as it relates to Opportunity New Jersey. The stipulation will help ensure continued deployment of advanced communications services. Access to these services will not only benefit New Jersey's businesses and nonprofits, but consumers of all ages as well. I'm sure you will agree that advanced communications technologies have revolutionized how all residents and businesses in the Garden State communicate and we must ensure that future innovations by this industry find a home here in New Jersey.

New Jersey has benefitted from the significant investments Verizon has made here to build a robust communications network. Our state is now the most wired broadband state in the country and continued investment in broadband technologies will be critical to New Jersey's ongoing economic competitiveness.

Please support opportunity NJ

Thank you for considering my views and for examining this issue so closely. I strongly urge you to approve the proposed stipulation without further delay.

Sincerely,  
Richard C. Fulton
