RE: Verizon New Jersey, Docket No. TO12020155

Dear Board Members:

I would like to declare my support for the proposed stipulation between your Board Staff and Verizon as it relates to Opportunity New Jersey. The stipulation will help ensure continued deployment of advanced communications services. Access to these services will not only benefit New Jersey's businesses and nonprofits, but consumers of all ages as well. I'm sure you will agree that advanced communications technologies have revolutionized how all residents and businesses in the Garden State communicate and we must ensure that future innovations by this industry find a home here in New Jersey.

New Jersey has benefitted from the significant investments Verizon has made here to build a robust communications network. Our state is now the most wired broadband state in the country and continued investment in broadband technologies will be critical to New Jersey's ongoing economic competitiveness.

Thank you for considering my views and for examining this issue so closely. I strongly urge you to approve the proposed stipulation without further delay.

Sincerely,
Patrick Robinson

To: Secretary, Board
Subject: Oppose stipulation of agreement 12020155

To whom it May Concern:

I oppose the stipulation of agreement #12020155. I live in a remote part of Salem County. I have been hoping and waiting for FIOS to become available in my area. Currently, the only cable/phone/internet provider is Comcast. Their service is horrible! The cable TV service frequently stops working and we also lose telephone service every time it rains. Their service technicians have been here numerous time and cant seem to find anything wrong. We need reliable broadband Internet and we need reliable telephone service. Satellite Internet is too expensive and cellular service is not always reliable in my home. In addition, I have an alarm system which depends on a working telephone land line. Verizon needs to uphold their end of the agreement and run FIOS throughout the entire state! PLEASE vote to force Verizon to follow through with their agreement.

Thank you.

To the secretary of the Board of Public Utilities,

I'm writing to request that Verizon be held to their agreement to provide high speed internet access to the residents of New Jersey. In this case, the residents of Hopewell Township. The area will never be able to develop if it can't keep up with the neighboring townships. There are already lines installed through Hopewell that are used to service Greenwich, and we shouldn't be refused hookup to those lines simply because we live on the wrong side of a township line.

Arthur.

To whom it may concern,

I am writing to express my desire that the Board of Public Utilities does not allow Verizon to rescind it's agreement to provide high speed internet to all the residents of New Jersey, and in this specific instance, Hopewell Township. I believe it is unfair that the data cables have been run through Hopewell to serve neighboring townships, but we are unable to utilize the service. Particularly for the people whose property the cables have already been run across, and their neighbors on the other side of the township line can access it.

RE: Docket No. TO12020155

Dear Board of Public Utilities Members:

I am writing to express my support for the proposed stipulation between Verizon and Board staff because I believe continued access to broadband technologies is critical to the learning environment.

Broadband technologies have truly enhanced the learning experience for students across the state. Through my work managing Verizon's relationship with Access New Jersey, I saw firsthand how greater connectivity unites the education field and how online educational tools benefit students, teachers and parents alike.

Access New Jersey had a tremendous partner in Verizon and I take pride in the work we did for this wonderful organization. Verizon's commitment to Access New Jersey – both financial and technological – was significant and helped the organization meet its goals to enhance learning opportunities for local students. Because of Verizon, Access New Jersey was able to take advantage of an incredibly diverse range of educational opportunities that made learning richer and more rewarding. And, Verizon's technology connected students of all ages with literature, the arts, libraries of the world and each other with just a simple click of a button.

I firmly believe New Jersey has no better corporate partner than Verizon and is why I support the proposed stipulation. Even though I am no longer employed by the company, I truly believe that Verizon is still best equipped to provide New Jersey's academic community with the advanced communications tools they need to take advantage of emerging learning opportunities.

Thank you for taking the time to consider my view of this matter. Please do not hesitate to contact me if you would like to discuss this matter further.

Sincerely,

Eve Langer
Former Verizon Program Manager for Access New Jersey

I would like to declare my support for the proposed stipulation between your Board Staff and Verizon as it relates to Opportunity New Jersey. The stipulation will help ensure continued deployment of advanced communications services. Access to these services will not only benefit New Jersey's businesses and nonprofits, but consumers of all ages as well. I'm sure you will agree that advanced communications technologies have revolutionized how all residents and businesses in the Garden State communicate and we must ensure that future innovations by this industry find a home here in New Jersey.

New Jersey has benefitted from the significant investments Verizon has made here to build a robust communications network. Our state is now the most wired broadband state in the country and continued investment in broadband technologies will be critical to New Jersey's ongoing economic competitiveness.

Thank you for considering my views and for examining this issue so closely. I strongly urge you to approve the proposed stipulation without further delay.

Sincerely,
Margaret Yu

Subject: Fwd: Fiber optic network expansion, public comment

| board.secretary@bpu.state.nj.us

We the little people need the BPU and other inforcement agency's to insist or force Verizon to complete their side of this agreement, They appear to already have approved funding and are collecting. We are being RAPED one more time. Please put some teeth behind this agreement.

Thanks for your consideration,

NOTICE1

IN THE MATTER OF VERIZON NEW JERSEY, INC.'S ALLEGED FAILURE TO COMPLY WITH

OPPORTUNITY NEW JERSEY COMMITMENTS

Docket No. TO12020155

Notice of Opportunity to For Public Comment

On January 29, 2014, the Board of Public Utilities ("Board") directed Board Staff to seek comment on a

proposed Stipulation of Agreement between Board Staff and Verizon New Jersey relating to its

Alternative Plan For Regulation ("PAR-2") and Verizon's compliance with Opportunity New Jersey

("ONJ") by, among other things, implementing a new broadband request process known as a bonafide

retail request or "BFRR".

Parties wishing to be heard on the proposed stipulation, Opportunity New Jersey or the settlement of

this case should submit comments to board.secretary@bpu.state.nj.us no later than March 24, 2014 at

5:00 PM and include "Verizon New Jersey, Docket No. TO12020155" in the subject line of the email.

After reviewing comments, it will be determined whether to take additional action relating to this matter.

Hard copies or any comments should also be sent to:

DOCKET NO. TO12020155

STIPULATION OF SETTLEMENT

WHEREAS, the signatories to this Stipulation are Verizon New Jersey Inc. ("Verizon NJ"), 540 Broad Street, Newark, New Jersey and the Staff of the New Jersey Board of Public

Utilities ("Board Staff"), 44 South Clinton Avenue, Trenton, New Jersey. Said signatories have

agreed to settle the above-referenced matter subject to the stipulations, terms, and conditions

specified herein.

WHEREAS, Verizon NJ is a local exchange carrier ("LEC") that provides local telephone and associated services in its service territory in New Jersey through a telecommunications network that it owns and operates.

WHEREAS, the Board, pursuant to N.J.S.A. 48:2-13 and N.J.S.A. 48:2-1 et seq., has been granted certain regulatory authority and jurisdiction over public utilities.

WHEREAS, pursuant to N.J.S.A. 48:2-21.16, the Board has the authority to approve

alternative forms of regulation that address changes in technology and the structure of the telecommunications industry.

WHEREAS, on May 6, 1993, in Docket No. T092030358, the Board issued an order approving a plan of alternative regulation ("PAR-1") for Verizon NJ's predecessor New Jersey

Bell Telephone Company. PAR-1 included a plan for accelerated deployment of advanced

2

switching and transmission technologies for its network known as Opportunity New Jersey

("ONJ"). The service capability and technology deployments outlined in ONJ were based upon

assumptions regarding technology, markets and economic conditions over an extended period of time.

WHEREAS, PAR-1 required Verizon NJ to fully deploy broadband service in its service territory by the end of 2010 and provided for the monitoring of Verizon NJ's progress regarding such deployment.

WHEREAS, since the adoption of PAR-1, the Board has reviewed implementation of ONJ, particularly (1) the status of ONJ and relevant deployment strategies; (2) the business as

usual benchmarks established to gauge ONJ's progress to date, and (3) the economic development impacts that ONJ has had on the State. See, e.g., In the Matter of the Board's

Inquiry into Bell Atlantic-New Jersey, Inc.'s Progress and Compliance with Opportunity New

Jersey, Its Network Modernization Program, Docket No. TX96100707, Order, October 18, 1996.

WHEREAS, by Order dated August 19, 2003, in Docket No. T001020095, the Board approved a second plan for alternative regulation ("PAR-2") that replaced PAR-1, but left in

place the requirements of ONJ established under PAR-1.

WHEREAS, on March 12, 2012, the Board served on Verizon NJ an Order to Show Cause directing Verizon NJ to show cause why the Board should not find that it failed to comply

with the PAR Orders in providing full broadband capability in its service territory by 2010; and

to file an answer to the Order to Show Cause.

WHEREAS, on April 12, 2012, Verizon NJ filed an answer responding to the Order to Show Cause ("Answer"). In its Answer, Verizon NJ asserted that it satisfied its ONJ

3

commitments, including full deployment of broadband service within its service territory, and

requested that the Board dismiss the Order to Show Cause.

WHEREAS, as a resolution to the Board's investigation regarding Verizon NJ's compliance with ONJ, the signatories agree that the requirements embodied in this Stipulation

resolve the dispute between the signatories in a reasonable manner and THEREFORE agree as

follows;

1. Implementation of Broadband Request Process: For single-line business or residential

consumers ("consumers") residing in Verizon NJ's authorized service territory who do not have access to Broadband service (as defined below), Verizon NJ will,

commencing

thirty (30) days after the issuance and service of a Board Order approving this Stipulation and concluding the earlier of the Board's approval of a new plan of alternative regulation or December 31, 2017, make Broadband service available to such consumers pursuant to the terms of the bonafide retail request ("BFRR") requirements described below.

Under

the BFRR process, Verizon NJ shall make Broadband service available to:

a. a minimum of thirty-five (35) single-line business or residential consumers (in any combination) located in a Census Tract (as defined by the United States Census Bureau on the date of this Stipulation's execution) in Verizon NJ's authorized service territory who:

i. have no access to Broadband from cable service providers (including single-line business or residential consumers located outside of cable providers' Primary Service Area (defined in the applicable cable providers' Franchise Order issued by the Board));

ii. have no access to 4G-based wireless service; and

4

iii. each sign a contract agreeing to at least one (1) year of service and pay a \$100 deposit to be credited towards their service ("BFRR consumer").

b. Within nine (9) months of the receipt of a completed BFRR that meets the criteria referred to in 1(a)(i)-(iii) above ("BFRR consumer"), Verizon NJ must either itself or by contracting with another provider (including wireless, cable, or satellite provider¹), arrange to have Broadband service provided to such BFRR consumer's home or business. The nine (9) month time period for completing broadband installation may be extended by up to six (6) months upon notice by Verizon NJ to the Board and to the BFRR consumer, for delays beyond Verizon NJ's reasonable control, including situations involving equipment or property acquisition, rights-of-way, permitting, or if the total number of BFRR deployments exceeds twenty (20) in a calendar year.

c. For the purposes of this Stipulation, Broadband is defined as delivering, through the use of any technology medium (including 4G-based wireless, fiber, copper, or cable), data transmission service at speeds no less than the minimum speed of Verizon NJ's Digital Subscriber Line Services ("DSL") that is provided by Verizon NJ as of today's date.

d. Consumers who request Broadband service and meet the criteria set forth in paragraph 1(a) above, shall be advised by Verizon NJ that the BFRR process is available and provided with details of the program. Consumers who believe that Broadband service is improperly being denied to them under the BFRR process ¹The satellite technology referred to herein shall be technology that is superior to broadband satellite technology commonly deployed in the past. For example, a certain industry-leading satellite provider has announced plans to launch new satellite-based broadband services at speeds of between five and 10 megabits per second, far in excess of the arrangements previously available.

5

should also be advised by Verizon NJ that they can contact the Board to contest the denial.

e. Within thirty days after the issuance and service of a Board order approving this Stipulation, Verizon NJ shall post detailed information concerning the BFRR program on its web site. Within ninety days after the issuance and service of a Board order approving this Stipulation, Verizon NJ will include an insert into its paper bills providing notice to its customers of the BFRR program. Verizon NJ shall provide semi-annual reports to the Board detailing the number of BFRR requests received by Census Tract. The reports should identify: (1) every BFRR

request received; (2) the action taken in response to each request; (3) all applicants who are denied Broadband service under the BFRR process, and (4) the reason for the denial. The Board Staff may, upon reasonable notice to Verizon NJ, request that Verizon NJ provide supplemental reports updating the most recent semi-annual report.

2. Public Entities: Public schools, municipal police and fire stations, emergency services, rescue squads and/or paramedics shall not be subject to the BFRR process described in section 1 above. With regard to any such public school, municipal police, fire station, emergency service, rescue squad and/or paramedic in Verizon NJ's authorized service territory that does not have access to Broadband from a cable service provider or access

to 4G-based wireless service, Verizon NJ shall: (i) establish a single point of contact to handle inquiries about Broadband service options and (ii) shall make Broadband service

available on terms, conditions and rates mutually agreeable to the parties. Within nine (9) months of the execution of this Stipulation resolving this investigation, Verizon NJ 6

shall provide written notice to the public elementary schools in Hopewell and Upper Pittsgrove in Cumberland County, of their option to order Broadband service through what is known as the "Pittsgrove Consortium."2

3. Access to BFRR: For residential consumers of Hopewell and Upper Pittsgrove who do

not have access to Broadband and meet the BFRR process requirements set forth in Section 1(a) above, Verizon NJ shall complete all BFRR requests no later than nine (9) months of Verizon NJ's receipt of a qualified request. The six (6) month extension referred to in Section 1(b) above, shall not apply to BFRR applications submitted by Hopewell and Upper Pittsgrove residential consumers.

4. Order to Show Cause: Upon the Board's adoption of this Stipulation and service upon

the signatories, Verizon NJ will implement the BFRR process detailed above to any qualified consumers who request Broadband service within Verizon NJ's service territory. Further upon the Board's adoption of this Stipulation and service upon the signatories, this Order to Show Cause will be closed and Verizon NJ's ONJ requirements

will be enforced through Verizon NJ's compliance with the BFRR process and the requirements of this Stipulation. If Verizon NJ fails to comply with the terms of this Stipulation, the Board may take action to enforce such terms as the Board deems appropriate.

5. Effective upon Approval. The signatories agree that this Stipulation was negotiated and

agreed to in its entirety with each section being mutually dependent on approval of all other sections. If the Board modifies or rejects any of the terms of this Stipulation, each

signatory will have the option, before implementation of any different terms, to accept,

2 The Pittsgrove Consortium allows for a group e-rate application that allows discounts to be passed on to each member district, and allows for shared expenses among members.

7 change, or to resume the proceeding as if no agreement had been reached. If this proceeding is resumed, each signatory is given the right to return to the position it was in before this Stipulation was executed.

6. Drafting of Stipulation. The entire Stipulation has been reviewed by and is acceptable to

the signatories and their counsel as to form, content and meaning. The Stipulation was drafted jointly by the signatories and shall not be construed against any signatory based on its preparation.

7. **Enforceability.** In the event of default or breach of any term and/or condition of this Stipulation, the harmed signatory shall be entitled to rely upon this Stipulation or any other recourse available by law, to enforce the terms and conditions of this Stipulation.

8. **Counterparts.** This Stipulation may be executed in multiple counterparts, each of which shall be an original and all of which shall constitute one agreement.

9. **Authority to Bind.** The signatories hereby agree to be bound to this Stipulation, and they acknowledge that they are authorized on behalf of their respective clients to execute this Stipulation and to bind their respective clients by their signatures below.

10. **Governing Law.** This Stipulation shall be governed by the applicable law of New Jersey without regard to choice of law rules.

8
WHEREFORE, the parties hereto do respectfully submit this Stipulation and request that the Board issue a Decision and Order approving it in its entirety, in accordance with the terms hereof, as soon as reasonably possible.

RE: Verizon New Jersey, Docket No. TO12020155

Dear Board Members:

I would like to declare my support for the proposed stipulation between your Board Staff and Verizon as it relates to Opportunity New Jersey. The stipulation will help ensure continued deployment of advanced communications services. Access to these services will not only benefit New Jersey's businesses and nonprofits, but consumers of all ages as well. I'm sure you will agree that advanced communications technologies have revolutionized how all residents and businesses in the Garden State communicate and we must ensure that future innovations by this industry find a home here in New Jersey.

New Jersey has benefitted from the significant investments Verizon has made here to build a robust communications network. Our state is now the most wired broadband state in the country and continued investment in broadband technologies will be critical to New Jersey's ongoing economic competitiveness.

We need fios in this area.

Thank you for considering my views and for examining this issue so closely. I strongly urge you to approve the proposed stipulation without further delay.

Sincerely,
Arnold Jaffe

RE: Verizon New Jersey, Docket No. TO12020155

Dear Board Members:

I would like to declare my support for the proposed stipulation between your Board Staff and Verizon as it relates to Opportunity New Jersey. The stipulation will help ensure continued deployment of advanced communications services. Access to these services will not only benefit New Jersey's businesses and nonprofits, but consumers of all ages as well. I'm sure you will agree that advanced communications technologies have revolutionized how all residents and businesses in the Garden State communicate and we must ensure that future innovations by this industry find a home here in New Jersey.

New Jersey has benefitted from the significant investments Verizon has made here to build a robust communications network. Our state is now the most wired broadband state in the country and continued investment in broadband technologies will be critical to New Jersey's ongoing economic competitiveness.

Thank you for considering my views and for examining this issue so closely. I strongly urge you to approve the proposed stipulation without further delay.

Sincerely,
arthur keys

Our state is now the most wired broadband state in the country and continued investment in broadband technologies will be critical to New Jersey's ongoing economic competitiveness.

Not only will the consumer benefit from this, but the libraries and schools across our state will also reap many benefits.

As a retired staff member of the Newark Public Library I can attest to the impact computers have had on our students, young and old. The library has partnered with Verizon and is now in the process of expanding bandwidth throughout its system.

Thank you for considering my views and for examining this issue so closely. I strongly urge you to approve the proposed stipulation without further delay.

Sincerely,
Dolores DiLeo

RE: Verizon New Jersey, Docket No. TO12020155

Dear Board Members:

I would like to declare my support for the proposed stipulation between your Board Staff and Verizon as it relates to Opportunity New Jersey. The stipulation will help ensure continued deployment of advanced communications services. Access to these services will not only benefit New Jersey's businesses and nonprofits, but consumers of all ages as well. I'm sure you will agree that advanced communications technologies have revolutionized how all residents and businesses in the Garden State communicate and we must ensure that future innovations by this industry find a home here in New Jersey.

New Jersey has benefitted from the significant investments Verizon has made here to build a robust communications network. Our state is now the most wired broadband state in the country and continued investment in broadband technologies will be critical to New Jersey's ongoing economic competitiveness.

Over the period in which Verizon has shepherded developments in improving, expanding and upgrading broadband development now after They have proved that project of value others are seeking to jump in. Approve thye proposed stipulation benefit from the experience \and dedication of Verizon I receive no benefit of any kind from Verizon's businesses..

Peter Durkin

Thank you for considering my views and for examining this issue so closely. I strongly urge you to approve the proposed stipulation without further delay.

Sincerely,
Peter Durkin

New Jersey has benefitted from the significant investments Verizon has made here to build a robust communications network. Our state is now the most wired broadband state in the country and continued investment in broadband technologies will be critical to New Jersey's ongoing economic competitiveness.

This form letter is entirely incorrect. I was involved deeply in the telecom business when Bell Atlantic made the Opportunity New Jersey deal. It was simple: Bell Atlantic will get substantially less regulation and consumers would get higher telephone bills in return for Bell Atlantic building symmetrical 45 megabit/sec service to EVERY customer. The internet didn't exist at the time and was not part of the deal. Verizon's compliance with the deal -- they already have the money -- would indeed make New Jersey a world leader. They should honor the deal or refund the money taken from ratepayers to fund the unbuilt network.

Thank you for considering my views and for examining this issue so closely. I strongly urge you to approve the proposed stipulation without further delay.

Sincerely,
Robert Atkinson

I would like to declare my support for the proposed stipulation between your Board Staff and Verizon as it relates to Opportunity New Jersey. The stipulation will help ensure continued deployment of advanced communications services. Access to these services will not only benefit New Jersey's businesses and nonprofits, but consumers of all ages as well. I'm sure you will agree that advanced communications technologies have revolutionized how all residents and businesses in the Garden State communicate and we must ensure that future innovations by this industry find a home here in New Jersey.

New Jersey has benefitted from the significant investments Verizon has made here to build a robust communications network. Our state is now the most wired broadband state in the country and continued investment in broadband technologies will be critical to New Jersey's ongoing economic competitiveness.

Thank you for considering my views and for examining this issue so closely. I strongly urge you to approve the proposed stipulation without further delay.

Sincerely,
John Davis

Dear Ms. Kristi Izzo, Secretary:

New Jersey Board of Public Utilities
C/O Ms. Kristi Izzo, Secretary
44 South Clinton Avenue, 9th Floor
Post Office Box 350
Trenton, N.J. 08625-0350

To the Members of the New Jersey Board of Public Utilities:

As a New Jersey resident and Verizon employee, I am expressing my support for the proposed stipulation between BPU Staff and Verizon. The proposed stipulation is fair and balanced and, under your guidance, will build on the success that the Board and Verizon have achieved in making the Garden State one of the most wired broadband states in the country.

Access to advanced communications technologies is no longer a luxury; it's a necessity. Thanks to Verizon, New Jersey consumers and businesses can harness the power of these technologies like never before. By leveraging new and innovative technologies like 4G LTE and fiber, Verizon has helped put the power of the Internet into more consumers' hands across the state and fulfilled its Opportunity New Jersey obligations. The future holds even more promise.

Few companies have made the kind of critical infrastructure investments in New Jersey that Verizon has made and you can count on Verizon to continue working with communities across the State to deliver the benefits of broadband services through this program.

Please approve the proposed stipulation without further delay. Thank you for taking the time to consider my view and for all you do for the people of New Jersey.

Sincerely,

Jerry Risi

Just a reminder to you folks in Trenton that NJ does not stop there. We here in REAL SOUTH JERSEY tremendously appreciate what Verizon OFFERED and what we took advantage of. We tried to get services from the very companies who are trying to oppose this and WE WERE TURNED DOWN. For years we were turned down. Verizon stepped up and gave MY community the services we needed and now someone wants to call 'fowl'. Are you kidding me? Verizon deserves this. They worked very hard for us and with us! I would suggest that if you need any further clarification on this you contact the folks in my community. Thank you for considering my communication.

I would like to declare my support for the proposed stipulation between your Board Staff and Verizon as it relates to Opportunity New Jersey. The stipulation will help ensure continued deployment of advanced communications services. Access to these services will not only benefit New Jersey's businesses and nonprofits, but consumers of all ages as well. I'm sure you will agree that advanced communications technologies have revolutionized how all residents and businesses in the Garden State communicate and we must ensure that future innovations by this industry find a home here in New Jersey.

New Jersey has benefitted from the significant investments Verizon has made here to build a robust communications network. Our state is now the most wired broadband state in the country and continued investment in broadband technologies will be critical to New Jersey's ongoing economic competitiveness.

Thank you for considering my views and for examining this issue so closely. I strongly urge you to approve the proposed stipulation without further delay.

Sincerely,
Luis Bueno

Please approve this legislature! It is vital to maintaining the position of be in in the for front of digital media. Competition must be fostered to keep rates down and services equal. There is not enough competition currently in new jersey and one compan y has a strong hold in nj that must be broken.

Thank you for considering my views and for examining this issue so closely. I strongly urge you to approve the proposed stipulation without further delay.

Sincerely,
Anne Johnson

Our state is now the most wired broadband state in the country and continued investment in broadband technologies will be critical to New Jersey's ongoing economic competitiveness.

Some parts of the State do not have competition, but are monopolized by one Internet provider. I live in Pompton Plains and can only get Optimum service. They are constantly raising the cost because of the lack of competition. I urge you to approve Verizon's application and all the free market to help all the State's residents to have choice of services.

RE: Verizon New Jersey, Docket No. TO12020155

Dear Board Members:

I would like to declare my support for the proposed stipulation between your Board Staff and Verizon as it relates to Opportunity New Jersey. The stipulation will help ensure continued deployment of advanced communications services. Access to these services will not only benefit New Jersey's businesses and nonprofits, but consumers of all ages as well. I'm sure you will agree that advanced communications technologies have revolutionized how all residents and businesses in the Garden State communicate and we must ensure that future innovations by this industry find a home here in New Jersey.

New Jersey has benefitted from the significant investments Verizon has made here to build a robust communications network. Our state is now the most wired broadband state in the country and continued investment in broadband technologies will be critical to New Jersey's ongoing economic competitiveness.

Eric G. Heide

Thank you for considering my views and for examining this issue so closely. I strongly urge you to approve the proposed stipulation without further delay.

Sincerely,
Eric G. Heide

Re: Verizon New Jersey, Docket No. TO12020155

I write with concern that Verizon New Jersey has not met the terms of their contract with the State of New Jersey that specified they would deliver broadband internet to every resident of the state, not only by 2010, but not by this date.

I acknowledge that Verizon has indicated that believe the terms of the contract have been met but I would argue a number of points:

- 1) The promise was to wire the whole state with fiberoptic wire and to date there is substantially less than the whole state wired, including my home.
- 2) The promise was to provide “broadband” access. The term broadband is a moving target. While broadband was at a certain level when the contract was signed, it is at a substantially higher speed at present. If one were to allow Verizon to use an earlier broadband speed to indicate its obligations were met, I would fully expect the rate charged for that service to be the rate charged when the contract was signed.
- 3) If Verizon’s argument is accepted, those outside the FIOS area are effectively discriminated against when attempting to operate a business, be it a home business or a storefront business.
- 4) The area that has not been built out, is highly reflective of the more rural parts of the state. Those are also the areas with a vast majority of farms. As the need for increased speed, based upon increasingly memory-intensive program development, I do wonder what the “Garden State” will do without farms.
- 5) As I understand it, Verizon was allowed to acquire \$15 billion from excess phone charges and tax breaks to provide for construction. It has been stated that they have expended \$13 billion to develop the system.
 - a) Do expenditures include development of their wireless system that they profess will meet the terms of the contract?
 - b) If Verizon wins this argument, will the \$2 billion in excess charges be returned to those who have been excluded from the benefits of FIOS (since we paid for FIOS but did not receive it)?

My final question has to do with the future, whether Verizon wins this argument or not. The stipulation was that the buildout would be completed by 2010. Obviously, that was not the case. Verizon has, effectively, stopped additional construction of the fiberoptic system. Since the contract allowed for surcharges, will we see our rates decrease now that they have supposedly already accumulated the \$15 billion needed to construct the system?

I’ve learned over the years that a contract is a contract. If one party defaults, there are ramifications. In this case, I don’t presently see that Verizon is receiving any negative ramifications. Indeed, if the press is correct, Verizon has only received a 7-year extension on their cable franchise. I see this as a win-win only for Verizon who won their \$15 billion contract and for Verizon in that they didn’t have to meet the conditions of the contract. For those without FIOS, I see a disenfranchised group who will not be able to effectively compete in the marketplace,

I ask only for what has been agreed to. Require Verizon to complete the fiberoptic buildout of the state of New Jersey.

Sincerely,

James R Johnson

I would like to declare my support for the proposed stipulation between your Board Staff and Verizon as it relates to Opportunity New Jersey. The stipulation will help ensure continued deployment of advanced communications services. Access to these services will not only benefit New Jersey's businesses and nonprofits, but consumers of all ages as well. I'm sure you will agree that advanced communications technologies have revolutionized how all residents and businesses in the Garden State communicate and we must ensure that future innovations by this industry find a home here in New Jersey.

New Jersey has benefitted from the significant investments Verizon has made here to build a robust communications network. Our state is now the most wired broadband state in the country and continued investment in broadband technologies will be critical to New Jersey's ongoing economic competitiveness.

Thank you for considering my views and for examining this issue so closely. I strongly urge you to approve the proposed stipulation without further delay.

Sincerely,
william lewis

There are still towns around NJ without the FIOS option. Towns like Moorestown, blocked Verizon from providing this quality service for selfish reasons of a few Comcast stock holders. Not all residents of that town are Comcast stock holders and should be afforded the option to choose FIOS.

Thank you for considering my views and for examining this issue so closely. I strongly urge you to approve the proposed stipulation without further delay.

Sincerely,
John Thomas

I am not one for Verizon, because when I had a big problem and told them it was a medical emergency that I needed my phone and the internet access and they said so what do you want me to do about it, and I was told when I went to the switching station myself, the guy told me to get the hell out of there or he was going to call the Police. They did not care that my phone kept going of if it rained or even a threat of rain in the air. They could not kept the phone on and the workers told me the company is not going to spend the money to update the system because it would cost to much money and they didn't want to be bothered about it.

Thank you for considering my views and for examining this issue so closely. I strongly urge you to approve the proposed stipulation without further delay.
