RE: Verizon New Jersey, Docket No. TO12020155

Dear Board Members:

I would like to declare my support for the proposed stipulation between your Board Staff and Verizon as it relates to Opportunity New Jersey. The stipulation will help ensure continued deployment of advanced communications services. Access to these services will not only benefit New Jersey's businesses and nonprofits, but consumers of all ages as well. I'm sure you will agree that advanced communications technologies have revolutionized how all residents and businesses in the Garden State communicate and we must ensure that future innovations by this industry find a home here in New Jersey.

New Jersey has benefitted from the significant investments Verizon has made here to build a robust communications network. Our state is now the most wired broadband state in the country and continued investment in broadband technologies will be critical to New Jersey's ongoing economic competitiveness.

I strongly urge The BPU to approve the proposal stipulated in Verizon New Jersey, Docket No. TO12020155 as this agreement will provide countless benefits for all citizens of New Jersey and provide alternatives to consumers other than Monopolistic Comcast.

Thank you for considering my views and for examining this issue so closely. I strongly urge you to approve the proposed stipulation without further delay.

Sincerely,
Leonard F. Rayca

Subject: High speed internet

I am concerned in regards to the poor service that Verizon provides in our area. I reside at 132 Remsterville Elmer, NJ. I am a teacher and I have no high speed internet at all. All lesson plans are created and submitted online and the limited internet access makes it extremely difficult to be productive and efficient as a 21st century teacher. There have been numerous occasions where I've had to travel at least 20 minutes just to get decent internet. Higher quality internet would definitely improve the efficiency of school work while being home. Thank you for your time.

Sincerely,
Chiara Hurff

Subject: Verizon New Jersey ,Docket no. TO12020155

We are concerned in regards to the poor service that Verizon provides in our area. We reside at 132 Remsterville Road , Elmer New Jersey 08318 in Alloway Township/ Salem County. We have extremely poor landline service , no cable access , and limited cell phone service(average one bar reception). Our children do not have access to high speed Internet . We are approximately 2 miles from Stow Creek township in Cumberland County which recently has been wired with Verizon Fios to all residents. Stow Creek is similar to or even more rural than neighboring Alloway township. This inequality is unfair and discriminatory . It is unfair that school children two miles from our home have high speed Internet and school children in our area have no access. This is also a disadvantage for business's in our area. The BPU should enforce the agreement to provide all New Jersey residents with high speed internet access, reliable phone service, and strong cell phone reception. It is imperative that the Board of Public Utilities provide the residents of rural areas with high speed / broadband service that residents in suburban and urban area are provided . To Whom It May Concern;

I apologize for the lateness of this e-mail, but I am just finding out about what is going on with Verizon regarding this matter. I am writing to convey to you my extreme disappointment in Verizon not wishing to provide Fios to my location. I know of people with school age children who won't consider moving to this area because of the lack of available high speed internet available to help with school work. This could also affect property values as it may make potential buyers hesitant to purchase in this area. I live directly across the street from a large Church that runs Sunday School classes that I'm sure would benefit greatly from access to high speed internet. Any assistance that you could render in regards to Verizon New Jersey, Docket No. TO12020155 would be most greatly appreciated! Thank you very much for your concern and assistance in this matter!

Dear Kristi Izzo,

I was just inform about the situation involving Verizon trying to bail out of building out their fiber optic network. I currently live in an area where a high speed connection is not available. Television service has to be provided via satellite and an internet connections only have two options: archaic dial-up or expensive satellite. DSL is not proved either. This is true for my area and most the area located in the western part of Cumberland county. Verizon had told us that we could be able to get FiOS by January, it's March now and it is still not available. I currently rely on my cellphone as my internet connection but even then it can not provide the speed a fiber optic could provide. It is ridiculously that in 2014 there are still some us that don't have access to a high speed connection. There are times when I have to download large files for work and the only way I can is by going somewhere where there is an open WiFi hotspot (which means I have to drive 15-20 minutes to find one). Verizon is trying to convince people the wireless is way to go but it's not. There are parts around where I live were a cellular connection is not available or is very week. Also FiOS does not have the data limits that come with data plans provided by a cellphone company. I hope that board has reviews this situation and makes Verizon comply with building the fiber optic network. The US is not number one in internet connection speed and why is that? It's because the government fails to pressure the telecommunications companies. People paid surcharges that were suppose to be used for this network and we have the right to a high speed connection. Thank you for taking the time to read this and I hope

Sincerely,
Julio Villagomez

I'm sure you will agree that advanced communications technologies have revolutionized how all residents and businesses in the Garden State communicate and we must ensure that future innovations by this industry find a home here in New Jersey.

New Jersey has benefitted from the significant investments Verizon has made here to build a robust communications network. Our state is now the most wired broadband state in the country and continued investment in broadband technologies will be critical to New Jersey's ongoing economic competitiveness.

Verizon for many years has mailed me information on signing up for high speed internet or fios for my home and business. Many times I called only to find the service is not available. Verizon has repaired my 3 phone lines several times each year. Lines go out in Hot, Cold, Humid, or windy weather. Computer dial up line disconnects several times a day. Verizon would rather I buy more Verizon Wireless Smart Phones or wireless internet services or Bundle my services. My phone bill services are expensive for minimum service. My cell phone bill is also expensive and restricted.

Thank you for considering my views and for examining this issue so closely. I strongly urge you to approve the proposed stipulation without further delay.

Sincerely,
Carl Lang

RE: Verizon New Jersey, Docket No. TO12020155

Dear Board Members:

I would like to declare my support for the proposed stipulation between your Board Staff and Verizon as it relates to Opportunity New Jersey. The stipulation will help ensure continued deployment of advanced communications services. Access to these services will not only benefit New Jersey's businesses and nonprofits, but consumers of all ages as well. I'm sure you will agree that advanced communications technologies have revolutionized how all residents and businesses in the Garden State communicate and we must ensure that future innovations by this industry find a home here in New Jersey.

New Jersey has benefitted from the significant investments Verizon has made here to build a robust communications network. Our state is now the most wired broadband state in the country and continued investment in broadband technologies will be critical to New Jersey's ongoing economic competitiveness.

This is America and we should have a choice on what cable service we purchase. Right now our part of the community is only wired for Comcast and their prices are sky high without any competition to threaten them.

Thank you for considering my views and for examining this issue so closely. I strongly urge you to approve the proposed stipulation without further delay.

Sincerely,
Jeannie Macchiaroli

Should be also be about tv options. Comcast only choice, no competition except with satellite. After my bill reached 206.00 & Comcast would only budge down to 180. (Triple Play) was forced to have a disc put on roof for satellite! Total monopoly! Shame.

Thank you for considering my views and for examining this issue so closely. I strongly urge you to approve the proposed stipulation without further delay.

Our state is now the most wired broadband state in the country and continued investment in broadband technologies will be critical to New Jersey's ongoing economic competitiveness.

I am in favor of Verizon Fios being an option for me to choose - I feel that Comcast (in talks with Time Warner Cable) would be too much of a monopoly giving me little/no choice in my Tv/phone/internet use.

Verizon Fios is superior and we need a choice.

Thank you for considering my views and for examining this issue so closely. I strongly urge you to approve the proposed stipulation without further delay.

Subject: Verizon NJ Docket No. TO 12020155

Dear Kristi Izzo:

As an elected official in Hopewell Township in Cumberland County, I would like to express my opposition to the Proposed Stipulation of Settlement with Verizon.

The BPU must consider the impact on the underserved students, senior citizens and farmers within Hopewell Township if this proposal is signed as is. Verizon's desire to replace 4G wireless service to rural area fails to meet the intent of the original integrity of Opportunity New Jersey.

- 1) Students will not have equal access to modern technology at the same speed as fellow students that do have high speed broadband access. Plus the data download costs will be 3 to 4 times that of "wired" students.
- 2) Senior Citizens will be not have a voice as a consumer if Verizon backs away from its commitment to maintain existing land line infrastructure. Seniors that have medical devices and security systems will not have stable access to traditional land line services. Also, if this stipulation is accepted then Senior's traditional telephone land line services will be forever ignored by Verizon.
- 3) Farmers will not be able to complete on a level playing field with their fully wired competitors. Cumberland County produces 20% of the State of New Jersey's agriculture economy. Our farmers are at a competitive disadvantage and will never have "equal "access if this stipulation is agreed upon.

Cumberland County has the highest unserved population within the entire state. Unserved population exceeds 7% of our total residents while the state wide average is less that 1%. Cumberland County has the highest unemployment rate in the entire state. Our economy cannot be placed at a permanent disadvantage with Verizon turning its back on the residents with the weakest voice in our state.

This is a David and Goliath situation. The BPU has the jurisdiction to hold Verizon accountable for improving their infrastructure to the underserved areas of the most vulnerable citizens within our state.

Your consideration is appreciated.

Thank you,
Greg Facemyer

Subject: Comment on Proposed Stipulation of Settlement between Verizon and the New Jersey Board of Public Utilities

I am submitting this comment to indicate that I am opposed to the proposed Stipulation of Settlement between Verizon and the New Jersey Board of Public Utilities. I have read the comments of The New Jersey Ratepayer Advocate who is also opposed to the proposed Stipulation of Settlement and agree with them. I am for the maintaining of the existing copper wire network which is essential for maintaining an connection to the outside world in the event of a power outage. Verizon has attempted to pressure customers into switching to a FIOS system with an inadequate backup battery (only up to 8 hours) to use in the case of a power outage.

RE: Docket No. TO12020155 (Verizon New Jersey)

To the Members of the New Jersey Board of Public Utilities:

I am writing to express my support for the proposed stipulation between BPU Staff and Verizon. The proposed stipulation is fair and balanced and under your guidance, will build on the success that the Board and Verizon have achieved in making the Garden State one of the most wired broadband states in the country.

Thanks to Verizon's commitment to building an advanced communications network in New Jersey, consumers and businesses in our state have access to high-speed broadband. Access to advanced communications technologies is no longer a luxury; it's a necessity. Because Verizon has invested billions of dollars in our state over the last decade, consumers here can harness the power of these technologies like never before. By leveraging new and innovative technologies like 4G LTE and fiber, Verizon has helped put the power of the Internet into more consumers' hands across the state and fulfilled its Opportunity New Jersey obligations. And, the future holds even more promise.

Few companies have made the kind of critical infrastructure investments in New Jersey that Verizon has made and I am confident that you can continue to count on Verizon to work with the communities it serves to deliver the benefits of broadband services through this program.

I sincerely appreciate the work you, your Staff and Verizon have done to make New Jersey a broadband leader and hope you will move forward with the proposed stipulation without any reservations.

Thank you for considering my views,

Manny

As a New Jersey resident and Verizon employee, I am expressing my support for the proposed stipulation between BPU Staff and Verizon. The proposed stipulation is fair and balanced and, under your guidance, will build on the success that the Board and Verizon have achieved in making the Garden State one of the most wired broadband states in the country.

Access to advanced communications technologies is no longer a luxury; it's a necessity. Thanks to Verizon, New Jersey consumers and businesses can harness the power of these technologies like never before. By leveraging new and innovative technologies like 4G LTE and fiber, Verizon has helped put the power of the Internet into more consumers' hands across the state and fulfilled its Opportunity New Jersey obligations. The future holds even more promise.

Few companies have made the kind of critical infrastructure investments in New Jersey that Verizon has made and you can count on Verizon to continue working with communities across the State to deliver the benefits of broadband services through this program.

Please approve the proposed stipulation without further delay. Thank you for taking the time to consider my view and for all you do for the people of New Jersey.

Sincerely,

Lucia Diana

To Whom it May Concern,

I live in Alloway Township and it is ridiculous that in the state of New Jersey, I can't get high speed Internet. As you can see by my signature below, I have a small business and rely on my website since I don't have a brick and mortar store. I cannot compete with similar companies. I also have a small farm and cannot compete with others up north who can get their products online faster and more reliably than I can. My daughter, who will be attending Rowan this year, has gone to her boyfriend's house when she has to do research because of the frustration. The fastest Internet we could find is Hughes Satellite but it is not nearly as fast as everyone else's, it is very unreliable especially in bad weather, and it is more expensive than what everyone else in the surrounding areas pay. It is not fair! This is New Jersey! I lived in Oklahoma and Virginia for ten years where my Internet was faster and cheaper!

Sincerely,

Debi Van Cleave

Re. I/M/O Verizon New Jersey Inc.'s Alleged Failure To Comply With Opportunity New Jersey Commitments
BPU Docket No. T012020155

Dear Ms. Izzo:

I have carefully read and examined the proposed "stipulation settlement" and I am at a loss for words as to how the Governor would support the agreement. Needless to say, I have found it to be totally unacceptable as it does not require Verizon New Jersey to comply with the original "ONJ" commitments which included the completion of a statewide digital broadband fiber optic network by the end of 2010.

I am deeply concerned that BPU oversight has failed the New Jersey taxpayers who live and/or work in the "have not" communities. It is incomprehensible that Governor Christie and his administration would support the stipulation agreement as it is currently written and agreed to.

What the BPU discovered as part of the Stow Creek and Greenwich hearings is just the tip of the iceberg and should have been a wake up call. There are hundreds of towns around the State, including West Amwell Township that were never fiberized and Verizon has even stopped paying their real estate taxes to many of these towns causing a significant tax revenue shortfall.

As a resident of West Amwell Township in Hunterdon County as well as a recognized expert in the field of phone bill auditing, I have heard from a number of our community residents that were told by Verizon service representatives that FiOS was not going to be deployed in West Amwell because our Township officials were blocking Verizon from building the network. This is a flat out lie and a total misrepresentation of the truth.

Shortly after the BPU approved Verizon's "systemwide video franchise", Verizon representatives initiated a meeting with the West Amwell Township Mayor which I attended. At this meeting Verizon officials said our Township would be wired in the future but they were starting with Ewing Township, Hopewell Township and Pennington Borough. At the closure of this meeting, we had a clear understanding that we would get FiOS at some point in the future.

When It became clear that Verizon was never going to make the 2010 deadline, Mayor Palladino sent a letter to BPU President Jeanne Fox but we never received any response or plan of action to be taken by the BPU regarding our concern.

The fact is, West Amwell Township, just like Stow Creek and Greenwich Township, has been denied all the economic benefits that the BPU determined to be "just and reasonable" when it approved "PAR I" and "PAR II".

Before the ink was even dry, Verizon back pedalled on its "ONJ" commitments from the very beginning, Ratepayer Advocate Blossom Peretz took very aggressive action to protect New Jersey ratepayers and to accelerate the fiber deployment to our schools as part of a new commitment called "Access New Jersey".

Verizon subsequently declared that it had completed "ANJ" and ran fiber to all the schools, however, based on my observations in West Amwell Township, it appears that the elementary school was never fiberized but Verizon has claimed 100% compliance.

To add insult to injury, the BPU last year, approved Verizon's systemwide video franchise renewal knowing that Verizon has publicly announced that it has no intention to build FiOS on a systemwide basis. To refresh the BPU's memory, the carrier had originally argued that it needed a "systemwide video franchise" so they could accelerate the installation and bring competition and economic benefits to the State sooner. It was clearly just a "bait and switch" strategy from the very beginning.

When "ONJ" was approved by the BPU, Verizon "formerly known as New Jersey Bell" had already deployed fiber in the backbone part of the network. According to the Deloitte Touche study that was commissioned by the BPU, and relied on by the BPU, 50% of the interoffice facilities were already on fiber and New Jersey Bell had planned to fiberize the entire State by 2030 if traditional public utility regulations remained in effect.

According to the annual "infrastructure reports" filed by Verizon, the carrier installed around 750 remote terminals so they could extend the "DSL" footprint. DSL is primarily a copper based technology that has significant distance and speed limitations. To achieve ubiquitous availability of DSL throughout a central office service area, Verizon supposedly ran fiber from the central office to these remote terminals to extend the DSL foot print.

Instead, it appears that Verizon has pulled another 'bait and switch' by diverting the fiber deployment to their wireless affiliate. Meanwhile, DSL service was never made available to much of West Amwell Township and I would encourage the BPU to go to each remote terminal and see if any fiber was even run.

I strongly urge every "have not" town in New Jersey to stand up for your community and the businesses that are located in your neighborhood.

Verizon should be required to build the fiber optic network to the premises instead of running fiber to the cell phone tower. If the BPU allows Verizon to build 4G LTE instead of the promised fiber optic network, it will not be very long before Verizon claims that they need more "radio spectrum" and we are held hostage again.

Re: Docket No., TO12020155

I believe Verizon must be held to their original commitment to the people of New Jersey to complete the roll-out of broadband access to the entire state.

New Jerseyans have provided Verizon tax incentives, monopoly rights and other benefits per the contracts they negotiated with the state. It is well past time that they provide us the service they promised and for which they were fully compensated. I get so frustrated when I see the constant barrage of Verizon commercials offering services that they are unable (unwilling) to provide because my neighborhood is not yet upgraded to the necessary technology.

Subject: Verizon N. J. Docket No. TO12020155

To the attention of BPU representative, please take note:

Reading the local newspaper here in Bridgeton, Cumberland County N. J. about Verizon broadband pledge to expand the FIOS to ALL verizon residents is somewhat a criminal act by Verizon to their customers (me included) I live within 150 feet from where FIOS line runs and in this development there is over 100 residents that has yet and don't know when they will if ever to get FIOS, this is sick and sorry on Verizon part.

I have ask Verizon and get the same old message in person, we don't when, see your local municipal, which we have done this for at least five years...Still no response from Verizon. I know we pay verizon a fee for having FIOS, I think that I owe a explanation from Verizon when I can get reimburse from paying this fee in the past and also when they intend to keep their pledge to the rest of the Hopewell township customers...

I guess this is how the big companies gets bigger and forget who pays the bills to keep them in bussiness.

Thank you for reading this note, and hopefull you will crank on them with a " big stick" as what Teddy Roosevelt would say....

Subject: Comments on Docket No. T012020155 - Proposed Stipulation of Agreement between BPU Board Staff and Verizon New Jersey --

I am a resident of the Hopewell Township in Cumberland County. I am by no means in a very rural area as compared to Greenwich Township and Stow Creek Township. I have no access to cable or Verizon broadband. Whereas all the people around me do. How can you justify running this down deserted roads with one house on the entire road that ends in dead end in Stow Creek Township, and people in Hopewell Township in areas much less rural have nothing! This really seems very very unfair to me. Please consider completing the 8% of our county that is not completed. My husband runs a business and our office is out of our home so we do use a fair amount of data a month, we are always purchasing more to get through the month. We have Verizon for our land line and cell phones, but will be cancelling the land line to save money for purchasing internet service with our Verizon Jet Pack. This is also hurting the resale value of a property, who in today's world would want to purchase a house with no broadband service?

You have come so far with this project please do complete it for those who do not have access.

Thank You

I would like to declare my support for the proposed stipulation between your Board Staff and Verizon as it relates to Opportunity New Jersey. The stipulation will help ensure continued deployment of advanced communications services. Access to these services will not only benefit New Jersey's businesses and nonprofits, but consumers of all ages as well. I'm sure you will agree that advanced communications technologies have revolutionized how all residents and businesses in the Garden State communicate and we must ensure that future innovations by this industry find a home here in New Jersey.

New Jersey has benefitted from the significant investments Verizon has made here to build a robust communications network. Our state is now the most wired broadband state in the country and continued investment in broadband technologies will be critical to New Jersey's ongoing economic competitiveness.

KEEP TECHNOLOGY ADVANCING

Thank you for considering my views and for examining this issue so closely. I strongly urge you to approve the proposed stipulation without further delay.

Sincerely,
BOB MORRISF

Dear Ms. Kristi Izzo, Secretary:

New Jersey Board of Public Utilities
C/O Ms. Kristi Izzo, Secretary
44 South Clinton Avenue, 9th Floor
Post Office Box 350
Trenton, N.J. 08625-0350

To the Members of the New Jersey Board of Public Utilities:

As a New Jersey resident and Verizon employee, I am expressing my support for the proposed stipulation between BPU Staff and Verizon. The proposed stipulation is fair and balanced and, under your guidance, will build on the success that the Board and Verizon have achieved in making the Garden State one of the most wired broadband states in the country.

Access to advanced communications technologies is no longer a luxury; it's a necessity. Thanks to Verizon, New Jersey consumers and businesses can harness the power of these technologies like never before. By leveraging new and innovative technologies like 4G LTE and fiber, Verizon has helped put the power of the Internet into more consumers' hands across the state and fulfilled its Opportunity New Jersey obligations. The future holds even more promise.

Few companies have made the kind of critical infrastructure investments in New Jersey that Verizon has made and you can count on Verizon to continue working with communities across the State to deliver the benefits of broadband services through this program.

Please approve the proposed stipulation without further delay. Thank you for taking the time to consider my view and for all you do for the people of New Jersey.

Sincerely,

Jennifer Young

Our state is now the most wired broadband state in the country and continued investment in broadband technologies will be critical to New Jersey's ongoing economic competitiveness.

Steps need to be taken to ensure the greatest level of competition. I would love to have the option of broadband from Verizon, but right now, I am stuck with Comcast, who is clearly using monopoly pricing. I want a fiber optic line to my home. Why should Verizon be prevented from providing it? Only reason I can think of is that Comcast has been bribing all of our representatives, regardless of party. It really makes me sick!

Thank you for considering my views and for examining this issue so closely. I strongly urge you to approve the proposed stipulation without further delay.

Sincerely,
Joseph Cillo

RE: Verizon New Jersey, Docket No. TO12020155

Dear Board Members:

I would like to declare my support for the proposed stipulation between your Board Staff and Verizon as it relates to Opportunity New Jersey. The stipulation will help ensure continued deployment of advanced communications services. Access to these services will not only benefit New Jersey's businesses and nonprofits, but consumers of all ages as well. I'm sure you will agree that advanced communications technologies have revolutionized how all residents and businesses in the Garden State communicate and we must ensure that future innovations by this industry find a home here in New Jersey.

New Jersey has benefitted from the significant investments Verizon has made here to build a robust communications network. Our state is now the most wired broadband state in the country and continued investment in broadband technologies will be critical to New Jersey's ongoing economic competitiveness.

Cathy Wilkes

Thank you for considering my views and for examining this issue so closely. I strongly urge you to approve the proposed stipulation without further delay.

Sincerely,
Cathy Wilkes

As a FIOS customer I am being shortchanged by a lack of Hotspots in public. Everywhere I go there are Cable TV hotspots, but almost Never are there Verizon ones. They should be compelled to compete, even though they make more money selling separate cellular data service.

Thank you for considering my views and for examining this issue so closely. I strongly urge you to approve the proposed stipulation without further delay.

Sincerely,
Steve Ward

RE: Verizon New Jersey, Docket No. TO12020155

Dear Board Members:

I would like to declare my support for the proposed stipulation between your Board Staff and Verizon as it relates to Opportunity New Jersey. The stipulation will help ensure continued deployment of advanced communications services. Access to these services will not only benefit New Jersey's businesses and nonprofits, but consumers of all ages as well. I'm sure you will agree that advanced communications technologies have revolutionized how all residents and businesses in the Garden State communicate and we must ensure that future innovations by this industry find a home here in New Jersey.

New Jersey has benefitted from the significant investments Verizon has made here to build a robust communications network. Our state is now the most wired broadband state in the country and continued investment in broadband technologies will be critical to New Jersey's ongoing economic competitiveness.

Thank you for considering my views and for examining this issue so closely. I strongly urge you to approve the proposed stipulation without further delay.

Sincerely,
Catheryn Cohen

Dear Sir;

As New Jersey leads the country with broadband.

We need to continue this growth. In so doing, Verizon should reciprocate with lower fees.

I hope that you will support this.

Thank you for your time,

Best regards,

Sergio Alvarado

this will be a great advantage for all citizens here in New Jersey.

As long it is control properly by verizon and secure with the right amount of spectrum management. If this goes thru It will be a great future asset for Verizon and NJ residents as well.

Thank you for considering my views and for examining this issue so closely. I strongly urge you to approve the proposed stipulation without further delay.

Also, I may add, there is a need to change the form they charge our boxes to provide service. It is like with the phone, you rent the boxes for \$3.00 something take that number and multiply by 12 then by 25 years, how much is that. I don't think that it is fair to pay that kind of money on something that can be bought for \$55.00

Thank you for considering my views and for examining this issue so closely. I strongly urge you to approve the proposed stipulation without further delay.

Subject: Verizon New Jersey, Docket No. TO12020155"

Dear NJ PUC Board,

Please refuse to allow Verizon to walk away from its promise to provide FIOS service capability to all state residents and businesses, per "Verizon New Jersey, Docket No. TO12020155" which is the Verizon Company's answer to its failure.

The company has lost its commitment to the public as witnessed by the quality of wire services that now put subscribers into long waits for maintenance and does so by its failure to properly maintain and replace cable and wire service facilities, a breach of the company's franchise and permission by the government to operate as a monopoly.

By abdicating their unique position as a franchised utility supplier with promise to deliver proper levels of service, the company has demonstrated its lack of sincerity and commitment to the state with the same responsiveness as the telephone company or yore had delivered in an order of magnitude better service and customer satisfaction.

There is no reason demonstrated that the new Verizon will keep its promises, and pointing to other potential competitors as putting out deceiving advertising and promoting their service as beater alternative service makes me question the Verizon commitment, a disingenuous offer as I see it.

In response to a South Jersey news article about Verizon not living up to their promise to wire the state completely with broadband by the end of 2010, let me reassure you that they have not. I live in Deptford, New Jersey, and we cannot get FiOS in our part of the township. Some sections of Deptford have FiOS available to them, because, as I was told by several Verizon employees, they were connected to the Woodbury Central Office. Those of us in the other parts of the town are connected to the Blackwood Central Office. We have been informed by Verizon because Blackwood is a smaller and older Central Office, it will never be wired for FiOS. It doesn't seem profitable enough for them to make FiOS available to everyone.

THEY ARE NOT LIVING UP TO WHAT THEY PROMISED BACK IN 1993!!!!

Subject: Verizon New Jersey, Docket No. TO12020155

As a Verizon land line and dsl customer, I believe it is fundamentally unfair that Verizon is able to force me to pay for FIOS infrastructure while not committing to build it in my area. If the Huffington Post is to be believed, http://www.huffingtonpost.com/bruce-kushnick/the-great-verizon-fios-ripoff_b_1529287.html , *Verizon has diverted funds from upgrading existing infrastructure to building FIOS , but not committing to building it in areas other than high density areas.

This is unfair to many area of Southern New Jersey. Force Verizon to live up to its commitment to build out FIOS state wide. Do not permit Verizon to force people to accept wireless access.

Bruce M. Mundorf
12 Curriden Ave.
Clarksboro, N.J. 08020

*"So, in New Jersey, one of the states I know best, here is the sequence of events: Verizon (in 1993) get changes in state law that allows them to collect billions of dollars in extra charges and tax perks in exchange for upgrading the utilities. Then, Verizon doesn't roll out the fiber optic network until 2006 -- which is a cable service, but which uses the same construction budgets that were allocated to do the utility upgrades. Then Verizon cancels FiOS, and does not upgrade the utility, leaving no upgrades of the current infrastructure in the state to compete with cable. Instead, Verizon now has its local-service customers paying for wireless upgrades, while more or less abandoning the wires and stranding millions of customers in New Jersey.

So what, at the end of the day, did all that ratepayer money actually pay for? Well, the massive excess profits were used to increase **executive pay**, pay for investments and **losses overseas** in hundreds of subsidiary companies, create massive foundations that try to buy off non-profits, and to fill war chests used for lobbying and **campaign contribution**. It's clear the money didn't go into upgrading the Public Switched Telephone Networks, where it was supposed to bring everyone a fiber optic future."

RE: Verizon New Jersey, Docket No. TO12020155

Dear Board Members:

I would like to declare my support for the proposed stipulation between your Board Staff and Verizon as it relates to Opportunity New Jersey. The stipulation will help ensure continued deployment of advanced communications services. Access to these services will not only benefit New Jersey's businesses and nonprofits, but consumers of all ages as well. I'm sure you will agree that advanced communications technologies have revolutionized how all residents and businesses in the Garden State communicate and we must ensure that future innovations by this industry find a home here in New Jersey.

New Jersey has benefitted from the significant investments Verizon has made here to build a robust communications network. Our state is now the most wired broadband state in the country and continued investment in broadband technologies will be critical to New Jersey's ongoing economic competitiveness.

Thank you for considering my views and for examining this issue so closely. I strongly urge you to approve the proposed stipulation without further delay.

Sincerely,
Ken Merren

Post Office Box 350
Trenton, N.J. 08625-0350

To the Members of the New Jersey Board of Public Utilities:

As a New Jersey resident and Verizon employee, I am expressing my support for the proposed stipulation between BPU Staff and Verizon. The proposed stipulation is fair and balanced and, under your guidance, will build on the success that the Board and Verizon have achieved in making the Garden State one of the most wired broadband states in the country.

Access to advanced communications technologies is no longer a luxury; it's a necessity. Thanks to Verizon, New Jersey consumers and businesses can harness the power of these technologies like never before. By leveraging new and innovative technologies like 4G LTE and fiber, Verizon has helped put the power of the Internet into more consumers' hands across the state and fulfilled its Opportunity New Jersey obligations. The future holds even more promise.

Few companies have made the kind of critical infrastructure investments in New Jersey that Verizon has made and you can count on Verizon to continue working with communities across the State to deliver the benefits of broadband services through this program.

Please approve the proposed stipulation without further delay. Thank you for taking the time to consider my view and for all you do for the people of New Jersey.

Sincerely,

Jeffrey Batiste

Subject: Opposed to Agreement with Verizon New Jersey Referenced Docket No. TO12020155

I ask that the NJ BPU Board delay acceptance of an agreement proposed with Verizon New Jersey that could leave poor, rural, agricultural areas of New Jersey unserved or underserved in regard to wired, reliable, broadband internet service. Please do not accept data that appears incorrect to make an important decision like this. At the least, make sure that the data as to wired and wireless service is independently verified since the proposed agreement uses wireless 4G service as a basis of whether additional wired infrastructure is needed. Please do not leave Cumberland and Salem County rural residents and farm operations out the Verizon commitment to serve all of NJ.

I'm sure you will agree that advanced communications technologies have revolutionized how all residents and businesses in the Garden State communicate and we must ensure that future innovations by this industry find a home here in New Jersey.

New Jersey has benefitted from the significant investments Verizon has made here to build a robust communications network. Our state is now the most wired broadband state in the country and continued investment in broadband technologies will be critical to New Jersey's ongoing economic competitiveness.

Thank you for considering my views and for examining this issue so closely. I strongly urge you to approve the proposed stipulation without further delay.

Sincerely,
Andrea Garcia

RE: Verizon New Jersey, Docket No. TO12020155

Dear Board Members:

I would like to declare my support for the proposed stipulation between your Board Staff and Verizon as it relates to Opportunity New Jersey. The stipulation will help ensure continued deployment of advanced communications services. Access to these services will not only benefit New Jersey's businesses and nonprofits, but consumers of all ages as well. I'm sure you will agree that advanced communications technologies have revolutionized how all residents and businesses in the Garden State communicate and we must ensure that future innovations by this industry find a home here in New Jersey.

New Jersey has benefitted from the significant investments Verizon has made here to build a robust communications network. Our state is now the most wired broadband state in the country and continued investment in broadband technologies will be critical to New Jersey's ongoing economic competitiveness.

I support NJ Innovation!

Thank you for considering my views and for examining this issue so closely. I strongly urge you to approve the proposed stipulation without further delay.

Sincerely,
Christina Macdonald
