Comments: Members Of The NJ BPU,

I am a former employee of Verizon and can tell you that the company should not be granted any further accommodations by this state until they honor the Legislation known as "Opportunity New Jersey" Including the

extension of the statewide Franchise license. Verizon has cut, not added outside plant jobs here in NJ. They have ignored maintenance on the copper plant for years. And the production demands place on technicians by an overly aggressive management has resulted in poor customer service and hazardous situations for the general public.

The number of complaints filed against this company with your board, OSHA, state eeoc, and the NLRB speak for themselves. This is not a company that should be shown respect by the people of New Jersey until they change their behavior.

Please feel free to contact me at this email address with any questions.
