Re: In the Matter of Verizon New Jersey, Inc. (Docket# TO12020155)

Dear Ms. Izzo:

Under the 1993 "Opportunity New Jersey" regulatory agreement, Verizon is obligated to upgrade New Jersey's copper wire network. To fund this expansion, which was supposed to be completed in 2010, Verizon was permitted to collect excess charges from their customers. These charges, which began more than 20 years ago, are still being collected today.

However, Verizon failed to meet its timeframe requirements to New Jersey residents under Opportunity New Jersey. As a result of Verizon's failures, on March 12, 2012, the New Jersey Board of Public Utilities initiated a legal action against Verizon. The Board and Verizon have now entered into a proposed settlement agreement which I believe is inadequate and not in the best interests of myself and other New Jersey consumers who have paid for a service that has not been fully delivered.

I oppose the Board's proposed settlement agreement and ask that the Board of Public Utilities hold Verizon to the requirements of Opportunity New Jersey by expanding broadband service to every customer in the state. The proposed settlement has the potential to cost me and other residents even more money than we have already paid over the last 21 years. The Board of Public Utilities should not allow Verizon to flagrantly disregard the stipulations which are the framework for the charges and tax breaks that the company has enjoyed.

I am asking the Board of Public Utilities to be my advocate and not only require Verizon to give me what I was originally promised under Opportunity New Jersey, but to also investigate where my dollars were spent.

Very Truly Yours,

Victor Passiatore

Under the 1993 "Opportunity New Jersey" regulatory agreement, Verizon is obligated to upgrade New Jersey's copper wire network. To fund this expansion, which was supposed to be completed in 2010, Verizon was permitted to collect excess charges from their customers. These charges, which began more than 20 years ago, are still being collected today.

However, Verizon failed to meet its timeframe requirements to New Jersey residents under Opportunity New Jersey. As a result of Verizon's failures, on March 12, 2012, the New Jersey Board of Public Utilities initiated a legal action against Verizon. The Board and Verizon have now entered into a proposed settlement agreement which I believe is inadequate and not in the best interests of myself and other New Jersey consumers who have paid for a service that has not been fully delivered.

I oppose the Board's proposed settlement agreement and ask that the Board of Public Utilities hold Verizon to the requirements of Opportunity New Jersey by expanding broadband service to every customer in the state. The proposed settlement has the potential to cost me and other residents even more money than we have already paid over the last 21 years. The Board of Public Utilities should not allow Verizon to flagrantly disregard the stipulations which are the framework for the charges and tax breaks that the company has enjoyed.

I am asking the Board of Public Utilities to be my advocate and not only require Verizon to give me what I was originally promised under Opportunity New Jersey, but to also investigate where my dollars were spent.

Very Truly Yours,

Frank Deale

Re: In the Matter of Verizon New Jersey, Inc. (Docket# TO12020155)

Dear Ms. Izzo:

Under the 1993 "Opportunity New Jersey" regulatory agreement, Verizon is obligated to upgrade New Jersey's copper wire network. To fund this expansion, which was supposed to be completed in 2010, Verizon was permitted to collect excess charges from their customers. These charges, which began more than 20 years ago, are still being collected today.

However, Verizon failed to meet its timeframe requirements to New Jersey residents under Opportunity New Jersey. As a result of Verizon's failures, on March 12, 2012, the New Jersey Board of Public Utilities initiated a legal action against Verizon. The Board and Verizon have now entered into a proposed settlement agreement which I believe is inadequate and not in the best interests of myself and other New Jersey consumers who have paid for a service that has not been fully delivered.

I oppose the Board's proposed settlement agreement and ask that the Board of Public Utilities hold Verizon to the requirements of Opportunity New Jersey by expanding broadband service to every customer in the state. The proposed settlement has the potential to cost me and other residents even more money than we have already paid over the last 21 years. The Board of Public Utilities should not allow Verizon to flagrantly disregard the stipulations which are the framework for the charges and tax breaks that the company has enjoyed.

I am asking the Board of Public Utilities to be my advocate and not only require Verizon to give me what I was originally promised under Opportunity New Jersey, but to also investigate where my dollars were spent.

Very Truly Yours,

Joanne Seddon

Subject: FIOS

I live at 213 Ely Avenue in Franklinville, NJ. It is a dead end street off of Coles Mill Road in Franklinville. My phone service is provided by Verizon and their central office is in Williamstown, NJ. Fios is on Coles Mill Road but not on Ely Avenue. Why? Because we are a buried development. The street is less than 1/2 mile long with approximately 25-30 houses, yet we have no Fios. Comcast has no competition!! We just recently in 2013 had gas lines extended from Coles Mill Road to the end of Ely Avenue. I changed from propane gas to natural gas with a savings of \$900.00 per year. If FIOS were an option I would strongly consider changing my service to an outstanding product.

Re: In the Matter of Verizon New Jersey, Inc. (Docket# TO12020155)

Dear Ms. Izzo:

Under the 1993 "Opportunity New Jersey" regulatory agreement, Verizon is obligated to upgrade New Jersey's copper wire network. To fund this expansion, which was supposed to be completed in 2010, Verizon was permitted to collect excess charges from their customers. These charges, which began more than 20 years ago, are still being collected today.

However, Verizon failed to meet its timeframe requirements to New Jersey residents under Opportunity New Jersey. As a result of Verizon's failures, on March 12, 2012, the New Jersey Board of Public Utilities initiated a legal action against Verizon. The Board and Verizon have now entered into a proposed settlement agreement which I believe is inadequate and not in the best interests of myself and other New Jersey consumers who have paid for a service that has not been fully delivered.

I oppose the Board's proposed settlement agreement and ask that the Board of Public Utilities hold Verizon to the requirements of Opportunity New Jersey by expanding broadband service to every customer in the state. The proposed settlement has the potential to cost me and other residents even more money than we have already paid over the last 21 years. The Board of Public Utilities should not allow Verizon to flagrantly disregard the stipulations which are the framework for the charges and tax breaks that the company has enjoyed.

I am asking the Board of Public Utilities to be my advocate and not only require Verizon to give me what I was originally promised under Opportunity New Jersey, but to also investigate where my dollars were spent.

Very Truly Yours,

Nicholas Iannacone

Re: In the Matter of Verizon New Jersey, Inc. (Docket# TO12020155)

Dear Ms. Izzo:

Under the 1993 "Opportunity New Jersey" regulatory agreement, Verizon is obligated to upgrade New Jersey's copper wire network. To fund this expansion, which was supposed to be completed in 2010, Verizon was permitted to collect excess charges from their customers. These charges, which began more than 20 years ago, are still being collected today.

However, Verizon failed to meet its timeframe requirements to New Jersey residents under Opportunity New Jersey. As a result of Verizon's failures, on March 12, 2012, the New Jersey Board of Public Utilities initiated a legal action against Verizon. The Board and Verizon have now entered into a proposed settlement agreement which I believe is inadequate and not in the best interests of myself and other New Jersey consumers who have paid for a service that has not been fully delivered.

I oppose the Board's proposed settlement agreement and ask that the Board of Public Utilities hold Verizon to the requirements of Opportunity New Jersey by expanding broadband service to every customer in the state. The proposed settlement has the potential to cost me and other residents even more money than we have already paid over the last 21 years. The Board of Public Utilities should not allow Verizon to flagrantly disregard the stipulations which are the framework for the charges and tax breaks that the company has enjoyed.

I am asking the Board of Public Utilities to be my advocate and not only require Verizon to give me what I was originally promised under Opportunity New Jersey, but to also investigate where my dollars were spent.

Very Truly Yours,

Howard Sjursen

The proposed settlement has the potential to cost me and other residents even more money than we have already paid over the last 21 years. The Board of Public Utilities should not allow Verizon to flagrantly disregard the stipulations which are the framework for the charges and tax breaks that the company has enjoyed.

I am asking the Board of Public Utilities to be my advocate and not only require Verizon to give me what I was originally promised under Opportunity New Jersey, but to also investigate where my dollars were spent.

Very Truly Yours,

Re: In the Matter of Verizon New Jersey, Inc. (Docket# TO12020155)

Dear Ms. Izzo:

Under the 1993 "Opportunity New Jersey" regulatory agreement, Verizon is obligated to upgrade New Jersey's copper wire network. To fund this expansion, which was supposed to be completed in 2010, Verizon was permitted to collect excess charges from their customers. These charges, which began more than 20 years ago, are still being collected today.

However, Verizon failed to meet its timeframe requirements to New Jersey residents under Opportunity New Jersey. As a result of Verizon's failures, on March 12, 2012, the New Jersey Board of Public Utilities initiated a legal action against Verizon. The Board and Verizon have now entered into a proposed settlement agreement which I believe is inadequate and not in the best interests of myself and other New Jersey consumers who have paid for a service that has not been fully delivered.

I oppose the Board's proposed settlement agreement and ask that the Board of Public Utilities hold Verizon to the requirements of Opportunity New Jersey by expanding broadband service to every customer in the state. The proposed settlement has the potential to cost me and other residents even more money than we have already paid over the last 21 years. The Board of Public Utilities should not allow Verizon to flagrantly disregard the stipulations which are the framework for the charges and tax breaks that the company has enjoyed.

I am asking the Board of Public Utilities to be my advocate and not only require Verizon to give me what I was originally promised under Opportunity New Jersey, but to also investigate where my dollars were spent.

Under the 1993 "Opportunity New Jersey" regulatory agreement, Verizon is obligated to upgrade New Jersey's copper wire network. To fund this expansion, which was supposed to be completed in 2010, Verizon was permitted to collect excess charges from their customers. These charges, which began more than 20 years ago, are still being collected today.

However, Verizon failed to meet its timeframe requirements to New Jersey residents under Opportunity New Jersey. As a result of Verizon's failures, on March 12, 2012, the New Jersey Board of Public Utilities initiated a legal action against Verizon. The Board and Verizon have now entered into a proposed settlement agreement which I believe is inadequate and not in the best interests of myself and other New Jersey consumers who have paid for a service that has not been fully delivered.

I oppose the Board's proposed settlement agreement and ask that the Board of Public Utilities hold Verizon to the requirements of Opportunity New Jersey by expanding broadband service to every customer in the state. The proposed settlement has the potential to cost me and other residents even more money than we have already paid over the last 21 years. The Board of Public Utilities should not allow Verizon to flagrantly disregard the stipulations which are the framework for the charges and tax breaks that the company has enjoyed.

I am asking the Board of Public Utilities to be my advocate and not only require Verizon to give me what I was originally promised under Opportunity New Jersey, but to also investigate where my dollars were spent.

Very Truly Yours,

Mark Heter

Re: In the Matter of Verizon New Jersey, Inc. (Docket# TO12020155)

Dear Ms. Izzo:

Under the 1993 "Opportunity New Jersey" regulatory agreement, Verizon is obligated to upgrade New Jersey's copper wire network. To fund this expansion, which was supposed to be completed in 2010, Verizon was permitted to collect excess charges from their customers. These charges, which began more than 20 years ago, are still being collected today.

However, Verizon failed to meet its timeframe requirements to New Jersey residents under Opportunity New Jersey. As a result of Verizon's failures, on March 12, 2012, the New Jersey Board of Public Utilities initiated a legal action against Verizon. The Board and Verizon have now entered into a proposed settlement agreement which I believe is inadequate and not in the best interests of myself and other New Jersey consumers who have paid for a service that has not been fully delivered.

I oppose the Board's proposed settlement agreement and ask that the Board of Public Utilities hold Verizon to the requirements of Opportunity New Jersey by expanding broadband service to every customer in the state. The proposed settlement has the potential to cost me and other residents even more money than we have already paid over the last 21 years. The Board of Public Utilities should not allow Verizon to flagrantly disregard the stipulations which are the framework for the charges and tax breaks that the company has enjoyed.

I am asking the Board of Public Utilities to be my advocate and not only require Verizon to give me what I was originally promised under Opportunity New Jersey, but to also investigate where my dollars were spent.

Very Truly Yours,

Michael Costello

As a result of Verizon's failures, on March 12, 2012, the New Jersey Board of Public Utilities initiated a legal action against Verizon. The Board and Verizon have now entered into a proposed settlement agreement which I believe is inadequate and not in the best interests of myself and other New Jersey consumers who have paid for a service that has not been fully delivered.

I oppose the Board's proposed settlement agreement and ask that the Board of Public Utilities hold Verizon to the requirements of Opportunity New Jersey by expanding broadband service to every customer in the state. The proposed settlement has the potential to cost me and other residents even more money than we have already paid over the last 21 years. The Board of Public Utilities should not allow Verizon to flagrantly disregard the stipulations which are the framework for the charges and tax breaks that the company has enjoyed.

I am asking the Board of Public Utilities to be my advocate and not only require Verizon to give me what I was originally promised under Opportunity New Jersey, but to also investigate where my dollars were spent.

Very Truly Yours,

Re: In the Matter of Verizon New Jersey, Inc. (Docket# TO12020155)

Dear Ms. Izzo:

Under the 1993 "Opportunity New Jersey" regulatory agreement, Verizon is obligated to upgrade New Jersey's copper wire network. To fund this expansion, which was supposed to be completed in 2010, Verizon was permitted to collect excess charges from their customers. These charges, which began more than 20 years ago, are still being collected today.

However, Verizon failed to meet its timeframe requirements to New Jersey residents under Opportunity New Jersey. As a result of Verizon's failures, on March 12, 2012, the New Jersey Board of Public Utilities initiated a legal action against Verizon. The Board and Verizon have now entered into a proposed settlement agreement which I believe is inadequate and not in the best interests of myself and other New Jersey consumers who have paid for a service that has not been fully delivered.

I oppose the Board's proposed settlement agreement and ask that the Board of Public Utilities hold Verizon to the requirements of Opportunity New Jersey by expanding broadband service to every customer in the state. The proposed settlement has the potential to cost me and other residents even more money than we have already paid over the last 21 years. The Board of Public Utilities should not allow Verizon to flagrantly disregard the stipulations which are the framework for the charges and tax breaks that the company has enjoyed.

I am asking the Board of Public Utilities to be my advocate and not only require Verizon to give me what I was originally promised under Opportunity New Jersey, but to also investigate where my dollars were spent.

Re: In the Matter of Verizon New Jersey, Inc. (Docket# TO12020155)

Dear Ms. Izzo:

Under the 1993 "Opportunity New Jersey" regulatory agreement, Verizon is obligated to upgrade New Jersey's copper wire network. To fund this expansion, which was supposed to be completed in 2010, Verizon was permitted to collect excess charges from their customers. These charges, which began more than 20 years ago, are still being collected today.

However, Verizon failed to meet its timeframe requirements to New Jersey residents under Opportunity New Jersey. As a result of Verizon's failures, on March 12, 2012, the New Jersey Board of Public Utilities initiated a legal action against Verizon. The Board and Verizon have now entered into a proposed settlement agreement which I believe is inadequate and not in the best interests of myself and other New Jersey consumers who have paid for a service that has not been fully delivered.

I oppose the Board's proposed settlement agreement and ask that the Board of Public Utilities hold Verizon to the requirements of Opportunity New Jersey by expanding broadband service to every customer in the state. The proposed settlement has the potential to cost me and other residents even more money than we have already paid over the last 21 years. The Board of Public Utilities should not allow Verizon to flagrantly disregard the stipulations which are the framework for the charges and tax breaks that the company has enjoyed.

I am asking the Board of Public Utilities to be my advocate and not only require Verizon to give me what I was originally promised under Opportunity New Jersey, but to also investigate where my dollars were spent.

Very Truly Yours,

I oppose the Board's proposed settlement agreement and ask that the Board of Public Utilities hold Verizon to the requirements of Opportunity New Jersey by expanding broadband service to every customer in the state. The proposed settlement has the potential to cost me and other residents even more money than we have already paid over the last 21 years. The Board of Public Utilities should not allow Verizon to flagrantly disregard the stipulations which are the framework for the charges and tax breaks that the company has enjoyed.

I am asking the Board of Public Utilities to be my advocate and not only require Verizon to give me what I was originally promised under Opportunity New Jersey, but to also investigate where my dollars were spent.

Very Truly Yours,

Ines Garcia-Keim

Re: In the Matter of Verizon New Jersey, Inc. (Docket# TO12020155)

Dear Ms. Izzo:

Under the 1993 "Opportunity New Jersey" regulatory agreement, Verizon is obligated to upgrade New Jersey's copper wire network. To fund this expansion, which was supposed to be completed in 2010, Verizon was permitted to collect excess charges from their customers. These charges, which began more than 20 years ago, are still being collected today.

However, Verizon failed to meet its timeframe requirements to New Jersey residents under Opportunity New Jersey. As a result of Verizon's failures, on March 12, 2012, the New Jersey Board of Public Utilities initiated a legal action against Verizon. The Board and Verizon have now entered into a proposed settlement agreement which I believe is inadequate and not in the best interests of myself and other New Jersey consumers who have paid for a service that has not been fully delivered.

I oppose the Board's proposed settlement agreement and ask that the Board of Public Utilities hold Verizon to the requirements of Opportunity New Jersey by expanding broadband service to every customer in the state. The proposed settlement has the potential to cost me and other residents even more money than we have already paid over the last 21 years. The Board of Public Utilities should not allow Verizon to flagrantly disregard the stipulations which are the framework for the charges and tax breaks that the company has enjoyed.

I am asking the Board of Public Utilities to be my advocate and not only require Verizon to give me what I was originally promised under Opportunity New Jersey, but to also investigate where my dollars were spent.

Dear Ms. Izzo:

Under the 1993 "Opportunity New Jersey" regulatory agreement, Verizon is obligated to upgrade New Jersey's copper wire network. To fund this expansion, which was supposed to be completed in 2010, Verizon was permitted to collect excess charges from their customers. These charges, which began more than 20 years ago, are still being collected today.

However, Verizon failed to meet its timeframe requirements to New Jersey residents under Opportunity New Jersey. As a result of Verizon's failures, on March 12, 2012, the New Jersey Board of Public Utilities initiated a legal action against Verizon. The Board and Verizon have now entered into a proposed settlement agreement which I believe is inadequate and not in the best interests of myself and other New Jersey consumers who have paid for a service that has not been fully delivered.

I oppose the Board's proposed settlement agreement and ask that the Board of Public Utilities hold Verizon to the requirements of Opportunity New Jersey by expanding broadband service to every customer in the state. The proposed settlement has the potential to cost me and other residents even more money than we have already paid over the last 21 years. The Board of Public Utilities should not allow Verizon to flagrantly disregard the stipulations which are the framework for the charges and tax breaks that the company has enjoyed.

I am asking the Board of Public Utilities to be my advocate and not only require Verizon to give me what I was originally promised under Opportunity New Jersey, but to also investigate where my dollars were spent.

Very Truly Yours,

The proposed settlement has the potential to cost me and other residents even more money than we have already paid over the last 21 years. The Board of Public Utilities should not allow Verizon to flagrantly disregard the stipulations which are the framework for the charges and tax breaks that the company has enjoyed.

I am asking the Board of Public Utilities to be my advocate and not only require Verizon to give me what I was originally promised under Opportunity New Jersey, but to also investigate where my dollars were spent.

Very Truly Yours,

Re: In the Matter of Verizon New Jersey, Inc. (Docket# TO12020155)

Dear Ms. Izzo:

Under the 1993 "Opportunity New Jersey" regulatory agreement, Verizon is obligated to upgrade New Jersey's copper wire network. To fund this expansion, which was supposed to be completed in 2010, Verizon was permitted to collect excess charges from their customers. These charges, which began more than 20 years ago, are still being collected today.

However, Verizon failed to meet its timeframe requirements to New Jersey residents under Opportunity New Jersey. As a result of Verizon's failures, on March 12, 2012, the New Jersey Board of Public Utilities initiated a legal action against Verizon. The Board and Verizon have now entered into a proposed settlement agreement which I believe is inadequate and not in the best interests of myself and other New Jersey consumers who have paid for a service that has not been fully delivered.

I oppose the Board's proposed settlement agreement and ask that the Board of Public Utilities hold Verizon to the requirements of Opportunity New Jersey by expanding broadband service to every customer in the state. The proposed settlement has the potential to cost me and other residents even more money than we have already paid over the last 21 years. The Board of Public Utilities should not allow Verizon to flagrantly disregard the stipulations which are the framework for the charges and tax breaks that the company has enjoyed.

I am asking the Board of Public Utilities to be my advocate and not only require Verizon to give me what I was originally promised under Opportunity New Jersey, but to also investigate where my dollars were spent.

Re: In the Matter of Verizon New Jersey, Inc. (Docket# TO12020155)

Dear Ms. Izzo:

Under the 1993 "Opportunity New Jersey" regulatory agreement, Verizon is obligated to upgrade New Jersey's copper wire network. To fund this expansion, which was supposed to be completed in 2010, Verizon was permitted to collect excess charges from their customers. These charges, which began more than 20 years ago, are still being collected today.

However, Verizon failed to meet its timeframe requirements to New Jersey residents under Opportunity New Jersey. As a result of Verizon's failures, on March 12, 2012, the New Jersey Board of Public Utilities initiated a legal action against Verizon. The Board and Verizon have now entered into a proposed settlement agreement which I believe is inadequate and not in the best interests of myself and other New Jersey consumers who have paid for a service that has not been fully delivered.

I oppose the Board's proposed settlement agreement and ask that the Board of Public Utilities hold Verizon to the requirements of Opportunity New Jersey by expanding broadband service to every customer in the state. The proposed settlement has the potential to cost me and other residents even more money than we have already paid over the last 21 years. The Board of Public Utilities should not allow Verizon to flagrantly disregard the stipulations which are the framework for the charges and tax breaks that the company has enjoyed.

I am asking the Board of Public Utilities to be my advocate and not only require Verizon to give me what I was originally promised under Opportunity New Jersey, but to also investigate where my dollars were spent.

Very Truly Yours,

Emmanuel sardeira

Re: In the Matter of Verizon New Jersey, Inc. (Docket# TO12020155)

Dear Ms. Izzo:

Under the 1993 "Opportunity New Jersey" regulatory agreement, Verizon is obligated to upgrade New Jersey's copper wire network. To fund this expansion, which was supposed to be completed in 2010, Verizon was permitted to collect excess charges from their customers. These charges, which began more than 20 years ago, are still being collected today.

However, Verizon failed to meet its timeframe requirements to New Jersey residents under Opportunity New Jersey. As a result of Verizon's failures, on March 12, 2012, the New Jersey Board of Public Utilities initiated a legal action against Verizon. The Board and Verizon have now entered into a proposed settlement agreement which I believe is inadequate and not in the best interests of myself and other New Jersey consumers who have paid for a service that has not been fully delivered.

I oppose the Board's proposed settlement agreement and ask that the Board of Public Utilities hold Verizon to the requirements of Opportunity New Jersey by expanding broadband service to every customer in the state. The proposed settlement has the potential to cost me and other residents even more money than we have already paid over the last 21 years. The Board of Public Utilities should not allow Verizon to flagrantly disregard the stipulations which are the framework for the charges and tax breaks that the company has enjoyed.

I am asking the Board of Public Utilities to be my advocate and not only require Verizon to give me what I was originally promised under Opportunity New Jersey, but to also investigate where my dollars were spent.

Dear Ms. Izzo:

Under the 1993 "Opportunity New Jersey" regulatory agreement, Verizon is obligated to upgrade New Jersey's copper wire network. To fund this expansion, which was supposed to be completed in 2010, Verizon was permitted to collect excess charges from their customers. These charges, which began more than 20 years ago, are still being collected today.

However, Verizon failed to meet its timeframe requirements to New Jersey residents under Opportunity New Jersey. As a result of Verizon's failures, on March 12, 2012, the New Jersey Board of Public Utilities initiated a legal action against Verizon. The Board and Verizon have now entered into a proposed settlement agreement which I believe is inadequate and not in the best interests of myself and other New Jersey consumers who have paid for a service that has not been fully delivered.

I oppose the Board's proposed settlement agreement and ask that the Board of Public Utilities hold Verizon to the requirements of Opportunity New Jersey by expanding broadband service to every customer in the state. The proposed settlement has the potential to cost me and other residents even more money than we have already paid over the last 21 years. The Board of Public Utilities should not allow Verizon to flagrantly disregard the stipulations which are the framework for the charges and tax breaks that the company has enjoyed.

I am asking the Board of Public Utilities to be my advocate and not only require Verizon to give me what I was originally promised under Opportunity New Jersey, but to also investigate where my dollars were spent.

Very Truly Yours,

Tom Dzubina

Re: In the Matter of Verizon New Jersey, Inc. (Docket# TO12020155)

Dear Ms. Izzo:

Under the 1993 "Opportunity New Jersey" regulatory agreement, Verizon is obligated to upgrade New Jersey's copper wire network. To fund this expansion, which was supposed to be completed in 2010, Verizon was permitted to collect excess charges from their customers. These charges, which began more than 20 years ago, are still being collected today.

However, Verizon failed to meet its timeframe requirements to New Jersey residents under Opportunity New Jersey. As a result of Verizon's failures, on March 12, 2012, the New Jersey Board of Public Utilities initiated a legal action against Verizon. The Board and Verizon have now entered into a proposed settlement agreement which I believe is inadequate and not in the best interests of myself and other New Jersey consumers who have paid for a service that has not been fully delivered.

I oppose the Board's proposed settlement agreement and ask that the Board of Public Utilities hold Verizon to the requirements of Opportunity New Jersey by expanding broadband service to every customer in the state. The proposed settlement has the potential to cost me and other residents even more money than we have already paid over the last 21 years. The Board of Public Utilities should not allow Verizon to flagrantly disregard the stipulations which are the framework for the charges and tax breaks that the company has enjoyed.

I am asking the Board of Public Utilities to be my advocate and not only require Verizon to give me what I was originally promised under Opportunity New Jersey, but to also investigate where my dollars were spent.

Very Truly Yours,

Gerard Vella

However, Verizon failed to meet its timeframe requirements to New Jersey residents under Opportunity New Jersey. As a result of Verizon's failures, on March 12, 2012, the New Jersey Board of Public Utilities initiated a legal action against Verizon. The Board and Verizon have now entered into a proposed settlement agreement which I believe is inadequate and not in the best interests of myself and other New Jersey consumers who have paid for a service that has not been fully delivered.

I oppose the Board's proposed settlement agreement and ask that the Board of Public Utilities hold Verizon to the requirements of Opportunity New Jersey by expanding broadband service to every customer in the state. The proposed settlement has the potential to cost me and other residents even more money than we have already paid over the last 21 years. The Board of Public Utilities should not allow Verizon to flagrantly disregard the stipulations which are the framework for the charges and tax breaks that the company has enjoyed.

I am asking the Board of Public Utilities to be my advocate and not only require Verizon to give me what I was originally promised under Opportunity New Jersey, but to also investigate where my dollars were spent.

Very Truly Yours,

Re: In the Matter of Verizon New Jersey, Inc. (Docket# TO12020155)

Dear Ms. Izzo:

Under the 1993 "Opportunity New Jersey" regulatory agreement, Verizon is obligated to upgrade New Jersey's copper wire network. To fund this expansion, which was supposed to be completed in 2010, Verizon was permitted to collect excess charges from their customers. These charges, which began more than 20 years ago, are still being collected today.

However, Verizon failed to meet its timeframe requirements to New Jersey residents under Opportunity New Jersey. As a result of Verizon's failures, on March 12, 2012, the New Jersey Board of Public Utilities initiated a legal action against Verizon. The Board and Verizon have now entered into a proposed settlement agreement which I believe is inadequate and not in the best interests of myself and other New Jersey consumers who have paid for a service that has not been fully delivered.

I oppose the Board's proposed settlement agreement and ask that the Board of Public Utilities hold Verizon to the requirements of Opportunity New Jersey by expanding broadband service to every customer in the state. The proposed settlement has the potential to cost me and other residents even more money than we have already paid over the last 21 years. The Board of Public Utilities should not allow Verizon to flagrantly disregard the stipulations which are the framework for the charges and tax breaks that the company has enjoyed.

I am asking the Board of Public Utilities to be my advocate and not only require Verizon to give me what I was originally promised under Opportunity New Jersey, but to also investigate where my dollars were spent.

Re: In the Matter of Verizon New Jersey, Inc. (Docket# TO12020155)

Dear Ms. Izzo:

Under the 1993 "Opportunity New Jersey" regulatory agreement, Verizon is obligated to upgrade New Jersey's copper wire network. To fund this expansion, which was supposed to be completed in 2010, Verizon was permitted to collect excess charges from their customers. These charges, which began more than 20 years ago, are still being collected today.

However, Verizon failed to meet its timeframe requirements to New Jersey residents under Opportunity New Jersey. As a result of Verizon's failures, on March 12, 2012, the New Jersey Board of Public Utilities initiated a legal action against Verizon. The Board and Verizon have now entered into a proposed settlement agreement which I believe is inadequate and not in the best interests of myself and other New Jersey consumers who have paid for a service that has not been fully delivered.

I oppose the Board's proposed settlement agreement and ask that the Board of Public Utilities hold Verizon to the requirements of Opportunity New Jersey by expanding broadband service to every customer in the state. The proposed settlement has the potential to cost me and other residents even more money than we have already paid over the last 21 years. The Board of Public Utilities should not allow Verizon to flagrantly disregard the stipulations which are the framework for the charges and tax breaks that the company has enjoyed.

I am asking the Board of Public Utilities to be my advocate and not only require Verizon to give me what I was originally promised under Opportunity New Jersey, but to also investigate where my dollars were spent.

Very Truly Yours,

Jack A. Russell

Re: In the Matter of Verizon New Jersey, Inc. (Docket# TO12020155)

Dear Ms. Izzo:

Why do we bother to have contracts drawn up and allow big company's like Verizon to even ask to get out. There are communities where half the town is wired and the other half isn't. Is that fair to the residents of New Jersey. There not losing money and they keep down sizing they reduced their crews to 1 and when they have installs in bad areas there's no protection for them.

Under the 1993 "Opportunity New Jersey" regulatory agreement, Verizon is obligated to upgrade New Jersey's copper wire network. Under the 1993 "Opportunity New Jersey" regulatory agreement, Verizon is obligated to upgrade New Jersey's copper wire network. To fund this expansion, which was supposed to be completed in 2010, Verizon was permitted to collect excess charges from their customers. These charges, which began more than 20 years ago, are still being collected today.

However, Verizon failed to meet its timeframe requirements to New Jersey residents under Opportunity New Jersey. As a result of Verizon's failures, on March 12, 2012, the New Jersey Board of Public Utilities initiated a legal action against Verizon. The Board and Verizon have now entered into a proposed settlement agreement which I believe is inadequate and not in the best interests of myself and other New Jersey consumers who have paid for a service that has not been fully delivered.

I oppose the Board's proposed settlement agreement and ask that the Board of Public Utilities hold Verizon to the requirements of Opportunity New Jersey by expanding broadband service to every customer in the state. The proposed settlement has the potential to cost me and other residents even more money than we have already paid over the last 21 years. The Board of Public Utilities should not allow Verizon to flagrantly disregard the stipulations which are the framework for the charges and tax breaks that the company has enjoyed.

I am asking the Board of Public Utilities to be my advocate and not only require Verizon to give me what I was originally promised under Opportunity New Jersey, but to also investigate where my dollars were spent.

Very Truly Yours,

Richard Earley

The proposed settlement has the potential to cost me and other residents even more money than we have already paid over the last 21 years. The Board of Public Utilities should not allow Verizon to flagrantly disregard the stipulations which are the framework for the charges and tax breaks that the company has enjoyed.

I am asking the Board of Public Utilities to be my advocate and not only require Verizon to give me what I was originally promised under Opportunity New Jersey, but to also investigate where my dollars were spent.

Very Truly Yours,

Re: In the Matter of Verizon New Jersey, Inc. (Docket# TO12020155)

Dear Ms. Izzo:

Under the 1993 "Opportunity New Jersey" regulatory agreement, Verizon is obligated to upgrade New Jersey's copper wire network. To fund this expansion, which was supposed to be completed in 2010, Verizon was permitted to collect excess charges from their customers. These charges, which began more than 20 years ago, are still being collected today.

However, Verizon failed to meet its timeframe requirements to New Jersey residents under Opportunity New Jersey. As a result of Verizon's failures, on March 12, 2012, the New Jersey Board of Public Utilities initiated a legal action against Verizon. The Board and Verizon have now entered into a proposed settlement agreement which I believe is inadequate and not in the best interests of myself and other New Jersey consumers who have paid for a service that has not been fully delivered.

I oppose the Board's proposed settlement agreement and ask that the Board of Public Utilities hold Verizon to the requirements of Opportunity New Jersey by expanding broadband service to every customer in the state. The proposed settlement has the potential to cost me and other residents even more money than we have already paid over the last 21 years. The Board of Public Utilities should not allow Verizon to flagrantly disregard the stipulations which are the framework for the charges and tax breaks that the company has enjoyed.

I am asking the Board of Public Utilities to be my advocate and not only require Verizon to give me what I was originally promised under Opportunity New Jersey, but to also investigate where my dollars were spent.

Dear Ms. Izzo:

Under the 1993 "Opportunity New Jersey" regulatory agreement, Verizon is obligated to upgrade New Jersey's copper wire network. To fund this expansion, which was supposed to be completed in 2010, Verizon was permitted to collect excess charges from their customers. These charges, which began more than 20 years ago, are still being collected today.

However, Verizon failed to meet its timeframe requirements to New Jersey residents under Opportunity New Jersey. As a result of Verizon's failures, on March 12, 2012, the New Jersey Board of Public Utilities initiated a legal action against Verizon. The Board and Verizon have now entered into a proposed settlement agreement which I believe is inadequate and not in the best interests of myself and other New Jersey consumers who have paid for a service that has not been fully delivered.

I oppose the Board's proposed settlement agreement and ask that the Board of Public Utilities hold Verizon to the requirements of Opportunity New Jersey by expanding broadband service to every customer in the state. The proposed settlement has the potential to cost me and other residents even more money than we have already paid over the last 21 years. The Board of Public Utilities should not allow Verizon to flagrantly disregard the stipulations which are the framework for the charges and tax breaks that the company has enjoyed.

I am asking the Board of Public Utilities to be my advocate and not only require Verizon to give me what I was originally promised under Opportunity New Jersey, but to also investigate where my dollars were spent.

Very Truly Yours,

Joe Nihill

Re: In the Matter of Verizon New Jersey, Inc. (Docket# TO12020155)

Dear Ms. Izzo:

I am boiling mad right now! I firmly state with the utmost respect for you as a person and as a public servant that Verizon must be held accountable for upgrading from copper to fiber optics!

I understand that the New Jersey Board of Public Utilities has entered entered into a proposed settlement agreement on the issue of Verizon's failure to upgrade from copper to fiber optics. I think the terms of this settlement are inadequate and are not in the best interests of New Jersey consumers. We have paid for a service that has not been fully delivered. I don't think it is good to let Verizon negotiate its way out of having to fulfill the law!

The Board of Public Utilities should hold Verizon accountable to the requirements of Opportunity New Jersey--they must expand broadband service to every customer in the state. The Board of Public Utilities should not allow Verizon to flagrantly disregard the stipulations which are the framework for the charges and tax breaks that the company has enjoyed.

I add my request to that of all the other advocacy groups, especially the AFL-CIO, that are made up of average citizens like myself: I want the Board of Public Utilities to be my/our advocate and not only require Verizon to give us what we were originally promised under Opportunity New Jersey, but to also investigate where our money was spent!!!! Verizon has been collecting surcharges for more than 20 years! They should be made to live up to their obligation under the 1993 "Opportunity New Jersey" regulatory agreement!

Sincerely,

Catherine Stanford

Re: In the Matter of Verizon New Jersey, Inc. (Docket# TO12020155)

Dear Ms. Izzo:

I strongly believe this to be an extremely important issue that must be addressed. Even though the message below got to me over the internet (from an organization that I respect and support) please trust that I have carefully read it (as well as having read about the issue itself) and agree strongly with everything it says. In fact, I couldn't have said it better.

Under the 1993 "Opportunity New Jersey" regulatory agreement, Verizon is obligated to upgrade New Jersey's copper wire network. To fund this expansion, which was supposed to be completed in 2010, Verizon was permitted to collect excess charges from their customers. These charges, which began more than 20 years ago, are still being collected today.

However, Verizon failed to meet its timeframe requirements to New Jersey residents under Opportunity New Jersey. As a result of Verizon's failures, on March 12, 2012, the New Jersey Board of Public Utilities initiated a legal action against Verizon. The Board and Verizon have now entered into a proposed settlement agreement which I believe is inadequate and not in the best interests of myself and other New Jersey consumers who have paid for a service that has not been fully delivered.

I oppose the Board's proposed settlement agreement and ask that the Board of Public Utilities hold Verizon to the requirements of Opportunity New Jersey by expanding broadband service to every customer in the state. The proposed settlement has the potential to cost me and other residents even more money than we have already paid over the last 21 years. The Board of Public Utilities should not allow Verizon to flagrantly disregard the stipulations which are the framework for the charges and tax breaks that the company has enjoyed.

I am asking the Board of Public Utilities to be my advocate and not only require Verizon to give me what I was originally promised under Opportunity New Jersey, but to also investigate where my dollars were spent.

Very Truly Yours,

Paul Meyers

Re: In the Matter of Verizon New Jersey, Inc. (Docket# TO12020155)

Dear Ms. Izzo:

Under the 1993 "Opportunity New Jersey" regulatory agreement, Verizon is obligated to upgrade New Jersey's copper wire network. To fund this expansion, which was supposed to be completed in 2010, Verizon was permitted to collect excess charges from their customers. These charges, which began more than 20 years ago, are still being collected today.

However, Verizon failed to meet its timeframe requirements to New Jersey residents under Opportunity New Jersey. As a result of Verizon's failures, on March 12, 2012, the New Jersey Board of Public Utilities initiated a legal action against Verizon. The Board and Verizon have now entered into a proposed settlement agreement which I believe is inadequate and not in the best interests of myself and other New Jersey consumers who have paid for a service that has not been fully delivered.

I oppose the Board's proposed settlement agreement and ask that the Board of Public Utilities hold Verizon to the requirements of Opportunity New Jersey by expanding broadband service to every customer in the state. The proposed settlement has the potential to cost me and other residents even more money than we have already paid over the last 21 years. The Board of Public Utilities should not allow Verizon to flagrantly disregard the stipulations which are the framework for the charges and tax breaks that the company has enjoyed.

I am asking the Board of Public Utilities to be my advocate and not only require Verizon to give me what I was originally promised under Opportunity New Jersey, but to also investigate where my dollars were spent.

Dear Ms. Izzo:

Under the 1993 "Opportunity New Jersey" regulatory agreement, Verizon is obligated to upgrade New Jersey's copper wire network. To fund this expansion, which was supposed to be completed in 2010, Verizon was permitted to collect excess charges from their customers. These charges, which began more than 20 years ago, are still being collected today.

However, Verizon failed to meet its timeframe requirements to New Jersey residents under Opportunity New Jersey. As a result of Verizon's failures, on March 12, 2012, the New Jersey Board of Public Utilities initiated a legal action against Verizon. The Board and Verizon have now entered into a proposed settlement agreement which I believe is inadequate and not in the best interests of myself and other New Jersey consumers who have paid for a service that has not been fully delivered.

I oppose the Board's proposed settlement agreement and ask that the Board of Public Utilities hold Verizon to the requirements of Opportunity New Jersey by expanding broadband service to every customer in the state. The proposed settlement has the potential to cost me and other residents even more money than we have already paid over the last 21 years. The Board of Public Utilities should not allow Verizon to flagrantly disregard the stipulations which are the framework for the charges and tax breaks that the company has enjoyed.

I am asking the Board of Public Utilities to be my advocate and not only require Verizon to give me what I was originally promised under Opportunity New Jersey, but to also investigate where my dollars were spent.

Very Truly Yours,

Dominick Triolo

Re: In the Matter of Verizon New Jersey, Inc. (Docket# TO12020155)

Dear Ms. Izzo:

Under the 1993 "Opportunity New Jersey" regulatory agreement, Verizon is obligated to upgrade New Jersey's copper wire network. To fund this expansion, which was supposed to be completed in 2010, Verizon was permitted to collect excess charges from their customers. These charges, which began more than 20 years ago, are still being collected today.

However, Verizon failed to meet its timeframe requirements to New Jersey residents under Opportunity New Jersey. As a result of Verizon's failures, on March 12, 2012, the New Jersey Board of Public Utilities initiated a legal action against Verizon. The Board and Verizon have now entered into a proposed settlement agreement which I believe is inadequate and not in the best interests of myself and other New Jersey consumers who have paid for a service that has not been fully delivered.

I oppose the Board's proposed settlement agreement and ask that the Board of Public Utilities hold Verizon to the requirements of Opportunity New Jersey by expanding broadband service to every customer in the state. The proposed settlement has the potential to cost me and other residents even more money than we have already paid over the last 21 years. The Board of Public Utilities should not allow Verizon to flagrantly disregard the stipulations which are the framework for the charges and tax breaks that the company has enjoyed.

I am asking the Board of Public Utilities to be my advocate and not only require Verizon to give me what I was originally promised under Opportunity New Jersey, but to also investigate where my dollars were spent.

Very Truly Yours,

RoseMaria Root
