CASINO REVENUE FUND

The Casino Revenue Fund (CRF) was established in 1976 with the provision that State revenues derived from casino gambling would be applied solely for the purpose of "providing funding for reductions in property taxes, rental, telephone, gas, electric, and municipal utilities charges of eligible senior citizens and disabled residents of the State in accordance with such formulae as the Legislature shall by law provide." The Fund's authorized use was expanded in 1981 to include additional or expanded health services or benefits, transportation services or benefits to eligible senior and disabled residents.

Total CRF resources of \$199.9 million, including \$175,000 from the Casino Simulcasting Fund, are projected for fiscal 2017. This total also includes revenues from Internet gaming, which was launched in November 2013.

The Pharmaceutical Assistance to the Aged and Disabled (PAAD) program, which at one point in time consumed a majority of the revenues in the CRF, has become less costly as most recipients now receive medications through the federally funded Medicare Part D program. This has allowed greater CRF support for expanded community based services for residents with developmental disabilities.

The summary and projection table on the following page displays CRF revenues and the programs receiving Fund appropriations over the past several years. Some CRF appropriations have been shifted to the General Fund during that time (see the "General Fund Support" section of the table).
