## **NOVEMBER 2010 CONSTRUCTION HIGHLIGHTS**

- November construction totaled \$662.7 million; 559 of New Jersey's 566 municipalities reported.
- New homes and repair and expansion of existing houses amounted to \$381.1 million, or 57.5 percent of all work authorized by building permits. Office, retail, and other nonresidential activity amounted to \$281.7 million (42.5 percent).
- 879 new houses were authorized for construction in November. The amount of new office space reported on building permits was 447,042 square feet. Only 78,689 square feet of new retail space was authorized by building permits in November.
- Newark led all municipalities with \$25.7 million of work. Two large developments accounted for most of this: a new community and recreational center with an estimated construction cost thus far of \$10.6 million; and a \$10.2 million auditorium for a charter school.
- West Windsor Township had \$19.4 million of work. Most of this was for a 65-unit apartment building underway that is part of a multifamily development for Princeton Theological Seminary.

### **Year to Date**

With 11 months of building permit data, several trends are evident in 2010.

- This will be another depressed year for the industry, a little better than last year, but still significantly below the level of work approved in 2008. Compared to two years ago, the dollar amount of work authorized by building permits may decline by as much as 30 percent.
- New home construction will show modest gains in 2010 compared to 2009. The number of new houses authorized by building permits between January and November 2010 is up by 767 units, compared to the same time period in 2009; this is an increase of nearly 8 percent. Still, it is 36 percent below the 16,338 authorized dwellings in 2008.
- Office and retail work is up compared to this time last year, but still significantly below levels from two years ago.
- Jersey City, Plainsboro, Franklin Township (Somerset County), Newark, New Brunswick, and Piscataway will be among the top municipalities in 2010.

- No single municipality will report more work than “State Buildings.” This category of construction includes permits issued on behalf of New Jersey State government agencies or their instrumentalities. It typically includes large public improvements for organizations like, New Jersey Transit, the Sports and Exposition Authority, and the Turnpike Authority. It also includes work on buildings and other structures at State colleges and universities. 2010 will be a very strong year for “State Buildings.” Well over \$600 million of construction will be authorized. Much of this is to build new dormitories and other academic buildings at State colleges and universities.

**T**HE NEW JERSEY CONSTRUCTION REPORTER contains statistics on construction activity in New Jersey. Information in the report comes from construction officials who administer the State Uniform Construction Code (UCC) (N.J.A.C. 5:23-1 et seq.) in New Jersey's 566 municipalities.

Each month, construction officials send to the New Jersey Department of Community Affairs (DCA) reports on the permits and certificates they issue. Permits authorize the start of construction and cover four types of activity: (1) New construction permits authorize the start of a new structure. (2) Permits for additions refer to work that will add space (volume and square feet) to an existing building. (3) Alterations also involve existing structures, but the work authorized will not add space. Typically, construction officials issue permits for alterations when the work is subject to one or more of the UCC's major subcodes (building, electrical, plumbing, fire protection). (4) Demolition permits authorize the removal of a building or some other structure. The *CONSTRUCTION REPORTER* identifies only those demolitions that will result in the loss of housing.

In addition to permits, the *CONSTRUCTION REPORTER* has information on the certificates issued by construction officials. While permits authorize the start of construction, certificates are issued for work completed and ready for occupancy. Each month, the *CONSTRUCTION REPORTER* will report on the number of housing units and the amount of office and retail space authorized for construction, along with the number of housing units and the amount of office and retail space completed.

### **Data Comparability**

The *CONSTRUCTION REPORTER* contains information on authorized housing units that is tabulated two different ways. The DCA tabulates Tables 1 through 3 and Tables 8 through 13 based on the use of buildings, defined in "groups" by New Jersey's UCC. Exhibit B on page 3 summarizes these groups.

Tables 4, 5, and 6 show authorized housing units as defined and tabulated by the United States Census Bureau. The New Jersey Department of Labor and Workforce Development prepares these tables for publication in the *CONSTRUCTION REPORTER*. Exhibit C on page 4 describes the housing definitions used by the Census Bureau.

The DCA series and the Census Bureau series on authorized housing units differ two important ways. First, the DCA series includes housing units created as a result of permits issued to alter or make additions to existing structures. The Census Bureau counts only those housing units authorized from permits issued for new construction.

Second, the Census Bureau imputes data for localities that fail to submit monthly reports on time. An asterisk in the Census column of data appearing in the Municipal Summary Data table at the back of the *CONSTRUCTION REPORTER* indicates those towns with imputed data. The Census Bureau bases these imputations on historic trends. The DCA series shows information for only those towns that submitted monthly reports. If a municipality failed to submit a monthly report on time, "No report" appears in the appropriate columns in the Municipal Summary Data table.

### **Additional Terms**

A number of other terms appear in the tables throughout the *CONSTRUCTION REPORTER*. Exhibit A on page 2 defines additional construction permit and certificate terms.

### Residential Structures (U.S. Census Bureau Definitions)

**Tables 4, 5, and 6 show authorized housing units based on the structure types defined below by the U.S. Census Bureau. The number of units shown in these tables refers to those authorized by building permits issued for new construction only.**

**Single-Family Houses**

Include all detached one-family houses and all attached one-family houses separated by a wall that extends from ground to roof with no common heating system or inter-structural public utilities. Include prefabricated, sectionalized, panelized, and modular homes that are manufactured partially off site, but are transported and assembled at the construction site.

## NOTE:

Users of the monthly *CONSTRUCTION REPORTER* may notice that year-to-date figures in a particular issue may not be obtained by merely summing the monthly totals that appear in previous issues. This is because the construction data compiled by the New Jersey Department of Community Affairs are continuously updated. Monthly construction reports submitted too late to make the January issue of the *CONSTRUCTION REPORTER*, for example, are included in the year-to-date totals that appear in the February issue.
