Adam,

ENSP has concluded that the project (NCR39441) will not affect Northern Long-Eared Bat.

Best,

Pat

Subject: ENSP Consultation for NCR39441

Hello Mr. Woerner:

We are performing an CEST review for the referenced project site as part of the funding process under the New Jersey Economic Development Authority's Neighborhood and Community Revitalization (NCR) program - this application is identified as NCR39441. Due to the unique nature of this project, there is no centroid data for the site that returns a simple "Yes" or "No" answer for the presence of federally and state-listed T&E species.

This project does not require a land use permit.

Attached are the Natural Heritage Database records received on June 19, 2014 and a shapefile of the project area. Also attached is a map made using the NJDEP Tool, showing the part of the project area to be a habitat for northern long-eared bat.

Project Description:

The City of Long Branch is proposing streetscape improvements and storm damage repairs within Brighton Avenue Commercial District. The project is intended to address inadequate pedestrian lighting, electrical code issues, ADA crosswalks, access and drainage issues at the intersection of Second and Brighton Avenues. The project is intended to address sidewalk and safety issues for local residential and destination visitors utilizing the Commercial District.
