Classification: UNCLASSIFIED  
Caveats: NONE

Mrs. Yank,

Now that the second permit extension has been issued for the existing Department of the Army permit (CENAP-OP-R-2008-1007), I wanted to make sure that I notified you regarding any potential need to modify the existing permit. If any changes to the proposed project take place from what was previously authorized, a request to modify the permit must be submitted to the Corps. This is outlined in Special Condition 3 of the issued Department of the Army permit. You may want to discuss this with your consultant and contractor to insure that a modification request is submitted to the Corps within a timeframe that allows for sufficient review and authorization. If you have any questions regarding the need to modify the Department of the Army permit, please feel free to contact me.

Mrs. Yank,

Provided is a PDF copy of the Corps' letter that extends your existing Department of the Army permit for one additional year (new expiration date of December 31, 2015). The hard copy of the letter will be mailed to you. Please insure that you review the permit once again, and become acquainted with what it authorizes. Also be aware of all applicable permit conditions, and don't forget to send the District the notification of commencement form.

I'm currently preparing a package of documents related to your proposed project that I will send to the State, and I plan to send that early next week. I will copy you on that email so that you know it has been sent. If you have any further questions please feel free to contact me directly.
