Hi Chris,

Sorry I missed your call. Below is information from Jay Kelly on the results of his 2013 coastal surveys, including general locations of the Amaranthus plants.

I suggest you contact Jay directly if you have any questions and copy me.

Hey Bob,  
I just submitted a time sheet.

Final Results of Amaranth Survey: 3 plants (lowest of any year so far)  
1 - Keansburg (Monmouth Co)  
1 - Brigantine NA (Atlantic Co)  
1 - Pork Island WMA (Atlantic Co)  
(saw some at Sandy Hook as well, but no formal survey conducted)

Honckenya peploides at Holgate (3 plants), Little Beach (1 plant), Brigantine (<10 plants in 2 clusters), Sandy Hook (1 plant)

Polygonum glaucum at Long Branch (1 plant), Belmar (1 plant), IBSP (1 plant), Sandy Hook (2 plants)

Oenothera humifusa at all the usual places

Sesuvium maritimum at Holgate, Little Beach Island, Avalon, Brigantine, Pork Island WMA

Several other additional new coastal species populations (Carex silicea in northern LBI, Manasquan, Artemisia campestris in Mantoloking, Eupatorium coelestinum along GSP near exit 4 Wildwood, Plantago maritima at Great Bay Blvd WMA, Little Beach Island, Stone Harbor, plus a few others that I have to look further into.)

Jay

**Subject:** Endangered Plant Species Rules and List

Amendments to these rules (N.J.A.C. 7:5C) became effective on September 3, 2013 and an unofficial copy posted on the Department's rules and regulations webpage:

[http://www.nj.gov/dep/rules/nj\\_env\\_law.html](http://www.nj.gov/dep/rules/nj_env_law.html)

In addition, the Natural Heritage Program Special Plants of New Jersey web page **List of Endangered Plant Species and Plant Species of Concern**, which includes all plant species tracked by the Program, has also been updated to incorporate the revised List:

<http://www.state.nj.us/dep/parksandforests/natural/heritage/spplant.html>

Persons inquiring about the List should be directed to these web pages.

Special thanks are due to Elena and David for their critical roles in making this happen.
