	<input type="checkbox"/> Reconstruction:	<input checked="" type="checkbox"/> Within Existing Footprint, plus 2 feet		<input type="checkbox"/> Outside Existing Footprint	

Property Description:	<p>Proposed project is part of the NJDEP Blue Acres Buyout (BAB) program. As part of a larger project within Southampton Township, NJDEP proposes to acquire the property at 47 Lenape Trail in Southampton Township, Burlington County. The residential property is located along the flood-prone Rancocas Creek. Upon acquiring the property, the BAB project will remove and dispose of all man-made features including dwellings, foundations, sheds, garages, fences, and driveways. The project will leave any existing wells and/or septic systems abandoned in place and will disconnect all utilities. The property will experience limited grading, confined to the limits of past disturbance, and will be left in a stabilized condition that will support soil stability. Once cleared, the property will be permanently preserved as open space and serve as a natural buffer against future storms and flood events.</p> <p>All project-related debris removal and demolition activities would be conducted in compliance with the Federal Emergency Management Agency's (FEMA) Low Impact Debris Removal Standards. These standards are outlined in Appendix G of the <i>Statewide Programmatic Agreement among the Federal Emergency Management Agency, the New Jersey State Historic Preservation Officer, the New Jersey State Office of Emergency Management, the Advisory Council on Historic Preservation, the Absentee Shawnee Tribe of Indians of Oklahoma, the Delaware Nation, the Delaware Tribe of Indians, the Shawnee Tribe of Oklahoma, and the Stockbridge-Munsee Community of Mohicans as a Result of Hurricane Sandy</i> (2015).</p>

Reasoning:	<p>The property at 47 Lenape Trail contains two buildings—a ca. 1930 dwelling and a ca. 1970 dwelling. The ca. 1930 one-and-one-half story single-family dwelling has Tudor Revival-style characteristics. It is clad in multiple materials that include pattern brickwork, half-timbering, and uncut stone. The dwelling's façade exhibits a distinctive pattern of brickwork between the half-timbering that includes herringbone, basket weave, Flemish-bond, and Soldier-bond. The dwelling has a cross-gabled roof with asphalt shingles and rests upon a concrete pad. The dwelling has two chimneys comprised of uncut stones and brick. Windows are wood-framed, six-pane, and appear to be original.</p> <p>The ca. 1970 building is a two-story single-family dwelling with stucco, false half-timbering, and a gabled roof with asphalt shingles. The property card indicates that the building was constructed in ca. 1970; sits on a concrete foundation. The dwelling</p>

	<p>has vinyl windows and two brick chimneys. It is assumed that removal of the existing buildings and any associated grading will be limited to areas of previous disturbance.</p> <p>The United States Department of Agriculture Soil Survey (<a href="http://websoilsurvey.sc.egov.usda.gov">websoilsurvey.sc.egov.usda.gov</a>) maps one soil type within the property—Fluvaquents, loamy (FmhAt). Fluvaquents are poorly drained and frequently flooded; these soils are associated with toeslopes and the floodplain of creeks. The property is located within the floodplain of the North Branch of the Rancocas Creek. The North Branch of the Rancocas Creek is located to the immediate north. The topography within the property gradually descends from south to north towards the creek. Elevations range from 20 to 26 feet above sea level, with the lowest elevations at the northern extent of the property.</p> <p>A search of NJ GeoWeb indicates that the property is not located within an archaeological site grid as defined by the New Jersey Historic Preservation Office (NJHPO); the property is approximately 1,100 and 1,300 feet north and northeast of two NJHPO-defined Archaeological Grids. The property is also 2,200 feet northeast of the Camden and Burlington County Railroad Historic District. The district is eligible for listing in the National Register of Historic Places (National Register). There are no known historic properties within the subject locations.</p> <p>Historic maps of Burlington County indicate that a historic forerunner to present-day Route 206 had been constructed by 1859 (Kuhn and Janney 1859). The 1859 <i>Wall Map of Burlington County</i> indicates that the property was in the immediate vicinity of a tributary of the Rancocas Creek. Sporadic development was located south and west of the property. Scott's 1876 <i>Combination Atlas of Burlington County</i> also indicates that the Rancocas Creek was located in the immediate vicinity; a rail line was also located to the south. There was no development within the property. Late twentieth century topographic maps reflect that the property continued to be undeveloped. The 1930 aerial imagery indicates that a dirt road was located in vicinity of Lenape Trail. At this time, the property was undeveloped; it appeared to be a cleared parcel within wooded marshlands near the creek. By 1951, the topographic maps indicate multiple buildings north of Lenape Trail including the subject property. By 1956, Lenape Trail had been extended to its current length, although portions of it appeared to be unpaved.</p> <p>Pedestrian reconnaissance of the property was conducted to document existing conditions, identify buildings and features, and assess past disturbance. The buildings at 47 Lenape Trail are located in the northern portion of the lot. The ca. 1930 building is situated west of the second, ca. 1970 dwelling. The ca. 1930 building is situated in a small clearing surrounded by young woodlands and growth. An alignment of stone pavers forms the walkway to the building. The ca. 1970 dwelling is located in an area of dense ornamental planting; cobblestone pathways encircle the residence. No other buildings or features were identified within the property.</p> <p>A search of NJ GeoWeb indicates that the property is not located with an archaeological site grid suggesting that it is not in the vicinity of a known archaeological site. The property is also not located in proximity to any known historic properties or historic districts. The property is situated within the floodplain of the North Branch of the Rancocas Creek and is associated with frequently flooded and poorly drained soils. The historic map review found no evidence for development within the property prior to the early to mid-twentieth century. Given the lack of proximate archaeological sites and the topographic and environmental setting of the property, the area would not have been an attractive location for prehistoric settlement. There is little likelihood for prehistoric occupation within the floodplain of the creek. In addition, the proposed BAB program will restrict disturbance to areas of previous ground disturbance. Therefore, there is no potential for intact prehistoric or historic archaeological resources to be affected by the project.</p> <p>With respect to historic properties, the ca. 1930 dwelling appears to represent a unique architectural style for the area. The Tudor Revival-style dwelling has similar distinctive brickwork and character to the dwelling located at 45 Lenape Trail. Therefore, additional research is recommended to determine its potential National Register-eligibility. Potential project effects to the property will be evaluated following a reevaluation of the resource.</p> <p>The ca. 1970 dwelling is not considered a unique or distinct architectural style; it is not recommended eligible for the National Register.</p>
	<input type="checkbox"/> Recommend Ineligible:
	<input type="checkbox"/> Lacks Integrity of Materials/Design
	<input type="checkbox"/> Not 48 Years of Age
	<input type="checkbox"/> Not Within / In View of a National Register of Historic Places Listed / Eligible Historic District
<input type="checkbox"/> Not a Building (per FEMA Definition)	
<input type="checkbox"/> Other – Lacks Distinctive Characteristics That Make It Individually Eligible for Listing on NRHP
