## General Information

---

The DEP Bulletin is an information service provided by the New Jersey Department of Environmental Protection. In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Flood Hazard Area (FHA) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA).

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed do not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed on the inside back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

DEP Events of Public Interest include public hearings, council meetings, workshops, public information meetings, and exams.

<b>Narrative</b>	<p>a. The filled waters edge regulation provides that on filled waters edge sites with direct water access (i.e. sites without extensive intertidal shallows or wetlands) the water front portion shall be developed with a water dependent use or left undeveloped for future water dependent uses. The Applicant has attempted to develop the property in accordance with the Filled Waters Edge and Public Access Rules with DEPs approval and the municipality has rejected these efforts. The property is situated on a bulkheaded parcel along the water at the end of a public street. The adjoining properties are developed with a residence on one side and a marina on the other side. DEP has approved development of one single family dwelling on the property with public access to be provided by a proposed adjoining public park, but the municipality has twice denied applications for public access to be provided by way of public park. As the municipality will not approve public access at this site, the only remaining viable use of the property is private residential use, which would not conform with the public access and water dependent use requirements of the filled waters edge rule. The docks accessory to the two proposed residences would also be privately accessible only. Because the Applicant is precluded by the actions of the municipality from complying with the provisions of the filled waters edge rule and the public access requirements, this creates an undue hardship to the Applicant. Because the Applicant has exhausted efforts to develop the property in compliance with the Department Rules and based on the unique circumstances associated with this particular project, the requested waiver should be granted.</p>

Those permittees with existing small capacity cesspools who applied after May 2008 had a rolling 2 year deadline.
