Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Flood Hazard Area (FHA) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA).

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed do not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed on the inside back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

The National Auto Dealers Exchange is an existing auto auction facility with seven (7) wastewater generating buildings on-site that are connected to the wastewater treatment plant. The primary building is +80,000 sq. ft. and serves as the auto auctioning facility as well as the main offices and cafeteria. One building (49,000 sq. ft.) serves as a multi-function, office/storage/vehicle inspection area (formerly the vehicle auction/main offices building) including a decommissioned kitchen/cafeteria. Another building (20,000 sq.ft.) is used as an auto servicing and body shop facility. A fourth building (40,000 sq. ft.) houses auto reconditioning services (car wash). NADE received authorization to construct and operate an on-site wastewater treatment system to serve the 40,000 sq. ft. auto reconditioning building through NJDEP TWA No. 95-9243-4, dated 04/20/95. The fifth building (2,000 sq.ft.) is NADE's registration and security building (primarily office space). The sixth building (21,000 sq. ft.) is the Inspection Building. The seventh Building is the NADE marshalling center (70,000 sq. ft.) These buildings combined generate a total average wastewater flow of approximately 6,000 gpd with a permit limit of 8,142 GPD. The fleet and factory operations building has its own onsite treatment system and does not connect to the treatment system at this time. The facility has installed an extended aeration, nitrification/de-nitrification treatment plant which treats the wastewater prior to disposal via existing subsurface disposal fields. This treatment system serves all buildings associated with NADE's Bordentown facilities. All individual extended aeration treatment systems previously installed were converted into pumps stations only. Sufficient equalization capacity is provided in the new treatment system to handle the auction's one day peak flows. The permittee has chosen to install the pretreatment system at this time and therefore has not performed a review of any treatment system's ability to achieve and water quality standards. Two downgradient monitor wells are sampled quarterly to assess compliance with Ground Water Quality Standards.</p>
