Permit Descriptions

CAFRA - A Coastal Area Facility Act permit is required to construct residential, commercial, public, transportation, utility and energy-related facilities in the coastal area as defined by the Act.

Federal Consistency Activity: Certain federal permits, not limited to the U.S. Army Corps of Engineers Dredge and Fill Permits, require certification by the DEP prior to the issuance of the permit by the federal agency.

Flood Hazard Area: A Flood Hazard permit or verification is required for disturbances within the floodway or floodplain in areas regulated under the Flood Hazard Area Control Act.

Freshwater Wetlands: A Permit (Letters of Exemption, Letters of Interpretation, Statewide General Permit, Open Water Fill, Individual, Transition Area Waiver, Water Quality Certificate) is needed prior to engaging in a regulated activity in or around freshwater wetlands and associated transition areas. A Flood Hazard Area Permit, an U.S. Army Corps of Engineers Dredge and Fill Permit, and a Water Quality Certification may also be required.

General Groundwater Petroleum Products Cleanup: This general permit authorizes the surface water discharge of treated groundwater previously contaminated with petroleum products.

NJPDES permits: A permit is required for the discharge of pollutants to surface and groundwater, a discharge from an indirect user or the land application of municipal and/or industrial residuals. (A more comprehensive definition of activities, which require a permit, may be found at N.J.A.C. 7:14A-2.4)

Solid Waste Facility: A permit is required to conduct or operate any solid waste facility as defined under the Solid Waste Management Act, N.J.S.A. 13:1E-1 et seq., and N.J.A.C. 7:26-1 et seq.

Highlands Resource: A Highland Preservation Area Approval is required for regulated activities within the Highland Preservation Area as defined in the Highlands Water Protection & Planning Act Preservation Area Rules. Highlands Applicability Determinations verifies certain exemptions allowed by the regulations.

Tidal Wetlands: A Coastal Wetlands Permit is needed to excavate, dredge, fill or erect structures on coastal wetlands.

Treatment Works Approval: A TWA permit is required for the construction, modification or operation of a treatment works, including sanitary/industrial sewage pretreatment or treatment systems, sewage conveyance systems, sewer extensions and subsurface sewage disposal systems.

Waterfront Development: A permit is required for any project involving the development of waterfront near or upon any tidal or navigable waterway in the State.

Coastal Wetlands: A permit authorizing disturbances to Mapped Tidal Wetlands under the Wetlands Act of 1970, N.J.S.A. 13:9A”

General Information

The DEP Bulletin is an information service provided by the New Jersey Department of Environmental Protection. In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Flood Hazard Area (FHA) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA). In addition, this publication lists status of Highlands application and Highlands Applicability Determinations.

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed do not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed on the inside back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

DEP Events of Public Interest include public hearings, council meetings, workshops, public information meetings, and exams.

Appeals on Applications

Any individual who would like to appeal a decision on an application should direct their remarks to:

Office of Legal Affairs

**Notice of Public Comment Period Regarding Site Specific Water Quality Management Plan Amendment
Applications Pursuant to P.L.2013, c.188**

Notice is hereby given that the New Jersey Department of Environmental Protection (NJDEP), Division of Coastal and Land Use Planning, has received the following Water Quality Management Plan site specific amendment requests pursuant to P.L. 2013, c.188. P.L. 2013, c.188 directs the Department to accept and process certain site specific amendment proposals despite the absence of a wastewater management plan in compliance with the Water Quality Management Plan rules. Pursuant to the provisions of the Statewide Water Quality Management Planning rules (N.J.A.C. 7:15-3.4), notices of amendment proposals and the Department's subsequent final action are to be published in the New Jersey Register (NJR). In accordance with P.L. 2013, c.188, notice of site specific amendments for projects or activities having a wastewater planning flow of less than 20,000 gallons per day (gpd) or being less than 100 acres in size is to be published in the Department of Environmental Protection (DEP) Bulletin.

Notice of site specific amendment proposals for changes in sewer service area designation, which may include new or expanded wastewater treatment facilities, are individually provided below.

An appointment to review the file for any of the proposals may be arranged by calling the Division of Coastal and Land Use Planning at (609) 984-6888. The Department's file is available for inspection between 8:30 a.m. and 4:00 p.m., Monday through Friday at 401 East State Street, Trenton, New Jersey.

Interested person may submit written comments on any of the proposals. When providing comments, specify which proposal the comments are being provided for. All comments must be submitted within 30 days of the date of this public notice to the address cited below. All comments submitted prior to the close of the comment period shall be considered by the Department in reviewing the amendment request.

Interested persons may request that the Department hold a non-adversarial public hearing or extend the public comment period up to 30 additional days for any of the proposals. These requests must state the nature of the issues to be raised at the proposed hearing or state the reasons why the proposed extension is necessary. The requests must be submitted within 30 days of the date of this public notice to the address cited below. If a public hearing is held, the public comment period in this notice shall be extended to close 15 days after the public hearing.

Written comments should be submitted to:

Elizabeth Semple, Acting Director
Land Use Management
Division of Coastal and Land Use Planning
Mail Code 401-07C
PO Box 420, 401 East State Street
Trenton, New Jersey 08625-0420

Notice(s) of site specific proposals that qualify for review under P.L. 2013, c. 188 are individually provided below:

DIVISION OF COASTAL AND LAND USE PLANNING
Proposed Amendment to the Upper Raritan Water Quality Management Plan
Public Notice:
Fiddlers Elbow County Club

Take notice that the New Jersey Department of Environmental Protection (Department) is seeking public comment on a proposed amendment to the Upper Raritan Water Quality Management (WQM) Plan. This proposed amendment would modify the Somerset County/Upper Raritan Watershed Wastewater Management Plan (WMP) and the Somerset County-wide Map 3, Future Wastewater Service Area, to provide for the expansion the existing Fiddlers Elbow County Club (FECC), located on Block 36.01, Lots 1 and 1.01, Bedminster Township, Somerset County. The proposed expansion of the existing golf club is to include the construction of 2 cottages, an expanded member's clubhouse and restaurant seating, a pool complex, Golf and Tennis Pro Shops, a Golf Academy, and Cart Barn. As part of this proposed amendment, the current Somerset County/Upper Raritan WMP Facility Table 6 for the FECC on-site Sewage Treatment Plant (STP) (NJPDES #NJ0021865) is proposed to be modified to indicate that the combined existing flow, and new projected wastewater flow from the proposed expansion, of the FECC to be discharged to surface water is within the current permitted maximum flow value of 0.030 million gallons per day (mgd).

This proposed amendment has been reviewed in accordance with the Water Quality Management Planning rules at N.J.A.C. 7:15 and P.L. 2011, c.203, amended and supplemented by P.L. 2013, c. 188. This preliminary notice represents the Department's determination that the proposed amendment is in compliance with the regulatory criteria.

To accommodate the expanded and new facilities, this proposed amendment would provide for an adjustment of the existing approved sewer service area of the FECC STP to contain only the existing and proposed new wastewater generating structures, including the proposed two guest cottages, the pool house, and exercise area, Golf and Tennis Pro Shops, ,Golf Academy, and Cart Barn.

In accordance with N.J.A.C. 7:15-5.24(b), environmentally sensitive areas have been assessed to determine what areas are appropriately included in the proposed sewer service area. Pursuant to N.J.A.C. 7:15-5.24, environmentally sensitive areas are defined as contiguous areas of 25 acres or larger, alone or in combination, consisting of habitat for threatened and endangered species as identified on the Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species (Landscape Project), Natural Heritage Priority Sites, Category One (C1) special water resource protection areas, and wetlands. These environmentally sensitive areas are not included in the proposed sewer service area except as noted below.

In accordance with N.J.A.C. 7:15-5.24(b)1, to determine areas designated as threatened or endangered species habitat, the Department utilized the Landscape Project, version 3.1. A review of the Landscape Project indicated that the project location is identified as threatened and endangered species habitat for the Bobolink. However, pursuant to N.J.A.C. 7:15-5.26, a habitat suitability determination was performed by the Department which found that the current conditions at this project location are not suitable for this grassland bird species.

In accordance with N.J.A.C. 7:15-5.24(b)2 through 4, (c), and (d), no portion of the proposed SSA for the development on site is identified as within a Natural Heritage Priority Site, a special water resource protection area along a Category One water, wetlands or associated buffer, coastal planning area, coastal resource, or an environmentally sensitive area limited by Federal 201 grant restrictions.

The FECC is currently served by an on-site Sewage Treatment Plant (STP) (NJPDES #NJ0021865). That NJPDES permit, reissued by the Department in October 1, 2004, indicates a three-day maximum wastewater flow value of 0.030 mgd. At the time, this figure was based upon a design flow criteria pursuant to N.J.A.C. 7:14A-23.3 that applies 35 gallons per day (gpd) per capita use of facilities at non-residential clubs. Employing this standard, the design wastewater flow for the FECC STP was projected to account for 225 patrons for the clubhouse dining seating, 28 employees attributed to a maintenance building, plus a maximum of 600 golfers per day, yielding a total of 853 persons utilizing the club facilities on an average peak weekend. The design flow of for a three day peak, therefore, was calculated to be (35 gpd x 853) 29,855 gpd. This volume was rounded to 30,000 gpd and applied to develop the effluent limitations in the issued NJPDES permit.

In accordance with N.J.A.C. 7:15-5.25(h)1, a build-out analysis was conducted to identify future projected flow for all new proposed wastewater generating structures and/or activities that would result due to the expansion at the FECC. The proposed new development at the FECC will consist of an expanded existing club house to increase the dining by 125 seats to accommodate up to 350 members and guests, two guest cottages, a swimming pool area and exercise room, a 5,100 square foot (sq. ft.) Golf and Tennis Pro Shop, a 1,122 sq. ft. Golf Academy, and an expanded maintenance staff from 28 to 40. Application of the appropriate criteria at N.J.A.C. 7:14A-23.3 for these various new wastewater generating activities results in a projected wastewater flow of 9,397 gpd.

In addition, due to the anticipated increase in member use resulting from the expanded recreational and eating facilities, the future rounds of golf at the course was projected to increase by 450 rounds. As part of the proposed project, FECC has indicated that at the current membership golf outings yielded an average maximum peak of approximately 150 golf rounds.

As more recent data regarding wastewater generated by golf course activity has become available, the Department now applies more appropriate projected flow of 15 gpd per golf round based on activities at recreational parks and picnic areas, as provided under N.J.A.C. 7:14A-23.3. Therefore, the flow projected from the increased 450 golf rounds is 6,750 gpd. Consequently the total projected wastewater flow as result from all expanded and new facilities and golf rounds is projected to be 16,147 gpd.

In accordance with N.J.A.C. 7:15-5.25(h)2, an analysis was performed to assess the existing and future wastewater treatment needs for the FECC STP. The existing wastewater flow for this wastewater treatment plant was calculated based on the average of the monthly metered flow from August 2012 through July 2013 as reported to the Department in the Discharge Monitoring Reports (DMRs) received from this STP. The existing flow from the FECC calculated for this period is 5,158 gpd. The total projected wastewater flow that would result from all expanded and new facilities and golf rounds is projected to be 16,147 gpd. The total projected wastewater flow for the existing, expanded, and new facilities and golf rounds is 21,305 gpd. Therefore, the proposed project is within the current permitted wastewater flow of 30,000 gpd to the on-site STP. As such no expansion to this STP is necessary at this time.

In accordance with N.J.A.C. 7:15-5.25(h)3, the Department evaluated the water supply availability for the proposed project. Water for sanitary and potable purposes at the FECC is supplied by three wells located on site. Well 2 provides water for the maintenance building; Well 3 is the main well for the clubhouse; and Well 1 is a backup well for the clubhouse. Each of the three wells is permitted to withdraw approximately 50,000 gpd. To provide potable and sanitary water to the new proposed development, the project will utilize these privately owned permitted wells associated with activity conducted at the FECC parcels. As the proposed wastewater treatment system is permitted to discharge up to 30,000 gpd discharge effluent, the water supply analysis determined that the onsite water supply for the onsite wells would be sufficient to supply the future needs.

The proposed project is located within the Highlands Planning Area. In accordance N.J.A.C 7:15-3.10 the Department shall not approve a WQM Plan amendment for a project proposed in the Highlands Planning Area without first seeking comments from the Highlands Council (Council). To this end, the applicant was directed by the Department to provide the Council a copy of the proposed amendment application and all supporting documentation with a cover letter formally requesting a review of the amendment proposal and to provide the Department with recommendations, if any.

In response to the request for recommendations, the Department received correspondence from the Council dated April 14, 2014 indicating that the proposed project is located in a HUC-14 subwatershed identified in the Highlands Regional Master Plan (RMP) as having a water supply deficit. The Council calculated that the increased water demand, supplied by on-site wells, would exacerbate the deficit of net water availability as an additional consumptive use. Therefore, the Council deemed the proposed project inconsistent with policies of the RMP. To address the water supply deficit, as required by the RMP, the proposed project would need to develop a plan to mitigate the projected consumptive loss by a factor of 125%. Based on the proposed wastewater flow projections for the new facilities at the FECC, the Council calculated a mitigation target of 2,018 gpd. However, it was recommended the applicant be allowed to coordinate with the Council to determine if a more appropriate targeted mitigation value was warranted and to develop a plan to mitigate the agreed upon target. The Council suggested that the mitigation plan entail a combination of an increase in groundwater recharge and permanent water conservation techniques.

On May 6th, 2014 the Council notified the Department that to resolve the RMP inconsistency, the site design engineer for the proposed project submitted additional information, including actual discharged flow data for the previous 5 years, supporting a revised projected consumptive water demand. Consequently, the Council agreed to a new revised mitigation target of 533 gpd and to work with the engineer to prepare a mitigation plan to off-set this value. The mitigation plan proposed by the applicant's design engineer included enhanced groundwater recharge methods beyond those required pursuant to the stormwater management regulations combined with an architectural design plan for the installation of low flow plumbing fixtures for all new proposed building structures and to retrofit 5 fixtures (toilets, urinals, and/or showers) within existing buildings with new higher-efficiency components to offset the consumptive use.

Subsequently, the applicant proposed a revised architectural design plan for municipal approval for the replacement of the five existing 5 toilets with high efficiency water use fixtures, and documented that additional increased groundwater recharge was previously approved as part of the on-site stormwater management design plans. On May 8, 2014, the applicant submitted to the Council a copy of the Toilet Replacement Plan, prepared by JGA Architectural Design. As a result, in a letter dated May 19, 2014 the Council advised the Department that these actions satisfied the mitigation requirement and deemed the proposed project in compliance and consistent with the RMP.

To demonstrate compliance with non-point source pollution control pursuant to N.J.A.C 7:15-5.25(h)4, the Department confirmed that the Township of Bedminster Somerset County, New Jersey has adopted a stormwater control ordinance (Ord. #05-40, §2) in accordance with N.J.A.C. 7:8. Therefore, a review for compliance with the Stormwater Management rules is required to be conducted under the township's authority. Consequently, the requirements of N.J.A.C. 7:15-5.25(g)1 for stormwater control have been satisfied.

To demonstrate compliance with non-point source pollution control pursuant to N.J.A.C 7:15-5.25(h)5, the Department has confirmed that no new development is proposed within a riparian zone.

To demonstrate compliance with non-point source pollution control pursuant to N.J.A.C 7:15-5.25(h)6, the Department has confirmed that no portion of the proposed development is located within a steep slope.

Approval of this amendment does not eliminate the need for any permits, approvals or certifications required by any Federal, State, County or municipal review agency with jurisdiction over this project/activity.

This notice is being provided to inform the public that a plan amendment has been proposed for the Upper Raritan WQM Plan. All information relating to the WQM Plan and the proposed amendment is located at the Department, Division of Coastal and Land Use Planning, 401 East State Street, P.O. Box 420, Mail Code 401-07C, 401 East State Street, Trenton, N.J. 08625-0420. The Department's file is available for inspection between 9:00 a.m. and 4:00 p.m., Monday through Friday. An appointment to inspect the documents may be arranged by calling the Division of Coastal and Land Use Planning at (609) 984-6888.

Interested persons may submit written comments on the amendment to WQM Program Docket, Division of Division of Coastal and Land Use Planning at the Department address cited above with a copy sent to Mr. Robert C. Moschello, P.E, Gladstone Design, Inc. Consulting Engineers, 265 Main Street, P.O. Box 400, Gladstone, New Jersey 07934. All comments must be submitted within 30 days of the date of this published notice, or the date that notice is provided in a local newspaper, whichever occurs later. All comments submitted prior to the close of the comment period shall be considered by the Department in reviewing the amendment request.

Interested persons may request in writing that the Department hold a non-adversarial public hearing on the amendment or extend the public comment period in this notice up to 30 additional days. These requests must state the nature of the issues to be raised at the proposed hearing or state the reasons why the proposed extension is necessary. These requests must be submitted within 30 days of the date of this notice to WQM Program Docket at the Department address cited above. If a public hearing for the amendment is held, the public comment period in this notice shall be extended to close 15 days after the public hearing.

NEW JERSEY DEPARTMENT OF ENVIRONMENTAL PROTECTION

BUREAU OF COASTAL AND LAND USE COMPLIANCE AND ENFORCEMENT

NOTICE OF INTENT TO SETTLE A FRESHWATER WETLANDS VIOLATION

PLEASE TAKE NOTICE THAT THE DEPARTMENT OF ENVIRONMENTAL PROTECTION intends to settle an enforcement action pertaining to the below site and responsible party for violations of the Freshwater Wetlands Protection Act pursuant to N.J.S.A. 13:9B-21.j.

**NEW JERSEY DEPARTMENT OF ENVIRONMENTAL PROTECTION
DIVISION OF REMEDIATION MANAGEMENT AND
OPERATIONS ELEMENT**

PUBLIC NOTICE

Notice is hereby given that the New Jersey Department of Environmental Protection (Department), Site Remediation and Waste Management, proposes to issue the following New Jersey Pollutant Discharge Elimination System permit actions in accordance with N.J.S.A. 58:10A-1 et seq. and N.J.A.C. 7:14A-1 et seq.

The permit action prepared by the Department is based on the administrative record which is on file at the offices of the Department, Site Remediation Program, located at 401 East State Street in the City of Trenton, Mercer County, New Jersey. It is available for inspection, by appointment, Monday through Friday, between 8:30 A.M. and 4:00 P.M. Appointment for inspection may be requested through the Open Public Records Act. Details are online at www.nj.gov/dep/opra, or call (609) 341-3121. Appointments for inspection of the NJPDES file only or requests for a copy of the draft document (at a nominal charge) may be made by calling Central File at (609) 292-0400.

Comments on the draft document or a request that the Department holds a non-adversarial public hearing must be submitted in writing to the person specified below and shall be postmarked within 30 days of the date of this public notice. All persons, including the applicant, who believe that any condition set forth in this document is inappropriate, must raise all reasonable issues and submit all arguments and factual materials supporting their position by the close of the public comment period. Any request for a hearing shall state the nature of the issues to be raised. A public hearing will be conducted whenever the Department determines that there is a significant degree of public interest in the permit decision. If a public hearing is held, the public comment period shall automatically be extended to the close of the public hearing.

The Department will consider and respond to all significant and timely comments. The applicant and each person who has submitted written comments will receive notice of Department's final decision.

Written comments should be submitted to:

Wayne Howitz
Operations Element
PO Box 028
Trenton, NJ 08625

**NEW JERSEY DEPARTMENT OF ENVIRONMENTAL PROTECTION
DIVISION OF WATER QUALITY
PUBLIC NOTICE**

Notice is hereby given that the New Jersey Department of Environmental Protection (NJDEP) proposes to issue the following New Jersey Pollutant Discharge Elimination System (NJPDES) permit actions in accordance with N.J.A.C. 7:14A-1 et seq. and by authority of N.J.S.A. 58:10A-1 et seq. The description of each proposed permit action is contained in the accompanying table.

This public notice has been prepared for these facilities as part of the administrative record to be filed at NJDEP, 401 East State Street, Trenton. Copies of the draft document are obtainable, for a nominal charge, and the administrative record is available for inspection by appointment only, Monday through Friday, by contacting the NJDEP file room at (609) 292-0400. Additional information regarding the draft document may be obtained from the contact person listed in the accompanying table.

Comments on the draft document or a request that NJDEP hold a non-adversarial public hearing on the document must be submitted, in writing, to the individual specified below (refer to the accompanying table for the appropriate permitting bureau) during the public comment period, which closes either:

1. 30 calendar days after publication of the last newspaper notice when a notice is published in the DEP Bulletin *and* a newspaper(s); or
2. 30 calendar days after publication of the DEP Bulletin notice when a notice is published in the DEP Bulletin *only*.

All persons, including permittees who believe that any condition of NJDEP's tentative decision to issue these permit actions is inappropriate must raise all reasonable issues of concern and submit all arguments and factual materials supporting their position during the public comment period. Any request for a public hearing shall state the nature of the proposed issues to be raised in the hearing. A public hearing will be conducted if NJDEP determines there is a significant degree of public interest. If a public hearing is held, the public comment period is automatically extended through the close of the hearing.

NJDEP will consider and respond to all significant and timely submitted comments. The permittee and each person who submitted written comments, will receive notice of NJDEP's final decision to issue, revoke or redraft the document.

Written comments should be submitted to the appropriate permitting bureau:

COLONIAL PIPELINE CO WOODBURY JUNCTION NJ0033952 DST	696 Mantua Grove Rd West Deptford Twp, NJ 08066 Gloucester County	Kerri Standowski Bureau of Nonpoint Pollution Control (609)633-7021	Little Mantua Creek FW2-NT(C2) Mantua Creek	Stormwater Discharge Renewal Permit Action The above named applicant has applied for a New Jersey Pollutant Discharge Elimination System (NJPDES) permit renewal to the New Jersey Department of Environmental Protection (NJDEP), Bureau Nonpoint Pollution Control. The applicant is classified under the Standard Industrial Classification (SIC) 4613, Petroleum pipelines, refined. The existing permit regulates stormwater discharges to the Little Mantua Creek, classified as FW2-NT(C2). The renewal permit proposes to remove monitoring location DSN002A.
PENN JERSEY BUILDING MATERIALS CO INC NJ0120995 DGW	Fire Rd & Rail Rd Egg Harbor Twp, NJ 08232 Atlantic County	Mike Pigliacelli Bureau of Nonpoint Pollution Control (609)633-7021	Cape May II-A	Ground Water New Permit Action This facility is a ready-mixed concrete plant/Class B recycling facility which discharges stormwater runoff from industrial areas to on-site, unlined infiltration/percolation lagoons. Water quality is monitored at three (3) outfalls to the two (2) lagoons, and ground water monitoring wells surrounding the lagoon located on the western side of the facility are also sampled to ensure compliance with Ground Water Quality Standards (GWQS).
ALLAMUCHY ELEMENTARY SCHOOL NJ0108481 DGW	20 Johnsonburg Rd Allamuchy, NJ 07820 Warren County	Mike Pigliacelli Bureau of Nonpoint Pollution Control (609)633-7021	Glacial Till II-A	Ground Water Renewal Permit Action The facility is an existing elementary school, with a maximum student population of 450 students. The school includes student and teacher bathrooms, a janitor closet, kitchen/cafeteria, and a science lab room. An on-site wastewater treatment plant manages all sanitary wastewater flows generated by the facility
WAWA FOOD MARKET & GASOLINE SALES NJ0170330 DGW	631 Rt 322 Aka Mullica Hill Rd Mullica Hill, NJ 08062 Gloucester County	Keith Howell Bureau of Nonpoint Pollution Control (609)633-7021	Bridgeton II-A	Ground Water Renewal Permit Action WAWA Food Store and Gasoline Pump Station located in Harrison Twp., Gloucester County, has applied for a renewal NJPDES-DGW permit. This facility consists of a 16 pump refueling station and a 5,940 square foot food store. All sanitary waste generated at this location will be treated by an on-site waste water treatment system which is designed for 4,000 gallon per day discharge to a 4,300 square foot subsurface disposal bed.
