Specific Decision Application Codes

O = Other

REG = HMDC/Pinlands Exemption

Permit Descriptions

CAFRA - A Coastal Area Facility Act permit is required to construct residential, commercial, public, transportation, utility and energy-related facilities in the coastal area as defined by the Act.

Coastal Permit: A permit or an authorization issued under this chapter pursuant to CAFRA, the Wetlands Act of 1970, N.J.S.A. 13:9A-1 et seq., or the Waterfront Development Law, N.J.S.A. 12:5-3.

Coastal Wetlands: A permit authorizing disturbances to Mapped Tidal Wetlands under the Wetlands Act of 1970, N.J.S.A. 13:9A”

Federal Consistency Activity: Certain federal permits, not limited to the U.S. Army Corps of Engineers Dredge and Fill Permits, require certification by the DEP prior to the issuance of the permit by the federal agency.

Flood Hazard Area: A Flood Hazard permit or verification is required for disturbances within the floodway, floodplain or riparian zone in areas regulated under the Flood Hazard Area Control Act.

Freshwater Wetlands: A Permit (Letters of Exemption, Letters of Interpretation, Statewide General Permit, Open Water Fill, Individual, Transition Area Waiver, Water Quality Certificate) is needed prior to engaging in a regulated activity in or around freshwater wetlands and associated transition areas.

General Groundwater Petroleum Products Cleanup: This general permit authorizes the surface water discharge of treated groundwater previously contaminated with petroleum products.

NJPDES permits: A permit is required for the discharge of pollutants to surface and groundwater, a discharge from an indirect user or the land application of municipal and/or industrial residuals. (A more comprehensive definition of activities, which require a permit, may be found at N.J.A.C. 7:14A-2.4)

Solid Waste Facility: A permit is required to conduct or operate any solid waste facility as defined under the Solid Waste Management Act, N.J.S.A. 13:1E-1 et seq., and N.J.A.C. 7:26-1 et seq.

Highlands Resource: A Highland Preservation Area Approval is required for regulated activities within the Highland Preservation Area as defined in the Highlands Water Protection & Planning Act Preservation Area Rules. Highlands Applicability Determinations verifies certain exemptions allowed by the regulations.

Tidal Wetlands: A Coastal Wetlands Permit is needed to excavate, dredge, fill or erect structures on coastal wetlands.

Treatment Works Approval: A TWA permit is required for the construction, modification or operation of a treatment works, including sanitary/industrial sewage pretreatment or treatment systems, sewage conveyance systems, sewer extensions and subsurface sewage disposal systems.

Waterfront Development: A permit is required for any project involving the development of waterfront near or upon any tidal or navigable waterway in the State.

General Information

The DEP Bulletin is an information service provided by the New Jersey Department of Environmental Protection. In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Flood Hazard Area (FHA) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA). In addition, this publication lists status of Highlands application and Highlands Applicability Determinations.

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed do not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed on the inside back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

DEP Events of Public Interest include public hearings, council meetings, workshops, public information meetings, and exams.

Appeals on Applications

Any individual who would like to appeal a decision on an application should direct their remarks to:

**Notice of Public Comment Period Regarding Site Specific Water Quality Management Plan Amendment
Applications Pursuant to P.L.2013, c.188**

Notice is hereby given that the New Jersey Department of Environmental Protection (NJDEP), Office of Water Resource Management Coordination, has received the following Water Quality Management Plan site specific amendment requests pursuant to P.L. 2011, C.203 (amended by P.L. 2013, c.188.) directs the Department to accept and process certain site specific amendment proposals despite the absence of a wastewater management plan in compliance with the Water Quality Management Plan rules. Pursuant to the provisions of the Statewide Water Quality Management Planning rules (N.J.A.C. 7:15-3.4), notices of amendment proposals and the Department's subsequent final action are to be published in the New Jersey Register (NJR). In accordance with P.L. 2013, c.188, notice of site specific amendments for projects or activities having a wastewater planning flow of less than 50,000 gallons per day (gpd) or being less than 100 acres in size is to be published in the Department of Environmental Protection (DEP) Bulletin.

Notice of site specific amendment proposals for changes in sewer service area designation, which may include new or expanded wastewater treatment facilities, are individually provided below.

An appointment to review the file for any of the proposals may be arranged by calling the Office of Water Resource Management Coordination at (609) 777-4349. The Department's file is available for inspection between 8:30 a.m. and 4:00 p.m., Monday through Friday at 401 East State Street, Trenton, New Jersey.

Interested person may submit written comments on any of the proposals. When providing comments, specify which proposal the comments are being provided for. All comments must be submitted within 30 days of the date of this public notice to the address cited below. All comments submitted prior to the close of the comment period shall be considered by the Department in reviewing the amendment request.

Interested persons may request that the Department hold a non-adversarial public hearing or extend the public comment period up to 30 additional days for any of the proposals. These requests must state the nature of the issues to be raised at the proposed hearing or state the reasons why the proposed extension is necessary. The requests must be submitted within 30 days of the date of this public notice to the address cited below. If a public hearing is held, the public comment period in this notice shall be extended to close 15 days after the public hearing.

Written comments should be submitted to:

Colleen Kokas, Director
Office of Water Resource Management Coordination
Mail Code 401-02A
PO Box 420, 401 East State Street
Trenton, New Jersey 08625-0420

Notice(s) of site specific proposals that qualify for review under P.L. 2013, c. 188 are individually provided below:

**NEW JERSEY DEPARTMENT OF ENVIRONMENTAL PROTECTION
OFFICE OF WATER RESOURCES MANAGEMENT COORDINATION
Proposed Amendment to the Mercer County Water Quality Management Plan
Public Notice:
Hamilton Senior Living**

Take notice that the New Jersey Department of Environmental Protection (Department) is seeking public comment on a proposed amendment to the Mercer County Water Quality Management (WQM) Plan. This amendment proposal, entitled “Hamilton Senior Living”, submitted on behalf of Columbia/Wegman Acquisitions LLC, would expand the Hamilton Township Water Pollution Control Facility (HTWPCF) sewer service area (SSA) by 7.64 acres to allow for the construction of a 134 bed senior living facility with 1,263 sq. ft. of office space. The proposed project site is located in Hamilton Township, Mercer County on a portion of Block 2173, Lot 22 on Yardville – Hamilton Square Road just south of its intersection with Klockner Road.

This proposed amendment has been reviewed in accordance with the Water Quality Management Planning rules at N.J.A.C. 7:15 as modified by P.L 2013, c.188. This preliminary notice represents the Department’s determination that the proposed amendment is in compliance with the regulatory criteria pursuant to N.J.A.C. 7:15-5.24 and 5.25

In accordance with N.J.A.C. 7:15-5.24, environmentally sensitive areas (ESA’s) have been assessed to determine what areas of the proposed project site are appropriate for inclusion in the SSA. Pursuant to N.J.A.C. 7:15-5.24(b), ESAs are defined as contiguous areas of 25 acres or larger consisting of habitat for threatened and endangered species as identified on the Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, Natural Heritage Priority Sites, Category One (C1) special water resource protection areas, and wetlands, alone or in combination. No such ESA’s are included in the proposed SSA.

In accordance with N.J.A.C. 7:15-5.24(b)1, to identify areas designated as threatened or endangered species habitat, the Department utilized the Division of Fish and Wildlife’s Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, version 3.1. Areas identified by the Landscape Project as being suitable habitat for threatened and endangered species Ranks 3 (State threatened), 4 (State endangered), and 5 (Federal endangered or threatened) are not to be included in proposed SSAs except as provided under N.J.A.C. 7:15-5.24(e) – (h). Review of the proposed project site has determined that no threatened or endangered species habitat exists on site.

In accordance with N.J.A.C. 7:15-5.24(b)2, areas mapped as Natural Heritage Priority Sites are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e) – (h). Review of the project site has determined that no Natural Heritage Priority Sites exist on site.

In accordance with N.J.A.C. 7:15-5.24(b)3, areas identified as special water resource protection areas along Category One waters and their tributaries are not to be included in SSA’s, except as provided under N.J.A.C. 7:15-5.24(e) – (h). The Department has determined that no special water resource protection areas along Category One waters or tributaries exist on the site.

In accordance with N.J.A.C. 7:15-5.24(b)4, areas mapped as wetlands pursuant to N.J.S.A. 13:9A-1 and 13:9B-25 are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e) – (h). In accordance with N.J.A.C. 7:15-5.24(e)2, a Freshwater Wetlands Letter of Interpretation: Line Verification File # 1103-15-0003.1 FWW150001 was provided, confirming the extent of wetlands and transition areas on the site. The provisions at N.J.A.C 7:15-5.24(b)4, have been satisfied by the exclusion of both the mapped wetlands and associated 50 foot transition areas from the proposed SSA.

Pursuant to N.J.A.C. 7:15-5.24(c), certain coastal planning areas, not applicable here, must also be excluded from SSA. Specifically, there are no Coastal Fringe Planning Areas, Coastal Rural Planning Areas, or Coastal Environmentally Sensitive Areas on the project site.

Pursuant to N.J.A.C. 7:15-5.24(d)1, areas with Federal 201 grant limitations that prohibit the extension of sewers into specified environmentally sensitive areas are excluded from the SSA. Pre-existing grant conditions and requirements (from Federal and State grants or loans for sewerage facilities), which provide for restriction of sewer service to environmentally sensitive areas, are unaffected by adoption of this amendment and compliance is required.

In addition to the environmentally sensitive areas with Federal 201 grant limitations there are other special restricted areas, not applicable here, which must also be excluded from SSA pursuant to N.J.A.C. 7:15-5.24(d)2 through 4. Specifically, there are no beaches, coastal high hazard areas, or dunes on the project site.

In accordance with N.J.A.C. 7:15-5.25(h)1, the projected wastewater flow of the project is to be evaluated. However, P.L. 2013, c.188 allows the Department to approve the inclusion of land within a sewer service area notwithstanding that existing treatment works may not currently have the assured capacity to treat wastewater from such land without infrastructure improvements or permit modifications. Therefore amendments to expand a sewer service area may be approved if such actions are compliant with the applicable sections of the WQM Planning rules (N.J.A.C. 7:15) regardless of whether capacity has been fully assessed. Currently the HTWPCF (NJ0098922) is permitted to discharge up to 16 Million Gallons per day (MGD). Based on an average of the monthly average flow for the most recent twelve month period for which discharge monitoring data is available, the existing wastewater flow discharged from the HTWPCF was calculated to be 8.45 MGD. The projected wastewater flow for the proposed new development, calculated in accordance with N.J.A.C. 7:14A-23.3 is 13,516 (gpd).

In accordance with N.J.A.C. 7:15-5.25(h)3 the water supply need for the proposed project has been evaluated. Water supply for the proposed development will be provided by the Trenton Water Works (TWW) (PWSID No. 1111001). The TWW is a public water system which withdraws water from the Delaware River. The TWW has diversion privileges set by water allocation permit 5187 for a total supply of 1350 Million Gallons per Month (MGM) and currently has a water supply surplus of 203.715 MGM. The proposed water demand of the project, calculated in accordance with N.J.A.C. 7:15-5.25(f)1i, is 0.935 MGM; therefore sufficient water supply is currently available to serve the proposed development within the existing water allocation permit.

In accordance with N.J.A.C. 7:15-5.25(h)4, a project or activity's stormwater management is to be evaluated. However, P.L. 2013, c. 188 directs that there is a presumption that an engineered subdivision or site plan is not required. Without such information a review and determination of compliance with the Stormwater Management rules (N.J.A.C. 7:8) is not possible. The municipal governments are responsible for review and implementation of the Stormwater Management rules during their review and approval of proposed development. Hamilton Township has an adopted stormwater management ordinance (No.05-037); see N.J.A.C. 7:8-4. Hamilton Township is also required to implement the N.J.A.C. 7:8 requirements incorporated in the Residential Site Improvement Standards; see N.J.A.C. 5:21-7.

In accordance with N.J.A.C. 5.25(h)5, riparian zones are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.25(h)i –vii. A riparian zone of a Pond Run tributary has been identified on the property. Riparian zones or buffers are established along all surface waters, based on the surface water body's classification designated in the Surface Water Quality Standards at N.J.A.C. 7:9B, under the following regulations: the Flood Hazard Area Control Act Rules, the Stormwater Management rules, and the Water Quality Management Planning rules. The required buffer width for the Pond Run Tributary, which is designated FW2-NT, is 50 feet. While a Flood Hazard Area Verification application, File No. 1103-15-0003.1 FHA150001 is currently under review by the Department, the riparian buffer and flood hazard area are not located within the proposed sewer service area. The provisions at N.J.A.C. 7:15-5.25(h)5i, have been satisfied by the exclusion of the riparian corridor and associated 50 foot buffer to the applicable portions of the Pond Run Tributary from the proposed SSA.

In accordance with N.J.A.C. 7:15-5.25(h)6, proposed development disturbance is not to be located in areas with steep slopes, defined as any slope equal to or greater than 20 percent. There are no steep slopes on the subject site.

Additional issues which may need to be addressed include, but are not limited to, compliance with stormwater regulations, antidegradation, effluent limitations, water quality analysis, and exact locations and designs of future treatment works. Additionally, sewer service to any particular project is subject to contractual allocations between municipalities, authorities and/or private parties, and is not guaranteed by this amendment.

Approval of this amendment does not eliminate the need for any permits, approvals or certifications required by any Federal, State, County or municipal review agency with jurisdiction over this project/activity.

This notice is being given to inform the public that a plan amendment has been proposed for the Mercer County WQM Plan. All information related to the WQM Plan and the proposed amendment is located at the Department, Office of Water Resources Management Coordination, 401 East State Street, P.O. Box 420, Mail Code 401-02A, 401 East State Street, Trenton, N.J. 08625-0420. The Department's file is available for inspection between 9:00 a.m. and 4:00 p.m., Monday through Friday. An appointment to inspect the documents may be arranged by calling the Office of Water Resources Management Coordination at (609) 777-4349.

A public hearing, as required by Mercer County's adopted amendment procedures, will be held by the Mercer County Department of Planning for the proposed amendment on November 12, 2015, at 9:00 A.M. in the McDade Administration Building, Freeholder Meeting Room 211, 640 South Broad Street, Trenton, NJ.

Interested persons may submit written comments on the proposed amendment to WQM Program Docket, at the Department address cited above, with a copy sent to the Secretary, Mercer County Planning Board, P O Box 8068, Trenton, NJ 08650-0068 and to Ms. Sue Brasefield, Maser Consulting, 331 Newman Springs Road – Suite 203, Red Bank, NJ 07701. All comments should reference Program Interest No. 435452, Activity No. AMD150002 and must be submitted within 15 days following the public hearing. All comments submitted prior to the close of the comment period shall be considered by the Department and the Mercer County Department of Planning in reviewing the amendment request.

Proposed Amendment to the Ocean County Water Quality Management Plan

Public Notice:

Route 70 Townhouses

Take notice that the New Jersey Department of Environmental Protection (Department) is seeking public comment on a proposed amendment to the Ocean County Water Quality Management (WQM) Plan. This amendment proposal, entitled "Route 70 Townhouses", submitted on behalf of 3085 Route 571 Manchester Associates LLC, would expand the Ocean County Utilities Authority (OCUA) Central Water Pollution Control Facility (WPCF) sewer service area (SSA) by 3.1 acres to allow for the construction of a proposed townhouse development.

The proposed project site is located in Manchester Township, Ocean County on a portion of Block 52/Lot 2 near the intersection of Ridgeway Road (Route 571) and State Highway 70. This amendment would allow for the construction of 38 three-bedroom townhouse units and 2 two-bedroom townhouse units. The entire proposed development is for 82 units, however, 42 of these units are in the presently adopted SSA in adjacent lots and are not the subject of this proposed amendment. An application for a Coastal Area Facility Review Act (CAFRA) individual permit, No. 1518-06-0001.2 CAF150001, is currently under review by the Department's Division of Land Use Regulation (DLUR).

This proposed amendment has been reviewed in accordance with the Water Quality Management Planning rules at N.J.A.C. 7:15 as modified by P.L. 2013, c.188. This preliminary notice represents the Department's determination that the proposed amendment is in compliance with the regulatory criteria pursuant to N.J.A.C. 7:15-5.24 and 5.25.

In accordance with N.J.A.C. 7:15-5.24, environmentally sensitive areas (ESA's) have been assessed to determine what areas of the proposed project site are appropriate for inclusion in the SSA. Pursuant to N.J.A.C. 7:15-

5.24(b), ESAs are defined as contiguous areas of 25 acres or larger consisting of habitat for threatened and endangered species as identified on the Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, Natural Heritage Priority Sites, Category One (C1) special water resource protection areas, and wetlands, alone or in combination. These ESA's are not included in the proposed SSA except as noted below.

In accordance with N.J.A.C. 7:15-5.24(b)1, to identify areas designated as threatened or endangered species habitat, the Department utilized the Division of Fish and Wildlife's Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, version 3.1. Areas identified by the Landscape Project as being suitable habitat for threatened and endangered species Ranks 3 (State threatened), 4 (State endangered), and 5 (Federal endangered or threatened) are not to be included in proposed SSAs except as provided under N.J.A.C. 7:15-5.24(e) – (h). Review of the proposed project site has determined that a portion was identified as Rank 4 Timber Rattlesnake habitat in Landscape Project version 3.1.

On October 25, 2013 the Department received a Habitat Suitability Determination application (HSD), prepared by Trident Environmental Consultants. The HSD application was submitted in accordance with the provisions at N.J.A.C. 7:15-5.26. This section of the Water Quality Management Planning Rules describes the information that must be submitted by an applicant in order for the Department to re-evaluate the finding that a site is constrained for threatened and endangered species habitat. The Department concurred with the application's finding that the site's habitat was not of great significance in maintaining timber rattlesnake populations in the area.

In accordance with N.J.A.C. 7:15-5.24(b)2, areas mapped as Natural Heritage Priority Sites are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e) – (h). Review of the proposed project site has determined that no Natural Heritage Priority Sites exist on site.

In accordance with N.J.A.C. 7:15-5.24(b)3, areas identified as special water resource protection areas along Category One waters and their tributaries are not to be included in SSA's, except as provided under N.J.A.C. 7:15-5.24(e) – (h). The Department has determined no special water resource protection areas along Category One waters or their tributaries exist on the site.

In accordance with N.J.A.C. 7:15-5.24(b)4, areas mapped as wetlands pursuant to N.J.S.A. 13:9A-1 and 13:9B-25 are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e) through (h). In accordance with N.J.A.C. 7:15-5.24(e)2, a Letter of Interpretation (LOI): Line Verification, file No. 1518-06-0001.1 FWW130001, issued by DLUR on April 17, 2014 was provided, confirming the extent of wetlands and transition areas on the site. An application for a Transition Area Waiver Averaging Plan, No. 1518-06-0001.1 FWW150001 FWTW1 is currently under review by DLUR. As per the above referenced Flood Hazard & Riparian Zone Verification Map, a portion of the transition area and the area proposed for the transition area waiver averaging plan are located in the presently adopted sewer service area that is not the subject of this amendment. The provisions of N.J.A.C. 7:15-5.24(b)4, have been satisfied by the exclusion of both the mapped wetlands and associated 50 foot transition area from the proposed SSA.

Pursuant to N.J.A.C. 7:15-5.24(c), certain coastal planning areas, not applicable here, must also be excluded from SSA. Specifically, there are no Coastal Fringe Planning Areas, Coastal Rural Planning Areas, or Coastal Environmentally Sensitive Areas on the project site.

Pursuant to N.J.A.C. 7:15-5.24(d)1, areas with Federal 201 grant limitations that prohibit the extension of sewers into specified environmentally sensitive areas are excluded from the SSA. Pre-existing grant conditions and requirements (from Federal and State grants or loans for sewerage facilities), which provide for restriction of sewer service to environmentally sensitive areas, are unaffected by adoption of this amendment and compliance is required.

In addition to the environmentally sensitive areas with Federal 201 grant limitations there are other special restricted areas, not applicable here, which must also be excluded from SSA pursuant to N.J.A.C. 7:15-5.24(d)2 through 4. Specifically, there are no beaches, coastal high hazard areas, or dunes on the project site.

In accordance with N.J.A.C. 7:15-5.25(h)1, the projected wastewater flow of the project is to be evaluated. However, P.L. 2013, c.188 allows the Department to approve the inclusion of land within a sewer service area notwithstanding that existing treatment works may not currently have the assured capacity to treat wastewater from such land without infrastructure improvements or permit modifications. Therefore amendments to expand a sewer service area may be approved if such actions are compliant with the applicable sections of the WQM Planning rules (N.J.A.C. 7:15) regardless of whether capacity has been fully assessed. Currently the OCUA Central WPCF (NJ0029408) is permitted to discharge up to 32 Million Gallons per Day (MGD) of treated wastewater to the Atlantic Ocean. Based on an average of the monthly average flow for the most recent twelve month period for which discharge monitoring data is available, the existing wastewater flow discharged from the OCUA Central WPCF was calculated to be 20.82 MGD. The projected wastewater flow for the proposed new development, calculated in accordance with N.J.A.C. 7:14A-23.3 is 11,850 (gpd).

In accordance with N.J.A.C. 7:15-5.25(h)3 the water supply need for the proposed project has been evaluated. Water supply for the proposed development will be provided by the Manchester Township Water Utility (PWSID No. 1518005) which is a public water system which withdraws water from the Kirkwood-Cohansey and the Upper Potomac Raritan Magothy aquifers. The Manchester Township Water Utility has diversion privileges set by water allocation permit 5043 for a total supply of 145 Million Gallons per Month (MGM) and currently has a water supply surplus of 19.120 MGM. The proposed water demand of the project, calculated in accordance with N.J.A.C. 7:15-5.25(f)1i, is 0.016 MGM; therefore sufficient water supply is currently available to serve the proposed development within the existing water allocation permit.

In accordance with N.J.A.C. 7:15-5.25(h)4, a project or activity's stormwater management is to be evaluated. However, P.L. 2013, c. 188 directs that there is a presumption that an engineered subdivision or site plan is not required. Without such information a review and determination of compliance with the Stormwater Management rules (N.J.A.C. 7:8-4) is not possible. The municipal governments are responsible for review and implementation of the Stormwater Management rules during their review and approval of proposed development. Manchester Township has an adopted stormwater management ordinance (No. 08-012, 013); see N.J.A.C. 7:8-4. Manchester Township is also required to implement the N.J.A.C. 7:8 requirements incorporated in the Residential Site Improvement Standards; see N.J.A.C. 5:21-7.

In accordance with N.J.A.C. 5.25(h)5, riparian zones are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.25(h)i –vii. A riparian zone of the Ridgeway Branch (FW2-NT) has been identified on the property. Riparian zones or buffers are established along all surface waters, based on the surface water body's classification designated in the Surface Water Quality Standards at N.J.A.C. 7:9B, under the following regulations: the Flood Hazard Area Control Act Rules, the Stormwater Management rules, and the Water Quality Management Planning rules. The required buffer width for this section of the Ridgeway Branch is 150 feet due to the presence of acid producing soils. A Flood Hazard Area Verification Approval (No. 1518-06-0001.2 FHA140001) was obtained from the DLUR on December 15, 2014, and the Flood Hazard & Riparian Zone Verification Map that is part of the above mentioned approval depicts 150 foot riparian buffers. The provisions at N.J.A.C 7:15-5.25(h)5i, have been satisfied by the exclusion of the riparian corridor and associated 150 foot buffer from the proposed SSA.

In accordance with N.J.A.C. 7:15-5.25(h)6, proposed development disturbance is not to be located in areas with steep slopes, defined as any slope equal to or greater than 20 percent. There are no steep slopes on the subject site.

Additional issues which may need to be addressed include, but are not limited to, compliance with stormwater regulations, antidegradation, effluent limitations, water quality analysis, and exact locations and designs of future treatment works. Additionally, sewer service to any particular project is subject to contractual allocations between municipalities, authorities and/or private parties, and is not guaranteed by this amendment.

Approval of this amendment does not eliminate the need for any permits, approvals or certifications required by any Federal, State, County or municipal review agency with jurisdiction over this project/activity.

This notice is being given to inform the public that a plan amendment has been proposed for the Ocean County WQM Plan. All information related to the WQM Plan and the proposed amendment is located at the Department, Office of Water Resources Management Coordination, 401 East State Street, P.O. Box 420, Mail Code 401-02A, 401 East State Street, Trenton, N.J. 08625-0420. The Department's file is available for inspection between 9:00 a.m. and 4:00 p.m., Monday through Friday. An appointment to inspect the documents may be arranged by calling the Office Water Resources Management Coordination at (609) 777-4349.

Interested persons may submit written comments on the proposed amendment to WQM Program Docket, at the Department address cited above, with copies sent to Mr. David McKeon, Ocean County Department of Planning, P.O. Box 2191, Toms River, NJ 08754-2191 and Ms. Jessica Staszewski, FWH Associates, 1856 Route 9, Toms River, NJ 08755. All comments should reference Program Interest No. 435448, Activity No. AMD150002 and must be submitted within 30 days of the date of this public notice. All comments submitted prior to the close of the comment period shall be considered by the Department in reviewing the amendment proposal.

Interested persons may request in writing that the Department hold a non-adversarial public hearing on the amendment or extend the public comment period in this notice up to 30 additional days. These requests should reference Program Interest No. 435448, Activity No. AMD150002 and must state the nature of the issues to be raised at the proposed hearing or state the reasons why the proposed extension is necessary. These requests must be submitted within 30 days of the date of this notice to WQM Program Docket at the Department address cited above. If a public hearing for the amendment is held, the public comment period in this notice shall be extended to close 15 days after the public hearing.

**Proposed Amendment to the Upper Raritan Water Quality Management Plan
Public Notice:**

Ryland Residential Development

Take notice that the New Jersey Department of Environmental Protection (Department) is seeking public comment on a proposed amendment to the Upper Raritan Water Quality Management (WQM) Plan. This amendment proposal, entitled "Ryland Residential Development", submitted on behalf of Ryland Developers LLC, would expand the Readington-Lebanon Sewerage Authority (RLSA) sewer service area (SSA) by 12.06 acres to allow for the construction of 21 single family homes. The proposed amendment site is located in Readington Township, Hunterdon County on a portion of Block 14, Lot 29.02 at the intersection of Old Highway 28 and Clark Lane. The entire proposed development is for 39 single family homes, however, 18 of these homes are in the presently adopted SSA in an adjacent lot and are not the subject of this proposed amendment. This proposed amendment has been reviewed in accordance with the Water Quality Management Planning rules at N.J.A.C. 7:15 as modified by P.L 2013, c.188. This preliminary notice represents the Department's determination that the proposed amendment is in compliance with the regulatory criteria pursuant to N.J.A.C. 7:15-5.24 and 5.25.

In accordance with N.J.A.C. 7:15-5.24, environmentally sensitive areas (ESA's) have been assessed to determine what areas of the proposed project site are appropriate for inclusion in the SSA. Pursuant to N.J.A.C. 7:15-5.24(b), ESAs are defined as contiguous areas of 25 acres or larger consisting of habitat for threatened and endangered species as identified on the Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, Natural Heritage Priority Sites, Category One (C1) special water resource protection areas, and wetlands, alone or in combination. No such ESA's are included in the proposed SSA.

In accordance with N.J.A.C. 7:15-5.24(b)1, to identify areas designated as threatened or endangered species habitat, the Department utilized the Division of Fish and Wildlife's Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, version 3.1. Areas identified by the Landscape Project as being suitable habitat for threatened and endangered species Ranks 3 (State threatened), 4 (State endangered), and 5 (Federal endangered or threatened) are not to be included in proposed SSAs except as provided under N.J.A.C. 7:15-5.24(e) – (h). Review of the proposed project site has determined that no threatened or endangered species habitat exists on site.

In accordance with N.J.A.C. 7:15-5.24(b)2, areas mapped as Natural Heritage Priority Sites are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e) – (h). Review of the project site has determined that no Natural Heritage Priority Sites exist on site.

In accordance with N.J.A.C. 7:15-5.24(b)3, areas identified as special water resource protection areas along Category One waters and their tributaries are not to be included in SSA's, except as provided under N.J.A.C. 7:15-5.24(e) – (h). The Department has determined that no special water resource protection areas along Category One waters or their tributaries exist on the site.

In accordance with N.J.A.C. 7:15-5.24(b)4, areas mapped as wetlands pursuant to N.J.S.A. 13:9A-1 and 13:9B-25 are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e) – (h). In accordance with N.J.A.C. 7:15-5.24(e)2, Letter of Interpretation; Presence/Absence Determination File # 1022-03-0005.1, FWW030001 issued by the Department's Division of Land Use Regulation on August 7, 2003 was provided, confirming that freshwater wetlands and waters are not present on the property and that no part of the above referenced property occurs within a transition area or buffer as designated in N.J.A.C. 7:7A-2.59d) and (e). The above mentioned approval remains valid under the Permit Extension Act at N.J.A.C. 7:1B until June 30, 2016. The provisions of N.J.A.C. 7:15-5.24(b)4, have been satisfied as there are no wetlands or transition areas within the proposed SSA.

Pursuant to N.J.A.C. 7:15-5.24(c), certain coastal planning areas, not applicable here, must also be excluded from SSA. Specifically, there are no Coastal Fringe Planning Areas, Coastal Rural Planning Areas, or Coastal Environmentally Sensitive Areas on the project site.

Pursuant to N.J.A.C. 7:15-5.24(d)1, areas with Federal 201 grant limitations that prohibit the extension of sewers into specified environmentally sensitive areas are excluded from the SSA. Pre-existing grant conditions and requirements (from Federal and State grants or loans for sewerage facilities), which provide for restriction of sewer service to environmentally sensitive areas, are unaffected by adoption of this amendment and compliance is required.

In addition to the environmentally sensitive areas with Federal 201 grant limitations there are other special restricted areas, not applicable here, which must also be excluded from SSA pursuant to N.J.A.C. 7:15-5.24(d)2 through 4. Specifically, there are no beaches, coastal high hazard areas, or dunes on the project site.

In accordance with N.J.A.C. 7:15-5.25(h)1, the projected wastewater flow of the project is to be evaluated. However, P.L. 2013, c.188 allows the Department to approve the inclusion of land within a sewer service area notwithstanding that existing treatment works may not currently have the assured capacity to treat wastewater from such land without infrastructure improvements or permit modifications. Therefore amendments to expand a sewer service area may be approved if such actions are compliant with the applicable sections of the WQM Planning rules (N.J.A.C. 7:15) regardless of whether capacity has been fully assessed. Currently the RLSA STP (NJ0098922) is permitted to discharge up to 0.8 Million Gallons per Day (MGD). Based on an average of the monthly average flow for the most recent twelve month period for which discharge monitoring data is available, the existing wastewater flow discharged from the RLSA STP was calculated to be 0.63 MGD. The projected wastewater flow for the proposed new development, calculated in accordance with N.J.A.C. 7:14A-23.3 is 6,300 (gpd).

In accordance with N.J.A.C. 7:15-5.25(h)3 the water supply need for the proposed project has been evaluated. Water supply for the proposed development will be provided by the New Jersey American Water Company-Raritan System (NJAWRS) (PWSID No. 2004002). NJAWRS is a public water system which withdraws water from the Raritan River, Millstone River and Delaware and Raritan canal. The NJAWRS has diversion privileges set by water allocation permit 5033 for a total supply of 6761.5 Million Gallons per Month (MGM) and currently has a water supply surplus of 979.264 MGM. The proposed water demand of the project, calculated in accordance with N.J.A.C. 7:15-5.25(f)1i, is 0.77 MGM; therefore sufficient water supply is currently available to serve the proposed development within the existing water allocation permit.

In accordance with N.J.A.C. 7:15-5.25(h)4, a project or activity's stormwater management is to be evaluated. However, P.L. 2013, c. 188 directs that there is a presumption that an engineered subdivision or site plan is not required. Without such information a review and determination of compliance with the Stormwater Management rules (N.J.A.C. 7:8) is not possible. The municipal governments are responsible for review and implementation of the Stormwater Management rules during their review and approval of proposed development. Readington Township has an adopted stormwater management ordinance (No.7-Nov); see N.J.A.C. 7:8-4. Readington Township is also required to implement the N.J.A.C. 7:8 requirements incorporated in the Residential Site Improvement Standards; see N.J.A.C. 5:21-7.

In accordance with N.J.A.C. 5.25(h)5, riparian zones are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.25(h)i –vii. Riparian zones or buffers are established along all surface waters, based on the surface water body's classification designated in the Surface Water Quality Standards at N.J.A.C. 7:9B, under the following regulations: the Flood Hazard Area Control Act Rules, the Stormwater Management rules, and the Water Quality Management Planning rules. In accordance with N.J.A.C. 7:15-5.25(h)5, the proposed project site is not located in a riparian zone.

In accordance with N.J.A.C. 7:15-5.25(h)6, proposed development disturbance is not to be located in areas with steep slopes, defined as any slope equal to or greater than 20 percent. There are no steep slopes on the subject site.

Additional issues which may need to be addressed include, but are not limited to, compliance with stormwater regulations, antidegradation, effluent limitations, water quality analysis, and exact locations and designs of future treatment works. Additionally, sewer service to any particular project is subject to contractual allocations between municipalities, authorities and/or private parties, and is not guaranteed by this amendment.

Approval of this amendment does not eliminate the need for any permits, approvals or certifications required by any Federal, State, County or municipal review agency with jurisdiction over this project/activity.

This notice is being given to inform the public that a plan amendment has been proposed for the Upper Raritan WQM Plan. All information related to the WQM Plan and the proposed amendment is located at the Department, Office of Water Resources Management Coordination, 401 East State Street, P.O. Box 420, Mail Code 401-02A, 401 East State Street, Trenton, N.J. 08625-0420. The Department's file is available for inspection between 9:00 a.m. and 4:00 p.m., Monday through Friday. An appointment to inspect the documents may be arranged by calling the Office of Water Resources Management Coordination at (609) 777-4349.

Interested persons may submit written comments on the proposed amendment to WQM Program Docket, at the Department address cited above, with a copy sent to Mr. Stephen Dalton, Giordano, Halleran & Ciesla, 125 Half Mile Road – Suite 300, Red Bank, NJ 07701-6777. All comments should reference Program Interest No. 435434, Activity No. AMD150007 and must be submitted within 30 days of the date of this public notice. All comments submitted prior to the close of the comment period shall be considered by the Department in reviewing the amendment proposal.

Interested persons may request in writing that the Department hold a non-adversarial public hearing on the amendment or extend the public comment period in this notice up to 30 additional days. These requests should reference Program Interest No. 435434, Activity No. AMD150007 and must state the nature of the issues to be raised at the proposed hearing or state the reasons why the proposed extension is necessary. These requests must be submitted within 30 days of the date of this notice to WQM Program Docket at the Department address cited above. If a public hearing for the amendment is held, the public comment period in this notice shall be extended to close 15 days after the public hearing.

**New Jersey Department of Environmental Protection
Water Resources
Office of Water Resource Management Coordination
Mail Code 401-02A
PO Box 420, 401 East State Street
Trenton, New Jersey 08625-0420**

**Notice Regarding Adoption of Site Specific Water Quality Management Plan Amendment Applications
pursuant to P.L.2013, c.188**

Notice is hereby given that the New Jersey Department of Environmental Protection (NJDEP), Office of Water Resource Management Coordination, has adopted the following Water Quality Management Plan site specific amendment requests pursuant to P.L. 2011, C.203 (amended by P.L. 2013, c.188) which was enacted on January 15, 2014. This legislation modifies some aspects of the Water Quality Management Planning Program for a period of two years. P.L. 2013, c.188 directs the Department to accept and process certain site specific amendment proposals despite the absence of a wastewater management plan in compliance with the Water Quality Management Plan rules. Pursuant to the provisions of the Statewide Water Quality Management Planning rules (N.J.A.C. 7:15-3.4), notices of amendment proposals and the Department's subsequent final action are to be published in the New Jersey Register (NJR). In accordance with P.L. 2013, c.188, notice of adoption of site specific amendments for projects or activities having a wastewater planning flow of less than 50,000 gallons per day (gpd) or being less than 100 acres in size is to be published in the Department of Environmental Protection (DEP) Bulletin.

Notice(s) of adoption of site specific amendment(s) for changes in sewer service area designation, which may include new or expanded wastewater treatment facilities, are individually provided below:

**OFFICE OF WATER RESOURCES MANAGEMENT (WRM) COORDINATION
Adopted Amendment to the Ocean County Water Quality Management Plan
Public Notice:**

Congregate Care Center

Take notice that on 9/9/15 pursuant to the provisions of the New Jersey Water Quality Planning Act, N.J.S.A. 58:11A-1 et seq., and the Statewide Water Quality Management Planning rules (N.J.A.C. 7:15-3.4), an amendment to the Ocean County WQMP was adopted by the Department of Environmental Protection (Department). This amendment proposal, entitled "Congregate Care Center", submitted on behalf of Hovcare of Brick, expands the Ocean County Utilities Authority sewer service area (SSA) by 6.82 acres. The proposed project site is located in Lakewood Township, Ocean County on Block 1587/Lot 1. This amendment has been reviewed in accordance with the Water Quality Management Planning rules at N.J.A.C. 7:15 and P.L 2013, c.188. This notice represents the Department's determination that the proposed amendment is in compliance with the regulatory criteria pursuant to N.J.A.C. 7:15.

As outlined at N.J.A.C. 7:15-5.24(a), sewer service may only be provided to areas that are not identified as environmentally sensitive areas (ESAs), Coastal Fringe, Coastal Rural and Coastal Environmentally Sensitive Planning Areas, beaches, coastal high hazard areas, and dunes.

Pursuant to N.J.A.C. 7:15-5.24(b), ESAs are defined as contiguous areas of 25 acres or larger consisting of habitat for threatened and endangered species as identified on the Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, Natural Heritage Priority Sites, Category One (C1) special water resource protection areas, and wetlands, alone or in combination. These areas are not included in the proposed SSA.

In accordance with N.J.A.C. 7:15-5.24(b)1, to determine areas designated as threatened or endangered species habitat, the Department utilized the Division of Fish and Wildlife's Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, version 3.1. Areas identified by the Landscape Project as being suitable habitat for threatened and endangered species Ranks 3 (State threatened) , 4 (State endangered),

and 5 (Federal endangered or threatened) are not to be included in proposed SSAs except as provided under N.J.A.C. 7:15-5.24(e) – (h), or unless a site has undergone a site specific Habitat Suitability Determination prepared in accordance with N.J.A.C. 7:15-5.26 that found the site to be not suitable habitat, or pursuant with N.J.A.C. 7:15-5.24(g)2, the Department determined the ESA is not critical to a population of endangered or threatened species the loss of which would decrease the likelihood of the survival or recovery of the identified species. Review of the proposed project site has determined that a portion was identified as Rank 3 habitat for the following species in Landscape Project version 3.1: Snowy Egret, Glossy Ibis, Tri Colored Heron, Black Crowned Night Heron, Little Blue Heron, and Great Blue Heron.

On April 1, 2013 the Department received a Habitat Suitability Determination application (HSD), prepared by Trident Environmental Consultants. The HSD application was submitted in accordance with the provisions at N.J.A.C. 7:15-5.26. This section of the Water Quality Management Planning Rules describes the information that must be submitted by an applicant in order for the Department to re-evaluate the finding that a site is constrained for threatened and endangered species habitat. The Department concurred with the application's finding that the site was too fragmented and disturbed to provide suitable breeding habitat for the species of concern and that forging opportunities for all species were non-existent due to the disturbed nature of the onsite stream corridor and overall lack of suitable prey species.

In accordance with N.J.A.C. 7:15-5.24(b)2, areas mapped as Natural Heritage Priority Sites are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e) – (h). Review of the project site has determined that no Natural Heritage Priority Sites exist on site.

In accordance with N.J.A.C. 7:15-5.24(b)3, areas identified as special water resource protection areas along Category One waterways and their tributaries are not to be included in SSA's, except as provided under N.J.A.C. 7:15-5.24(e) – (h). The Department has determined there are no special water resource protection areas along Category One waters on the site.

In accordance with N.J.A.C. 7:15-5.24(b)4, areas mapped as wetlands pursuant to N.J.S.A. 13:9A-1 and 13:9B-25 are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e) – (h). In accordance with N.J.A.C. 7:15-5.24(e)2, Letter of Interpretation: Line Verification File # 1514-05-0002.1, FWW050001 re-issued by the Department on June 29, 2005 was submitted to the Department, confirming that the extent of wetlands and transition area are accurately delineated on the proposed project activity site. The above mentioned approval remains valid under the Permit Extension Act at N.J.A.C. 7:1B until June 30, 2016. The provisions at N.J.A.C 7:15-5.24(b)4, have been satisfied by the exclusion of both the mapped wetlands and associated 50-foot buffer areas from the proposed SSA.

Pursuant to N.J.A.C. 7:15-5.24(c), certain coastal planning areas, not applicable here, must also be excluded from SSA. Specifically, there are no Coastal Fringe Planning Areas, Coastal Rural Planning Areas, or Coastal Environmentally Sensitive Areas on the project site.

In accordance with N.J.A.C. 7:15-5.24(d)1, areas with Federal 201 grant limitations that prohibit the extension of sewers are excluded from the adopted SSA either where local mapped information exists delineating these areas, or through a narrative description where mapping does not exist, except as provided under N.J.A.C. 7:15-5.24(f)1. Pre-existing grant conditions and requirements (from Federal and State grants or loans for sewerage facilities), which provide for restriction of sewer service to environmentally sensitive areas, are unaffected by adoption of these amendments.

In accordance with N.J.A.C. 7:15-5.24(d)1, there are other special restricted areas, which must also be excluded from SSA pursuant to N.J.A.C. 7:15-5.24(d)2 through 4. None of those special restricted areas are applicable here. Specifically, there are no beaches, coastal high hazard areas, or dunes on the project site.

In accordance with N.J.A.C. 7:15-5.25(h)1, the projected wastewater flow of the project has been evaluated. The Department has determined that the OCUA Northern Wastewater Pollution Control Facility has adequate available capacity to treat the proposed wastewater flow from the lot should it be developed in accordance with existing zoning regulations. Currently the OCUA Northern WPCF (NJ0028142) is permitted to discharge up to

32 Million Gallons per day (MGD) of treated wastewater to the Atlantic Ocean. Based on an average of the monthly average flow for the most recent twelve month period for which discharge monitoring data is available, the existing wastewater flow discharged from the OCUA Northern WPCF was calculated to be 22.67 MGD.

In accordance with N.J.A.C. 7:15-5.25(h)3 the water supply need for the proposed project has been evaluated. Water supply for any proposed development on the property will be provided by the Lakewood Township Municipal Utilities Authority which withdraws water from the Englishtown, Raritan, and Cohansey aquifers. The water allocation permit number is WAP100002. The existing water allocation permit will not require modification to serve the proposed project. It is currently permitted under PWSID No. 1514002 to allocate 200 million gallons per month (MGM) and has a water supply surplus of 21.307 MGM.

In accordance with N.J.A.C. 7:15-5.25(h)4, a project or activity's stormwater management is to be evaluated. However, P.L. 2013, c. 188 directs that there is a presumption that an engineered subdivision or site plan is not required. Without such information a review and determination of compliance with the Stormwater Management rules (N.J.A.C. 7:8) is not possible. The county and local governments are responsible for review and implementation of the Stormwater Management rules during their review and approval of proposed development. Lakewood Township has an adopted stormwater management ordinance (No.2006-22) which complies with the performance standards of the Stormwater Management Rules at N.J.A.C. 7:8.

In accordance with N.J.A.C. 5.25(h)5, riparian zones are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.25(h)i –vii. Riparian zones or buffers are established along all surface waters, based on the surface water body's classification designated at N.J.A.C. 7:9B, under the following regulations: the Flood Hazard Area Control Act Rules, the Stormwater Management rules, and the Water Quality Management Planning rules. A riparian zone has been identified on the proposed project site as a tributary to the Long Causeway Branch (FW2-NT/SE1) and runs through the middle of the property. The required buffer width for Long Causeway Branch is 50 feet. In accordance with N.J.A.C. 7:15-5.25(h)5i, the Riparian Corridor Analysis has been satisfied by applying a 50 foot buffer to the applicable portions of the Long Causeway Branch tributary, and the exclusion of the buffer area from the proposed SSA.

In accordance with N.J.A.C. 7:15-5.25(h)6, proposed development disturbance is not to be located in areas with steep slopes, defined as any slope greater than 20 percent. There are no steep slopes on the subject site.

This amendment proposal was noticed in the DEP bulletin on June 17, 2015 at Volume 39, Issue 12, pages 18-21 and no comments were received during the comment period.

This amendment represents only one part of the permit process and other issues may need to be addressed prior to final permit issuance. Additional issues which may need to be addressed may include, but are not limited to, the following: compliance with stormwater regulations; antidegradation; effluent limitations; water quality analysis; exact locations and designs of future treatment works (pump stations, interceptors, sewers, outfalls, wastewater treatment plants); and development in wetlands, flood prone areas, designated Wild and Scenic River areas, or other environmentally sensitive areas which are subject to regulation under Federal or State statutes or rules. Additionally, sewer service to any particular project is subject to contractual allocations between municipalities, authorities and/or private parties, and is not guaranteed by this amendment.

Adopted Amendment to the Tri-County Water Quality Management Plan

Public Notice:

Woodcrest Country Club

Take notice that on **September 8, 2015**, pursuant to the provisions of the New Jersey Water Quality Planning Act, N.J.S.A. 58:11A-1 et seq., and the Statewide Water Quality Management Planning rules (N.J.A.C. 7:15-3.4), an amendment to the Tri-County Water Quality Management (WQM) Plan was adopted by the Department of Environmental Protection (Department). This amendment (PI No.: 435433; Activity No.: AMD140004), submitted on behalf of Cherry Hill Land Associates (CHLA), LLC, returns approximately 99.96 acres located on Block 528.01, Lot 11 in Cherry Hill Township, Camden County to the sewer service area (SSA) of the Camden

Municipal Utility Authority's (CCMUA) Delaware No. 1 Water Pollution Control Facility (WPCF) (#NJ0026182) and removes approximately four acres of delineated wetlands and flood hazard area within 20 acres of currently approved SSA.

This amendment was reviewed in accordance with the Water Quality Management Planning rules, N.J.A.C. 7:15-1 et seq. and P.L. 2011, c.203 as amended and supplemented by P.L. 2013, c.188, section 6(h) which allows for the consideration of an application for a WQM Plan amendment that does not propose a specific project or activity and delineates as SSA a parcel not to exceed 100 acres in size that complies with the regulatory criteria for the delineation of a sewer service area established at N.J.A.C. 7:15-5.24.

In accordance with N.J.A.C. 7:15-5.24 environmentally sensitive areas (ESAs) are assessed to determine what areas of the property are appropriate for inclusion in the proposed SSA. ESAs are defined based on a composite geographic information systems (GIS) analysis, as any contiguous area of 25 acres or larger consisting of habitat for threatened and endangered species as identified on the Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, Natural Heritage Priority Sites, Category One (C1) special water resource protection areas, and wetlands, alone or in combination, ESAs are required to be excluded from the SSA.

As identified in the previously approved Camden County Municipal Utility Wastewater Management Plan (WMP) the entirety of Block 528.01, Lot 11, an approximately 183 acre property, was within the SSA. This property is the location of the Woodcrest Country Club (WCC) and 18 hole golf course. As superseded by the Camden County Future Wastewater Service Areas (FWSA) Map, adopted on June 18 2013, approximately 20 acres of land surrounding the club house facilities were only retained as SSA. Portions of the previously approved SSA were removed pursuant to N.J.A.C. 7:15-5.24 based on the presence of wetlands as mapped by the Department's GIS analysis that indicated they were contiguous and the area was greater than 25 acres in size. The remaining SSA was removed as a result of the initial state-wide proposed draft SSA as provided by the Department to County WMP agencies participating in the WQMP planning process for use in the development of their countywide WMP.

As stated above, each WMP agency participating in the WQMP planning process was contacted by the Department via written correspondence that included an electronic copy of the GIS shapefile of a first draft of the proposed SSA. This correspondence noted that the GIS SSA mapping coverage provided was intended as the starting point from which the County should begin discussions with the municipalities to refine the draft SSA. This initial working draft supplied to the County WMP agencies removed SSA from golf course playing areas. As part of process for the development of the FWSA map, SSA could be returned to a golf playing area if a property owner, the municipality or the county requested that it be retained and if the location had underlying zoning other than for recreational uses, such as commercial or residential, and was eligible pursuant to N.J.A.C. 7:15-5.24. Although the property is currently zoned for institutional (IN) use, no such request was made during the development of the FWSA for Camden County. As a result, upon adoption of the amendment for the Camden Country FWSA map, only the 20 acre area surrounding the club house was included in the SSA.

As indicated, the proposed project property is comprised of IN zoning. The submitted application for this amendment provided only a concept plan for potential residential development on approximately 50 acres of this 183 acre property. No other development proposal was provided for the remainder of the property to be returned as SSA. Therefore, the Department determined that, as part of this amendment, no specific project activity had been presented for the entire area to be included back in the SSA. Furthermore, as describe below, the Department concluded that inclusion of the 99.96 acres as SSA to this site is compliant with N.J.A.C. 7:15-5.24(b), and as such, qualifies as an amendment under the section 6(h) of P.L 2013, c. 188.

In accordance with N.J.A.C. 7:15-5.24(b)1, to determine areas designated as threatened or endangered species habitat, the Department utilized the Division of Fish and Wildlife's Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, version Landscape Project 3.1. Areas identified by the Landscape Project as being suitable habitat for threatened and endangered species Ranks 3 (State threatened) , 4 (State endangered), and 5 (Federal endangered or threatened) are not to be included in proposed SSAs except as provided under N.J.A.C. 7:15-5.24(e)-(h). The Department determined no threatened or endangered species habitat or other priority species habitats were identified on the property.

In accordance with N.J.A.C. 7:15-5.24(b)2, areas mapped as Natural Heritage Priority Sites are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e)-(h). A site review of the property determined that no Natural Heritage Priority Sites exist on site.

In accordance with N.J.A.C. 7:15-5.24(b)3, Category One (C1) special water resource protection areas are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e)-(h). The Department determined no classified C1 water bodies exist on or near the property.

In accordance with N.J.A.C. 7:15-5.24(b)4, areas mapped as wetlands pursuant to N.J.S.A. 13:9A-1 and 13:9B-25 are not to be proposed as SSA. In accordance with N.J.A.C. 7:15-5.24(e)2, a Letter of Interpretation (LOI) file No. 0409-04-0019, dated May 30, 2014, verified the presence and extent of the regulated wetlands and associated transmittal buffers located within Block 528, Lot 11. No area identified as a regulated wetland or buffer is proposed to be returned as SSA on the property as part of this amendment. Consequently, only 99.96 acres within the approximately 183 acres are to be returned as SSA on Block 528, Lot 11. In addition, as part of this amendment, approximately four acres of delineated wetlands and flood hazard area within the 20 acres currently approved SSA has been removed.

In accordance with N.J.A.C. 7:15-5.24(d)1, areas with Federal 201 grant limitations that prohibit the extension of sewers are excluded from the proposed SSA. All other ESA as defined at N.J.A.C. 7:15-5.24(c) 1-3; lands within certain coastal planning areas (Coastal Fringe, Coastal Rural, and Coastal Environmentally Sensitive Planning Areas) are not applicable to this amendment, nor are any ESA as defined at N.J.A.C. 7:15-5.24(d)1-4; beaches, coastal high hazards area or dunes as defined under N.J.A.C.7:7E.

The preliminary notice of this amendment was published in the Department Bulletin at Volume 39, Issue 4 on February 18, 2015 and comments and statements of non-consent were received during the comment period.

On April 27, 2015, Cherry Hill Township Council adopted resolution #2015-4-23; "Opposing the application by CHLA, LLC seeking to include 140 acres on Block 528.01, Lot 11 in SSA". In addition, resolution #2015-4-23 incorporated by reference, comments and statements of objection contained in a letter dated April 28, 2015 submitted to the Department on behalf of Cherry Hill Township from Mr. Adam Zeller, Esq. The following are the specific comments within Mr. Zeller's letter opposing the proposed amendment and the Department's response to each:

1. Comment: The commenter asserts that, on procedural grounds, CHLA's application is not eligible as an amendment pursuant under P.L. 2013, c.188 section 6(h). The commenter argues that in support of a pending Mount Laurel litigation entitled Fair Share Housing Center, Inc. et. al. v. Township of Cherry Hill (Docket #L-4889-01), CHLA, in defense of a builders remedy, submitted to the court, concept plans and site plans to construct 1,080 residential housing units within the WCC property, and furthermore certified to the state superior court, that the property contains approximately 140 acres of developable lands. The commenter stressed that such court documentation confirms that WCC contains in excess of 100 acres and the application has not withdrawn its referenced to a concept site plans, and therefore, cannot seek an amendment pursuant to section 6(h) of P.L 2013, c.188.

Response: On May 21, 2014, CHLA submitted an application to the Department requesting a "site specific amendment" as defined pursuant to P.L. 2013, c.188, for a proposed project or activity to generate a wastewater planning flow of less than 50,000 gallons per day (gpd) and/or propose new sewer service area (SSA) of less than 100 acres. In response, on July 28, 2014, the Department issued a Notice of Application Incompleteness letter outlining several deficiencies to be address in order for the Department to continue its review of the submitted application as a site specific amendment pursuant to sections 6(a); (b) and (c) of P.L.2013, c. 188.

Section 6(a) of the P.L recognizes that a site specific proposal or activity may either generate less than 50,000 gpd and/ or propose less than 100 acres of SSA and must comply with the Water Quality Management planning rules. As such, the July 28, 2014 letter indicated that if the applicant wished to identify a specific project activity such as the proposed residential development and/ or development based on existing IN zoning within the 99.96 areas

of proposed SSA, wastewater flow and water supply projections calculated in accordance with N.J.A.C. 7:15-5.25 were necessary.

In addition, the Department's letter recognized that the submitted application contained only a tentative and initial concept plan for 1,080 potential residential units on approximately 50 acres within the 99.96 acres of proposed new SSA. No other development on the remaining 49.66 acres of SSA was proposed. Only the proposed residential concept plan was provided, no site specific design plans or preliminary site plans for the proposed SSA were included with the submitted application. Therefore, the July 28, 2014 letter notified the applicant that they may qualify under section 6(h) of P.L. 2013, c. 188, for the consideration of a WMQP amendment that does not propose a specific project or activity and delineates as SSA, a parcel, not to exceed 100 acres in size, provided it can be demonstrated that the parcel complies with the regulatory criteria for the delineation of a sewer service area established at N.J.A.C. 7:15-5.24.

In order to pursue this amendment under section 6(h) of P.L. 2013 c. 188, CHLA was requested to modify their submission and formally withdraw the application's reference to the proposed residential concept plan, thereby no specific flow and water supply projections would be warranted. However, the proposed 99.96 acres would need to fully comply with the regulatory criteria for the delineation of a SSA established at N.J.A.C. 7:15-5.24.

On August 6, 2014, in response to the Department's a Notice of Application Incompleteness letter, Marathon Environmental Engineers Inc., requested in writing that that all references to the proposed concept plan be withdrawn as indicated and the application be modified as an amendment reliant on section 6(h) of P.L. 2013, c.188. Upon further review the Department determined that the re-submitted application was eligible under section 6(h) of the P.L 2013, c.188 as intended under the legislation.

Of the documents referenced by the commenter presented by CHLA to the court in defense of a fair housing dispute; the concepts plans for residential housing were included in their WQMP amendment application and commented on by the Department as indicated above. While certification that the property contains approximately 140 acres of potential developable area have been submitted as part of the that legal process, the application in front of the Department merely requested that 99.96 and not 140 acres be returned as SSA. Thus the Department was obligated to act on the re-submitted application in accordance with section 6(h). As a result, the Department determined that no specific project or activity is proposed; verified the proposed SSA as presented in the application is less than 100 acres; and no environmental constrained areas as defined at N.J.A.C. 7:15-5.24 are to be placed back into the SSA. Nonetheless, the adoption of this amendment should not be construed as a position on nor an endorsement of residential housing at the WCC property.

2. Comment: The commenter contends that the Department neglected to review proposed amendment application in accordance with procedures identified at N.J.A.C. 7:15-3.4(g)2; where documentation as determined by the Department to be necessary to determined compliance with the criteria established at N.J.A.C 7:15-5.24 and 5.25 was not requested. As a result the, the analysis requirements pursuant N.J.A.C 7:15-5.25(a),(f) and (h) for a site specific amendment have not been met. Specifically, the commenter noted under N.J.A.C 7:15-5.25(a) the Department may not adopt an amendment unless compliance with the requirements in this section for existing and future wastewater treatment needs and water supply demands have been met.

Response: As noted above, in response to comment number one, this application was reviewed in accordance with section 6(h) of P.L. 2013 c. 188 for a WQMP amendment that does not propose a specific project or activity and only delineates as SSA for a parcel not to exceed 100 acres in size. It is the intent of this section that when no specific project activity is proposed, the site specific analysis applicable under the WQM planning rule at N.J.A.C. 7:15-5.25 is not required. However, for an amendment pursuant to this section, compliance with the delineation of sewer service areas at N.J.A.C. 7:15-5.24 is a prerequisite. The Department determined that this analysis has been met.

3. Comment: The commenter indicated that a review of the site plans by Remington & Vernick Engineers, on behalf of Cherry Hill Township, determined that CHLA's calculations as to the size of the acreage at the WCC are inaccurate as the amount is actually in excess of 100 acres. The commenter contends that, while CHLA has

represented to the Department that the WCC property is 99.96 acres, CHLA asserted to the Superior Court of New Jersey, in its conceptual site plans and mapping, that the WCC has a total of 137.61 acres of developable land. Furthermore, the commenter noted that CHLA's attorney submitted to the Superior Court that based upon a wetlands LOI issued by the Department on May 30, 2014, the developable acreage has increased to 140.5 acres and CHLA intends to develop entire acreage as reflected in their concept plans.

The commenter concluded that this acreage discrepancy must be resolved before the Department can properly apply the provisions of P.L. 2013, c.188, section 6(h), which requires that the land be less than 100 acres.

Response: A review of this amendment application validated that the WCC property, Block 528.01, Lot 11, is approximately 183 acres. In addition, the applicant utilized the wetlands delineation as approved by the LOI (file No. 0409-04-0019), dated May 30, 2014 to verify the extent of the regulated wetlands and associated transmittal buffers located within Block 528, Lot 11. As discussed above, in order to comply with section 6(h) of P.L. 2013, c.188 and subsequently, N.J.A.C. 7:15-5.24(b)4, no areas mapped as wetlands pursuant to N.J.S.A. 13:9A-1 and 13:9B-25 are proposed as SSA. The Department has verified that the acreage of land within Block 528.01, Lot 11 requested to be returned as SSA is 99.96 acres or a parcel that does not exceed 100 acres in size and therefore eligible pursuant to the intent of the statute in question. It is noted here that the 99.96 acres of SSA to be returned plus the existing 19 acres retained will account for approximately 116 acres of total SSA that may or may not be developed within the 189 acre WCC property if or when any local site plans and Department and CCMUA treatment works approvals are obtained.

4. Comment: The commenter stated that in preparation of the proposed amendment to a WMP, CHLA failed to, as required pursuant to N.J.A.C. 7:15-5.22(a), notify and seek comments and offer to confer with all governmental units which have wastewater and water supply jurisdiction or land use in the WMP area. The commenter stated that neither Cherry Hill Township nor Camden County was consulted during the preparation of the amendment.

Response: On June 16, 2014, CHLA provided evidence to the Department of notification of their application submittal to all affected governmental agencies in the WMP area. On June 12, 2014, correspondences sent via certified mail by Marathon Engineer & Environmental Services, Inc., on behalf of CHLA, notified municipal and county appointed officials and officers that the applicant was seeking an amendment pursuant to P.L. 2013, c.188, provided a copy of the pending amendment application, and specifically requested that they may provide comments, if any, to the Department. Included, in part, on this notification were: the Designated WQM Planning agency for this area, the Executive Director of the Delaware Valley Regional Planning Commission; Executive Director of the CCMUA; Director of Camden County Freeholders; and the Mayor of Cherry Hill.

As the applicant did request comments on the pending application from all effected governmental entities, the Department concluded that the provision in accordance with N.J.A.C. N.J.A.C. 7:15-5.22(a) to provided notification and seek comments in preparation of the proposed amendment have been met.

5. Comment: The commenter reiterated the statement contained in Cherry Hill Township Council resolution #2015-4-23 that the proposed amendment is inconsistent with the township Master Plan, zoning ordinance and its local planning objectives. The commenter objected to the potential residential use of the WCC property as proposed on the concept plans in support of the applicant fair share housing litigation as it is currently zoned for institutional uses (IN). The commenter indicted that the township is opposed to the legal effort to rezone the WCC property to residential housing as Cherry Hill Township has not included the WCC property in its Housing Element/Housing Plan filed with the court and thus the property is not required to enable the township to address its obligation under the Mt. Laurel doctrine and Fair Housing Act.

The commenter elaborated that as approved on the Camden County FWSA map, only the areas with existing development within the WCC property, the clubhouse and other accessory buildings associated with the golf course are in the SSA. The portions of the property not within the SSA are designated to be served by individual sub-surface disposal systems (ISSDS) with planning flows of 2,000 gpd or less only. As a result, the commenter stated that any future building improvements that comply with the IN zoning cannot connect to the Camden County sewer system.

Response: The inclusion of the 99.96 acres of SSA within the WCC property as provided by this amendment pursuant to section 6(h) of P.L. 2013, c. 188 does not recognized any specific type of development, institutional or otherwise. As determined by the Department, SSA returned by this amendment includes only a parcel less than 100 acres not identified as environmentally constrained as defined at N.J.A.C. 7:15-5.24. As such, the adoption of this amendment is neither a position on, nor an endorsement of residential housing on the WCC property.

Prior to adoption of the Camden County FWSA map on June 18 2013, the entire 183 acre WCC property (Block 528.01, Lot 1) was included as SSA. Therefore, it is apparent that that any development consistent with the IN zoning as recognized in the most recently adopted Cherry Hill Township Municipal Master Plan dated 2007 was intended to be served by the CCMUA. This is supported by the current adopted FWSA map which includes the existing club house and surrounding amenities on the WCC property in the SSA as they are currently connected to the CCMUA District 1 STP. In addition, all current existing residential development and lands bounding the golf course on all sides are within the CCMUA District 1 STP SSA.

On June 8, 2015, the aforementioned on-going litigation was resolved and as result a Settlement Agreement entered into by the parties, which in part, recognized that a deed of easement restricting use of the property has been entered into. Whereas, upon recording with the County of Camden, the Deed will restrict development on the WCC property in a manner that is only consistent with the current recreational and/or County Club uses. However this easement specifies the types of uses that are consistent and includes among other uses, new and expanded club house amenities such as; restaurant and banquet facilities, tennis, squash and paddle tennis courts, skating rink, horseback riding stables, swimming pools, including locker rooms, showers and bathrooms, a halfway golf course rest station and eatery, golf shop, golf cart and maintenance buildings and up to 8 cottages on the property designed for hosting weddings, events and overnight guest.

Furthermore, as provided in the easement, the development type identified would be permissible anywhere within the WCC property. Any proposed development within the WCC property to support such recreational activities/complex as described above would be more suited to be served by the available sanitary sewers currently serving this site rather than multiple ISSDS with planning flows of 2,000 gpd or less. Therefore, the return of the SSA to portions of the site not identified as environmentally constrained would be consistent with this deed restriction.

6. Comment: The commenter stated that Cherry Hill Township objects to the proposed amendment as it is inconsistent with the township planning objectives particular to the property location if 1,080 new residential units are permitted, as this would exacerbate an existing traffic problem at this location. A traffic study commissioned by the Township in April 2014 determined that the five point intersection that borders the WCC site currently operates at a failed level of service and is identified by the Delaware Valley Regional Planning Commission as an area of concern due to traffic congestion during both morning and evening peak hours.

Furthermore, commenter emphasized that section 6(h) of P.L. 2013, c. 188 specifically cites N.J.A.C. 7:15-5.24, which in part states“nothing shall preclude the WMP agency (in this case Camden County) from excluding additional areas from SSA based on local planning objectives (emphasis added), lack of wastewater treatment capacity or other environmental concerns...to that end, the objection raised by Camden County Board of Chosen Freeholders (BOCF) in its resolution (see below) which relates to traffic concerns also recognizes that these concerns adversely impacts traffic and public safety and therefore the local planning objectives in Cherry Hill Township.

Response: As part of this amendment, the WQM planning process focused on determining the extent of SSA in relation to P.L. 2013, c. 188. Approval of the project by the adoption of this amendment is based solely upon the review of all relevant information and in consideration of the requirements of the WQM planning program as pursuant to section 6(h) of P.L. 2013, c.188. Concerns of impacts and the effect on local roads due to a population increase are issues that would more appropriately be dealt with through the township and County planning process for any approval if or when the site were to gain preliminary site plan approval for a specific development project. Nonetheless as discussed above, the affordable housing litigation was concluded as of June 8, 2015 and

the settlement agreement/deed restriction provides for only additional development consistent with the current county club activities on site.

In addition to the statements of objections/comments provided by Mr. Zeller on behalf of Cherry Hill, the governing bodies of Camden County BOCF, and the CCMUA passed resolutions/ statements of non-consent on the proposed amendment.

The CCMUA Board of Commissioners, on April 20, 2015, adopted resolution #R-15:4-59 “Concerning the amendment to the Tri-County WQM plan to allow for the sewerage of the WCC property”. This resolution indicated that the CCMUA Board of Commissioners would not consent to the proposed amendment until the following stated conditions have been met: Cherry Hill Township consents to the parcel being sewerable and is willing to utilize the corresponding portion of its sewer allocation for the subject parcel and there would be no adverse environmental impacts arising from development of the parcel as per the CCMUA’s federal grant condition with the USEPA which prohibits sewerage of projects that have adverse impacts on environmental sensitive areas.

In response to the issue of CCMUA withholding consent to this amendment until Cherry Hill Township is willing to consent and agrees to utilize the corresponding portion of its sewer allocation for the subject parcel, as discussed above, no future projected flow has been identified as part of this amendment. As a result, wastewater flow projections can only be calculated at such time when preliminary site plan approval is granted by the Township through the local planning process. At that time, as required, an applicant may apply to the Department for the necessary approvals to provide for construction of the necessary treatment works to serve the approved development. Nonetheless, it is emphasized here that any recognized wastewater allocations or contracted need between Cherry Hill Township and the CCMUA are neither determined by nor enforced by the Department and are used entirely by CCMUA and the communities it serves.

In regards to the referenced grant conditions associated with their USEPA Federal 201 Grant (#C-34-708-04), listed in the Findings of No Significant Impact (FONSI), dated May 29, 1981, the FONSI identified the specific environmental sensitive areas as “mapped wetlands in accordance with the National Wetlands Inventory Maps” and/or areas within “the 100 year flood-plain (flood hazard area (FHA)) as defined by the federal Department of Housing and Urban Development”.

As indicated above in this notice, the wetlands areas as delineated based on a Department issued LOI have not been included in the SSA on the WCC parcel. In addition, the digitized Flood Insurance Rate Map (FIRM) used as the basis for floodplain management, mitigation, and insurance activities for the National Flood Insurance Program was utilized to identify the FHA within the WCC property to exclude these from the SSA. To specifically address the grant condition, a narrative description approach has been used and is noted as text on the adopted Camden County FWSA map which states: “Pre-existing grant conditions and requirements (from Federal and State grants or loans for sewerage facilities) which provide for restriction of sewer service to environmentally sensitive areas, are unaffected by adoption of this amendment and compliance is required. Compliance of this condition can only occur if and when an applicant requesting sewer service for any development on the WCC property has obtained a USEPA grant mapping waiver.

Such waivers are only issued through a formal request through the grantee, in this case the CCMUA. The request by the grantee must include the submission of wetlands verification via a Department LOI confirming that environmental sensitive areas will not be impacted if sewer conveyance systems are constructed to serve development. Since, prior to any Department and/or CCMUA approvals for the extension of sewer infrastructure to serve any proposed development will require a USEPA mapping waiver issued at the request of the grantee to served the development, the started condition in the CCMUA resolution will be satisfied at that time.

On April 16, 2015, Camden County BOCF passed a resolution opposing the placement of 140 acres (Block 528.01, Lot 1) in the SSA, stating that any residential development at the WCC property would aggravate already high traffic congestion at the intersections of County Route 561(Haddonfield-Berlin Road); County Route 678 (Somerdale Road); and County Route 544 (Evesham Road).

The applicant has requested a Water Quality Plan Amendment pursuant to legally established procedures. The issues identified by the BOCF are largely beyond the scope and authority of the WQMP process. At this time, the WQM planning process focuses on determining the extent of SSA in relation to P.L. 2013 c. 188. Concerns of impacts and the effect on local roads due to a population increase are issues that would more appropriately be dealt with through the Township and County planning process for any approval if or when the site were to request site plan approval. Approval of the SSA by the adoption of this amendment is solely based upon the review of all relevant information and in consideration of the requirements of the WQM planning program as modified by P.L. 2013, c.188. Yet, as a result of the June 8, 2015 the settlement agreement/deed restriction which provides for only development consistent with the current county club activities on site may elevate the potential for traffic congestion at this intersection that may have resulted due to high intensity residential development at the WCC property.

As detailed above, the Department has determined that the arguments and information submitted in response to the applicant's request for written statements of consent did not appear to raise substantial new questions concerning this proposed plan amendment. As such, in accordance with N.J.A.C. 7:15-3.4(g)8 and section 6(d) of P.L. 2013, c.188, the Department adopts this plan amendment as proposed.

This amendment represents only one part of the permit process and other issues may need to be addressed prior to final permit issuance. Additional issues which may need to be addressed may include, but are not limited to, the following: compliance with stormwater regulations; antidegradation; effluent limitations; water quality analysis; exact locations and designs of future treatment works (pump stations, interceptors, sewers, outfalls, wastewater treatment plants); and development in wetlands flood prone areas, designated Wild and Scenic River areas, or other environmentally sensitive areas which are subject to regulation under Federal or State statutes or rules.

Adopted Amendment to the Lower Delaware Water Quality Management Plan (WQMP)
Public Notice:
Gateway Industrial Park

Take notice that on September 9, 2015, pursuant to the provisions of the New Jersey Water Quality Planning Act, N.J.S.A. 58:11A-1 et seq., and the Statewide Water Quality Management Planning rules (N.J.A.C. 7:15-3.4), an amendment to the Lower Delaware WQMP was adopted by the Department of Environmental Protection (Department). This amendment, initiated by the Department, removes an environmentally sensitive area (ESA), specifically, bald eagle foraging habitat, from the sewer service area (SSA) on Block 29, Lot 6.10 in Oldmans Township, Salem County on a parcel that is part of the property referred to as "Gateway Business Park". The ESA which is removed from the SSA is mapped as foraging habitat for bald eagle on the Department Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species (version 3.1).

The Department reviewed current conditions at adjacent parcels that are part of the Gateway Business Park, Block 29, Lots 6.02 and 6.09, acknowledging that several permits have been issued for both parcels, including Waterfront Development, Freshwater Wetlands and Flood Hazard Area permits for the proposed developments. These permits restrict construction in the ESAs and protect bald eagle foraging habitat identified onsite. As a result, the developments were designed outside of bald eagle foraging areas. In regards to Block 29, Lot 6.10, which is currently undeveloped, but slated for development, the Department has reviewed habitat records and land use data for bald eagle, and has determined that the removal of bald eagle foraging habitat based only on the habitat identified in the Department's Landscape Project map is neither consistent with what would be approved by the Department's Land Use Permitting program, nor is it sufficiently protective of the aforementioned habitat areas.

Therefore, this amendment assigns the appropriate 300 foot buffer to the top of bank of Beaver Creek and removes this area from SSA on Lot 6.10. Removal of the bald eagle foraging habitat will ensure that approval of future development proposals would be contingent upon providing the same protections approved through the land use permitting process as witnessed on Block 29, Lots 6.02 and 6.09 for bald eagle foraging habitat.

This amendment proposal was noticed in the DEP Bulletin on June 17, 2015 at Volume 39, Issue 12 and no comments were received during the comment period.

This amendment represents only one part of the permit process and other issues may need to be addressed prior to final permit issuance. Additional issues which may need to be addressed may include, but are not limited to, the following: compliance with stormwater regulations; antidegradation; effluent limitations; water quality analysis; exact locations and designs of future treatment works (pump stations, interceptors, sewers, outfalls, wastewater treatment plants); and development in wetlands, flood prone areas, designated Wild and Scenic River areas, or other environmentally sensitive areas which are subject to regulation under Federal or State statutes or rules.

**NEW JERSEY DEPARTMENT OF ENVIRONMENTAL PROTECTION
BUREAU OF COASTAL AND LAND USE COMPLIANCE AND ENFORCEMENT
NOTICE OF INTENT TO SETTLE A FRESHWATER WETLANDS VIOLATION**

PLEASE TAKE NOTICE THAT THE DEPARTMENT OF ENVIRONMENTAL PROTECTION intends to settle an enforcement action pertaining to the below site and responsible party for violations of the Freshwater Wetlands Protection Act pursuant to N.J.S.A. 13:9B-21.j.

IN THE MATTER OF: BIALKIN BRUCE M & WHITE DENISE M
 Enforcement File # 1918-15-0004.1
 Block and Lot [33001, 24]
 Sparta Twp, Sussex County

Comments regarding this settlement or requests for a copy of the settlement should be sent to: Maria Worley, NJDEP Bureau of Coastal and Land Use Compliance and Enforcement, Highlands Office, 100 North Road, Chester New Jersey 07930 or via email at Maria.Worley@dep.nj.gov. Comments must be received by NJDEP within 30 days of this publication to be considered.

Public Notice of Intention to Extend Landfill Post-Closure Care Period

The New Jersey Department of Environmental Protection hereby issues this public notice, pursuant to N.J.A.C. 7:26-2A.9(c)6, of its intention to extend the post-closure care period for the Kinsley's Landfill located at 2025 Delsea Drive in Sewell, Gloucester County by an additional 10 years.

The subject landfill ceased operating and was closed in 1987. The closure was certified as complete and approved by the Department of Environmental Protection in 1989. The landfill has been maintained and monitored since closure during its post-closure care period, which is scheduled to end in June 2017. The Solid Waste Regulations at N.J.A.C. 7:26-2A.9(c)5 specify that landfill post-closure care periods shall continue for 30 years, but includes a provision that the post-closure care period may be extended or shortened. The Department may extend the post-closure care period upon a finding that such an extended period is necessary to protect human health and/or the environment.

The Department has determined that the Kinsley's Landfill cap, landfill gas and leachate collection systems require on-going maintenance, and the groundwater monitoring program has demonstrated the landfill is impacting groundwater quality, therefore, groundwater monitoring must continue. Based on this determination, the Department intends to extend the post-closure care period for the landfill for 10 more years.

If anyone from the public has questions or comments concerning the Department's intention to extend the post-closure care period, please send those questions or comments to the following address:

Anthony Fontana, Chief

**NOTICE OF A PUBLIC COMMENT PERIOD
ON THE PROPOSED ISSUANCE OF A PERMIT RENEWAL UNDER
THE RESOURCE CONSERVATION AND RECOVERY ACT
AND THE NEW JERSEY SOLID WASTE MANAGEMENT ACT**

The State of New Jersey, Department of Environmental Protection (NJDEP) has reviewed the hazardous waste facility permit application dated May 2015, submitted by:

Department of the Army
U.S. Army Fort Dix
Federal Enclave in Burlington County
EPA ID No.: NJ4 213 720 275

for the continued operation of a hazardous waste storage facility. The application was submitted to renew a permit that was originally issued on October 28, 2005.

THE DRAFT PERMIT

The NJDEP issues hazardous waste facility permits to regulate ongoing activities involving treatment, storage, and/or disposal of hazardous waste. The NJDEP has prepared a draft hazardous waste facility permit for U.S. Army Fort Dix for public comment. Items addressed in the draft permit and the permit application include, but are not limited to, the following:

- Strict specifications of the activities allowed under the permit
- Identification of waste types handled by the facility
- Design specifications for all approved activities and required monitoring systems
- A contingency plan
- Inspection schedules
- Closure plan

FACILITY DESCRIPTION

The Department of the Army, U.S. Army Fort Dix (Fort Dix), is a force command installation. The mission of Fort Dix is to provide for the command, administration, security services, and support of assigned and attached U.S. Army units. Furthermore, Fort Dix provides support and services to off-post units, agencies and individuals. Fort Dix also provides preparation for the support of mobilization plans and contingency operations. These activities generate waste that may exhibit any of the four characteristics of hazardous waste: ignitability, corrosivity, reactivity, and toxicity (as defined in 40 CFR 261.21 through 261.24) or are listed at 40 CFR 261.30 through 261.33. The hazardous waste facility permit issued on October 28, 2005, authorized Fort Dix to store on-site-generated hazardous and non-hazardous waste in containers at one indoor storage building designated as Building 8131.

WHERE TO OBTAIN ADDITIONAL INFORMATION

Copies of the permit application and supporting documents are available for review and copying at the NJDEP's headquarters in Trenton. Anyone interested in viewing and/or copying the permit application and supporting documents or being placed on the facility mailing list should contact:

Guy J. Watson, Chief
Bureau of Recycling & Hazardous Waste Management
Division of Solid and Hazardous Waste
New Jersey Department of Environmental Protection
401 East State Street, P.O. Box 420, Mail Code: 401-02C
Trenton, New Jersey 08625-0420
(609) 984-3438

Mr. William Flockhart is the applicant's contact person. He can be reached at (609) 754-6167 for additional information regarding the facility and the permit renewal application.

HOW TO PROVIDE YOUR COMMENTS

The public comment period on the draft permit begins today and will extend for forty-five (45) days from the date of this notice. Written comments and requests for a public hearing must be submitted to Mr. Guy J. Watson at the above address.

All comments submitted during the comment period will be considered in making the final decision on permit renewal. Should the NJDEP decide to approve the permit, a response to comments document will be issued which will identify any changes from the draft version of the permit, and describe and respond to all significant issues raised during the public comment period. A notice of the decision will be sent to each person who submits written comments or who requests such notice.

LEGAL REFERENCES FOR THIS PROPOSAL

This permit covers ongoing hazardous waste activities that are regulated by the Solid Waste Management Act (N.J.S.A. 13:1E-1, *et seq.*) on the State level and the Resource Conservation and Recovery Act (RCRA) on the Federal level.

**NEW JERSEY DEPARTMENT OF ENVIRONMENTAL PROTECTION
BUREAU OF COASTAL AND LAND USE COMPLIANCE AND ENFORCEMENT
NOTICE OF INTENT TO SETTLE A WATERFRONT DEVELOPMENT VIOLATION**

PLEASE TAKE NOTICE THAT THE DEPARTMENT OF ENVIRONMENTAL PROTECTION intends to settle an enforcement action pertaining to the below site and responsible party for violations of the Waterfront Development Act pursuant to N.J.A.C. 7:7-28.4.

IN THE MATTER OF: BRIDDA VINCENT & LINDA
 Enforcement File # 0505-13-0009.1
 Block and Lot [816, 15]
 Lower Twp, Cape May County

Comments regarding this settlement or requests for a copy of the settlement should be sent to: Larry Baier, NJDEP Bureau of Coastal and Land Use Compliance and Enforcement, 401 East State Street, Mail Code 401-04C, PO Box 420, Trenton, New Jersey 08625 or via email at larry.baier@dep.nj.gov. Comments must be received by NJDEP within 30 days of this publication to be considered.

**Notice of Public Comment Period Regarding Site Specific Water Quality Management Plan Amendment
Applications Pursuant to P.L.2013, c.188**

Notice is hereby given that the New Jersey Department of Environmental Protection (NJDEP), Office of Water Resource Management Coordination, has received the following Water Quality Management Plan site specific amendment requests pursuant to P.L. 2011, C.203 (amended by P.L. 2013, c.188.) directs the Department to accept and process certain site specific amendment proposals despite the absence of a wastewater management plan in compliance with the Water Quality Management Plan rules. Pursuant to the provisions of the Statewide Water Quality Management Planning rules (N.J.A.C. 7:15-3.4), notices of amendment proposals and the Department's subsequent final action are to be published in the New Jersey Register (NJR). In accordance with P.L. 2013, c.188, notice of site specific amendments for projects or activities having a wastewater planning flow of less than 50,000 gallons per day (gpd) or being less than 100 acres in size is to be published in the Department of Environmental Protection (DEP) Bulletin.

Notice of site specific amendment proposals for changes in sewer service area designation, which may include new or expanded wastewater treatment facilities, are individually provided below.

An appointment to review the file for any of the proposals may be arranged by calling the Office of Water Resource Management Coordination at (609) 777-4349. The Department's file is available for inspection between 8:30 a.m. and 4:00 p.m., Monday through Friday at 401 East State Street, Trenton, New Jersey.

Interested person may submit written comments on any of the proposals. When providing comments, specify which proposal the comments are being provided for. All comments must be submitted within 30 days of the date of this public notice to the address cited below. All comments submitted prior to the close of the comment period shall be considered by the Department in reviewing the amendment request.

Interested persons may request that the Department hold a non-adversarial public hearing or extend the public comment period up to 30 additional days for any of the proposals. These requests must state the nature of the issues to be raised at the proposed hearing or state the reasons why the proposed extension is necessary. The requests must be submitted within 30 days of the date of this public notice to the address cited below. If a public hearing is held, the public comment period in this notice shall be extended to close 15 days after the public hearing.

Written comments should be submitted to:

Colleen Kokas, Director
Office of Water Resource Management Coordination
Mail Code 401-02A
PO Box 420, 401 East State Street
Trenton, New Jersey 08625-0420

Notice(s) of site specific proposals that qualify for review under P.L. 2013, c. 188 are individually provided below

**NEW JERSEY DEPARTMENT OF ENVIRONMENTAL PROTECTION
OFFICE OF WATER RESOURCES MANAGEMENT COORDINATION**
Proposed Amendment to the Lower Raritan/Middlesex County Water Quality Management Plan

Public Notice:

Zell Property

Take notice that the New Jersey Department of Environmental Protection (Department) is seeking public comment on a proposed amendment to the Lower Raritan/Middlesex County Water Quality Management (WQM) Plan. This amendment proposal, entitled “Zell Property”, submitted on behalf of Industrial Property Trust, would expand the Middlesex County Utilities Authority (MCUA) sewage treatment plant (STP) sewer service area (SSA) by 39.38 acres to allow for the construction of 508,500 sq. ft. of warehouse space and 56,500 sq. ft. of office space. The proposed amendment site is located in Piscataway Township on a portion of Block 4401, Lot 8.05 at the intersection of Centennial Avenue and Old New Brunswick Road. This proposed amendment has been reviewed in accordance with the Water Quality Management Planning rules at N.J.A.C. 7:15 as modified by P.L. 2013, c.188. This preliminary notice represents the Department’s determination that the proposed amendment is in compliance with the regulatory criteria pursuant to N.J.A.C. 7:15-5.24 and 5.25.

In accordance with N.J.A.C. 7:15-5.24, environmentally sensitive areas (ESA’s) have been assessed to determine what areas of the proposed project site are appropriate for inclusion in the SSA. Pursuant to N.J.A.C. 7:15-5.24(b), ESAs are defined as contiguous areas of 25 acres or larger consisting of habitat for threatened and endangered species as identified on the Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, Natural Heritage Priority Sites, Category One (C1) special water resource protection areas, and wetlands, alone or in combination. No such ESA’s are included in the proposed SSA.

In accordance with N.J.A.C. 7:15-5.24(b)1, to identify areas designated as threatened or endangered species habitat, the Department utilized the Division of Fish and Wildlife’s Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, version 3.1. Areas identified by the Landscape Project as being suitable habitat for threatened and endangered species Ranks 3 (State threatened), 4 (State endangered), and 5 (Federal endangered or threatened) are not to be included in proposed SSAs except as provided under N.J.A.C. 7:15-5.24(e) – (h). Review of the proposed project site has determined that a portion of the site is identified as Rank 4 Bald Eagle and Great Blue Heron habitat in Landscape Project version 3.1.

On May 2015, the Department received a Habitat Suitability Determination application (HSD), prepared by Amy S. Greene Environmental Consultants. The HSD application was submitted in accordance with the provisions at N.J.A.C. 7:15-5.26. This section of the Water Quality Management Planning Rules describes the information that must be submitted by an applicant in order for the Department to re-evaluate the finding that a site is constrained for threatened and endangered species habitat. The Department concurred with the application’s finding that outside of the immediate area of the Ambrose Brook (which is not in the proposed SSA), where some suitable perch trees occur, the remaining forest/successional forest on the site does not provide additional value to foraging eagles.

In accordance with N.J.A.C. 7:15-5.24(b)2, areas mapped as Natural Heritage Priority Sites are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e) – (h). Review of the project site has determined that no Natural Heritage Priority Sites exist on site.

In accordance with N.J.A.C. 7:15-5.24(b)3, areas identified as special water resource protection areas along Category One waters and their tributaries are not to be included in SSA’s, except as provided under N.J.A.C. 7:15-5.24(e) – (h). The Department has determined that no special water resource protection areas along Category One waters or their tributaries exist on the site.

In accordance with N.J.A.C. 7:15-5.24(b)4, areas mapped as wetlands pursuant to N.J.S.A. 13:9A-1 and 13:9B-25 are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e) – (h). In accordance with N.J.A.C. 7:15-5.24(e)2, Letter of Interpretation: Line Verification Reissuance File No. 1217-02-0005.1 FWW020001 (LOI) was provided, confirming the extent of wetlands and transition areas on the site. The above mentioned approval remains valid under the Permit Extension Act at N.J.A.C. 7:1B until June 30, 2016. A freshwater wetlands transition area averaging plan waiver application under File No.1217-02-0005.1 FWW150001 FWTW1, is currently under review by the Department. The provisions of N.J.A.C. 7:15-5.24(b)4, have been satisfied as there are no wetlands within the proposed SSA as per the LOI delineation. The regulated 50 foot transition areas may be reduced consistent with buffer averaging as per the transition area averaging plan waiver currently under review.

Pursuant to N.J.A.C. 7:15-5.24(c), Coastal Fringe Planning Areas, Coastal Rural Planning Areas, and Coastal Environmentally Sensitive Areas shall be excluded from SSA. There are no such areas on the proposed site.

Pursuant to N.J.A.C. 7:15-5.24(d)1, areas with Federal 201 grant limitations that prohibit the extension of sewers into specified environmentally sensitive areas are excluded from the SSA. Pre-existing grant conditions and requirements (from Federal and State grants or loans for sewerage facilities), which provide for restriction of sewer service to environmentally sensitive areas, are unaffected by adoption of this amendment and compliance is required.

In addition to the environmentally sensitive areas with Federal 201 grant limitations there are other special restricted areas, not applicable here, which must also be excluded from SSA pursuant to N.J.A.C. 7:15-5.24(d)2 through 4. Specifically, there are no beaches, coastal high hazard areas, or dunes on the project site.

In accordance with N.J.A.C. 7:15-5.25(h)1, the projected wastewater flow of the project is to be evaluated. However, P.L. 2013, c.188 allows the Department to approve the inclusion of land within a sewer service area notwithstanding that existing treatment works may not currently have the assured capacity to treat wastewater from such land without infrastructure improvements or permit modifications. Therefore, amendments to expand a sewer service area may be approved if such actions are compliant with the applicable sections of the WQM Planning rules (N.J.A.C. 7:15) regardless of whether capacity has been fully assessed. Currently the MCUA STP (NJ0020141) is permitted to discharge up to 147 Million Gallons per Day (MGD). Based on an average of the monthly average flow for the most recent twelve month period for which discharge monitoring data is available, the existing wastewater flow discharged from the MCUA STP was calculated to be 101.69 MGD. The projected wastewater flow for the proposed new development, calculated in accordance with N.J.A.C. 7:14A-23.3 is 13,275 gallons per day (gpd).

In accordance with N.J.A.C. 7:15-5.25(h)3 the water supply need for the proposed project has been evaluated. Water supply for the proposed development will be provided by the New Jersey American Water Company-Raritan System (NJAWRS) (PWSID No. 2004002). NJAWRS is a public water system which withdraws water from the Raritan River, Millstone River and Delaware and Raritan canal. The NJAWRS has diversion privileges set by Water Allocation Permit No. 5045 for a total supply of 6761.5 Million Gallons per Month (MGM) and currently has a water supply surplus of 979.264 MGM. The proposed water demand of the project, calculated in accordance with N.J.A.C. 7:15-5.25(f)1i, is 1.37 MGM; therefore sufficient water supply is currently available to serve the proposed development within the existing water allocation permit.

In accordance with N.J.A.C. 7:15-5.25(h)4, a project or activity's stormwater management is to be evaluated. However, P.L. 2013, c. 188 directs that there is a presumption that an engineered subdivision or site plan is not required. Without such information a review and determination of compliance with the Stormwater Management rules (N.J.A.C. 7:8) is not possible. The municipal governments are responsible for review and implementation of the Stormwater Management rules during their review and approval of proposed development. Piscataway Township has an adopted stormwater management ordinance (No. 15-Jun); see N.J.A.C. 7:8-4. Piscataway Township is also required to implement the N.J.A.C. 7:8 requirements incorporated in the Residential Site Improvement Standards; see N.J.A.C. 5:21-7.

In accordance with N.J.A.C. 5.25(h)5, riparian zones are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.25(h)i –vii. A riparian zone of Ambrose Brook (FW2-NT) has been identified on the property. Riparian zones or buffers are established along all surface waters, based on the surface water body's classification designated in the Surface Water Quality Standards at N.J.A.C. 7:9B, under the following regulations: the Flood Hazard Area Control Act Rules, the Stormwater Management rules, and the Water Quality Management Planning rules. The provisions at N.J.A.C. 7:15-5.25(h)5i, have been satisfied by the exclusion of the riparian corridor and associated 50 foot buffer to the Ambrose Brook from the proposed SSA.

In accordance with N.J.A.C. 7:15-5.25(h)6, proposed development disturbance is not to be located in areas with steep slopes, defined as any slope equal to or greater than 20 percent. There are no steep slopes on the subject site.

This proposed amendment represents only one part of the permit process and other issues may need to be addressed prior to final permit issuance. These issues may include, but are not limited to, the following: compliance with stormwater regulations; antidegradation; effluent limitations; water quality analysis; exact locations and designs of future treatment works; development in wetlands and flood prone areas, or other environmentally sensitive areas which are subject to regulation under Federal or State statutes or rules. Approval of this amendment does not eliminate the need for any permits, approvals or certifications required by any Federal, State, County or municipal review agency with jurisdiction over this project/activity.

Sewer service to any particular project is subject to contractual arrangements between municipalities, authorities and/or private parties, and is not guaranteed by this amendment.

This notice is being given to inform the public that a plan amendment has been proposed for the Lower Raritan/Middlesex County WQM Plan. All information related to the WQM Plan and the proposed amendment is located at the Middlesex County Planning Department, 40 Livingston Avenue, New Brunswick, New Jersey 08901, and the Department, Office of Water Resources Management Coordination, P.O. Box 420, Mail Code 401-02A, 401 East State Street, Trenton, New Jersey 08625-0420. The Department's file is available for inspection between 9:00 a.m. and 4:00 p.m., Monday through Friday. An appointment to inspect the documents may be arranged by calling the Middlesex County Planning Department at (732) 745-3016 or the Office of Water Resources Management Coordination at (609) 777-4349.

A **public hearing** will be held by Middlesex County on the proposed WQM Plan amendment. The public hearing will be on November 24, 2015 at 5:30 p.m., in the Freeholders' Public Meeting Room, 1st Floor, of the Middlesex County Administration Building located on John F. Kennedy Square and Bayard Street, New Brunswick, New Jersey.

Interested persons may submit written comments on the amendment to WQM Program Docket, Office of Water Resources Management Coordination, at the Department address cited above with a copy sent to Ms. Mirah Becker of the Middlesex County Planning Department at the County address cited above and to Mr. Christian Roche, Langan Engineering and Environmental Services, 989 Lenox Drive – Suite 124, Lawrenceville, NJ 08648. All comments should reference Program Interest No. 435463, Activity No. AMD150003 and must be submitted within 15 days following the public hearing. All comments submitted prior to the close of the comment period shall be considered by the County Board of Chosen Freeholders in reviewing the amendment request. If the amendment is adopted by Middlesex County, the Department must review the amendment prior to final adoption. The comments received in reply to this notice and to the public hearing will also be considered by the Department during its review.

Proposed Amendment to the Tri-County Water Quality Management Plan
Public Notice:
Ruth Bell Subdivision

Take notice that the New Jersey Department of Environmental Protection (Department) is seeking public comment on a proposed amendment to the Tri-County Water Quality Management Plan (WQMP). This amendment proposal, submitted by Stanley Bell on behalf of the property owner, Ruth Bell, would expand the sewer service area (SSA) of the Mount Laurel Township Municipal Utilities Authority (MUA)/Hartford Road Water Pollution Control Facility to include approximately one acre of upland portions of Block 800, Lots 7.02 and 7.05 in Mount Laurel Township, Burlington County. The property owner plans to develop two four-bedroom single family homes within the proposed SSA. This amendment would update the Mount Laurel Township MUA Wastewater Management Plan, the Burlington County Future Wastewater Service Area map, and the Tri-County WQMP.

This proposed amendment has been reviewed in accordance with the Water Quality Management Planning rules, N.J.A.C. 7:15-1 et seq. and P.L. 2011 c.203 as amended and supplemented by P.L. 2013 c.188. This proposal qualifies as a site specific amendment pursuant to Section 7 of P.L. 2013 c.188.

Pursuant to P.L. 2011 c.203, as amended and supplemented by P.L. 2013 c.188, the Department, in consultation with the applicable wastewater management planning agency, may approve the inclusion of land within a SSA notwithstanding that existing treatment works may not currently have the assured capacity to treat wastewater from such land without infrastructure improvements or permit modification. Therefore, amendments to modify a SSA may be approved if such actions are compliant with the applicable sections of the Water Quality Management Planning rule (N.J.A.C. 7:15) regardless of whether capacity has been fully assessed.

In accordance with N.J.A.C. 7:15-5.24(b)1, to determine areas designated as threatened or endangered species habitat, the Department utilized the Division of Fish and Wildlife's Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, version 3.1. Landscape Project version 3.1 identifies State Endangered American Bittern and State Threatened Red-Headed Woodpecker habitat within the proposed SSA, however pursuant to N.J.A.C. 7:15-5.24(g), SSAs may include ESAs listed above provided: the ESA is included either to allow infill development, or to remove undulations in the SSA boundary as necessary to create a linear boundary that relates to recognizable geographic features...; and the Department determines that the ESAs included in the SSA are not critical to a population of endangered or threatened species, the loss of which would decrease the likelihood of the survival or recovery of a species in the State. "Infill area" is defined as a lot or lots existing on July 7, 2008 situated between two lots improved as of July 7, 2008, where the total amount of wastewater to be generated by all potential new development allowed by existing zoning at the time of application between the two previously improved lots is 2,000 gallons per day (gpd) or less, as calculated in accordance with N.J.A.C. 7:14A-23.3. When calculating flow from lots zoned for single family residential development that would connect to a wastewater treatment facility which discharges to surface water, 300 gpd per unit shall be utilized. The two single family homes proposed for development on Lots 7.02 and 7.05 meet the definition of infill area, and would generate a total projected wastewater flow of 600 gpd as calculated in accordance with N.J.A.C. 7:14A-23.3. Additionally, the Department has determined that the inclusion of the one acre of upland area in SSA, to include the proposed development, will not negatively impact habitat critical to the survival or recovery of the American Bittern or the Red-Headed Woodpecker in the State.

In accordance with N.J.A.C. 7:15-5.24(b)2, areas mapped as Natural Heritage Priority Sites are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e) – (h). Review of the project site has determined that no Natural Heritage Priority Sites exist on site.

In accordance with N.J.A.C. 7:15-5.24(b)4, areas mapped as wetlands pursuant to N.J.S.A. 13:9A-1 and 13:9B-25 are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e) – (h). In accordance with N.J.A.C. 7:15-5.24(e)2, Letter of Interpretation, L.O.I. # 0324-03-0015.1 was submitted, which delineates the wetlands and the associated 50 foot buffer, and these areas are not proposed for inclusion in the SSA.

In accordance with N.J.A.C. 7:15-5.24(c), lands within certain coastal planning areas (Coastal Fringe, Coastal Rural, and Coastal Environmentally Sensitive Planning Areas) are not included in the SSA. The project site is not in a coastal planning area.

In accordance with N.J.A.C. 7:15-5.24(d), special restricted areas including areas with Federal 201 grant limitations that prohibit the extension of sewers to serve development in specified areas such as wetlands and floodplains, in addition to special restricted areas of designated beaches, coastal high hazard areas, and dunes are not included in the SSA. These restricted areas are not applicable here.

In accordance with N.J.A.C. 7:15-5.25(h)3, the water supply need for the proposed project has been evaluated. Water would be provided by the Mount Laurel Township Water Department which holds PWSID #0324001 and currently has a water supply surplus of 51.233 million gallons per month (MGM) or 1.7 million gallons per day (MGD). Pursuant to N.J.A.C. 5.21-5.3, Table 1, the daily residential water demand for a four-bedroom home is 395 gpd; therefore the total water demand for two four-bedroom homes is 790 gpd, which is well within the available water supply surplus.

In accordance with N.J.A.C. 7:15-5.25(h)4, a project or activity's stormwater management is to be evaluated. However, P.L. 2011, c. 203 as amended by P.L. 2013, c. 188, directs that there be a presumption that an engineered subdivision or site plan is not required. Compliance with this standard shall be demonstrated by submission of an adopted stormwater management plan and ordinance that conform with the requirements of N.J.A.C. 7:8. The project is in compliance with this standard, as Mount Laurel Township has adopted stormwater control ordinance #2006-04, as approved by Burlington County, which complies with the performance standards of the Stormwater Management rules at N.J.A.C. 7:8. The county and local governments are responsible for review and implementation of the Stormwater Management rules during their review and approval of the proposed development.

In accordance with N.J.A.C. 7:15-5.25(h)5i, riparian zones shall be protected. Riparian zones or buffers are established along all surface waters, based on the surface water body's classification designated at N.J.A.C. 7:9B, under the following regulations: the Flood Hazard Area Control Act Rules, the Stormwater Management rules, and the Water Quality Management Planning rules. There are no riparian zones on the project site.

In accordance with N.J.A.C. 7:15-5.25(h)6, proposed development disturbance is not to be located in areas with steep slopes, defined as any slope greater than 20 percent. There are no steep slopes on the project site.

This proposed amendment represents only one part of the permit process and other issues may need to be addressed prior to final permit issuance. These issues may include, but are not limited to, the following: compliance with stormwater regulations; antidegradation; effluent limitations; water quality analysis; exact locations and designs of future treatment works; development in wetlands and flood prone areas, or other environmentally sensitive areas which are subject to regulation under Federal or State statutes or rules. Approval of this amendment does not eliminate the need for any permits, approvals or certifications required by any Federal, State, County or municipal review agency with jurisdiction over this project/activity.

Sewer service to any particular project is subject to contractual arrangements between municipalities, authorities and/or private parties, and is not guaranteed by this amendment.

This notice is being given to inform the public that a plan amendment has been proposed for the Tri-County WQMP. All information related to the WQMP and the proposed amendment is located at the Department, Office of Water Resources Management Coordination, P.O. Box 420, Mail Code 401-02A, 401 East State Street, Trenton, N.J. 08625-0420. The Department's file is available for inspection between 9:00 a.m. and 4:00 p.m., Monday through Friday. An appointment to inspect the documents may be arranged by calling the Office of Water Resources Management Coordination at (609) 984-3665.

Interested persons may submit written comments on the proposed amendment to WQMP Program Docket, at the Department address cited above with a copy sent to Mr. Stanley Bell, 4408 Michael Lane, Voorhees, N.J. 08043. All comments should reference Program Interest No. 435433, Activity No. AMD150004 and must be submitted

within 30 days of the date of this public notice. All comments submitted prior to the close of the comment period shall be considered by the Department in reviewing the amendment request.

Interested persons may request in writing that the Department hold a non-adversarial public hearing on the amendment or extend the public comment period in this notice up to 30 additional days. These requests should reference Program Interest No. 435433, Activity No. AMD150004 and must state the nature of the issues to be raised at the proposed hearing or state the reasons why the proposed extension is necessary. These requests must be submitted within 30 days of the date of this notice to WQMP Program Docket at the Department address cited above. If a public hearing for the amendment is held, the public comment period in this notice shall be extended to close 15 days after the public hearing.

Division of Coastal and Land Use Planning**

**Notice of Public Comment Period Regarding submission of
Municipal Public Access Plans**

Notice is hereby given that the New Jersey Department of Environmental Protection (NJDEP), Division of Coastal and Land Use Planning, has received the following application(s) for NJDEP approval of a Municipal Public Access Plan requesting approval in accordance with N.J.A.C. 7:7E (the Coastal Zone Management Rules).

The public comment period on these applications begins on the date of publication of this notice and will close thirty (30) calendar days later. Any interested person may raise all reasonable issues of concern and submit all arguments and factual materials supporting their position during the public comment period. A copy of these plans can be found at <http://www.state.nj.us/dep/cmp/access/mpaplndraft.htm>.

NJDEP will consider all timely submitted comments. The applicant and each person who submitted written comments will receive notice of NJDEP's final determination.

Written comments should be submitted to:

**NEW JERSEY DEPARTMENT OF ENVIRONMENTAL PROTECTION
DIVISION OF WATER QUALITY
PUBLIC NOTICE**

Notice is hereby given that the New Jersey Department of Environmental Protection (NJDEP) proposes to issue the following New Jersey Pollutant Discharge Elimination System (NJPDES) permit actions in accordance with N.J.A.C. 7:14A-1 et seq. and by authority of N.J.S.A. 58:10A-1 et seq. The description of each proposed permit action is contained in the accompanying table.

This public notice has been prepared for these facilities as part of the administrative record to be filed at NJDEP, 401 East State Street, Trenton. Copies of the draft document are obtainable, for a nominal charge, and the administrative record is available for inspection by appointment only, Monday through Friday, by contacting the NJDEP file room at (609) 292-0400. Additional information regarding the draft document may be obtained from the contact person listed in the accompanying table.

Comments on the draft document or a request that NJDEP hold a non-adversarial public hearing on the document must be submitted, in writing, to the individual specified below (refer to the accompanying table for the appropriate permitting bureau) during the public comment period, which closes either:

1. 30 calendar days after publication of the last newspaper notice when a notice is published in the DEP Bulletin *and* a newspaper(s); or
2. 30 calendar days after publication of the DEP Bulletin notice when a notice is published in the DEP Bulletin *only*.

All persons, including permittees who believe that any condition of NJDEP's tentative decision to issue these permit actions is inappropriate must raise all reasonable issues of concern and submit all arguments and factual materials supporting their position during the public comment period. Any request for a public hearing shall state the nature of the proposed issues to be raised in the hearing. A public hearing will be conducted if NJDEP determines there is a significant degree of public interest. If a public hearing is held, the public comment period is automatically extended through the close of the hearing.

NJDEP will consider and respond to all significant and timely submitted comments. The permittee and each person who submitted written comments, will receive notice of NJDEP's final decision to issue, revoke or redraft the document.

Written comments should be submitted to the appropriate permitting bureau:

Pilar Patterson, Chief

1250 STATE STREET HOLDINGS LLC NJ0001376 DST	State St Perth Amboy Terminal Perth Amboy, NJ 08861 Middlesex County	Blaire Langston Bureau of Nonpoint Pollution Control (609)633-7021	Arthur Kill SE3(C2) Rahway River / Woodbridge Creek	Stormwater Discharge Renewal Permit Action 1250 State Street Holdings LLC has applied for a New Jersey Pollutant Discharge Elimination System (NJPDES) permit Renewal to the New Jersey Department of Environmental Protection (NJDEP), Bureau of Nonpoint Pollution Control. The applicant historically stored petroleum for distribution into tanker trucks under the Standard Industrial Classification (SIC) 5171. The existing permit regulates stormwater discharges through outfalls DSN 001A, DSN 002A and DSN 003A. Currently, the facility is non-operational and monitoring is suspended at this time.
ATLANTIC COUNTY UTILITIES AUTH WWTF NJ0109703 DGW	1801 Absecon Blvd Atlantic City, NJ 08401 Atlantic County	Mike Pigliacelli Bureau of Nonpoint Pollution Control (609)633-7021	Quaternary Age Beach Sands & Gravel II-A	Ground Water Renewal Permit Action The Atlantic County Utilities Authority sewage treatment plant is a secondary treatment facility which ultimately discharges treated effluent to the Atlantic Ocean through a permitted surface water outfall (NJPDES-DSW permit #: NJ0024473). Secondary treated sanitary wastewater is discharged to an on-site equalization basin when flow through the plant exceeds capacity.
DENNIS TOWNSHIP ELEMENTARY NJ0070246 DGW	Academy Rd Dennis Twp, NJ 08214 Cape May County	Mike Pigliacelli Bureau of Nonpoint Pollution Control (609)633-7021	Cohansey I-PL	Ground Water Renewal Permit Action The facility is an existing elementary school with a student enrollment of approximately 900 students and 80 staff members. The school facilities include classrooms, a gymnasium, and a cafeteria. A six classroom addition and wood shop expansion totaling 8,725 ft2 was completed in 1996
DU PONT PARLIN WORKS/PARLIN NJ0000159 DSW Minor	250 Cheesequake Rd Parlin, NJ 08859 Middlesex County	Ramanathan Asokan Bureau of Surface Water Permitting (609)292-4860	South River via Pond Creek FW2-NT(C2) Raritan R Lower (below Lawrence)	Surface Water Renewal Permit Action This is a minor renewal permit action for an existing industrial NJPDES/DSW permit. A combination of untreated non-contact cooling water and stormwater is discharged through two outfalls. A long term average flow of 0.291 MGD from the north side of the facility is discharged via DSN 001A to the South River. A long term average flow of 0.0.248 MGD from the south side of the facility is discharged via DSN 002A to Selover Creek, which ultimately discharges into the South River.

<p>HANOVER MOBILE VILLAGE ASSOC NJ0027464 DSW Minor</p>	<p>202 Jacobstown & New Egypt Rd North Hanover Twp, NJ 08562-0000</p> <p>Burlington County</p>	<p>Dave Thomas</p> <p>Bureau of Surface Water Permitting</p> <p>(609)292-4860</p>	<p>Crosswick Creek</p> <p>FW2-NT(C2)</p> <p>Crosswicks Ck (Doctors Ck to New Egypt)</p>	<p>Surface Water Renewal Permit Action</p> <p>This permit action is a renewal of a minor permit for a domestic wastewater treatment plant that serves a mobile home park. It authorizes the discharge of a permitted flow of 0.02 MGD of treated and disinfected domestic wastewater without any industrial contribution via DSN 001A to an unnamed tributary of Crosswicks Creek located in the Delaware River Basin, and classified as FW2-NT waters.</p>
<p>MOUNT HOLLY WPCF NJ0024015 DSW Major</p>	<p>300 Rancocas Rd Mount Holly, NJ 08060</p> <p>Burlington County</p>	<p>Bela Mankad</p> <p>Bureau of Surface Water Permitting</p> <p>(609)292-4860</p>	<p>North Branch Rancocas Creek</p> <p>FW2-NT(C2) - tidal trib to Zone 2</p> <p>Rancocas Creek NB (below New Lisbon dam)</p>	<p>Surface Water Renewal Permit Action</p> <p>This permit action is for the renewal of an existing permit to discharge a permitted flow of 5.0 MGD of treated and disinfected domestic wastewater with industrial contribution. This permit action also retains the authorization to discharge at two additional higher flows of 6.0 and 7.675 MGD from the existing permit. The permittee owns and operates two water pollution control facilities, one on Rancocas Road in Mount Holly, NJ and another on Maple Avenue in Lumberton, NJ. Secondary treated effluent from the latter is pumped to the main facility on Rancocas Road, where combined wastewater from both facilities undergoes final treatment before discharge via DSN001A.</p>
<p>NEW JERSEY SPORTS & EXPOSITION AUTHORITY NJ0023345 DST</p>	<p>50 Rt 120 East Rutherford, NJ 07073</p> <p>Bergen County</p>	<p>Kerri Standowski</p> <p>Bureau of Nonpoint Pollution Control</p> <p>(609)633-7021</p>	<p>Berrys Creek</p> <p>SE2(C2)</p> <p>Hackensack R (below/incl Hirshfeld Bk)</p>	<p>Stormwater Discharge Renewal Permit Action</p> <p>The above named applicant has applied for a New Jersey Pollutant Discharge Elimination System (NJPDES) permit renewal to the New Jersey Department of Environmental Protection (NJDEP), Bureau Nonpoint Pollution Control. The site consists of commercial sports facilities designated under Standard Industrial Classification (SIC) 7940 and racing – including track operations under SIC 7948. Due to the facility's operation of a horseracing track, they are considered to be an Animal Feeding Operation. The proposed permit regulates stormwater discharges from the Meadowlands Sports Complex to the Berry's Creek, classified as SE2(C2).</p>
<p>TRENTON WATER WORKS NJ0240133 RES</p>	<p>Rt 29 S & Calhoun St Trenton, NJ 08604</p> <p>Mercer County</p>	<p>Patrick Brown</p> <p>Bureau of Pretreatment and Residuals</p> <p>(609)633-3823</p>		<p>Residual New Permit Action</p> <p>Water treatment residuals (WTR) generated during the production of potable water at the Trenton Water Works Water Filtration Plant located in Trenton, NJ are proposed to be directly land applied to lands with suitable soils and mixed with soil and other aggregates off-site to produce topsoil blends. Approximately 1,370 dry metric tons per year of WTR are proposed to be distributed for land application.</p>
<p>NJPDES MASTER GENERAL PERMIT PROGRAM INTEREST NJ0128589 DSW Minor</p>	<p>401 E State St Trenton, NJ 08625</p> <p>Mercer County</p>	<p>Tara Klimowicz</p> <p>Bureau of Surface Water Permitting</p> <p>(609)292-4860</p>		<p>Surface Water Master General Permit Renewal</p> <p>This master general permit serves to renew the existing master swimming pool discharges general permit which expired on November 30, 2003. This permit renewal authorizes short term discharges to a surface waterbody resulting from the draining of pool and/or filter backwash from any municipal, commercial or non-residential swimming pool. This general permit does not authorize discharges into receiving waters classified as FW1, Pinelands and certain Shellfish waters.</p>

SOMERVILLE INDUSTRIAL PARK NJ0227854 DST	152 Rt 206 Hillsborough, NJ 08844 Somerset County	Timothy Ebersberger Bureau of Nonpoint Pollution Control (609)633-7021	Royce Brook Tributary FW2-NT(C1) Millstone River (below/incl Carnegie Lk)	Stormwater Discharge New Permit Action Yannuzzi Wrecking & Recycling is a concrete and asphalt recycling center. Materials are received and ground up, chopped up, or processed into recyclable materials. There is a small trailer that is used as an office, an area used for processing material, an area used for storing vehicles, and a large portion of the facility is used for storing material. Stormwater on site sheet flows to low points on site before being conveyed by drainage swales offsite.
