## Specific Decision Application Codes

---

O = Other

REG = HMDC/Pinelands Exemption

---

## Permit Descriptions

---

**CAFRA** - A Coastal Area Facility Act permit is required to construct residential, commercial, public, transportation, utility and energy-related facilities in the coastal area as defined by the Act.

**Coastal Permit**: A permit or an authorization issued under this chapter pursuant to CAFRA, the Wetlands Act of 1970, N.J.S.A. 13:9A-1 et seq., or the Waterfront Development Law, N.J.S.A. 12:5-3.

**Coastal Wetlands**: A permit authorizing disturbances to Mapped Tidal Wetlands under the Wetlands Act of 1970, N.J.S.A. 13:9A”

**Federal Consistency Activity**: Certain federal permits, not limited to the U.S. Army Corps of Engineers Dredge and Fill Permits, require certification by the DEP prior to the issuance of the permit by the federal agency.

**Flood Hazard Area**: A Flood Hazard permit or verification is required for disturbances within the floodway, floodplain or riparian zone in areas regulated under the Flood Hazard Area Control Act.

**Freshwater Wetlands**: A Permit (Letters of Exemption, Letters of Interpretation, Statewide General Permit, Open Water Fill, Individual, Transition Area Waiver, Water Quality Certificate) is needed prior to engaging in a regulated activity in or around freshwater wetlands and associated transition areas.

**General Groundwater Petroleum Products Cleanup**: This general permit authorizes the surface water discharge of treated groundwater previously contaminated with petroleum products.

**NJPDES permits**: A permit is required for the discharge of pollutants to surface and groundwater, a discharge from an indirect user or the land application of municipal and/or industrial residuals. (A more comprehensive definition of activities, which require a permit, may be found at N.J.A.C. 7:14A-2.4)

**Solid Waste Facility**: A permit is required to conduct or operate any solid waste facility as defined under the Solid Waste Management Act, N.J.S.A. 13:1E-1 et seq., and N.J.A.C. 7:26-1 et seq.

**Highlands Resource**: A Highland Preservation Area Approval is required for regulated activities within the Highland Preservation Area as defined in the Highlands Water Protection & Planning Act Preservation Area Rules. Highlands Applicability Determinations verifies certain exemptions allowed by the regulations.

**Tidal Wetlands**: A Coastal Wetlands Permit is needed to excavate, dredge, fill or erect structures on coastal wetlands.

**Treatment Works Approval**: A TWA permit is required for the construction, modification or operation of a treatment works, including sanitary/industrial sewage pretreatment or treatment systems, sewage conveyance systems, sewer extensions and subsurface sewage disposal systems.

**Waterfront Development**: A permit is required for any project involving the development of waterfront near or upon any tidal or navigable waterway in the State.

## General Information

---

The DEP Bulletin is an information service provided by the New Jersey Department of Environmental Protection. In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Flood Hazard Area (FHA) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA). In addition, this publication lists status of Highlands application and Highlands Applicability Determinations.

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed do not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed on the inside back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

DEP Events of Public Interest include public hearings, council meetings, workshops, public information meetings, and exams.

## Appeals on Applications

---

Any individual who would like to appeal a decision on an application should direct their remarks to:

**Notice Regarding Adoption of Site Specific Water Quality Management Plan Amendment Applications  
pursuant to P.L.2013, c.188**

Notice is hereby given that the New Jersey Department of Environmental Protection (NJDEP), Office of Coastal and Land Use Planning, has adopted the following Water Quality Management Plan site specific amendment requests pursuant to P.L. 2011, C.203 (amended by P.L. 2013, c.188) which was enacted on January 15, 2014. This legislation modifies some aspects of the Water Quality Management Planning Program for a period of two years. P.L. 2013, c.188 directs the Department to accept and process certain site specific amendment proposals despite the absence of a wastewater management plan in compliance with the Water Quality Management Plan rules. Pursuant to the provisions of the Statewide Water Quality Management Planning rules (N.J.A.C. 7:15-3.4), notices of amendment proposals and the Department's subsequent final action are to be published in the New Jersey Register (NJR). In accordance with P.L. 2013, c.188, notice of adoption of site specific amendments for projects or activities having a wastewater planning flow of less than 50,000 gallons per day (gpd) or being less than 100 acres in size is to be published in the Department of Environmental Protection (DEP) Bulletin.

Notice(s) of adoption of site specific amendment(s) for changes in sewer service area designation, which may include new or expanded wastewater treatment facilities, are individually provided below:

**NEW JERSEY DEPARTMENT OF ENVIRONMENTAL PROTECTION  
OFFICE OF WATER RESOURCES MANAGEMENT COORDINATION**

**Adopted Amendment to the Monmouth County Water Quality Management Plan  
Public Notice:**

RMS Hospital and Mattie House

**Take notice** that on December 1, 2015, pursuant to the provisions of the New Jersey Water Quality Planning Act, N.J.S.A. 58:11A-1 et seq., and the Statewide Water Quality Management Planning rules (N.J.A.C. 7:15-3.4), an amendment to the Monmouth County WQMP was adopted by the Department of Environmental Protection (Department). This amendment, entitled "RMS Hospital and Mattie House", submitted on behalf of the New Jersey Department of Treasury's (Treasury) Division of Property Management and Construction, expands the Western Monmouth Utilities Authority (WMUA) sewer service area (SSA) by 123.48 acres. The amendment site is located in Marlboro Township, Monmouth County on Block 157, Lots 34.02 and 34.03 and on Block 159, Lot 11. This amendment has been reviewed in accordance with the Water Quality Management Planning rules at N.J.A.C. 7:15 and P.L. 2011, c.203 as amended and supplemented by 2013, c.188. This notice represents the Department's determination that the amendment is in compliance with the regulatory criteria pursuant to N.J.A.C. 7:15-5.24 and 5.25.

The above referenced properties are currently located within the Marlboro Psychiatric Hospital SSA on the adopted Monmouth County Future Wastewater Service Area (FWSA) map. This SSA is served by an on-site Sewage Treatment Plant (STP) owned by Treasury and permitted under New Jersey Pollutant Discharge Elimination System (NJDPES) permit number NJ0022586. This treatment plant, which is located on the Marlboro Psychiatric Hospital site was constructed in the 1930's, and after an upgrade in the 1950's, served the entire hospital complex of approximately 120 buildings. The treatment plant continued to serve the entire facility until the 1990's when the Marlboro Psychiatric Hospital was closed. After the hospital closure, the treatment plant continued to accept the wastewater flow from the Mattie House Group Home on Block 157, Lot 34.03 and the RMS Hospital on Block 157, Lot 34.02 for treatment. Due to its age and failing condition, Treasury has determined it's necessary to take the treatment plant offline and to complete the on-going demolition of the Marlboro Psychiatric Hospital complex, including the electric plant and the wastewater treatment plant. The

Marlboro Psychiatric Hospital property is proposed to be owned by the Monmouth County Parks System for use as a County Park. This amendment transfers the Mattie House, the RMS Hospital, and a 113.33 acre portion (not 113.3 acres as incorrectly stated in the preliminary notice published in the July 8, 2015 DEP Bulletin) of Block 159, Lot 11 (for eventual use by the Monmouth County Parks System), from the Marlboro Psychiatric Hospital STP SSA to the WMUA STP SSA. The portion of the SSA not being transferred has reverted to the Individual Subsurface Sewage Disposal Systems of 2,000 gallons per day (gpd) or less (septic area) designation. The projected wastewater flow, from the area to be transferred, calculated in accordance with N.J.A.C. 7:14A-23.3, is 40,000 gallons per day (gpd). This includes 32,750 gpd from the RMS hospital, 1,250 gpd from Mattie House, and 6,000 gpd from the 113.33 acre portion of Block 159, Lot 11.

N.J.A.C. 7:15-5.24 identifies several areas that are not to be provided sewer service due to their environmental sensitivity. Pursuant to N.J.A.C. 7:15-5.24(b), Environmentally Sensitive Areas (ESAs) are defined as contiguous areas of 25 acres or larger consisting of habitat for threatened and endangered species as identified on the Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, Natural Heritage Priority Sites, Category One (C1) special water resource protection areas, and wetlands, alone or in combination. No such ESA's are included in the proposed SSA.

In accordance with N.J.A.C. 7:15-5.24(b)1, to determine areas designated as threatened or endangered species habitat, the Department utilized the Division of Fish and Wildlife's Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, version 3.1. Areas identified by the Landscape Project as being suitable habitat for threatened and endangered species Ranks 3 (State threatened), 4 (State endangered), and 5 (Federal endangered or threatened) are not to be included in proposed SSAs except as provided under N.J.A.C. 7:15-5.24(e) – (h). Review of the project site has determined that no threatened or endangered species habitat exists on site.

In accordance with N.J.A.C. 7:15-5.24(b)2, areas mapped as Natural Heritage Priority Sites are not to be included in SSAs, except as provided under N.J.A.C. 7:15-5.24(e) – (h). Review of the project site has determined that no Natural Heritage Priority Sites exist on site.

In accordance with N.J.A.C. 7:15-5.24(b)3, areas identified as special water resource protection areas along Category One waterways and their tributaries are not to be included in SSAs, except as provided under N.J.A.C. 7:15-5.24(e) – (h). Two branches of a Category One waterway, the Big Brook and a Big Brook tributary, are located on Block 159, Lot 11. The tributaries and their 300 foot buffer areas are excluded from the sewer service area and no sewage producing structures are proposed for these portions of the property.

In accordance with N.J.A.C. 7:15-5.24(b)4, areas mapped as wetlands pursuant to N.J.S.A. 13:9A-1 and 13:9B-25 are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e) – (h). Wetlands have been identified on the project site along the southern edge of Block 157, Lot 34.02. The provisions at N.J.A.C. 7:15-5.24(b)4, have been satisfied by the exclusion of the wetlands areas from the SSA.

Pursuant to N.J.A.C. 7:15-5.24(c), Coastal Fringe Planning Areas, Coastal Rural Planning Areas, and Coastal Environmentally Sensitive Planning Areas shall be excluded from SSA. There are no such areas on the site.

In accordance with N.J.A.C. 7:15-5.24(d)1, areas with Federal 201 grant limitations that prohibit the extension of sewers into specified environmentally sensitive areas are excluded from the SSA. Pre-existing grant conditions and requirements (from Federal and State grants or loans for sewerage facilities), which provide for restriction of sewer service to environmentally sensitive areas, are unaffected by adoption of this amendment and compliance is required.

In addition to the environmentally sensitive areas with Federal 201 grant limitations, there are other special restricted areas, not applicable here, which must also be excluded from SSA pursuant to N.J.A.C. 7:15-5.24(d)2 through 4. Specifically, there are no beaches, coastal high hazard areas, or dunes on the project site.

In accordance with N.J.A.C. 7:15-5.25(h)1, the projected wastewater flow of the project is to be evaluated. However, P.L. 2013, c.188 allows the Department to approve the inclusion of land within a sewer service area

notwithstanding that existing treatment works may not currently have the assured capacity to treat wastewater from such land without infrastructure improvements or permit modifications. Therefore, amendments to expand a sewer service area may be approved if such actions are compliant with the applicable sections of the WQM Planning rules (N.J.A.C. 7:15) regardless of whether capacity has been fully assessed. Currently the Pine Brook Treatment Plant (NJ0023728) is permitted to discharge up to 8.8 Million Gallons per day (MGD) of treated wastewater to the Pine Brook. Based on an average of the monthly average flow for the most recent twelve month period for which discharge monitoring data is available, the existing wastewater flow discharged from the Pine Brook Treatment Plant was calculated to be 7.9 MGD. The projected wastewater flow for the amendment, calculated in accordance with N.J.A.C. 7:14A-23.3, is 40,000 gpd.

In accordance with N.J.A.C. 7:15-5.25(h)3, the water supply need of a site is to be evaluated. However, P.L. 2013, c.188 allows the Department to review amendments to a WQMP to allow for the inclusion of land in a sewer service area, where the amendment does not propose a specific project or activity. Without such information a review and determination of compliance with the water supply evaluation is not possible. Water supply for the RMS Hospital and Mattie House is provided by the Marlboro Township Municipal Utilities Authority (MTMUA) which holds PWSID 1328002. Water supply for any proposed development on the proposed Monmouth County Parks System portion of the property would also be provided by the MTMUA. The MTMUA is a public water system that withdraws water from the Farrington Aquifer. The location of the diversion is on Harbor Road. MTMUA is currently allocated 337 million gallons per month (MGM) and has a water supply surplus of 83.667 MGM established by Water Allocation Permit No. 5055. The presently existing water demand of the project, calculated in accordance with N.J.A.C. 7:15-5.25(f)1i, is 1.551 MGM (not 1.034 MGM as incorrectly stated in the preliminary notice that was published in the July 8, 2015 DEP Bulletin).

In accordance with N.J.A.C. 7:15-5.25(h)4, a project or activity's stormwater management is to be evaluated. However, P.L. 2013, c. 188 directs that there is a presumption that an engineered subdivision or site plan is not required. Without such information a review and determination of compliance with the Stormwater Management rules (N.J.A.C. 7:8) is not possible. The municipal governments are responsible for review and implementation of the Stormwater Management rules during their review and approval of proposed development. Marlboro Township has an adopted stormwater management ordinance (No.2006-21); see N.J.A.C. 7:8-4. Marlboro Township is also required to implement the N.J.A.C. 7:8 requirements incorporated in the Residential Site Improvement Standards; see N.J.A.C. 5:21-7.

In accordance with N.J.A.C. 5.25(h)5, proposed development disturbance is not to be located in riparian zones except as provided under N.J.A.C. 7:15-5.25(h)i-vii. Riparian zones or buffers are established along all surface waters, based on the surface water body's classification designated at N.J.A.C. 7:9B, under the following regulations: the Flood Hazard Area Control Act Rules, the Stormwater Management rules, and the Water Quality Management Planning rules. Riparian zones of the Big Brook (FW2-NTC1) and its tributary have been identified on Block 159, Lot 11. The required buffer width for Big Brook and its tributary is 300 feet. In accordance with N.J.A.C. 7:15-5.25(h)5i, the Riparian Corridor Analysis has been satisfied by the exclusion of the 300 foot buffer of the Big Brook and its tributary from the SSA.

In accordance with N.J.A.C. 7:15-5.25(h)6, proposed development disturbance is not to be located in areas with steep slopes, defined as any slope equal to or greater than 20 percent. There are no steep slopes on the subject site.

This amendment proposal was noticed in the DEP Bulletin on July 8, 2015 at Volume 39 Issue 13, pages 9-12. Comments, outlined below, were received during the comment period from Mayor Jonathan Hornik of Marlboro Township.

1. **Comment** - The above referenced properties are located within the A/LC (Agricultural/Land Conservation) zone district. This is the most restrictive zone district within the Township. As noted in the Township's Master Plan Reexamination of 2012, as a general Township policy, parcels located in the LC and the A/LC zones should not be serviced or located in the sewer service area. The amendment is inconsistent with Township policy relative to sanitary sewer service.

**Response** - The area being transferred to the WMUA STP sewer service area is already located within an existing sewer service area. The buildings onsite were served by the Marlboro Psychiatric Hospital STP sewer service area. This amendment does not expand the sewer service area; it only changes the location of where the wastewater generated by the existing Mattie House and RMS Hospital will be conveyed and treated. The wastewater currently discharged by the Marlboro Psychiatric Hospital STP to the Big Brook, under its NJPDES permit, will be conveyed in the future to WMUA treatment plant. This amendment reduces the size of the prior sewer service on the Marlboro Psychiatric Hospital property by 67.3 acres and also represents a substantial reduction in treated wastewater (from the currently permitted 1.0 MGD to 0.04 MGD) permitted to be generated and conveyed from the site.

The property that is proposed to be transferred to the Monmouth County Parks System is currently the subject of negotiations for a long-term lease between the State and the Monmouth County Park System for passive recreational use. New construction of restrooms to support the recreational uses will be proposed at some future time. However, the facilities will be limited to 6,000 gpd which represents the remaining available flow capacity in the Conover Road pump station, after considering the needs of the RMS Hospital and Mattie House. As noted in the Township's Master Plan Reexamination of 2012 report, there is a need for more recreational facilities and better linkages and access to the Henry Hudson Trail. The Reexamination report also cited that the Township was working in partnership with the County and State to see the former Marlboro Psychiatric Hospital site be preserved for open space and recreation. Under section 220-93, of the Marlboro Township Zoning Code, which enumerates the standards and regulations for the Agriculture/Land Conservation District, recreational facilities (e.g. State, County, Municipal parks which may include ball fields, swimming pools and/or other similar uses) as well as open space for passive recreational uses are permitted uses in the A/LC zone as per sections A(3) and (4).

2. **Comment** - This area of the Township is environmentally sensitive. It is unclear what impacts the extension of sanitary sewer to this area will have on the environmental features and character of the land.

**Response** - The amendment does not propose additional SSA, but rather the connection of one existing SSA to another. As discussed above, this amendment only changes the location of where existing wastewater from existing structures is to be conveyed and treated and allows for the accommodation of recreation related restrooms. Additionally, this amendment removes from the SSA environmentally sensitive areas which had been located within the previously adopted sewer service area.

3. **Comment** - The Township has not been supplied with any environmental or soil information for the referenced property. The potential installation of a septic system should have been explored.

**Response** - The use of a septic system was evaluated by the applicants. As stated in section 1-4 in their amendment application to Monmouth County Department of Planning: "The existing RMS facility does not have sufficient surface area on site to provide an adequate sized leach field for proper septic system to function." The RMS Hospital and Mattie House locations were not intended for septic system treatment when they were developed and constructed.

4. **Comment** - The WMUA STP currently has capacity issues. Expansion of the sewer service area to include flow from this parcel will have a direct impact on the existing sanitary infrastructure, as well as the Conover Road pump station.

**Response** - The issues related to existing infrastructure, capacity, and the Conover Road Pump Station have been extensively reviewed and evaluated by WMUA throughout the process. WMUA representatives have attended meetings with all interested parties, reviewed the proposed plans to transfer service area to WMUA, and have been copied on all relevant correspondence between the applicant, Monmouth Planning and the Department. WMUA representatives have stated that their investigation of

the proposal has determined that the existing sewer infrastructure along Conover Road will be able to support a flow of 40,000 gpd to WMUA; the amount specified in the amendment. On May 12, 2015, WMUA issued resolution 15-72 in support of this amendment. The Monmouth County Board of Chosen Freeholders resolution 2015-0622, which was adopted on July 23, 2015, states that "...WMUA [has] indicated that they are in favor of the proposed amendment and that WMUA is willing and able to accept a flow of up to 40,000 gpd through the Conover Road pump station for treatment at their Pine Brook facility...".

Sewer service to any particular project is subject to contractual arrangements between municipalities, authorities and/or private parties, and is not guaranteed by this amendment.

This proposed amendment represents only one part of the permit process and other issues may need to be addressed prior to final permit issuance. These issues may include, but are not limited to, the following: compliance with stormwater regulations; antidegradation; effluent limitations; water quality analysis; exact locations and designs of future treatment works; development in wetlands and flood prone areas, or other environmentally sensitive areas which are subject to regulation under Federal or State statutes or rules. Approval of this amendment does not eliminate the need for any permits, approvals or certifications required by any Federal, State, County or municipal review agency with jurisdiction over this project/activity.

**Adopted Amendment to the Northeast Water Quality Management Plan  
Public Notice:  
Glenmont Commons**

**Take notice** that on **Dec 1, 2015**, pursuant to the provisions of the New Jersey Water Quality Planning Act, N.J.S.A. 58:11A-1 et seq., the Statewide Water Quality Management Planning rules (N.J.A.C. 7:15-3.4) and Public Law (P.L.) 2011, c.203, as amended and supplemented by P.L. 2013, c.188, an amendment to the Northeast WQMP was adopted by the Department of Environmental Protection (Department). This amendment, (PI# 435442; Activity #AMD140003), submitted on behalf of Glenmont Commons Developers LLC, expands the sewer service area (SSA) of the Rockaway Valley Regional Sewerage Authority (RVRSA) to include an approximately 3 acre portion of Block 10002, Lot 3, a 13.2 acre parcel within Denville Township, Morris County. This amendment provides for the Glenmont Commons Subdivision to create four new individual lots with one residential unit to be constructed on each lot.

This amendment was reviewed in accordance with the Water Quality Management Planning rules that set the environmental standards to be applied to an amendment at N.J.A.C. 7:15-5.18, N.J.A.C. 7:15-5.24 and N.J.A.C. 7:15-5.25(h), as modified by P.L. 2011, c. 203, as amended and supplemented by P.L. 2013, c. 188. This notice represents the Department's determination that this amendment complies with the regulatory criteria pursuant to N.J.A.C. 7:15-5.24 and 5.25.

In accordance with N.J.A.C. 7:15-5.24 environmentally sensitive areas (ESAs) are assessed to determine what areas of the property are appropriate for inclusion in the proposed SSA. ESAs are defined based on a composite geographic information systems (GIS) analysis, as any contiguous area of 25 acres or larger consisting of habitat for threatened and endangered species as identified on the Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, Natural Heritage Priority Sites, Category One (C1) special water resource protection areas, and wetlands, alone or in combination, ESAs are required to be excluded from the SSA except as provided in accordance with N.J.A.C. 7:15-5.24(e)-(h).

In accordance with N.J.A.C. 7:15-5.24(b)1, to determine areas designated as threatened or endangered species habitat, the Department utilized the Division of Fish and Wildlife's Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, Landscape Project version 3.1. Areas identified by the Landscape Project as being suitable habitat for threatened and endangered species Ranks 3 (State threatened), 4 (State endangered), and 5 (Federal endangered or threatened) are not to be included in proposed SSAs except as provided under N.J.A.C. 7:15-5.24(e)-(h). A review of the Landscape Project Maps determined that the site location was identified as potential Rank 5 Forest Habitat for both Bobcat and Indiana Bat.

As a result of the above, pursuant to N.J.A.C. 7:15-5.24(e) and 5.26(a), the applicant submitted a Habitat Suitability Determination (HSD) application to refute the presumption that the parcel was in fact suitable and critical habitat for the identified species. A review of the HSD application and site investigation conducted by the Department's Endangered and Nongame Species Program determined that, site disturbance has been minimized to the maximum extent practicable, based upon the site plans for the proposed 4 lot subdivision. Therefore, the Department concluded that the 3 acre footprint of development within the 13.2 acre property would not adversely impact the suitability of the habitat of the local population of the species, the Department determined that the requirement at N.J.A.C. 7:15-5.24(e) has been satisfied.

In accordance with N.J.A.C. 7:15-5.24(b)2, areas mapped as Natural Heritage Priority Sites are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e)-(h). A site review of the property determined that no Natural Heritage Priority Sites exist on site.

In accordance with N.J.A.C. 7:15-5.24(b)3, Category One (C1) special water resource protection areas are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e)-(h). The Department determined no classified C1 water bodies exist on or near the property. In addition, no portion of the proposed development on site is identified as within a riparian zone as established at N.J.A.C. 7:15-5.25(g)2-5.

In accordance with N.J.A.C. 7:15-5.24(b)4, areas mapped as wetlands pursuant to N.J.S.A. 13:9A-1 and 13:9B-25 are not to be proposed as SSA except as provided under N.J.A.C. 7:15-5.24(e)-(h). In accordance with N.J.A.C. 7:15-5.24(e)2, a Letter of Interpretation (LOI) file No. 1408-05-0009.1, dated August 15, 2011 verified the presence and extent of the regulated wetlands and associated transitional buffers located within Block 10002, Lot 3. No area identified as a regulated wetland or buffer on the property is proposed as SSA as part of this amendment.

In accordance with N.J.A.C. 7:15-5.24(d)1, the site contains ESAs as defined under the Federal 201 grant limitations that prohibit the extension of sewers to these areas. The RVRSA Federal 201 Grant (#C-389-06), Findings of No Significant Impact, dated June 23, 1984, defines the specific ESAs as "mapped wetlands in accordance with the National Wetlands Inventory Maps" and/or areas within "the 100 year flood-plain (flood hazard area (FHA)) as defined by the federal Department of Housing and Urban Development." As described above, wetlands are excluded from the proposed SSA and this site is not within mapped FHA.

Furthermore, as noted as text on the adopted Morris County Future Wastewater Service Area map which states: "Pre-existing grant conditions and requirements (from Federal and State grants or loans for sewerage facilities) which provide for restriction of sewer service to environmentally sensitive areas, are unaffected by adoption of this amendment and compliance is required." Compliance of this condition can only occur if and when an applicant requesting sewer service for any development on the subject property has obtained a USEPA grant mapping waiver. Such waivers are only issued through a formal request through the grantee (RVRSA). This request must include the submission of wetlands verification via a Department LOI confirming that ESAs will not be impacted if sewer conveyance systems are constructed to serve development. In addition, prior to any Department and/or RVRSA approvals for the extension of sewer infrastructure to serve any proposed development, the USEPA mapping waiver must first be issued. As the USEPA mapping waiver must be requested and issued before the grantee can serve the development, the stated grant condition will be satisfied at that time.

All other ESAs as defined at N.J.A.C. 7:15-5.24(c)1-3; lands within certain coastal planning areas (Coastal Fringe, Coastal Rural, and Coastal Environmentally Sensitive Planning Areas) are not applicable to this amendment location nor are any ESAs as defined at N.J.A.C. 7:15-5.24(d)1-4; beaches, coastal high hazards area or dunes as defined under N.J.A.C. 7:7E.

In accordance with N.J.A.C. 7:15-5.25(h)4, a project or activities stormwater impact must be evaluated. Denville Township, Morris County, New Jersey has adopted "Land Use Ordinance Chapter XIX, Sub-Chapter No. [§19-4.16](#), which contains stormwater control and design measures. The Department has determined that this sub-chapter/ordinance complies with the water quality and quantity standards in accordance with N.J.A.C. 7:8. Consequently, the requirements of N.J.A.C. 7:15-5.25(h)4ii for stormwater control have been satisfied.

N.J.A.C. 7:15-5.25(h)6 does not permit new disturbance in areas with a gradient equal to or greater than 20 percent, except as provided by N.J.A.C. 7:15-5.25(g)6ii. As identified on the submitted approved subdivision site plans, the project proposes minimal disturbance of steep slopes with a gradient of equal to or greater than 20 percent. In accordance with N.J.A.C. 7:15-5.25(g)6ii new disturbance located in areas of steep slopes can occur if it is necessary “to prevent extraordinary hardship on the property owner, peculiar to the property; or to prevent extraordinary hardship, provided the hardship was not created by the property owner, that would not permit a minimum economically viable use of the property based upon reasonable investment. To that effect, as part of this proposed amendment, the applicant supplemented their application with additional information including an economic analysis to demonstrate that the steep slope disturbance meets this hardship exception.

In support of the assertion that the applicant incurred significant aggregated monetary investment towards the proposed development of the site, expenditures were submitted that included the cost for land acquisition and taxes, site survey, environmental assessments, engineering and site plan design, obtaining local preliminary major subdivision approval, Department freshwater wetlands and Individual Flood Hazard Area permits and Morris County Soil Conservation District soil erosion plan approval.

To demonstrate that the hardship was peculiar to the property and not created by the property owner, the applicant provided evidence that the approved site plans met Denville Township’s Land Use Ordinance Chapter XIX, Sub-Chapter No. 19-4.508 which regulates development within steep slopes, defined as greater than or equal to fifteen percent. This ordinance allows for disturbance within a steep slope gradient between 20 percent and 30 percent, however, only up to 30 percent of the total area of these onsite steep slopes can be impacted. The applicant indicated that, as shown on the approved subdivision site plans, titled “Preliminary Major Subdivision, Block 10002 - Lot 3 Township of Denville, Morris County, NJ”, minor impacts are proposed within steep slope areas greater than 20 percent on less than the allowable 30 percent of the total area of the steep slopes on site. This approved disturbance is mainly for the centralized roadway to gain access to the four units within the 13.2 acre property. The applicant noted that the parcel, an oblong, pie-shape lot, is constrained by the onsite steep slopes and wetlands. The applicant contends that the final alignment for the access road minimized, to the greatest extent possible, disturbance to the onsite constraints, while providing for the least minimum residential units necessary to obtain a viable return in the applicant’s total financial investments.

Furthermore, the applicant stated that, at the time the Preliminary Major Subdivision Approval was originally granted on December 9, 2009, the property was within approved SSA. Therefore, the applicant acquired the property with the intentions to develop the parcel within the site constraints; as permissible under the residential zoning and applicable land use ordinances. The applicant then sought and was issued Department freshwater wetlands and Individual Flood Hazard Area permits necessary for the construction of the approved 4 dwelling units on individual lots.

Based on the above, the Department determined that the proposed minimum disturbance within the steep slopes, as approved on the Preliminary Major Subdivision Plan, was necessary to avoid additional ESA impacts due to the constraints peculiar to the site. Furthermore, the Department concurred that the proposed disturbance within these steep slopes was necessary in order for the property owner to obtain a viable return to the overall financial investments made from the purchase to the property and gaining all obligatory local and Department approvals. As a result, pursuant to N.J.A.C. 7:15-5.25(g)6ii, in order to prevent an extraordinary hardship, not created by the property owner, that would not permit a minimum economically viable use of the property based upon reasonable investment, has been met.

This amendment proposal was noticed in the Department Bulletin, Volume 39; Issue 16, on August 19, 2015 and no comments were received during the comment period.

This amendment represents only one part of the permit process and other issues may need to be addressed prior to final permit issuance. These issues may include, but are not limited to, the following: compliance with stormwater regulations; antidegradation; effluent limitations; water quality analysis; exact locations and designs of future treatment works; development in wetlands and flood prone areas, or other environmentally sensitive areas which are subject to regulation under Federal or State statutes or rules. Approval of this amendment does

Comments regarding this settlement or requests for a copy of the settlement should be sent to: Lawrence Baier, NJDEP Bureau of Coastal and Land Use Compliance and Enforcement, 401 East Sate Street, Mail Code 401-04C, PO Box 420, Trenton, New Jersey 08625 or via email at Larry.Baier@dep.nj.gov. Comments must be received by NJDEP within 30 days of this publication to be considered.

**NEW JERSEY DEPARTMENT OF ENVIRONMENTAL PROTECTION

**NOTICE OF PUBLIC COMMENT PERIOD  
REGARDING A SOLID WASTE RESOURCE RECOVERY FACILITY PERMIT RENEWAL**

The New Jersey Department of Environmental Protection, Division of Solid & Hazardous Waste hereby gives notice that it has tentatively approved a Solid Waste Facility Permit renewal application regarding the operation of the existing Solid Waste Resource Recovery Facility Permit for Covanta Essex Company located at 183 Raymond Boulevard in the City of Newark, Essex County.

The application for a Solid Waste Facility Permit renewal was submitted in accordance with the requirements established at N.J.A.C. 7:26-2. The facility is currently permitted to accept waste types 10, 23, 25, and 27 with an approved continued maximum waste throughput capacity of 985,500 tons per year.

The public comment period on the draft permit action begins on the date of the publication of this notice and will close within thirty (30) days of this publication. Any interested person may submit written comments during this period to the Department concerning the draft permit action to:

Anthony Fontana  
Chief  
New Jersey Department of Environmental Protection  
Division of Solid & Hazardous Waste  
Bureau of Solid Waste Permitting  
Mail Code 401-02C  
P.O. Box 420  
Trenton, New Jersey 08625-0420  
(609) 292-9880

Upon written request of any interested party, which raises the issues of fact relevant to the proposed agency action within thirty (30) days of this publication, a public hearing will be scheduled regarding the proposed agency action.

The application and all other supporting documents, as well as the draft Solid Waste Facility Permit and fact sheet are available for inspection at the above noted office of the Department's Division of Solid & Hazardous Waste, the office of the City of Newark Clerk and the office of the Essex County Clerk.

Anyone who would like to obtain copies of the draft permit and a fact sheet for the facility should notify Kim Beccia at the above address or contact her at 609-984-2104.

**NOTICE OF PUBLIC COMMENT PERIOD  
REGARDING A SOLID WASTE FACILITY PERMIT**

The New Jersey Department of Environmental Protection, Division of Solid & Hazardous Waste, hereby gives notice that it has tentatively approved an Application for Renewal of a Solid Waste Facility (SWF) Permit ("Permit") regarding the operation of the existing Cumberland County Solid Waste Complex ("Complex") located at 169 Jesse Bridge Road in the Township of Deerfield, Cumberland County. The Application for a SWF Permit Renewal was submitted in accordance with the requirements established at N.J.A.C. 7:26-2 and was given Application Number LOP140001 by the Department.

The Renewal extends the SWF Permit for an additional five (5)-year period. Solid waste types ID 10, Municipal waste (household, commercial, and institutional); ID 13, Bulky waste; ID 13C, Construction and demolition waste; ID 23, Vegetative waste; ID 25, Animal and food processing waste; ID 27, Dry industrial waste; ID 27A, Asbestos and asbestos-containing waste; and ID 27I, Incinerator ash and ash-containing waste are currently permitted for receipt and disposal at the Complex.

The public comment period on the Draft Permit action begins on the date of the publication of this notice and will close within 30 days of this publication. Any interested person may submit written comments during this period concerning the Draft Permit action to:

Anthony Fontana, Chief  
Bureau of Solid Waste Permitting  
Division of Solid and Hazardous Waste  
New Jersey Department of Environmental Protection  
Mail Code 401-02C  
P.O. Box 420  
401 E. State Street, Trenton  
New Jersey 08625-0420

Upon written request of any interested party, which raises the issues of fact relevant to the proposed agency action within 30 days of this publication, a public hearing will be scheduled regarding the proposed agency action.

The Application and all other supporting documents, as well as the Draft SWF Permit and Fact Sheet are available for inspection at the above noted office of the Department's Division of Solid & Hazardous Waste. Copies of the Application were also provided to the offices of the Clerk of the Township of Deerfield and the Clerk of Cumberland County.

Anyone who would like to obtain copies of the Draft Permit and Fact Sheet for the Complex should notify Mr. Ross M. Hull at the above address or contact him at (609) 292-9880.

**NEW JERSEY DEPARTMENT OF ENVIRONMENTAL PROTECTION  
DIVISION OF WATER QUALITY  
PUBLIC NOTICE**

Notice is hereby given that the New Jersey Department of Environmental Protection (NJDEP) proposes to issue the following New Jersey Pollutant Discharge Elimination System (NJPDES) permit actions in accordance with N.J.A.C. 7:14A-1 et seq. and by authority of N.J.S.A. 58:10A-1 et seq. The description of each proposed permit action is contained in the accompanying table.

This public notice has been prepared for these facilities as part of the administrative record to be filed at NJDEP, 401 East State Street, Trenton. Copies of the draft document are obtainable, for a nominal charge, and the administrative record is available for inspection by appointment only, Monday through Friday, by contacting the NJDEP file room at (609) 292-0400. Additional information regarding the draft document may be obtained from the contact person listed in the accompanying table.

Comments on the draft document or a request that NJDEP hold a non-adversarial public hearing on the document must be submitted, in writing, to the individual specified below (refer to the accompanying table for the appropriate permitting bureau) during the public comment period, which closes either:

1. 30 calendar days after publication of the last newspaper notice when a notice is published in the DEP Bulletin *and* a newspaper(s); or
2. 30 calendar days after publication of the DEP Bulletin notice when a notice is published in the DEP Bulletin *only*.

All persons, including permittees who believe that any condition of NJDEP's tentative decision to issue these permit actions is inappropriate must raise all reasonable issues of concern and submit all arguments and factual materials supporting their position during the public comment period. Any request for a public hearing shall state the nature of the proposed issues to be raised in the hearing. A public hearing will be conducted if NJDEP determines there is a significant degree of public interest. If a public hearing is held, the public comment period is automatically extended through the close of the hearing.

NJDEP will consider and respond to all significant and timely submitted comments. The permittee and each person who submitted written comments, will receive notice of NJDEP's final decision to issue, revoke or redraft the document.

***Written comments should be submitted to the appropriate permitting bureau:***
