General Information

The DEP Bulletin is an information service provided by the New Jersey Department of Environmental Protection. In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Flood Hazard Area (FHA) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA). In addition, this publication lists status of Highlands application and Highlands Applicability Determinations.

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed do not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed on the inside back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

DEP Events of Public Interest include public hearings, council meetings, workshops, public information meetings, and exams.

| <p>We are in the process of finishing the basement of our single family 4 bedroom home and were informed that adding a below ground bathroom to the basement would require an upgrade to our septic system due to a rule that took effect 2 weeks prior to our application for a permit. We have owned our home since 1999 and currently have only 3 people living in the house. In order to comply with NJAC 7:9A-8.2c we would need to remove or demolish our current septic tank and replace it with a system that is 50% larger and enlarge the septic field by 50%. Total waste water (Black & grey) generated is less than 100 gallons/day into a septic system that is designed to handle over 1000 gallons/day. The requirement to expand this by another 50% simply because we want to add a bathroom in the basement for convenience is unduly burdensome and a prohibitive and unnecessary expense. The additional bathroom in the house does not generate additional waste water since the number of people in the house remains the same. In addition, the current septic system is capable of handling 10 times more waste water than is currently generated.</p> |
