## General Information

---

The DEP Bulletin is an information service provided by the New Jersey Department of Environmental Protection. In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Flood Hazard Area (FHA) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA). In addition, this publication lists status of Highlands application and Highlands Applicability Determinations.

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed do not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed on the inside back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally, their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

DEP Events of Public Interest include public hearings, council meetings, workshops, public information meetings, and exams.

### **Public Notice of Intention to Extend Landfill Post-Closure Care Period**

The New Jersey Department of Environmental Protection hereby issues this public notice, pursuant to N.J.A.C. 7:26-2A.9(c)10, of its intention to extend the post-closure care period for the Fairfield Township Sanitary Landfill located on Lummis Mill Road in Fairfield, Cumberland County by an additional 10 years.

The subject landfill ceased operating and was properly closed in 1987. The Solid Waste Regulations at N.J.A.C. 7:26-2A.9 require that closed landfills be maintained and monitored during their post-closure care periods which continue for 30 years after closure. However, the Department may extend the post-closure care period upon a finding that such an extended period is necessary to protect human health and/or the environment.

Based on a review of the administrative record and inspections of the site, the Department has found that the Fairfield Township Sanitary Landfill requires extensive final cover maintenance, including removal of exposed trash, removal of existing woody vegetation, and placement of additional final cover material to comply with the sanitary landfill closure requirements of N.J.A.C.7:26-2A.9 and the approved Closure and Post-Closure Plan. Based on these findings, the Department has determined that it is necessary to extend the post-closure care period for the landfill to protect human health and the environment. The Department intends to extend the post-closure care period for 10 additional years. During this extended post-closure care period, the Department will require the Township to implement a plan to correct the final cover deficiencies and continue to maintain and monitor the landfill.

If anyone from the public has questions or comments concerning the Department's intention to extend the post-closure care period, please send those questions or comments to the following address:
