New Jersey Clean Air Council Meeting Record

NJ DEP
 401 East State Street, 5th Floor
 Trenton, NJ

Wednesday, December 9, 2015

CALL TO ORDER	Richard Opiekun opened the meeting.
COUNCIL MEMBERS PRESENT	All of the Council members were present with the changed noted below.
EXCUSED	Robert Laumbach Joseph Spatola
PUBLIC	Scott Ross, NJ Petroleum Council Kimberly Scarborough, PSEG Andrea Friedman, NJDEP Chris Van Atten, MJ Bradley & Associates Mark Connelly, Public

Meeting Record

- The November meeting minutes were tabled.
- Public Hearing scheduled for Thursday, April 28, 2016 at Thomas Edison State College.
- Michael Egenton made a motion to adjourn; Ferdows Ali seconded the motion. Meeting was adjourned at 12:15pm.

Administrative Report

Presented by Bill O'Sullivan, Division of Air Quality

1. Energy Master Plan - Draft revisions of the NJ BPU Energy Master Plan were released on 11/23/15, with comments due by 12/4/15. (The EMP has since been finalized in early Jan. 2016, and copies provided to CAC by e mail.)
2. Power Plant Projects
 - a. Bayonne Energy Center – On 12/2/15, an air permit application was submitted for two new 66 MW simple cycle turbines to be located at the existing power plant site in Bayonne.
 - b. Deepwater Energy Center – On 12/7/15, Calpine submitted an air permit application for a new 446 MW combined cycle turbine with duct burner to be located at the existing power plant site in Pennsville.
 - c. Pre application meetings have been held with several other potential applicants for new natural gas combined cycle power plants at existing and new power plant sites, totaling about 3,500 MW.
 - d. Gateway Energy – On 11/23/15, NJDEP issued a notice to deny an air permit for a 450 MW facility in Sayreville, because of failure to provide requested information.
3. Mitsubishi Hitachi Power Systems – Provided a technical seminar for air permit staff on the capabilities of new large combined cycle turbine projects. Higher efficiencies may be able to achieve less than 800 lbs. of CO₂ per MWhr, which is considerably better than USEPA's August 2015 New Source Performance Standard of 1000 lbs. of CO₂ per MWhr.
4. VW Diesel violations – NJ Department of Law is working with California and other states that require low emission vehicles on legal action concerning violations of state emission requirements. Substantial numbers of noncomplying VW diesel vehicles were sold in NJ.
5. Port Authority - has approved a 3 year extension to their Ocean-Going Clean Vessel Incentive Program at a cost of \$3.12 million to encourage cleaner fuels, improved engines, and lower emission operation of ships when operating in the harbor.
6. Clean Power Plan(CPP) Evaluation
 - a. NJ Energy Goals – Andrea Friedman provided a summary of NJ Energy Goals as listed in the Energy Master Plan.
 - b. CPP Regulated Facilities - A graph was provided showing that 7 of the CPP regulated facilities in NJ account for over 80% of the annual electric production from the 24 CPP regulated facilities.
 - c. Rate based program – A 12/8/15 draft of a rough accounting for a potential NJ rate based program shows that about 10 million Emission Reduction Credits (ERCs) would be required in 2030 and potentially over 20 million ERCs might be generated from renewable energy, energy efficiency, combined heat and power, and gas shift ERCs. (These estimates are being revised to better show uncertainties by providing ranges for each estimate.)
