

Jersey City MUA Update

December 16, 2014

The Jersey City Municipal Utilities Authority this morning completed permanent repairs on the sewer main between NJ Transit's Garfield Avenue and Martin Luther King stations. The New Jersey Department of Environmental Protection continues to advise the public to temporarily avoid direct contact with and refrain from fishing in the Lower Hudson River, Upper New York Bay and the Kill Van Kull. This will allow for the natural breakdown and dilution of sewage discharges that were needed to allow the repairs to be completed. The DEP expects to lift the advisory on Wednesday.
