

Jersey City MUA Update

December 18, 2014

The Department of Environmental Protection today lifted its water contact advisory for waters of Upper New York Bay, the Lower Hudson River and the Kill Van Kull following completion of permanent repairs to a Jersey City Municipal Utilities Authority sewer main. The JCMUA completed repairs on the break in the 54-inch main located between the Garfield Avenue and Martin Luther King NJ Transit stations earlier this week, ending temporary sewage bypasses.
