

**NEW JERSEY INTERMEDIATE PROCESSING FACILITIES
(CLASS A RECYCLING CENTERS)**

Updated March 2009

While Intermediate Processing Facility (IPF) is not a regulatory term, it typically refers to a particular Class A recycling center that receives, at a minimum, source-separated commingled recyclable containers and processes the recyclable materials through mechanical and manual means into their constituent components.

Intermediate Processing Facilities are not given a permit by the NJDEP. However, they must be included in the County Solid Waste Management Plan of the county in which they intend to operate. Contact your county solid waste management office to confirm inclusion in their plan.

* **Facilities marked with an asterisk are equipped to process source-separated single-stream recyclables.**

Atlantic County Utilities Authority IPF (Atlantic County)
