# **Upcoming Air Quality Workshop: "Reducing Air Pollution Together: An Update on Air Emission Control Strategies in New Jersey"**

### **Why is this important to me?**

Meeting the new air quality standards will be a challenge for New Jersey, requiring the state to look at new emission control strategies for additional reductions, in addition to enhancing existing strategies. It is important that representatives of the regulated community participate in this process because the potential control measures under consideration cover a broad range of emission sources.

### **How can I participate?**

The New Jersey Department of Environmental Protection (DEP) invites you to join the public, representatives from local businesses, industry and environmental groups, and others for a workshop to discuss potential emission reduction strategies on **Wednesday, May 17, 2006** at the War Memorial Building in Trenton, NJ.

You may register for the workshop online at <http://www.nj.gov/dep/airworkgroups/regform.htm>. **Please register by May 8, 2006.**

The purpose of the workshop will be twofold: to provide an update on efforts during the past year to address air quality challenges facing New Jersey and to share preliminary regulatory and nonregulatory plans to reduce air emissions and to improve air quality for the health of New Jersey residents.

The DEP intends to assemble new teams to advise the department as we make final decisions on the measures to be selected.

### **Where can I get more information?**

For the most up-to-date information on the Workshop, please visit <http://www.nj.gov/dep/airworkgroups/2006update>. To get additional information, email [airworkshop@dep.state.nj.us](mailto:airworkshop@dep.state.nj.us) or call 609-292-6722.

Please note this advisory is intended to be a summary explanation of a DEP initiative. It does not include all potentially applicable requirements. If you have any questions related to participation with this initiative, please contact the number listed above.
