Summary

Chemicals that are persistent, bioaccumulative and toxic (PBT) are of particular concern not only because they are toxic, but also because they remain in the environment for long periods of time, are not readily destroyed, and build up or accumulate in body tissue. Through a series of rule changes for RY 2000 and RY 2001, the U. S. Environmental Protection Agency (USEPA) established a list of 20 chemicals and compound categories that are considered PBTs for TRI reporting purposes and lowered the reporting threshold for these chemicals.

Data summarized and presented on the following pages include all reports submitted by facilities for chemicals classified as PBTs except for dioxins. Dioxins are a unique category of PBT that are considered highly toxic and, therefore, reported in grams per year and not in pounds as are all other reportable substances.

There were 174 facilities that submitted 270 reports on 11 PBTs listings for 2006. For the purposes of this summary, lead and lead compounds were combined as a group as was mercury and mercury compounds. Lead and compounds are PBTs as well as carcinogens, as are most of the PBTs, and top the list for PBT Use for 2006. (Mercury and mercury compounds, pendimethalin, pentachlorobenzene, and trifluralin are listed as PBTs but not as carcinogens.) For RY 2006 lead and compounds and polycyclic aromatic compounds (PACs) accounted for more than 98% of all PBT Use. Combining the lead and compounds and mercury and compounds into groups resulted in only 9 PBT substance listings for 2006.

Environmental releases of PBTs are of special concern due to the nature of their potential to bioaccumulate in fish and other species and their potential impacts on human health. When humans consume fish and other food sources contaminated with PBTs the possibility of adverse health effects, especially for the young, elderly and sensitive individuals in the population becomes an issue. Even small quantities of environmental releases are, therefore, a matter of concern. The NJDEP has established work groups, as necessary, to study such special cases of concern and to issues advisories, e.g., for fishing, to alert citizens about identified problem areas.

About 0.1% of the 2006 PBT nonproduct output (NPO) was released to the environment from on-site sources, 24.5% was managed on site, and 75.4% was transferred off site for further waste management. Of all 2006 PBT NPO, 95.8% (more than 13.2 million pounds) was reported as on-site or off-site recycling. On-site and off-site recycling of lead and lead compounds was the single dominant management activity for NPO of all PBT substances and accounted for the largest quantities.

As stated above, lead and lead compounds and mercury and mercury compounds were combined as two groups since only the metal component is to be quantified for metal compound categories. As a result of the lead and mercury groupings, there are only nine PBT substances listed for 2006. Lead and compounds accounted for nearly 100% of NPO for PBTs for 2006.

Statewide Materials Accounting Summary¹ – 2006 RPPR
Persistent, Bioaccumulative, Toxic Substances

	2006
Number of Facilities	174
Number of Substance Reports	270
Starting Inventory	8,381,569.76
Starting Inventory as NPO	94,183.32
Manufactured	9,801,193.49
Brought on Site	114,123,991.55
Brought on Site as Recycled	41,945,240.06
Consumed	15,642,400.80
Shipped	100,276,710.93
Ending Inventory	6,131,640.23
Ending Inventory as NPO	73,880.46
NPO	13,828,400.81
On-Site Releases	18,089.64
Stack Air Emissions	6,533.89
Fugitive Air Emissions	1,474.08
Surface Water Discharge	1,099.97
Ground Water Discharge	0.00
Land Disposal on-site	8,981.70
On-Site Management	3,391,214.90
Recycled & Reused on-site	3,386,317.00
Energy Recovered on-site	1,940.30
Destroyed on-site	2,957.60
EI(as NPO) - SI(as NPO)	20302.86
Off-Site Transfers	10,439,399.13
POTW Discharge	145.36
Waste Transfer - Recycling	9,859,400.80
Waste Transfer - Energy Recovery	1,959.83
Waste Transfer - Treatment	318,268.51
Waste Transfer - Disposal	259,527.62
Total Substance USE or Throughput	129,747,512.54

1. All quantities are reported in pounds per year, except for “# of Facilities” and “# of Reports”
