

## 2012 AQUATIC PESTICIDE PRODUCT CONDITIONS

**ACCORD:** Only three treatments are allowed per treatment area during the proposed treatment period. The allowable dosage rate is specified on the product label. Do not retreat the same treatment area with this product or any other herbicide for emergent weeds, herbaceous plants, or woody plants for at least 14 days. Do not use any other herbicide for emergent weeds, herbaceous plants, or woody plants in the same treatment area at the same time as this product.

**ALGAE PRO:** In a single operation, only partial treatments (1/3 to 1/2 of the aquatic site) are allowed. The total amount of product allowed every 30 days is the amount of product equivalent to 2 treatments of 1/2 the aquatic site at the allowable dosage rate specified on the product label. Do not retreat this aquatic site with this product or any other algaecide for at least 7 days. Do not use any other algaecide in the same treatment area at the same time as this product.

**ALGIMYCIN PWF:** In a single operation, only partial treatments (1/3 to 1/2 of the aquatic site) are allowed at the dosage rate specified on the product label. Do not retreat this aquatic site with this product or any other algaecide for at least 7 days. Do not use any other algaecide in the same treatment area at the same time as this product.

**AQUA-KLEEN:** Full aquatic site treatments are only allowed when weed mass is sparse. The total amount of product allowed during the proposed treatment period is the amount of product equivalent to 2 full aquatic site treatments at the allowable dosage rate specified on the product label. Do not retreat the same treatment area with this product or any other herbicide for submerged weeds for at least 6 weeks. Do not use any other herbicide for submerged weeds in the same treatment area at the same time as this product.

**AQUACIDE PELLETS:** Full aquatic site treatments are allowed. Whether applied in one treatment or multiple treatments, the total amount of product allowed during the proposed treatment period, is the amount of product equivalent to three full aquatic site treatments at the allowable dosage rate specified on the product label. Do not retreat the same treatment area with this product or any other herbicide for submerged weeds for at least 30 days. Do not use any other herbicide for submerged weeds in the same treatment area at the same time as this product.

**AQUACURE - ALGAECIDE:** Only partial treatments (1/3 to 1/2 of the aquatic site) are allowed. The total amount of product allowed to each treatment area every 30 days during the proposed treatment period is the amount of product equivalent to two treatments of 1/2 of the aquatic site at the allowable dosage rate specified on the product label. Do not retreat the same treatment area with this product or any other algaecide for at least 7 days. Do not use any other algaecide in the same treatment area at the same time as this product.

**AQUACURE - HERBICIDE:** Only partial treatments (1/3 to 1/2 of the aquatic site) are allowed. The total amount of product allowed to each treatment area every 30 days during the proposed treatment period is the amount of product equivalent to two treatments of 1/2 of the aquatic site at the allowable dosage rate specified on the product label. Do not retreat the same treatment area with this product or any other herbicide for at least 7 days. Do not use any other herbicide in the same treatment area at the same time as this product.

**AQUAMASTER:** Only three treatments are allowed per treatment area during the proposed treatment period. The maximum amount of product allowed per treatment is the dosage rate specified on the product label. Do not retreat the same treatment area with this product or any other herbicide for emergent weeds for at least 14 days. Do not use any other herbicide for emergent weeds in the same treatment area at the same time as this product.

**AQUANEAT:** Only three treatments are allowed per treatment area during the proposed treatment period. The maximum dosage rate allowed to be used during a treatment is the dosage rate specified on the product label. Do not retreat the same treatment area with this product or any other herbicide for emergent weeds, herbaceous plants, or woody plants for at least 14 days. Do not use any other herbicide for emergent weeds, herbaceous plants, or woody plants in the same treatment area at the same time as this product.

**AQUAPIER:** In a single operation, only partial treatments (up to ½ of the aquatic site) are allowed at the dosage rate specified on the product label. Do not retreat the treatment area with this product or any other product for emergent vegetation for at least 10 days. Do not use any other product in the same treatment area at the same time as this product. Maximum treatment of 1.5 pounds of active ingredient per acre per year is allowed.

**AQUAPRO:** Only three treatments are allowed per treatment area during the proposed treatment period. The maximum dosage rate allowed to be used during a treatment is that specified on the product label. Do not retreat the same treatment area with this product or any other herbicide for emergent weeds for at least 14 days. Do not use any other herbicide for emergent weeds in the same treatment area at the same time as this product.

**AQUASHADE:** Full aquatic site treatments are allowed. Whether applied in one treatment or multiple treatments, the total amount of product allowed every 30 days during the proposed treatment period is the amount of product equivalent to two full aquatic site treatments at the allowable dosage rate specified on the product label. Do not retreat the same treatment area with this product or any other algaecide for at least 30 days. Do not use any other algaecide in the same treatment area at the same time as this product.

**AQUATHOL K:** Full aquatic site treatments are allowed. Whether applied in one treatment or multiple treatments, the total amount of product allowed during the proposed treatment period is the amount of product equivalent to three full aquatic site treatments at the allowable dosage rate specified on the product label. Do not retreat the same treatment area with this product or any other herbicide for submerged weeds for at least 14 days. Do not use any other herbicide for submerged weeds in the same treatment area at the same time as this product.

**AQUATHOL SUPER K:** Full aquatic site treatments are allowed. Whether applied in one treatment or multiple treatments, the total amount of product allowed during the proposed treatment period is the amount of product equivalent to three full aquatic site treatments at the allowable dosage rate specified on the product label. Do not retreat the same treatment area with this product or any other herbicide for submerged weeds for at least 14 days. Do not use any other herbicide for submerged weeds in the same treatment area at the same time as this product.

**AVAST:** Full aquatic site treatments are allowed. Whether applied in one single treatment or multiple treatments, the total amount of product allowed during the proposed treatment period must comply with the following guidelines. For Ponds (aquatic site area is less than or equal to 10 acres): a single application rate can not exceed 90 ppb, and for split or multiple applications the sum of all application rates can not exceed 90 ppb. For Lakes & Reservoirs (aquatic site area is greater than 10 acres): a single application rate can not exceed 150 ppb; and for split or multiple applications the sum of all application rates can not exceed 150 ppb, where 75 ppb is the maximum rate at any time. When performing split or multiple treatments to the same treatment area with this product or any other herbicide for submerged weeds, a minimum of 7 days is required between treatments. Do not use any other herbicide for submerged weeds in the same treatment area at the same time as this product.

**CAPTAIN:** In a single operation, only partial treatments (1/3 to 1/2 of the aquatic site) are allowed at the dosage rate specified on the product label. Do not retreat this aquatic site with this product or any other algaecide for at least 7 days. Do not use any other algaecide in the same treatment area at the same time as this product.

**CLEARCAST:** In a single operation, only partial treatments (1/3 to 1/2 of the aquatic site) are allowed at the dosage rate specified on the product label. Do not retreat this aquatic site with this product or any other herbicide for submerged/floating/weeds for at least 14 days. Do not use any other herbicide in the same treatment area at the same time as this product.

**CLEARIGATE:** In a single operation, only partial treatments (1/3 to 1/2 of the aquatic site) are allowed at the dosage rate specified on the product label. Do not retreat this aquatic site with this product or any other algaecide for at least 7 days. Do not use any other algaecide in the same treatment area at the same time as this product.

**CLIPPER:** Full aquatic site treatments are only allowed when weed mass is sparse. The total amount of treatments is limited to six at the allowable dosage rate specified on the product label. Do not retreat the same treatment area with this product or any other herbicide for submerged, floating, and/or emerged weeds for 12 days. Do not use any other herbicide for submerged, floating, and/or emerged weeds in the same treatment area at the same time as this product. Ensure that water pH is taken and complies with pH label mandates prior to any application.

**CuSO4:** In a single operation, only partial treatments (1/3 to 1/2 of the aquatic site) are allowed at the dosage rate specified on the product label. Do not retreat this aquatic site with this product or any other algaecide for at least 7 days. Do not use any other algaecide in the same treatment area at the same time as this product.

**CUTRINE-PLUS (solid):** In a single operation, only partial treatments (1/3 to 1/2 of the aquatic site) are allowed at the dosage rate specified on the product label. Do not retreat this aquatic site with this product or any other algaecide for at least 7 days. Do not use any other algaecide in the same treatment area at the same time as this product.

**EAGRE:** Only three treatments are allowed per treatment area during the proposed treatment period. The maximum dosage rate allowed to be used during a treatment is the allowable dosage rate specified on the product label. Do not retreat the same treatment area with this product or any other herbicide for emergent weeds for at least 14 days. Do not use any other herbicide for emergent weeds in the same treatment area at the same time as this product.

**EARTHTEC:** In a single operation, only partial treatments (1/3 to 1/2 of the aquatic site) are allowed. The total amount of product allowed every 30 days is the amount of product equivalent to 2 treatments of 1/2 the aquatic site at the allowable dosage rate specified on the product label. Do not retreat this aquatic site with this product or any other algaecide for at least 7 days. Do not use any other algaecide in the same treatment area at the same time as this product.

**ELIMINATOR:** Full aquatic site treatments are allowed. Whether applied in one treatment or multiple treatments, the total amount of product allowed during the proposed treatment period is the amount of product equivalent to three full aquatic site treatments at the allowable dosage rate specified on the product label. Do not retreat the same treatment area with this product or any other herbicide for submerged weeds for at least 14 days. Do not use any other herbicide for submerged weeds in the same treatment area at the same time as this product.

**FORMULA F30:** In a single operation, only partial treatments (1/3 to 1/2 of the aquatic site) are allowed at the dosage rate specified on the product label. Do not retreat this aquatic site with this product or any other algaecide for at least 10 days. Do not use any other algaecide in the same treatment area at the same time as this product.

**GALLEON SC:** Full aquatic site treatments are allowed. For Lakes, Ponds, and Reservoirs, split or multiple applications may be conducted (150 ppb maximum at any one time), limited to a total of 150 ppb per annual growth cycle. When performing split or multiple treatments to the same treatment area with this product or any other herbicide for submerged weeds, a minimum of 7 days is required between treatments. Do not use any other herbicide for submerged weeds in the same treatment area at the same time as this product.

**Garlon 3A:** This product is permissible to treat non-irrigation ditch banks, seasonally dry wetlands, and transitional areas between upland and lowland sites when surface water is not present except for in isolated pockets due to uneven or unlevel conditions. DO NOT APPLY to open water. This product may be used with rates up to 8 quarts per acre per year on non-crop areas including rights-of-way including electrical power lines. Do not use any other herbicide for emergent weeds, herbaceous plants, or woody plants in the same treatment area at the same time as this product.

**GLYPRO:** Only three treatments are allowed per treatment area during the proposed treatment period. The maximum dosage rate allowed to be used during a treatment is specified on the front page of this permit. Do not retreat the same treatment area with this product or any other herbicide for emergent weeds, herbaceous plants, or woody plants for at least 14 days. Do not use any other herbicide for emergent weeds, herbaceous plants, or woody plants in the same treatment area at the same time as this product.

**GREENCLEAN:** In a single operation only partial treatments (1/3 to 1/2 of the aquatic site) are allowed at the dosage rate specified on the product label. Do not retreat the same treatment area with this product or any other algaecide for at least 4 days. Do not use any other algaecide in the same treatment area at the same time as this product. Dosage rates are limited to curative or preventative maintenance.

**HABITAT:** In a single operation, only partial treatments (1/3 to 1/2 of the aquatic site) are allowed at the dosage rate specified on the product label. Do not retreat the treatment area with this product or any other product for at least 10 days. Do not use any other product in the same treatment area at the same time as this product.

**HYDROTHOL-191:** Full aquatic site treatments are allowed. Whether applied in one treatment or multiple treatments, the total amount of product allowed during the proposed treatment period is the amount of product equivalent to three full aquatic site treatments at the allowable dosage rate specified on the product label. Do not apply any other pesticide to the same treatment area at the same time as this product. Do not retreat with this pesticide or apply any other pesticide to this treatment area for at least 14 days after treatment.

**K-TEA:** In a single operation, only partial treatments (1/3 to 1/2 of the aquatic site) are allowed. The total amount of product allowed every 30 days is the amount of product equivalent to 2 treatments of 1/2 the aquatic site at the allowable dosage rate specified on the product label. Do not retreat this aquatic site with this product or any other algaecide for at least 10 days. Do not use any other algaecide in the same treatment area at the same time as this product.

**KNOCKOUT:** In a single operation, only partial treatments (1/3 to 1/2 of the aquatic site) are allowed at the approved dosage rate specified on this permit. Do not retreat the same treatment area with this product or any other herbicide for submerged weeds for at least 14 days. Total treatment area with this product and any other herbicide for submerged weeds (including algaecides) cannot exceed 1/2 of the aquatic site area within any 14 day period. Do not use any other herbicide for submerged weeds at the same time as this product. Outflow must be little to none for 5 days following treatment, or do not treat within 1,000 feet of this outlet. For water with an average depth (< or =) to 2 feet, dosage rate is restricted to 1 gal per surface acre.

**KOMEEN:** In a single operation, only partial treatments (1/3 to 1/2 of the aquatic site) are allowed. The total amount of product allowed to each treatment area in a single operation is equivalent to treating 1/2 the aquatic site at the allowable dosage rate specified on the product label. Do not retreat the same treatment area with this product for at least 12 weeks. Do not treat additional areas for 10-14 days. Do not use any other herbicide for submerged weeds in the same treatment area at the same time as this product.

**LESCO HYDRO BLOCK:** Full aquatic site treatments are allowed. Whether applied in one treatment or multiple treatments, the total amount of product allowed every 30 days during the proposed treatment period is the amount of product equivalent to two full aquatic site treatments at the allowable dosage rate specified on the product label. Do not retreat the same treatment area with this product or any other algaecide for at least 30 days. Do not use any other algaecide in the same treatment area at the same time as this product.

**LESCOCIDE-PLUS ALGAECIDE:** Only partial treatments (1/3 to 1/2 of the aquatic site) are allowed. The total amount of product allowed to each treatment area every 30 days during the proposed treatment period is the amount of product equivalent to four half aquatic site treatments at the allowable dosage rate specified on the product label. Do not retreat the same treatment area with this product or any other algaecide for at least 7 days. Do not use any other algaecide in the same treatment area at the same time as this product.

**LESCOCIDE-PLUS GRANULAR ALGAECIDE:** Only partial treatments (1/3 to 1/2 of the aquatic site) are allowed. The total amount of product allowed to each treatment area every 30 days during the proposed treatment period is the amount of product equivalent to four half aquatic site treatments at the allowable dosage rate specified on the product label. Do not retreat the same treatment area with this product or any other algaecide for at least 7 days. Do not use any other algaecide in the same treatment area at the same time as this product.

**NAUTIQUE:** In a single operation, only partial treatments (1/3 to 1/2 of the aquatic site) are allowed. The total amount of product allowed every 30 days is the amount of product equivalent to 2 treatments of 1/2 the aquatic site at the allowable dosage rate specified on the product label. Do not retreat this aquatic site with this product or any other herbicide for submerged weeds for at least 10 days. Do not use any other herbicide for submerged weeds in the same treatment area at the same time as this product.

**NAVIGATE:** Full aquatic site treatments are only allowed when weed mass is sparse. The total amount of product allowed during the proposed treatment period is the amount of product equivalent to 2 full aquatic site treatments at the allowable dosage rate specified on the product label. Do not retreat the same treatment area with this product or any other herbicide for submerged weeds for at least 6 weeks. Do not use any other herbicide for submerged weeds in the same treatment area at the same time as this product.

**PAK 27 Algaecide:** In a single operation only partial treatments (1/3 to 1/2 of the aquatic site) are allowed at the dosage rate specified on the product label. Do not retreat the same treatment area with this product or any other algaecide for at least 4 days. Do not use any other algaecide in the same treatment area at the same time as this product. Dosage rates are limited to curative or preventative maintenance.

**PHYCOMYCIN:** In a single operation only partial treatments (1/3 to 1/2 of the aquatic site) are allowed at the dosage rate specified on the product label. Do not retreat the same treatment area with this product or any other algaecide for at least 4 days. Do not use any other algaecide in the same treatment area at the same time as this product. Dosage rates are limited to curative or preventative maintenance. **PRENFISH TOXICANT:** Full aquatic site treatments are allowed. Fish kills are expected at recommended rates. Use in fisheries management for the eradication of fish from lakes, ponds, and streams. Dosage is based on type of water body use (maximum of 5 ppm under any conditions), consult label for specific directions. If a detoxification procedure is necessary to neutralize the rotenone within the water, only potassium permanganate is allowed to be used per Prefish label directions. Wait at least 2 weeks after treatment before attempting to restock water body.

**POLARIS:** In a single operation, only partial treatments (1/3 to 1/2 of the aquatic site) are allowed at the dosage rate specified on the product label. Do not retreat the treatment area with this product or any other product for at least 10 days. Do not use any other product in the same treatment area at the same time as this product.

MAX DOSAGE RATE= 0.75 GALS/A.

**RADIANCE:** In a single operation, only partial treatments (1/3 to 1/2 of the aquatic site) are allowed. The total amount of product allowed every 30 days is the amount of product equivalent to 2 treatments of 1/2 the aquatic site at the allowable dosage rate specified on the product label. Do not retreat this aquatic site with this product or any other algaecide for at least 10 days. Do not use any other algaecide in the same treatment area at the same time as this product.

**REDWING:** In a single operation, only partial treatments (1/3 to 1/2 of the aquatic site) are allowed at the approved dosage rate specified on this permit. Do not retreat the same treatment area with this product or any other herbicide for submerged weeds for at least 14 days. Total treatment area with this product and any other herbicide for submerged weeds (including algaecides) cannot exceed 1/2 of the aquatic site area within any 14 day period. Do not use any other herbicide for submerged weeds at the same time as this product. Outflow must be little to none for 5 days following treatment, or do not treat within 1,000 feet of this outlet. For water with an average depth (< or =) to 2 feet, dosage rate is restricted to 1 gal. per surface acre.

**RENOVATE 3:** Only partial treatments (1/3 to 1/2 of the aquatic site) are allowed. The total amount of product allowed to each treatment area during the proposed treatment period is the amount of product equivalent to two 1/2 aquatic site treatments at the allowable dosage rate specified on the product label. Do not retreat the same treatment area with this product or any other herbicide for submerged, floating, and/or emerged weeds for at least 10 days. Do not use any other herbicide for submerged, floating, and/or emerged weeds in the same treatment area at the same time as this product.

**RENOVATE MAX G:** Full aquatic site treatments are only allowed when weed mass is sparse. The total amount of product allowed during the treatment season is the amount of product equivalent to 2 full aquatic site treatments at the allowable dosage rate specified on the product label (maximum of 93.7 pounds/acre foot per application). Only two treatments per season are allowed to target areas regardless of dosage rate. Do not retreat the same treatment area with this product or any other herbicide for submerged, floating, and/or emerged weeds for at least 21 days unless conducting split treatments. Do not use any other herbicide for submerged, floating, and/or emerged weeds in the same treatment area at the same time as this product.

**RODEO:** Only three treatments are allowed per treatment area during the proposed treatment period. The maximum dosage rate allowed to be used during a treatment is specified on the front page of this permit. Do not retreat the same treatment area with this product or any other herbicide for emergent weeds for at least 14 days. Do not use any other herbicide for emergent weeds in the same treatment area at the same time as this product.

**REWARD:** In a single operation, only partial treatments (1/3 to 1/2 of the aquatic site) are allowed at the approved dosage rate specified on this permit. Do not retreat the same treatment area with this product or any other herbicide for submerged weeds for at least 14 days. Total treatment area with this product and any other herbicide for submerged weeds (including algaecides) cannot exceed 1/2 of the aquatic site area within any 14 day period. Do not use any other herbicide for submerged weeds at the same time as this product. Outflow must be little to none for 5 days following treatment, or do not treat within 1,000 feet of this outlet. For water with an average depth (< or =) to 2 feet, dosage rate is restricted to 1 gal Reward per surface acre.

**PRENFISH TOXICANT:** Full aquatic site treatments are allowed. Fish kills are expected at recommended rates. Use in fisheries management for the eradication of fish from lakes, ponds, and streams. Dosage is based on type of water body use (maximum of 5 ppm under any conditions), consult label for specific directions. The maximum dosage rate allowed to be used during a treatment will be determined on a case by case basis. If a detoxification procedure is necessary to neutralize the rotenone within the water, only potassium permanganate is allowed to be used per Prefish label directions. Wait at least 2 weeks after treatment before attempting to restock water body.

**SCI-62:** Only partial treatments (1/3 to 1/2 of the aquatic site) are allowed. The total amount of product allowed to each treatment area every 30 days during the proposed treatment period is the amount of product equivalent to two treatments of 1/2 the aquatic site at the allowable dosage rate specified on the product label. Do not retreat the same treatment area with this product or any other algaecide for at least 10 days. Do not use any other algaecide in the same treatment area at the same time as this product.

**SCULPIN G:** Full aquatic site treatments are only allowed when weed mass is sparse. The total amount of product allowed during the proposed treatment period is the amount of product equivalent to 2 full aquatic site treatments at the approved dosage rate specified on this permit. Do not retreat the same treatment area with this product or any other herbicide for submerged, floating, and/or emerged weeds for at least 3 weeks unless conducting split treatments. Do not use any other herbicide for submerged, floating, and/or emerged weeds in the same treatment area at the same time as this product.

**SONAR:** Full aquatic site treatments are allowed. For Lakes and Reservoirs, split or multiple applications may be conducted (90 ppb maximum at any one time), limited to a total of 150 ppb per annual growth cycle. For Ponds, split or multiple applications may be conducted, limited to a total of 90 ppb per annual growth cycle. When performing split or multiple treatments to the same treatment area with this product or any other herbicide for submerged weeds, a minimum of 7 days is required between treatments. Do not use any other herbicide for submerged weeds in the same treatment area at the same time as this product.

**TAHOE 3A:** This product is permissible to treat non-irrigation ditch banks, seasonally dry wetlands, and transitional areas between upland and lowland sites, and forestry sites associated with wetland areas. For such sites, in a single operation, full site treatments are allowed at the approved dosage rate specified on this permit. For forestry sites associated with wetlands, application is limited to 2 gallons of this product per acre per year. Do not use any other herbicide for emergent weeds, herbaceous plants, or woody plants in the same treatment area at the same time as this product.

**TOUCHDOWN PRO:** In a single operation, only partial treatments (1/3 to 1/2 of the aquatic site) are allowed. Only three treatments are allowed per treatment area during the proposed treatment period. The maximum dosage rate allowed to be used during a treatment is specified on the product label. Do not retreat the same treatment area with this product or any other herbicide for emergent weeds, herbaceous plants, or woody plants for at least 14 days. Do not use any other herbicide for emergent weeds, herbaceous plants, or woody plants in the same treatment area at the same time as this product.

**WEEDTRINE-D:** Full aquatic site treatments are allowed. Whether applied in one treatment or multiple treatments, the total amount of product allowed during the proposed treatment period is the amount of product equivalent to three full aquatic site treatments at the allowable dosage rate specified on the product label. Do not retreat the same treatment area with this product or any other herbicide for submerged weeds for at least 14 days. Do not use any other herbicide for submerged weeds in the same treatment area at the same time as this product.

**WHITECAP:** Full aquatic site treatments are allowed. For Lakes and Reservoirs, split or multiple applications may be conducted (90 ppb maximum at any one time), limited to a total of 150 ppb per annual growth cycle. For Ponds, split or multiple applications may be conducted, limited to a total of 90 ppb per annual growth cycle. When performing split or multiple treatments to the same treatment area with this product or any other herbicide for submerged weeds, a minimum of 7 days is required between treatments. Do not use any other herbicide for submerged weeds in the same treatment area at the same time as this product.
