

APPENDIX

Geographic Region Maps – Red knot critical habitat (migratory stopover and wintering/nonbreeding areas)

These important habitats are classified as “Critical” or “Suitable” according to the following criteria:

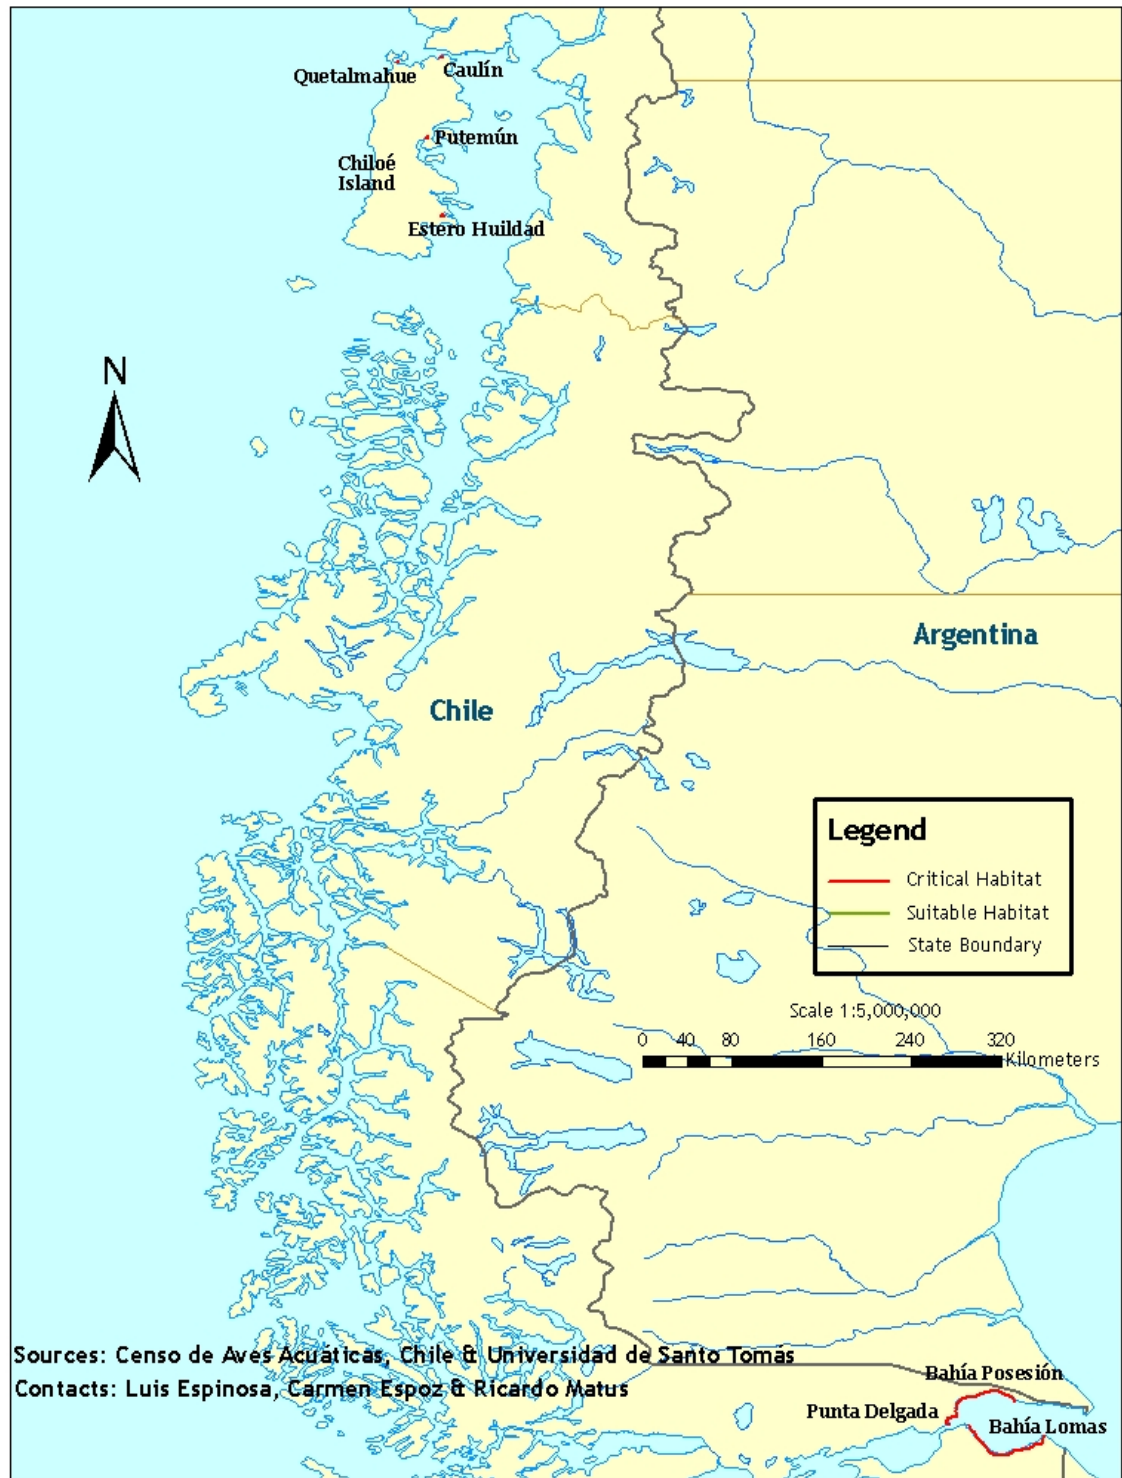

“Critical” habitats (red) are:

- 1) sites of known importance for red knots and are documented by survey
- 2) sites of known importance by expert opinion, and may or may not have survey data available
- 3) sites of known importance that are occupied intermittently (because of naturally fluctuating food resources, human disturbance, beach replenishment, etc.), and may or may not have survey data.

“Suitable” habitats (green) are:

- 1) sites of known importance that are occupied intermittently, may or may not have survey data, and are deemed by expert opinion as secondary sites not critical to the persistence of the red knot population at its current population level -- these sites may become critical if the red knot population increases
- 2) sites that were historically used by red knot but are now unused although the habitat has not been altered -- these sites may become critical if the red knot population increases.

Critical Habitats -- Chile

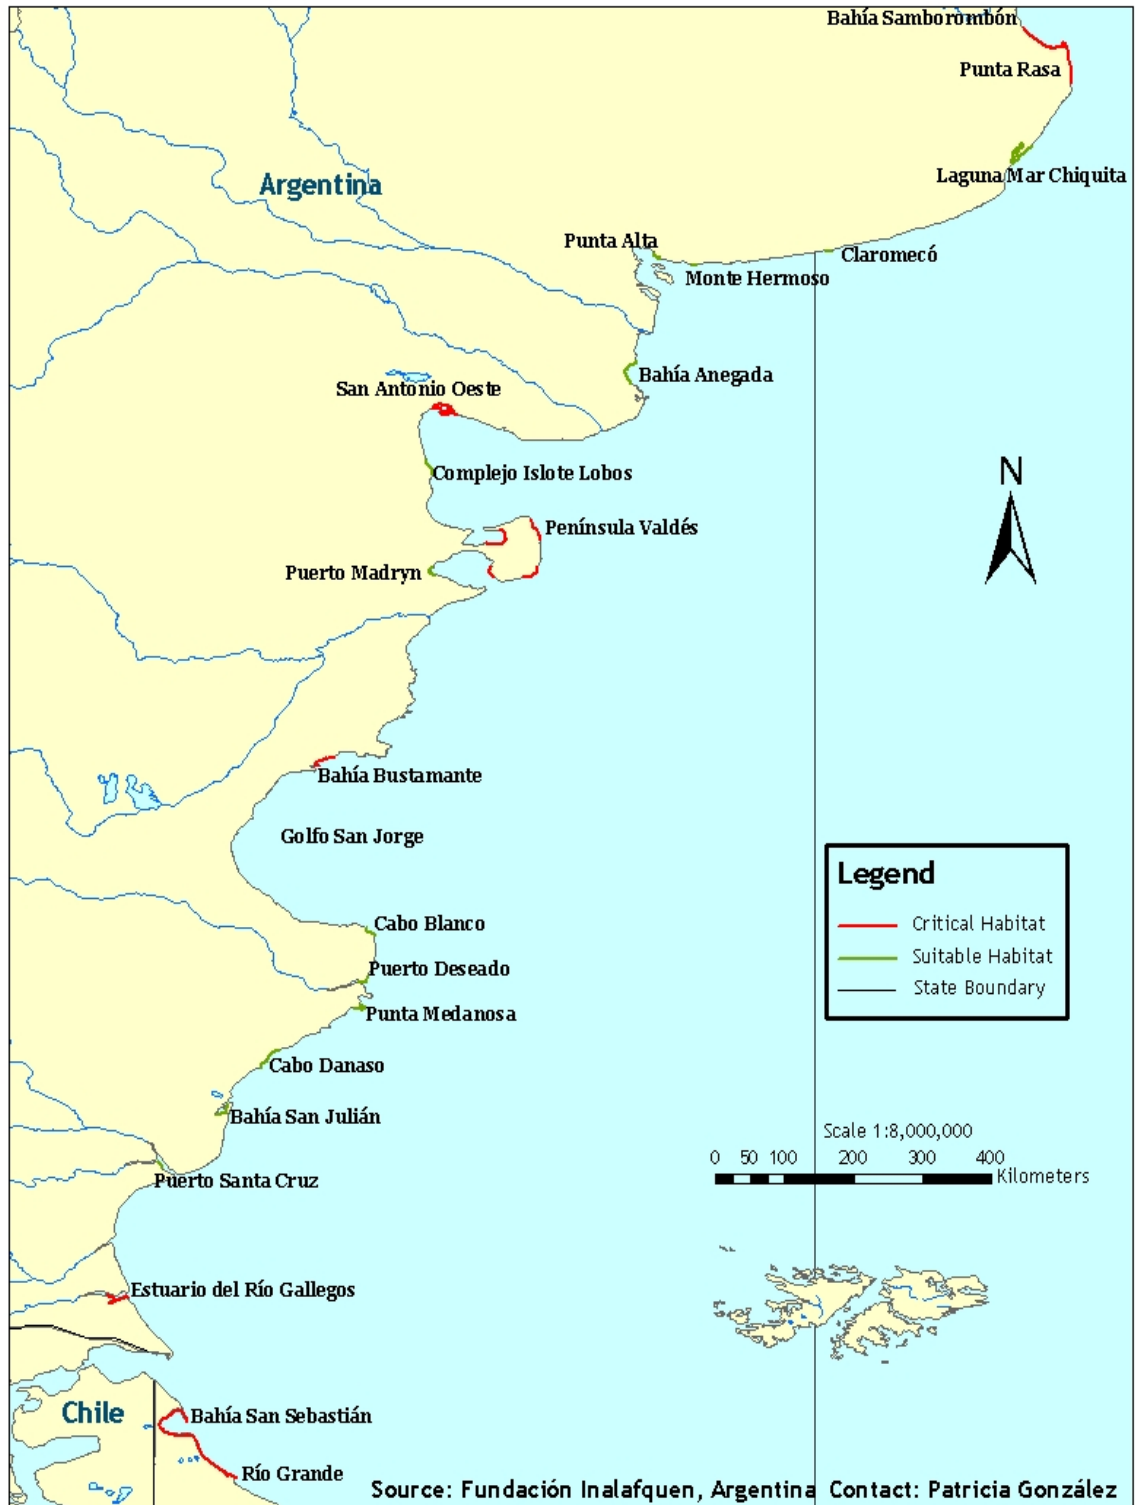

Critical Habitat -- Chiloé Island

Critical Habitat -- Bahía Lomas

Critical Habitat -- Argentinian Coastline

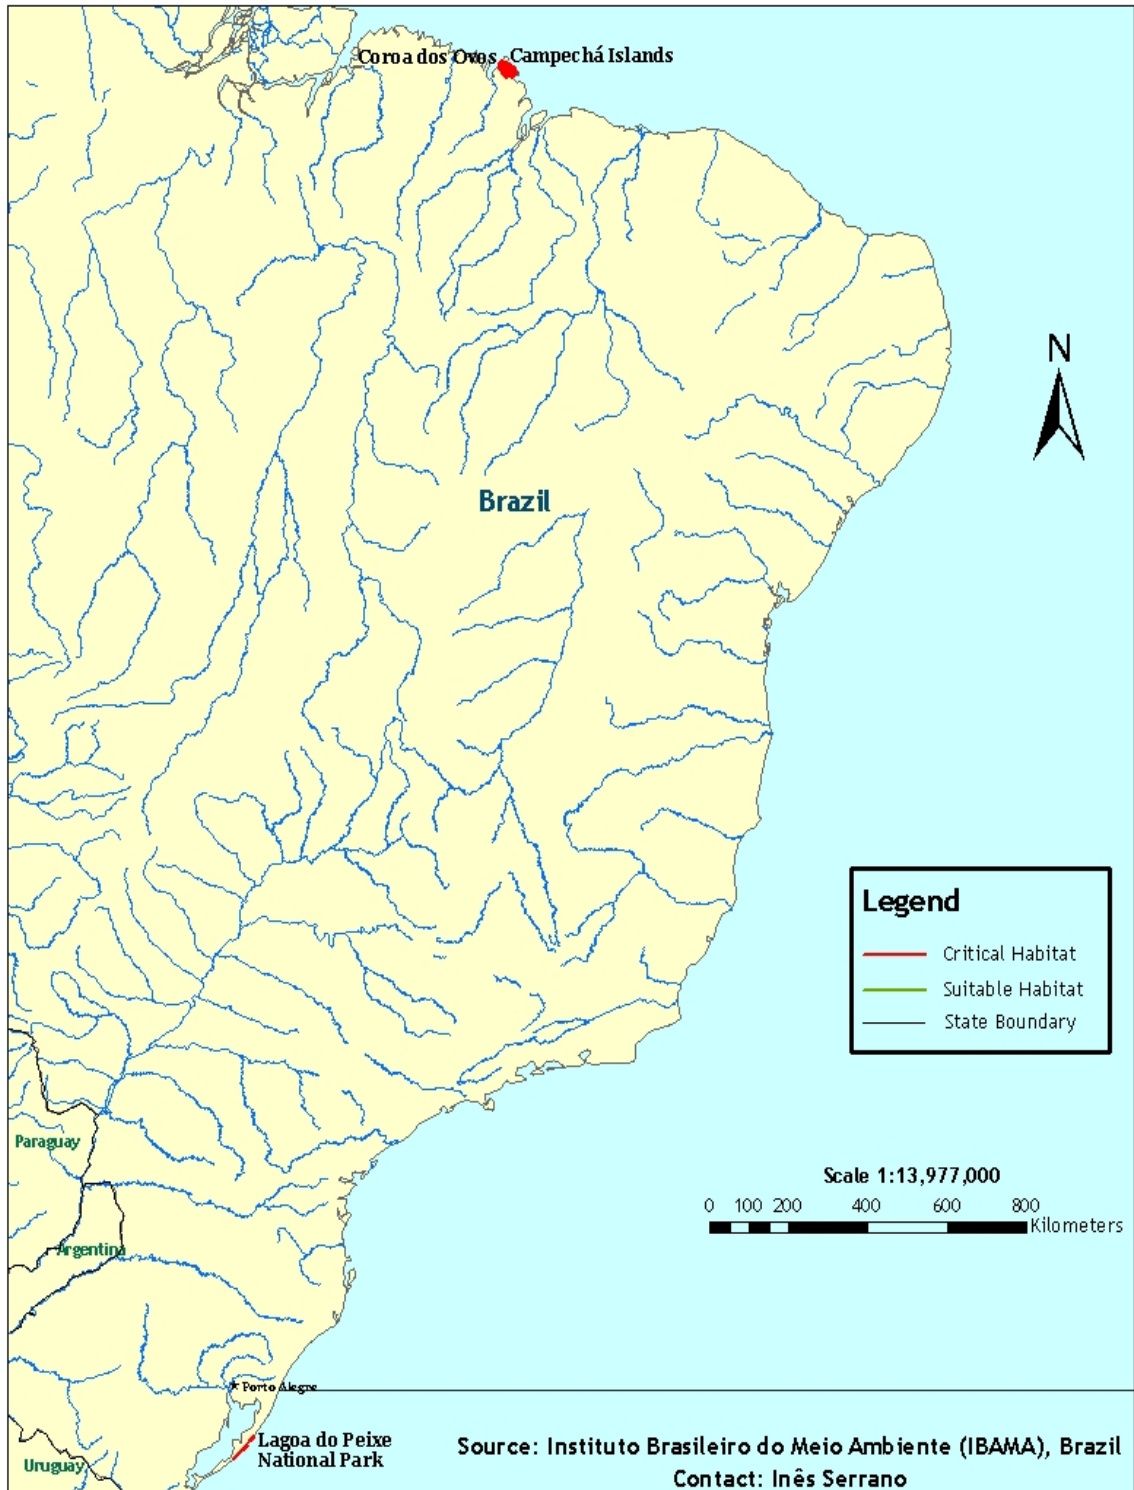

Critical Habitat -- Argentina North Atlantic

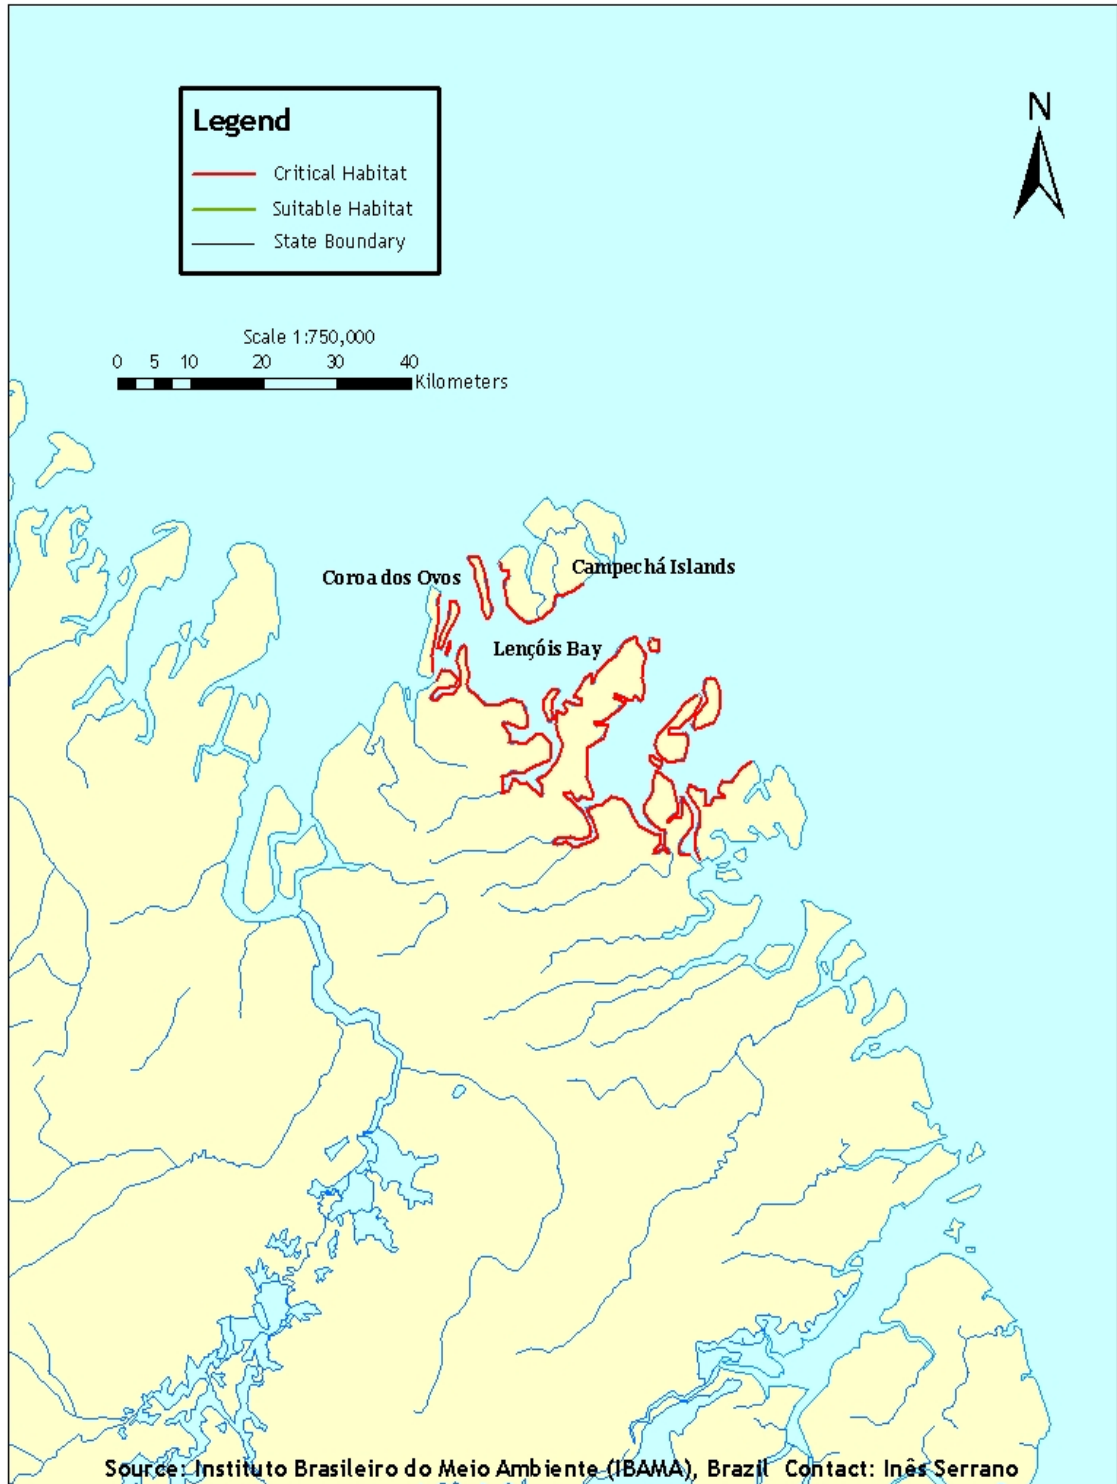

Critical Habitat -- Argentina South Atlantic

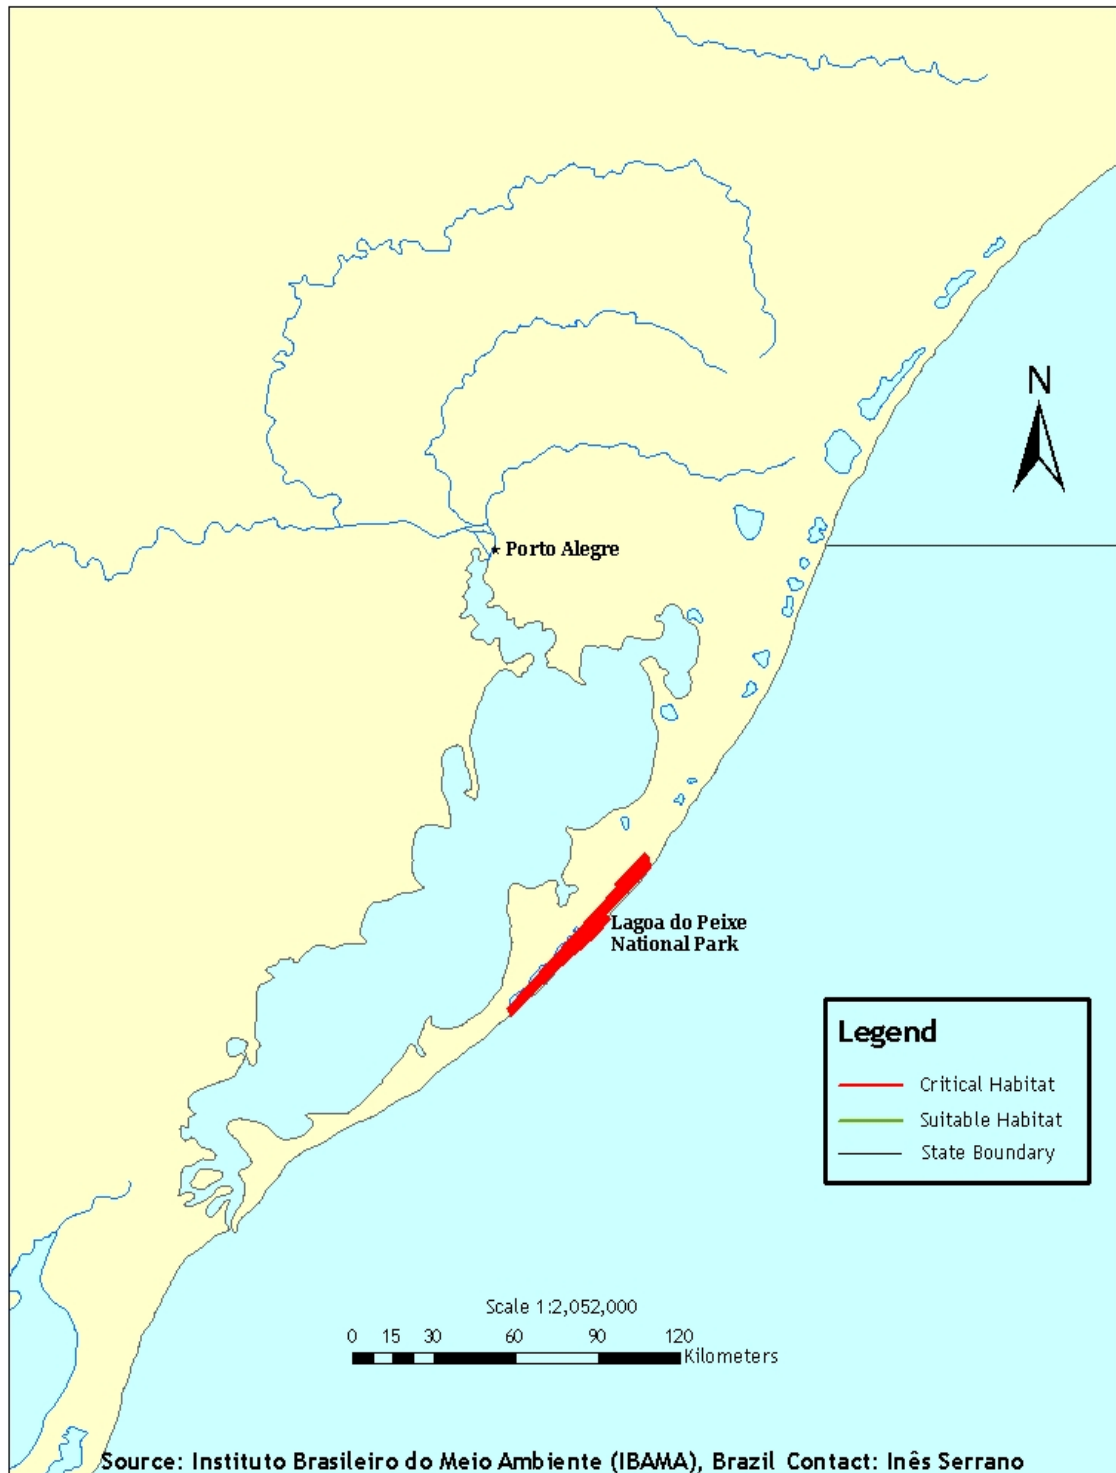

Critical Habitat -- Brazil

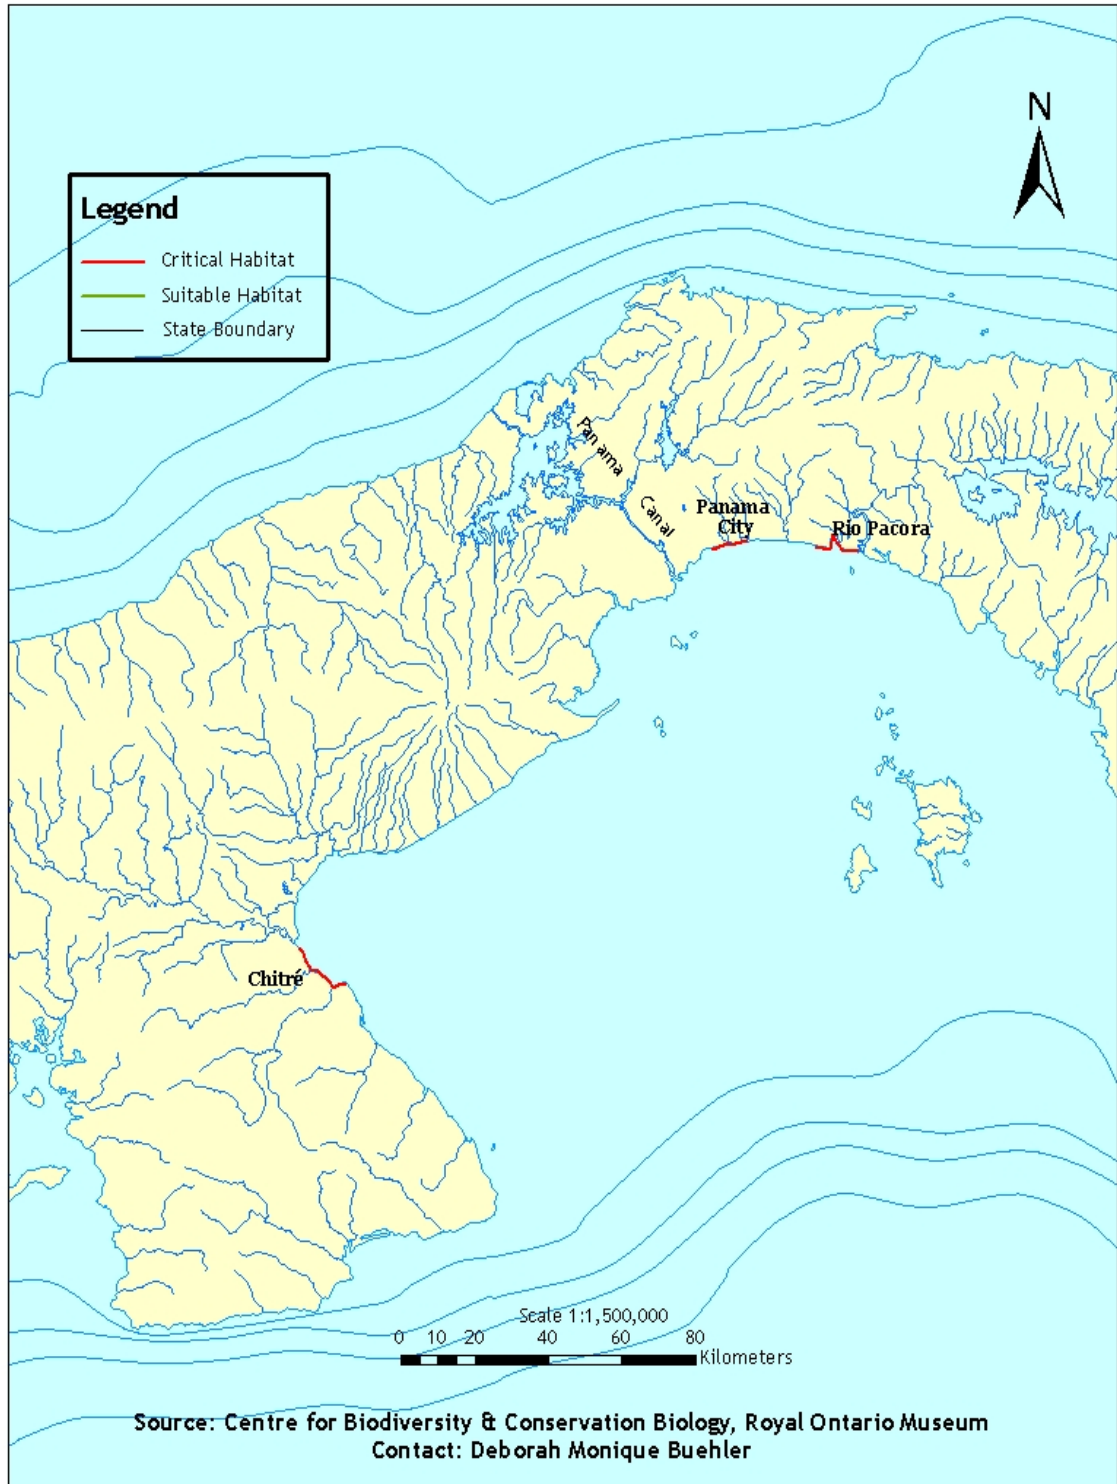

Critical Habitat -- Northern Brazil

Critical Habitat -- Southern Brazil

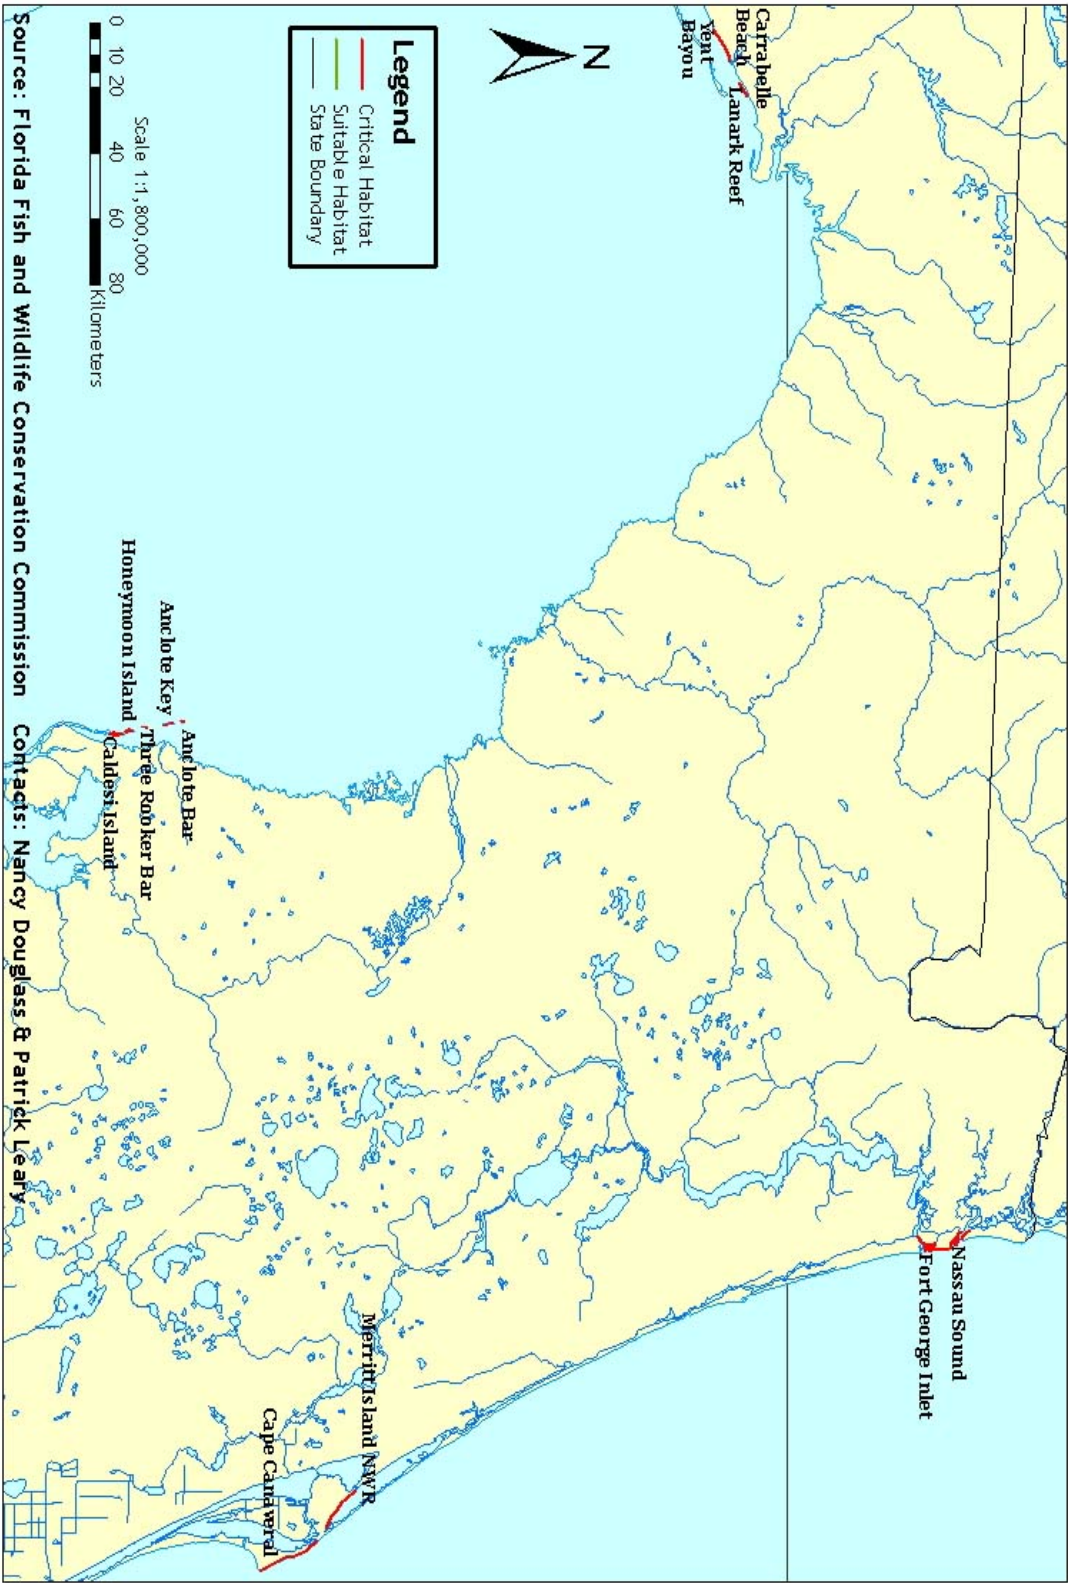

Critical Habitat -- Panama

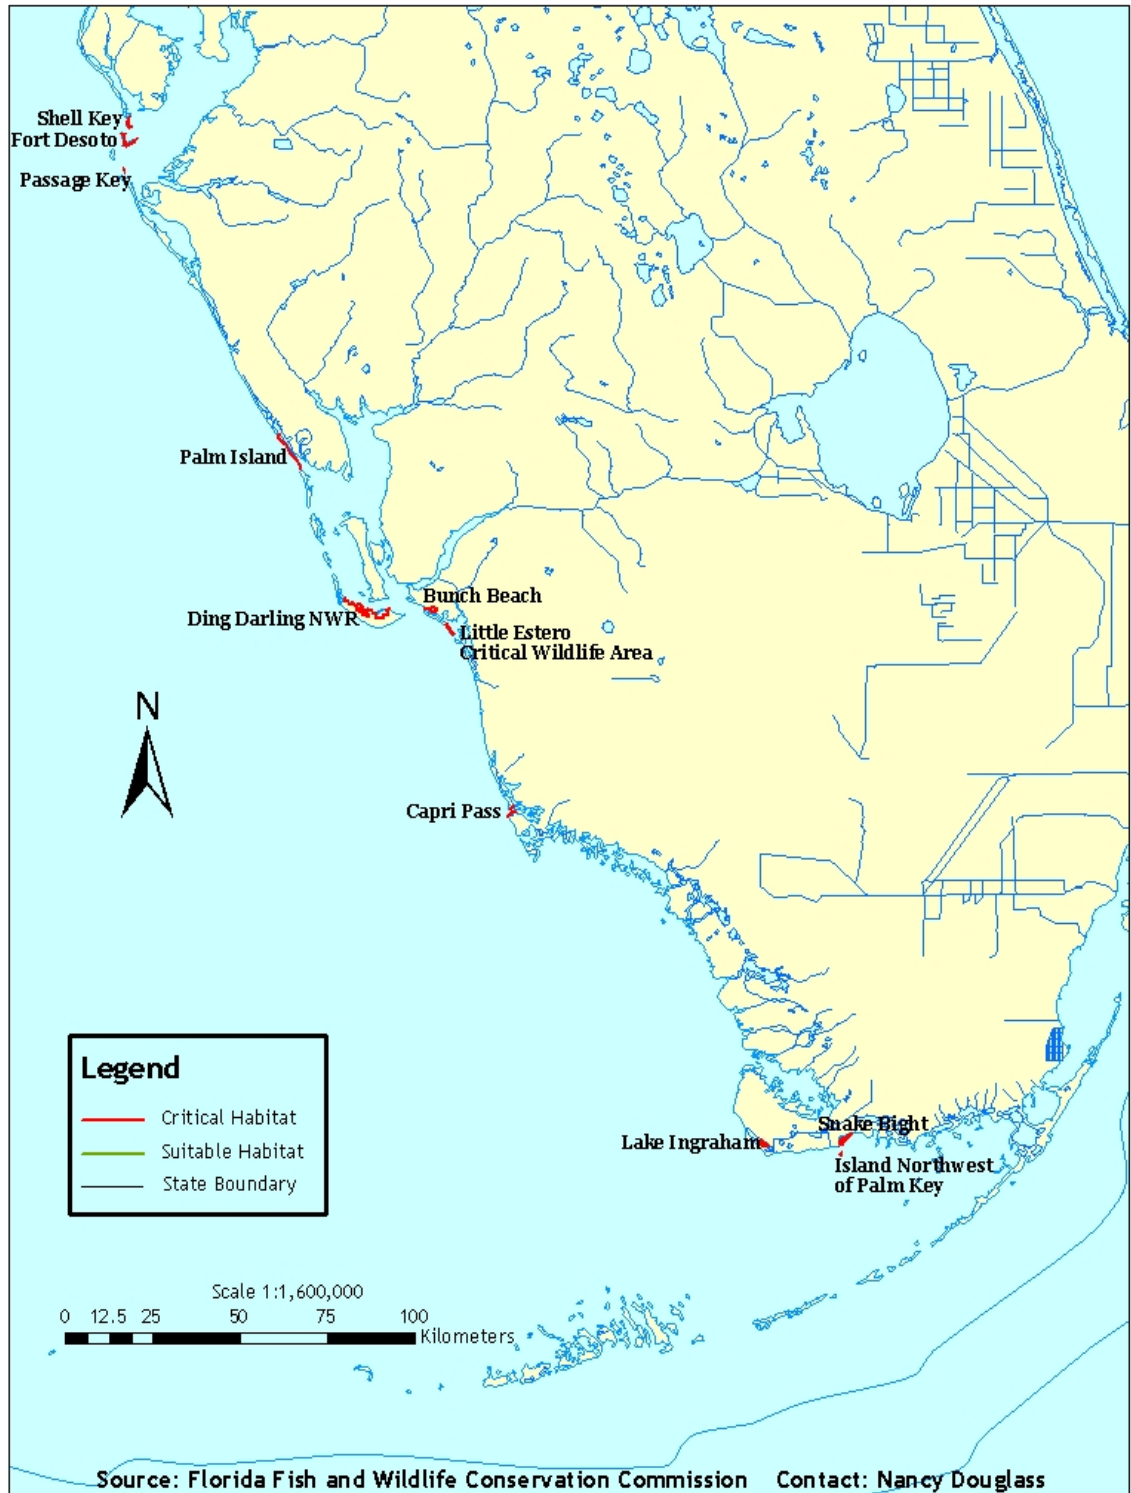

Critical Habitat -- Florida

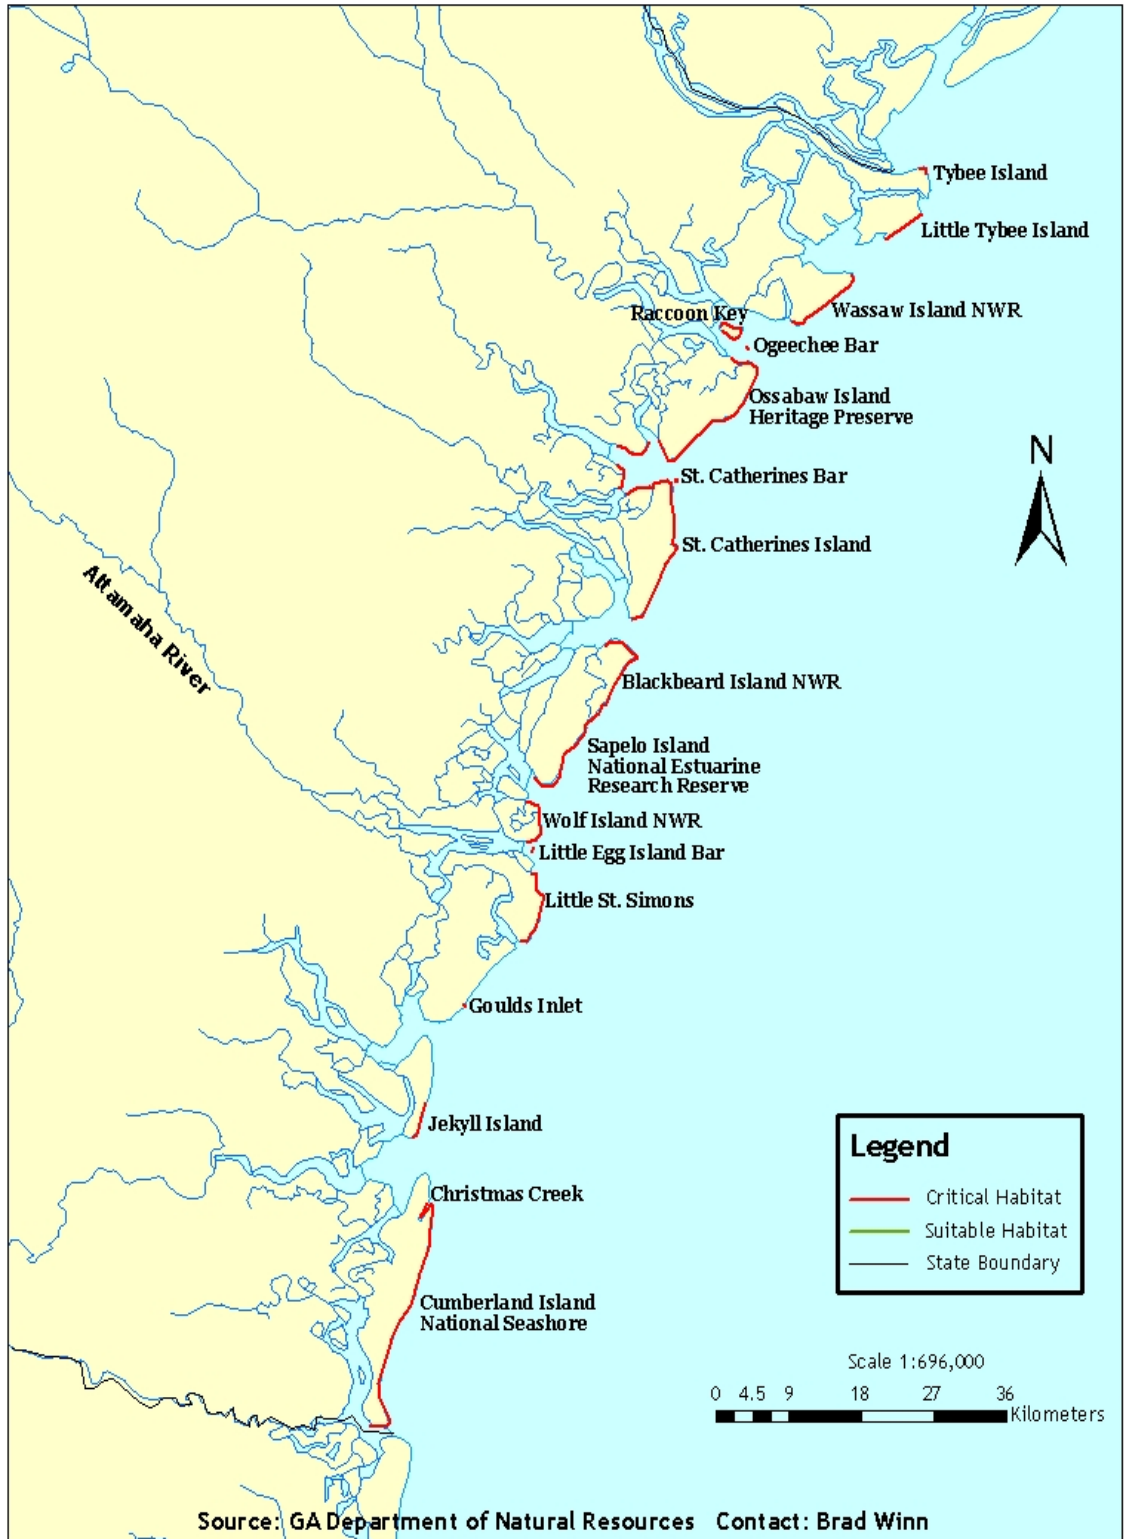

Critical Habitat -- Northern Florida

Critical Habitat -- Southern Florida

Critical Habitat -- Georgia

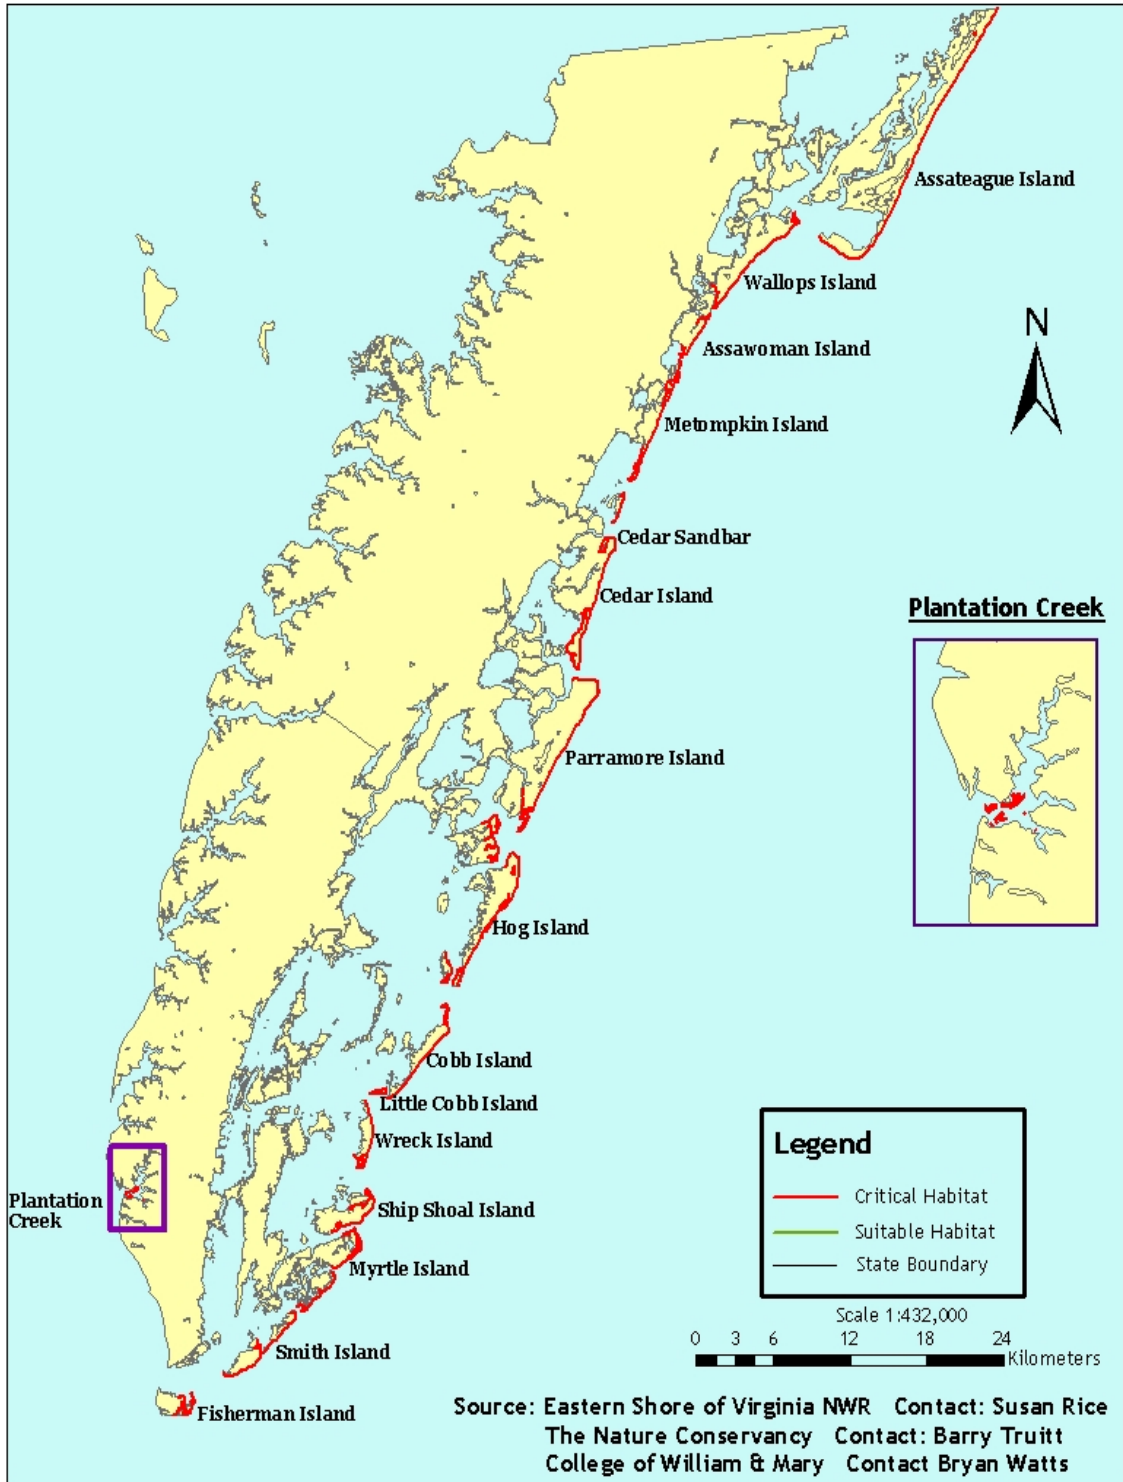

Critical Habitat -- South Carolina

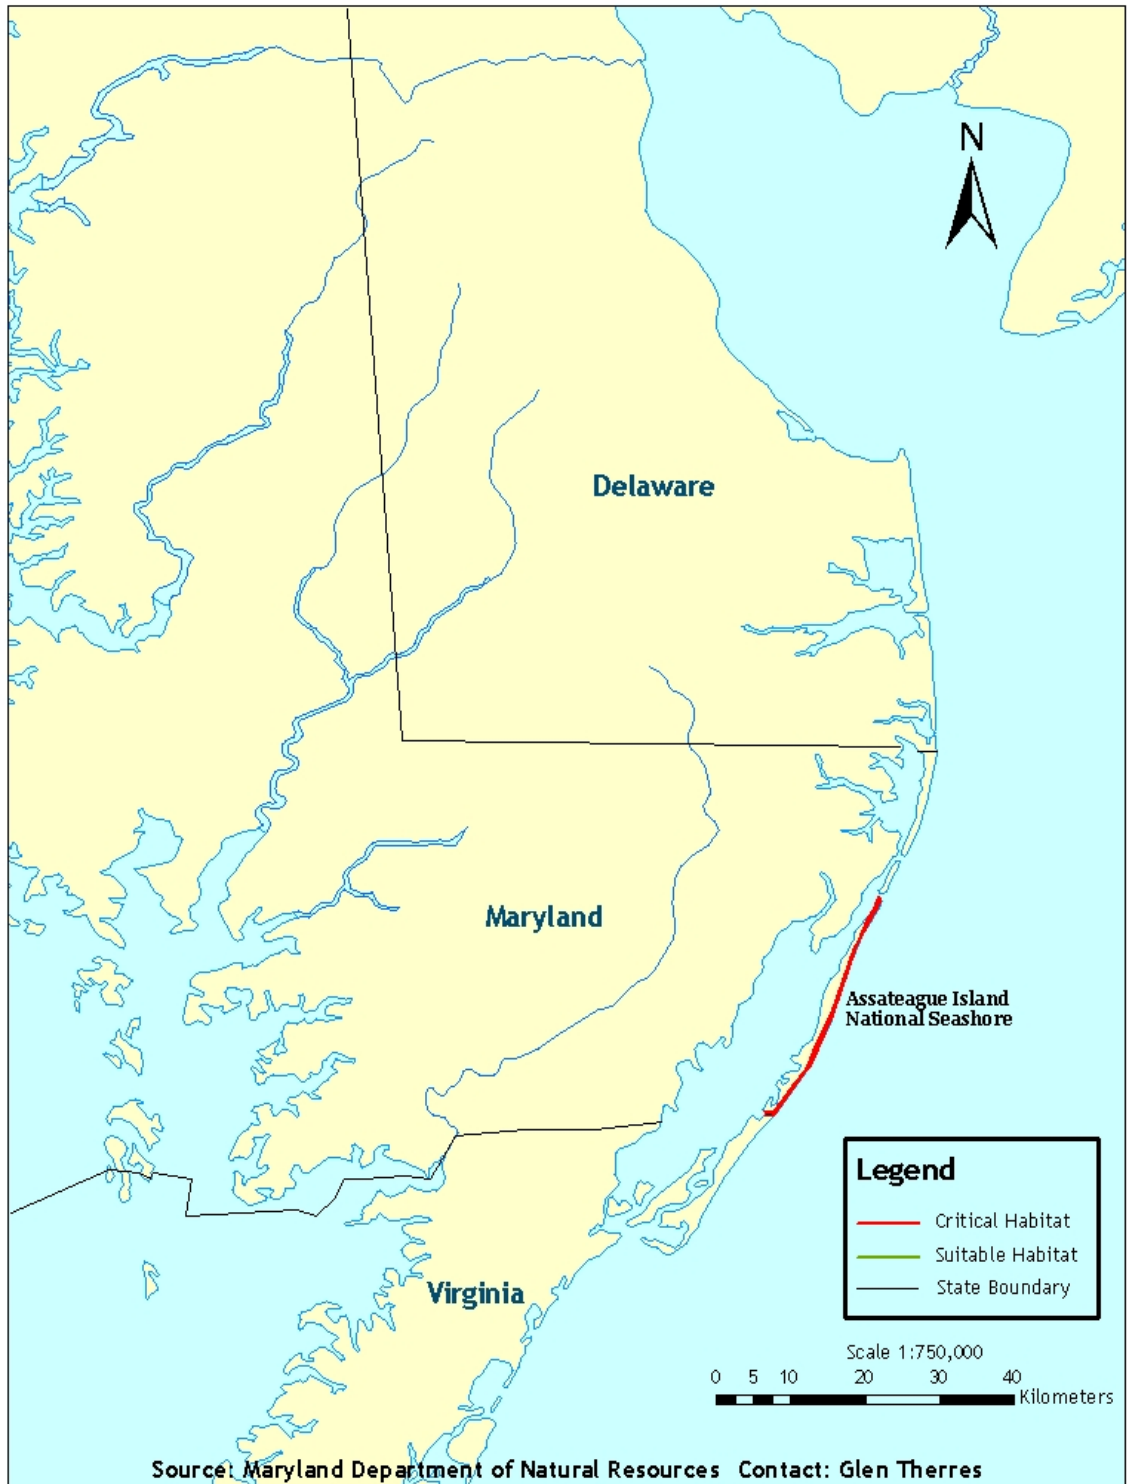

Critical Habitats -- North Carolina

Critical Habitat -- Virginia's Eastern Shore

Critical Habitat -- Maryland

Critical Habitat -- Delaware Bay Spring Migration

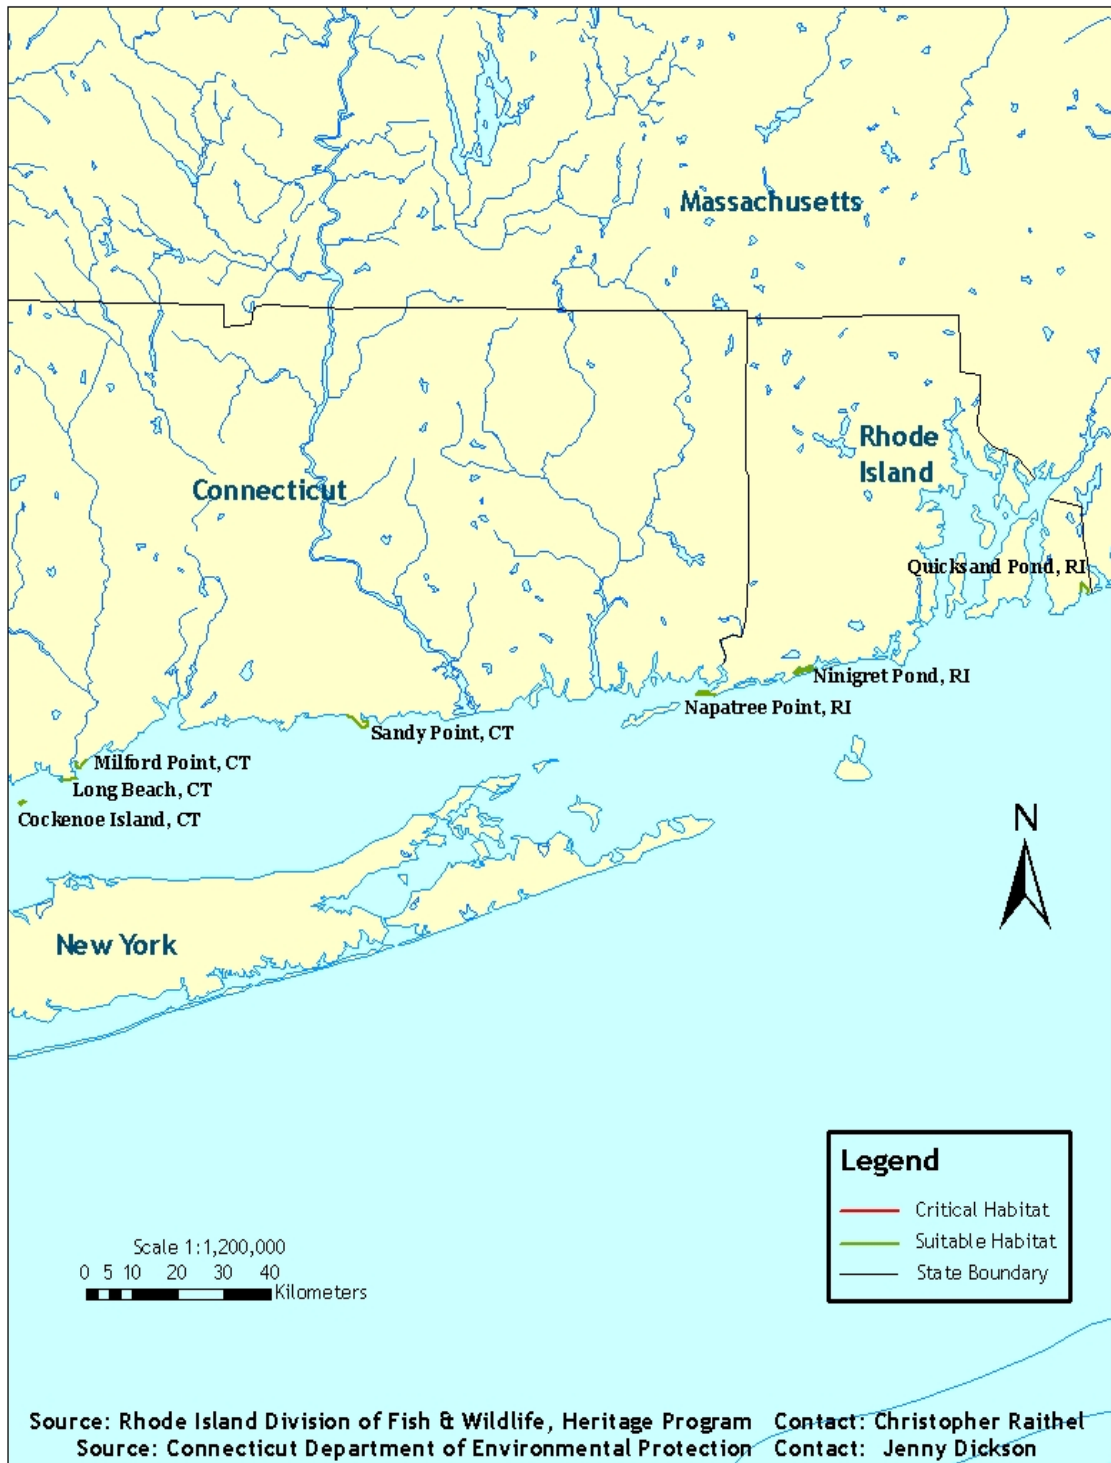

Critical Habitat -- Delaware Bay Fall Migration

Critical Habitat -- New York

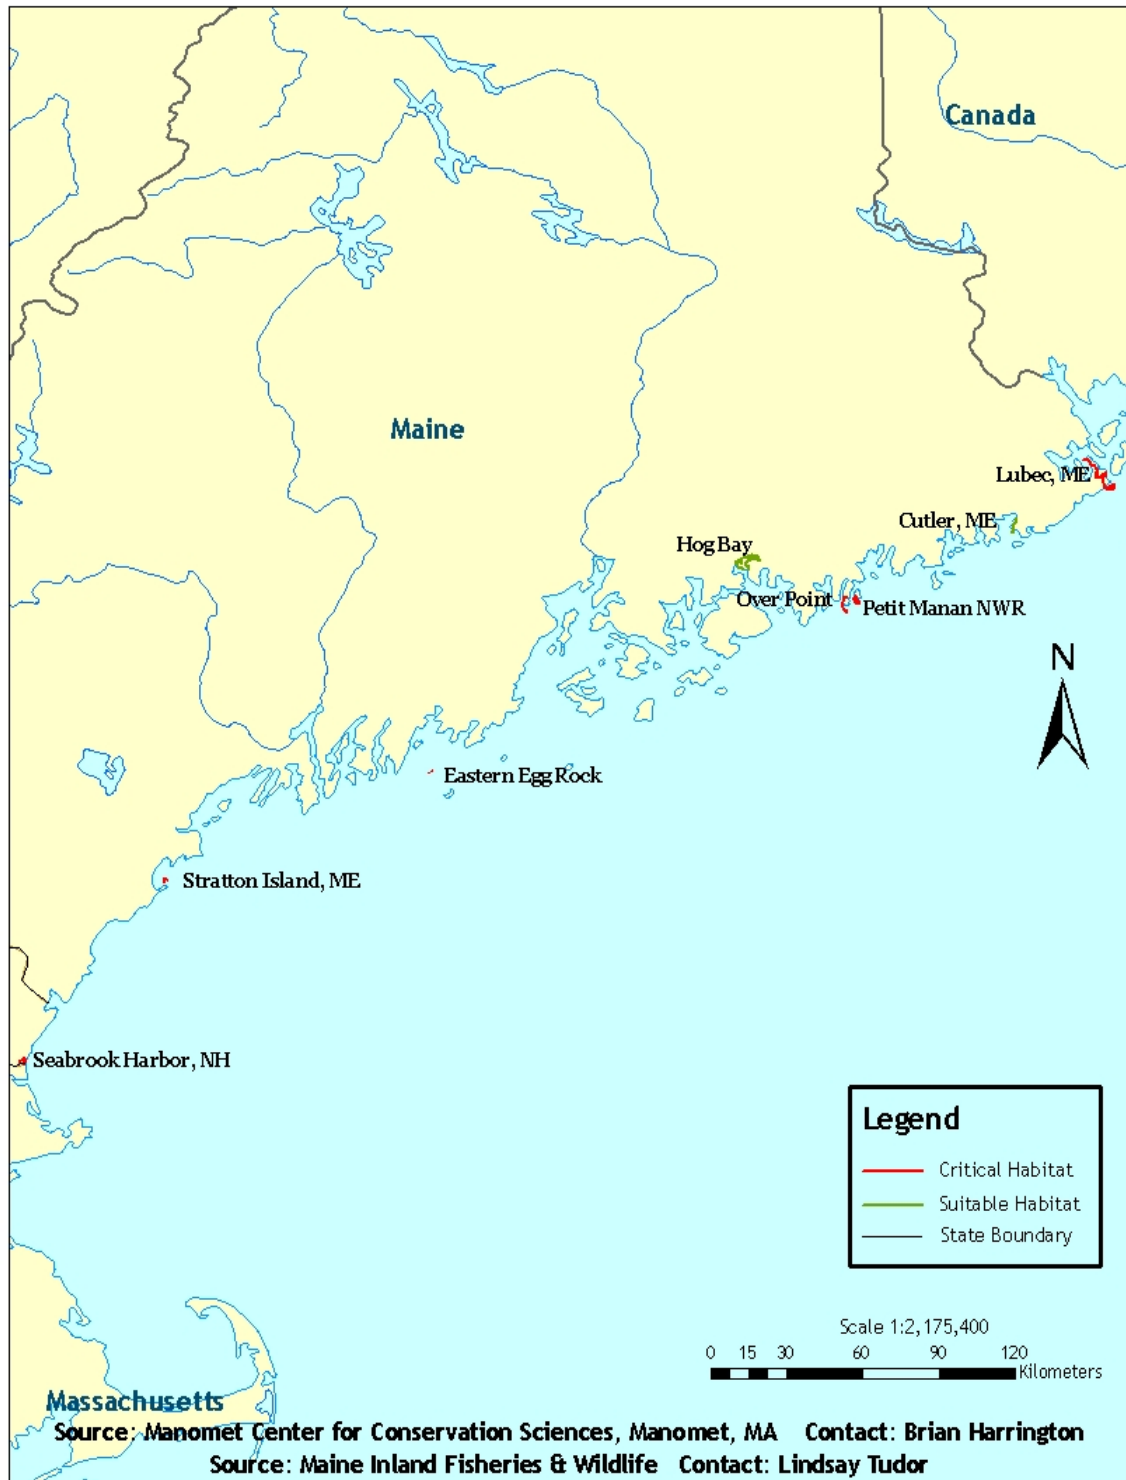

Critical Habitat -- Connecticut & Rhode Island

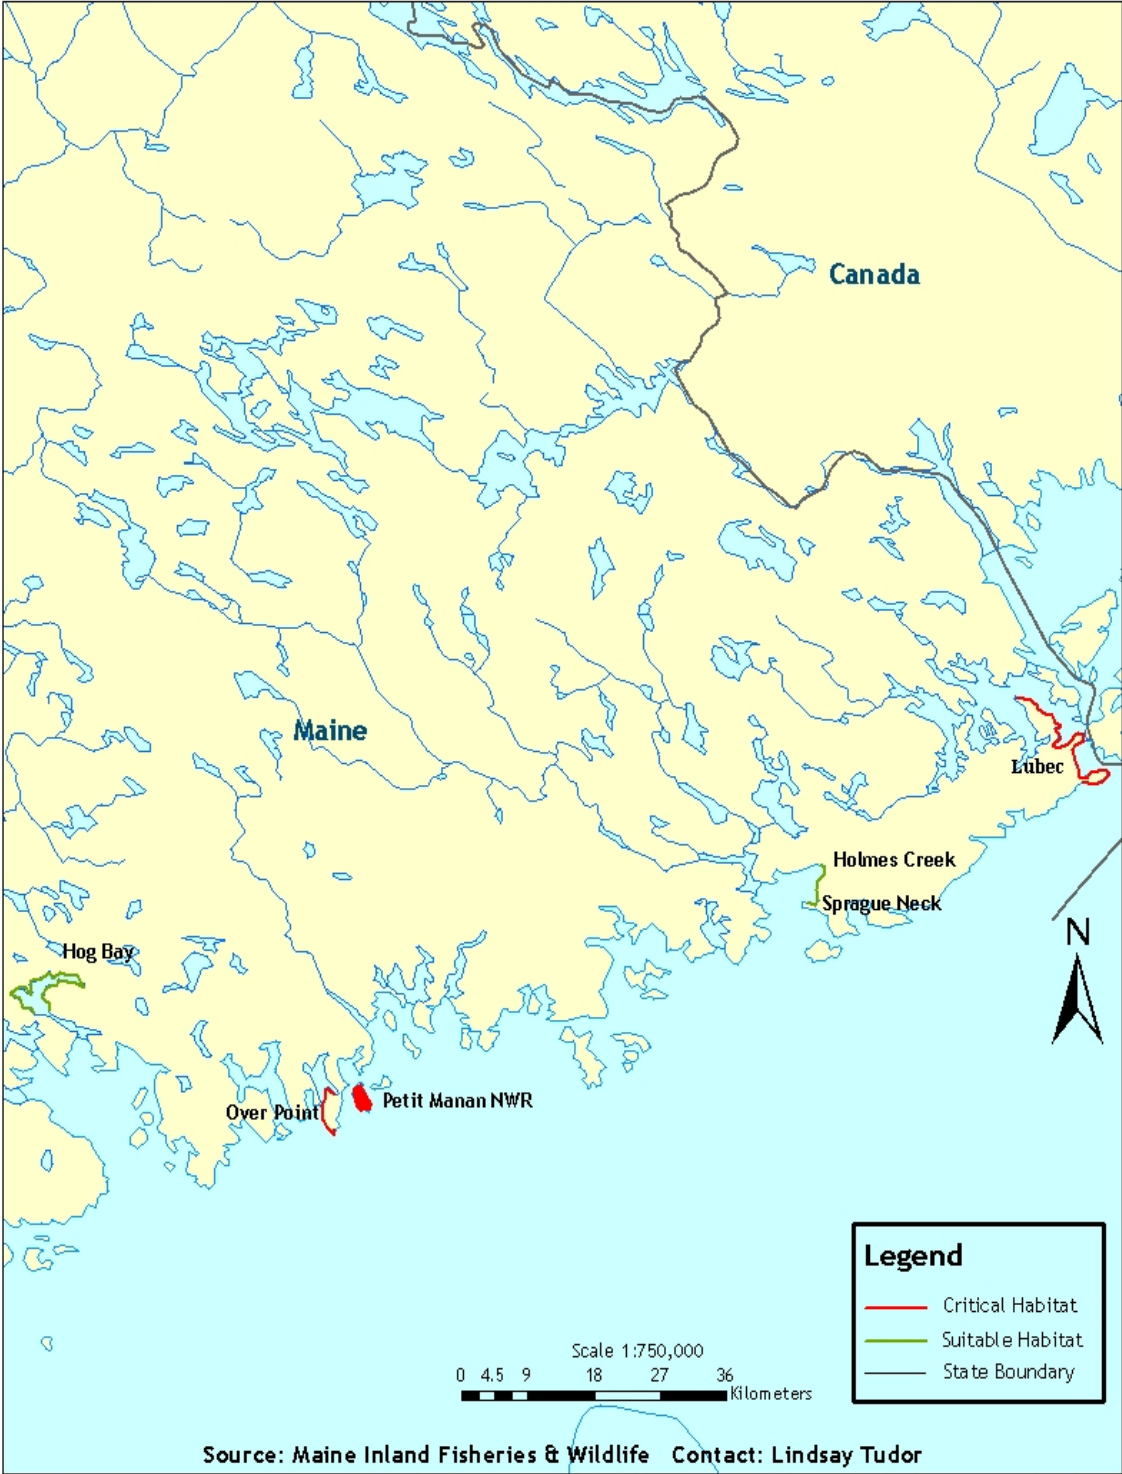

Critical Habitat -- Massachusetts

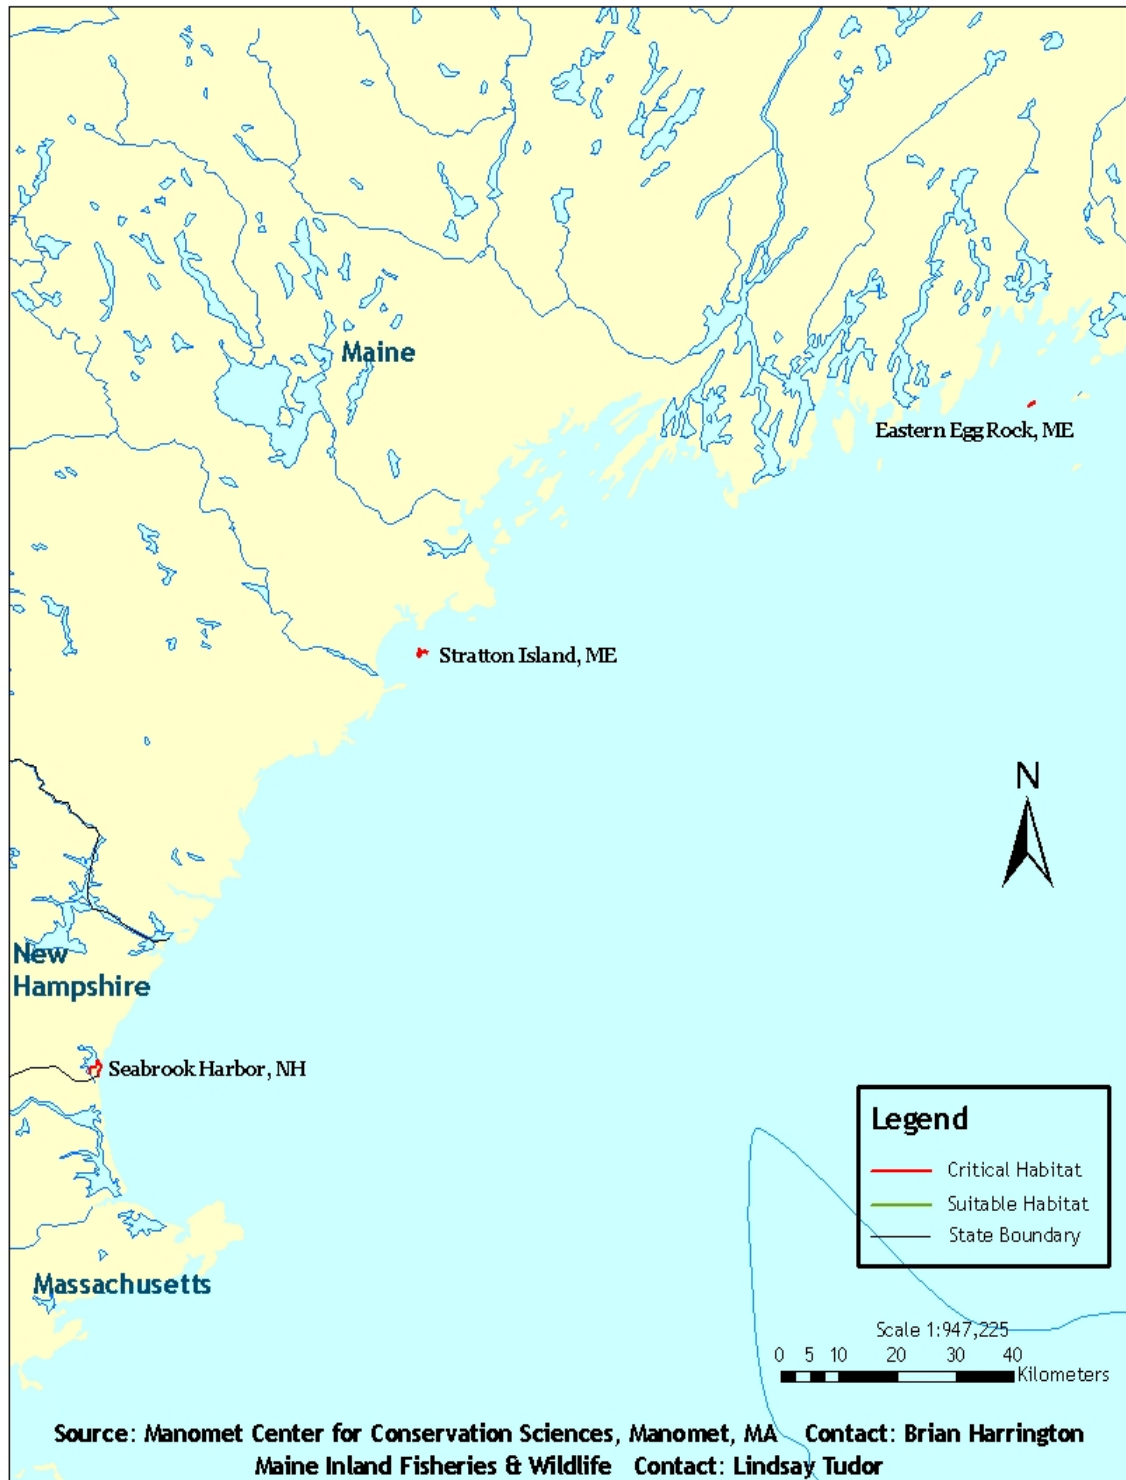

Critical Habitat -- Maine & New Hampshire

Critical Habitat -- Northern Maine

Critical Habitat -- Southern Maine & New Hampshire

Critical Habitat -- Canada
