**HACKETTSTOWN NATURAL RESOURCE
EDUCATION CENTER**

at the Hackettstown State Fish Hatchery

Professor W's **FREE**
Earth Science Circus**REGISTRATION
IS
REQUIRED****Thursday, June 12, 2008
6:30 pm**

In Professor W's Earth Science Circus, the Science Club Advisor, Professor W, has invited a guest expert to examine the challenges the Earth faces in the coming years. The expert doesn't show up but sends his neighbor, Meatloaf, in his stead with his new invention, the Commonsensinator. Meatloaf and the Professor are a classic vaudeville set up.

**Professor W's Earth Science Circus**

This Commonsensinator is a fanciful construction posing the challenges, "How well are we taking care of our Earth?" "How do we keep the planet healthy?" and "Where do things come from?" that lead us to the concepts of how "Nothing can ever be gotten rid of, it can only go somewhere else," and, "Nothing is limitless, meaning there is only so much to go around." Meatloaf's complete incomprehension drives the Professor to illustrate each and every one of these issues through, magic, juggling, plate spinning, classic vaudeville routines and original music, with the help of participants.

**This program is geared for the whole family.
