

FISHING ACCESS POINTS FOR NJ 2014 TROUT STOCKING LISTED BY COUNTY

Listed below are suggested access points to guide anglers unfamiliar with a particular water. These listings are only a small selection of possible access points on any given water. In 2014 due to the impacts of furunculosis at the Pequest Trout Hatchery, 42 waterbodies typically stocked with trout will not be stocked. These waterbodies are depicted in red. Waterbody information depicted in blue designates waters or sections of waters that will only be stocked for the 2014 spring stocking. As always the Division recommends consulting the 2014 Freshwater Fishing Digest for Rules and Regulations pertaining to trout. A Trout Stamp is required in addition to a valid fishing license when fishing for trout.

COUNTY	WATERBODY	TOWN	ACCESS	DIRECTIONS
