

Note to the Reader:

Since the initial sections of this survey were completed, determinations of eligibility have been modified for certain properties. In order to find the most recent determination of eligibility, consult the "Sites List and Municipal Maps" section of the introductory narrative (Vol. 1). The determinations of eligibility on the survey forms are superceded by those on the list.

SITES LISTS AND MAPS

Below is a list of all sites included in the Monmouth County Historic Sites Inventory. Sites location maps are also provided for each municipality. The sites lists are arranged by municipality and then alphabetically by street address or geographical location. Next to each site is a determination of its eligibility to the National Register of Historic Places.\*\* Eligibility is notated by the following symbols:

Y = Yes  
N = No  
P = Possible  
D = District

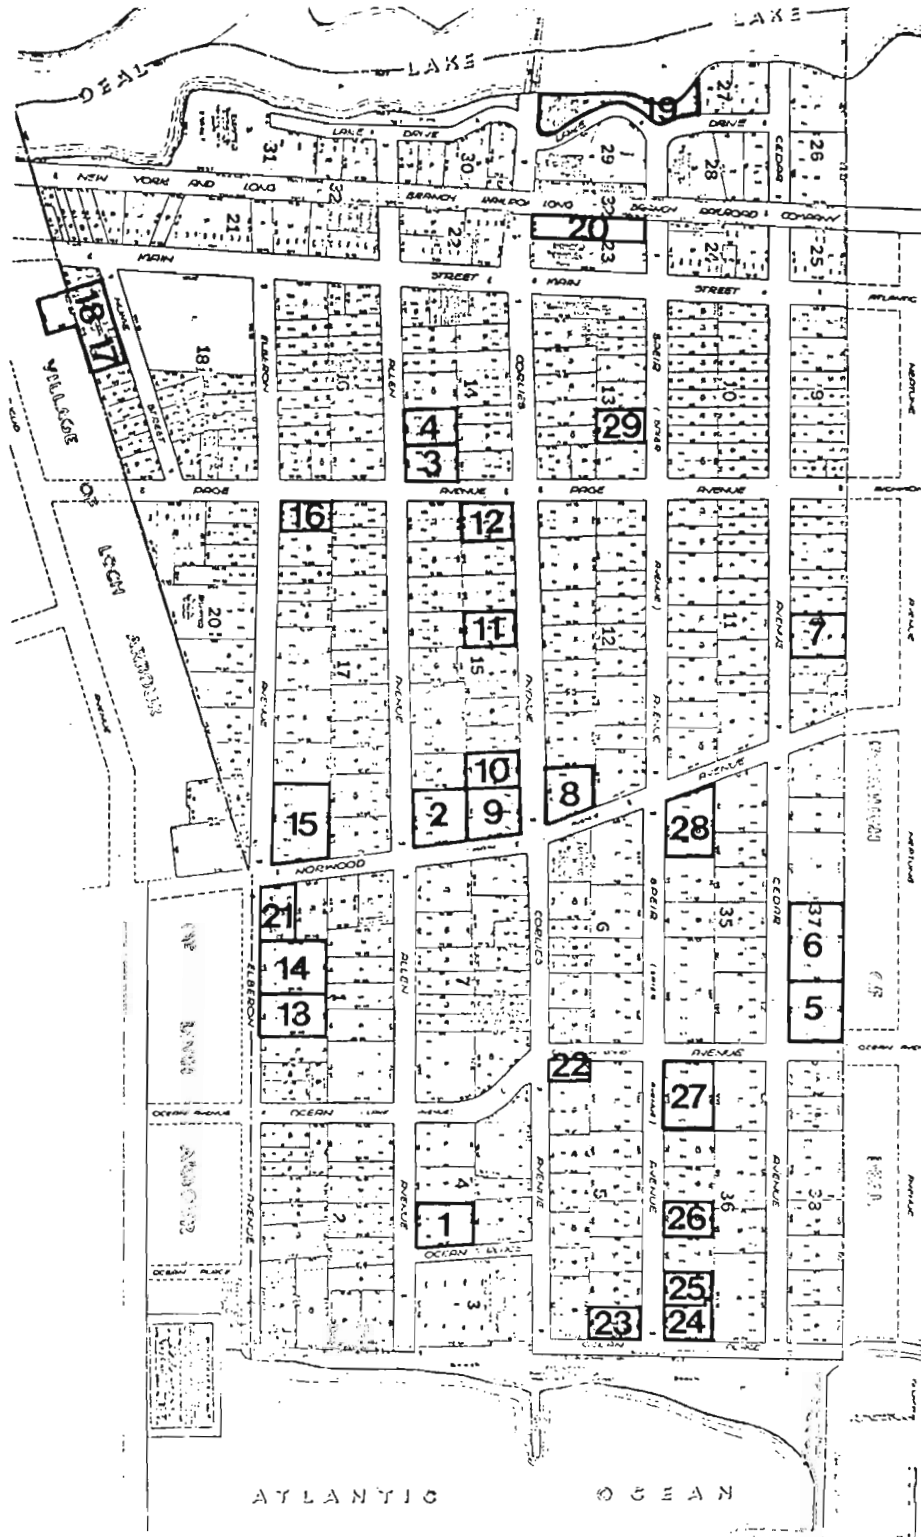

Sites which are located within eligible districts but which are also individually eligible are labeled "Y" instead of "D". The "Possible" category is limited to those properties which require additional research on construction date, quality of the interior (interiors generally were not examined), ownership history, and/or degree of alteration in order to determine eligibility.

The survey project followed federal standards for National Register eligibility which are set forth in "How to Apply the National Register Criteria for Evaluation" (National Park Service, Department of the Interior, 1982). National Register eligibility is subject to review and final approval by the Office of New Jersey Heritage and the New Jersey State Review Board of Historic Sites. Eligibility may change due to building alterations made subsequent to this survey. Since the initial field work for this project was completed during 1980-1982, determinations of eligibility on the survey forms are superceded by those on the below updated lists.

---

\*\*The National Register is the official list of properties significant in American history, architecture, archeology, engineering, and culture. The National Register was established by the Historic Sites Act of 1935 and the National Historic Preservation Act of 1966, as amended. It is maintained and expanded by the National Park Service on behalf of the Secretary of the Interior. Properties listed on the National Register receive a limited form of protection and certain benefits. For information concerning the effects of listing, contact the Office of New Jersey Heritage in Trenton (609-292-2023).

Construction Date: c. 1900      Source of Date: Ref. 1

Architect:      Builder:

Style: Queen Anne      Form/Plan Type: Rectangle with porch on three sides

Number of Stories: 2½

Foundation: Brick

Exterior Wall Fabric: Clapboard and wood shingles

Fenestration: 3 over 2 asymmetrical bays

Roof/Chimneys: Intersecting gables; interior end chimney

Additional Architectural Description:

The turret roof, which was probably either conical or a polygonal spire, has been removed. Rounded central bay in the second story is flanked by colonnettes and features a fixed rectangular light with lovely art glass. Fenestration includes multiple projecting bays and 3/2 and 4/1 (vertically divided panes) sash windows. Slender Doric columns with brackets on porch. Doorway has pointed arch glass with tracery; same motif is repeated in sidelights.
