

BARNEGAT LIGHT

SITING, BOUNDARY DESCRIPTION, AND RELATED STRUCTURES:

The structure is surrounded by five other structures built at the same time. The building sits on a corner lot and is surrounded by cedar trees.

SURROUNDING ENVIRONMENT: Urban Suburban Scattered Buildings
Open Space Woodland Residential Agricultural Village
Industrial Downtown Commercial Highway Commercial Other

SIGNIFICANCE:

The structure was one of the first houses built at Barnegat City in the 1880's. Although separated from the center of town by wide fields, the area contained 5 houses and a railroad station. This building is typical of other cottages in the area which were built by local artisans. It has a natural wood shingle exterior and employs Colonial Revival elements.

DESCRIPTION

Construction Date: c. 1885

Source of Date: style

Architect:

Builder:

Style: Vernacular/Victorian Gothic Revival

Form/Plan Type: rectangular

Number of Stories: 2½

Foundation: low

Exterior Wall Fabric: natural wood shingle

Fenestration: 3 bay

Roof/Chimneys: cross gable

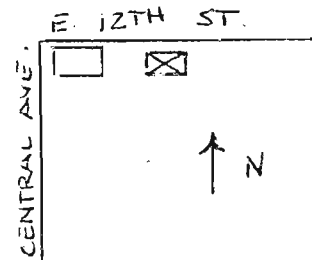

Additional Architectural Description:

The cross gable roof contains gabled dormers with Gothic pointed arch. All other windows are 2/2 double hung sash. A center door is flanked by side-lights and has a transom. All windows have louvered shutters. Lunettes are found in the east and west gable ends. An open porch is found on the first story with turned balustrade, square posts, and floral brackets. A second floor porch is centered, and contains a blind balustrade and shingled posts.

SITING, BOUNDARY DESCRIPTION, AND RELATED STRUCTURES: *

The structure is located on a large high piece of land filled with trees. Small outbuildings, including a servant's cottage and shed and garage are also on the property.

SURROUNDING ENVIRONMENT: Urban Suburban Scattered Buildings
Open Space Woodland Residential Agricultural Village
Industrial Downtown Commerical Highway Commercial Other

SIGNIFICANCE:

The structure, built in the early 1880's, was owned by Bailey, a principal in the Barnegat City Land Company, which sold lots and organized the town. The house is also important because it contained a windmill, servants' quarters and work shop, the latter 2 of which still exist. The posts for the porch came from a pavilion at the Philadelphia Centennial Exposition of 1876. These posts are unusual since they rest on thin metal legs.

 COUNTY: Ocean B
 TYPE OF DISTRICT: C
 USGS QUAD: D

DESCRIPTION: (General description of district as a whole and boundaries)

The district consists of 2 main structures, smaller outbuildings and docks along Barnegat Bay. The structures are one-story with clapboard or shingled exteriors. A small gabled roof, 3 bay building is located nearest the road. This structure has a center board and batten door flanked by 12 pane single sash windows. A long, narrow building is located west of the small shed and contains 12 doors with connecting sidelights. This "net-storage-house" has a slanting lean-to roof of corrugated tin. Small ice-fish storage sheds are located to the south. Newer buildings and docks are found to the west.

PHYSICAL CONDITION OF STRUCTURES: Excellent % Good 90% Fair 10% Poor %

 COMMENTS:

DEPARTMENT OF ENVIRONMENTAL PROTECTION, DIVISION OF PARKS AND FORESTRY
 OFFICE OF HISTORIC PRESERVATION, 109 WEST STATE STREET, TRENTON, NEW JERSEY 08625 (609) 292-2023

SIGNIFICANCE:

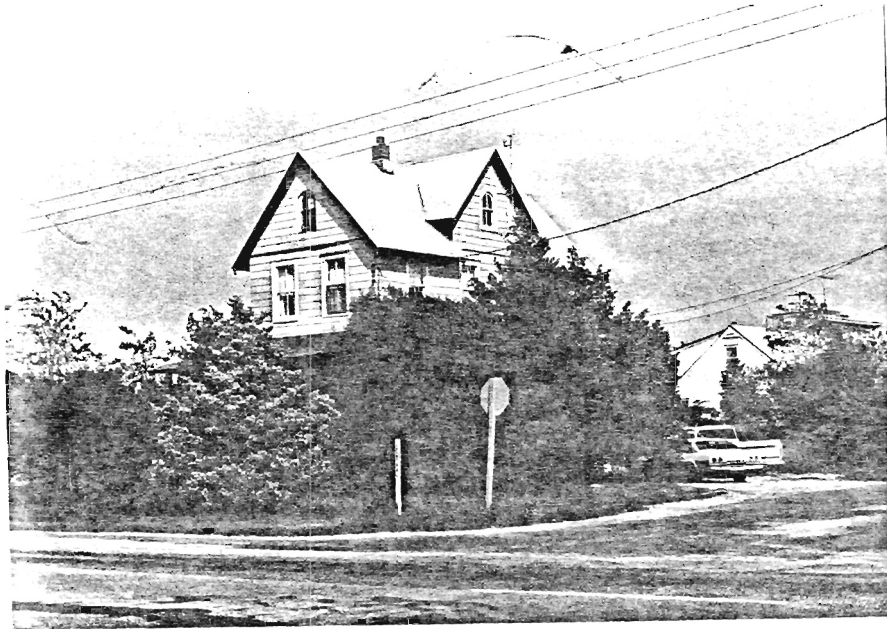

The Independent Fishery, founded in the 1920s by a group of Scandinavian fishermen, was the first major cooperative in the country. The building's functions, including storage and drying of nets, dictated their form. Although changes in fishing techniques have rendered those operations obsolete, the fishery is still functioning.

RECORDED BY: M. May
ORGANIZATION: Heritage Studies
DATE: November 1988

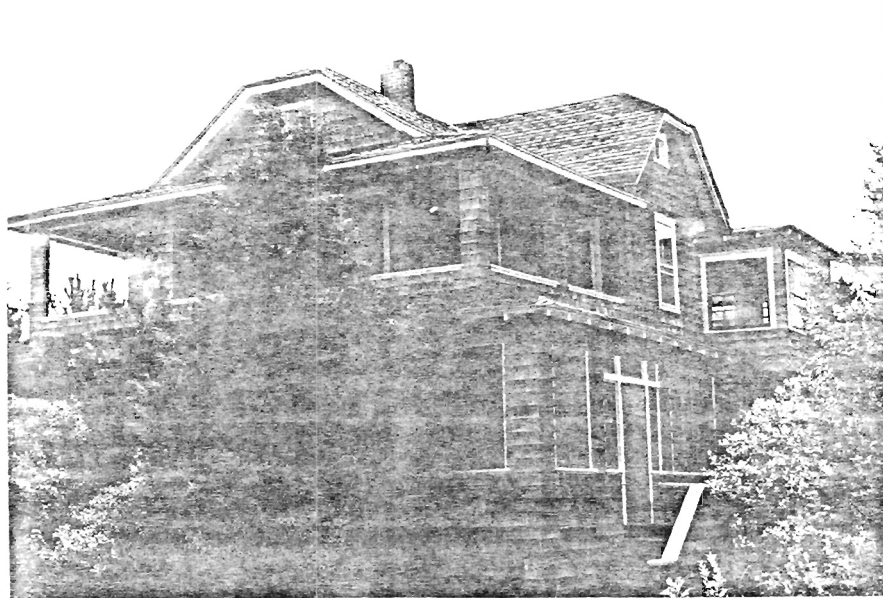

1501-L1

Dickerson House / northeast corner of 15th and Central

2½ story, 2 bay, asbestos siding, cross gable roof. An open porch runs across the first floor of the facade. 2/2 windows and gable end round arched windows are employed.

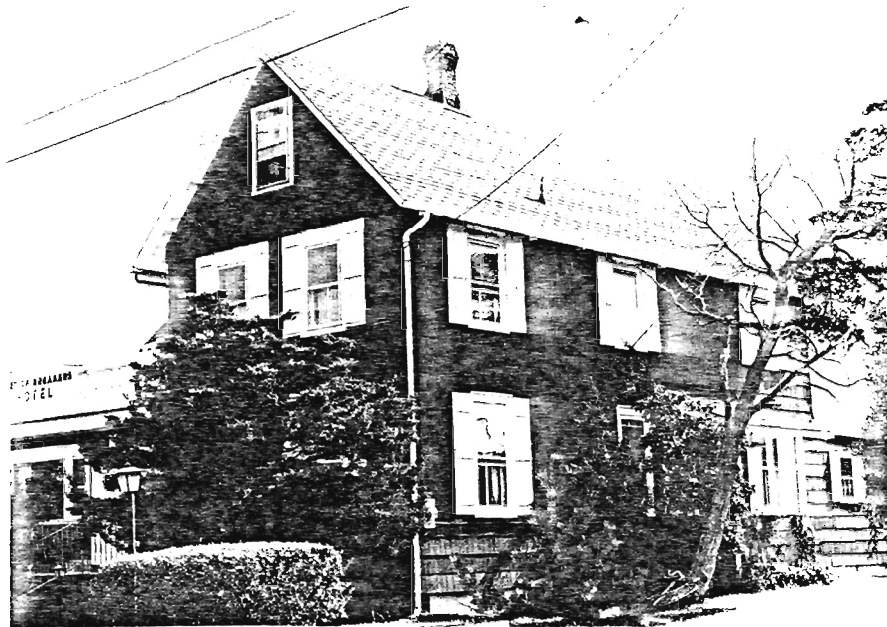

1501-L2

Walnut House / 11 East 12th Street

2½ story, 4 bay, natural wood shingle with jerkinhead roof. A two tier porch which is enclosed on the first floor has a shingled blind balustrade. Round panelled doors led to the second floor porch.

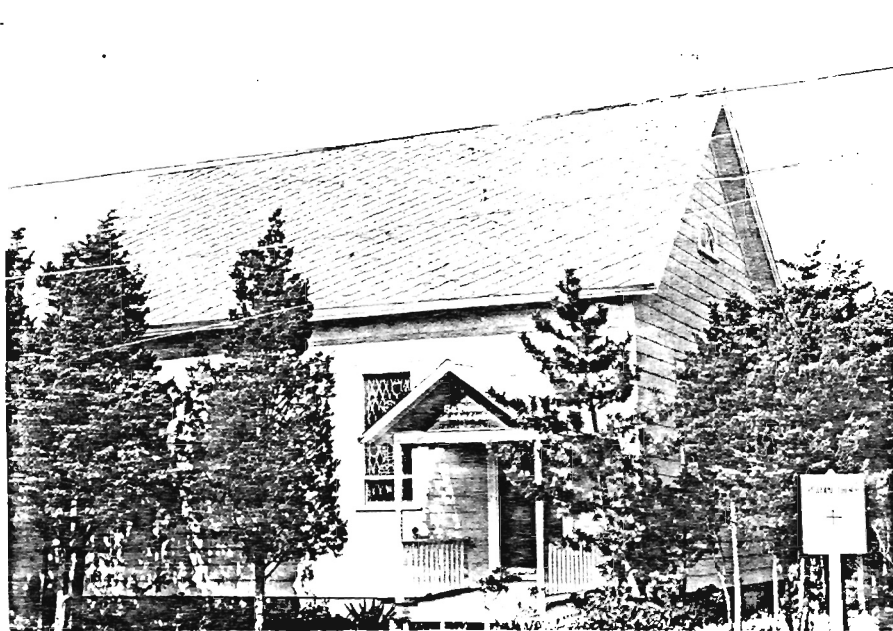

1501-L3

Social Hotel / West 5th Street

2½ story, asbestos siding, gable roof. The building is one of the few 19th century hotels remaining on the Island. A new wing has been added to the east and alterations to the original building have been made over the years.

1501-L4

St. Peter's Episcopal Church

1 story, 4 bay, asbestos siding, gable roof. The church built circa 1890, has been altered by the installation of new windows.

1501-L5

Signal House / Central and 6th Avenue

3 story, 2 bay, natural wood shingle exterior, parapet roof. The structure constructed c.1900 is said to have been built to watch for ships at sea.

1501-L6

Butterworth's General Store / West 4th Street

2 story, 3 bay, natural wood shingle exterior, gable roof. The structure, now the "Deli", is one of the oldest buildings in the area, constructed c.1880. It was once a post office and general store.

Describe the present and original (if known) physical appearance

The building was constructed in 1904. Originally there had been essentially just one big room, with "conveniences" out-of-doors. There were separate cloakrooms and entrances for boys and girls. These entrances were consolidated and indoor plumbing added later. The building is 34' X 19 1/2' on the Northeast side and 21 1/2 feet on the Southwest side. It has a brick base that is 3 feet 4 inches, from the top of the base to the roofline is 13 feet. It has a slanted cedar shingle roof. The exterior sides are covered with asbestos siding. There have been few changes since its construction. The only ones are the bell tower was removed, a bathroom has been added and an oil heater was installed in the back room.

Statement of Significance (in one paragraph)

The one-room schoolhouse was used until 1951 when the Long Beach Island Consolidated School was established. The school was attended by children from the whole northern end of Long Beach Island. The schoolhouse has deep association with the history of the area. After the building became the Barnegat Light Museum.

The schoolroom itself seems to have changed very little, although the desks have been removed. Originally, there were rows of student's desks running down the room; from south (the front of the room) to north, each row made up a class. The higher classes were in the eastern most row and the teacher's desk was usually the Southeastern quadrant of the room. The lower classes were along the western wall, here the blackboards were lower for the younger pupils. An old wood stove heated the room, it is still in the northwest corner of the classroom.

Initially, all the classes up to the eighth grade received their lessons there, but by 1942, it had gone down to the fifth grade. At its height, the school probably had about thirty students from Barnegat City and Harvey Cedars.

The school boasted one supply room and the consignment of books, tablets, pencils, crayons, chalk and the whole school was taught together. However, the pupils helped to teach each other: fifth graders helped the kindergarten children with their lessons, so everyone was usually aware of what the other classes were being taught.

The schoolhouse has always been the scene of great activity. This is evidenced in the School Record which runs for two hundred fifty two pages, from Volume 1, Number 1, September 26, 1902 to Volume 6, Number 8, November 9, 1908. The Record begins when school sessions took place in one of two little houses, the other, was rented, exactly alike. The school first opened September 22. Howard R. Strelman, a teacher in the school, wrote the first entry. All but one child of school age in the community was present that day. An unsigned entry on November 16, 1903 states, "school was begun in the new schoolhouse on Monday, and it is a very pleasant change from the old schoolhouse." Most of the entries in the record are of important events happening on local, national and even world levels. Eight items were noted in the front of the record which were to be included each week:

1. The weather for the week;
2. Record of attendance for week, together with those scholars named who deserve special mention for good lessons and deportment;

Item 8. Significance - Page 2

3. Anything new on school work;
4. Local news of interest;
5. National news of interest;
6. Criticism of any grammatical errors noticed at school;
7. Name of the editor for the following week;
8. Quotation or selection from some good author.

Barnegat Light Schoolhouse is no longer used as a school, but has retained much of the appearance it originally had over 70 years ago. It is significant because it represents the beginnings of public school education in Barnegat Light. Also it tells a little about the way of life in this community at the turn of century.

Describe the present and original (if known) physical appearance

The present Barnegat Lighthouse, built in 1857-58, replaced the original lighthouse which washed into the sea on November 2, 1857.

The first lighthouse was built in 1834 on a 5.2 acre tract of land purchased by the U. S. of America on October 25, 1834 from Bornt Slaight and his wife Ruth for \$300.00.

The lighthouse stood at latitude 39 degrees 45 minutes and 49 seconds and longitude 74 degrees 6 minutes and 25 seconds, built of wooden construction at a cost of \$6,000.00.

As the current of Barnegat Inlet shifted southward, cutting away and eroding the land, the lighthouse was in peril, so the government purchased an additional ten acres of land directly south of the original tract from John Ashley Brown on June 17, 1857. Fortunately the second lighthouse was built about fifteen hundred feet south of the original one. It was located on the southwest corner of the ten acre piece. All of that ten acres has washed away except for the small parcel upon which the 1857 lighthouse stands.

The 1857-58 lighthouse, built on a stone foundation, at a cost of \$45,000.00, stands 172 feet high, painted white at the bottom and red at the top. It has a base of twenty eight feet which tapers to fourteen feet at the observation platform. The thickness of the outer brick walls range from four and a half feet to twenty inches at the top.

217 steps lead from the base to the lantern. This spiral staircase is supported by the iron columns in the center of the structure.

The lantern which housed the lighting equipment measures twelve feet in diameter and is ten feet high. The original lens, six feet in diameter and eight feet high, was made in Paris in 1856. It was illuminated with oil-wick lamps, visible about twenty miles out to sea. In 1910 the oil wick lamp was replaced with incandescent oil vapor, later still to electricity.

Statement of Significance (in one paragraph)

The treacherous shoals of Barnegat was a menace to the coastal shipping lanes along the eastern seaboard of New Jersey during the early half of the 19th century. These shipping lanes were filled with about 2800 ships a year as immigrants poured into America and European trade increased. Also American trade began to expand from Maine to South America. These ships, frequently blown off course during a violant coastal storm, needed a beacon, or lighted landmark, to guide them away from these treacherous shoals. Light houses were built by the government as a navigational instrument to lessen the danger to ships sailing so close to land, thus avoid- ing wrecks which cost lives and the loss of valuable ships and cargo.

. Barnegat Lighthouse "Old Barney" provided this 'beacon of light' from 1858 to 1926 when her lamps were dimished in favor of the Barnegat Light- ship anchored ten miles off shore.
