OCEAN COUNTY
NEW JERSEY

PREPARED BY —

TUCKERTON

The Borough of Tuckerton, located in southern Ocean County, contains approximately 3,000 residents over 3.7 square miles. The borough is surrounded on the north, west and south by Little Egg Harbor Township and on the east by Little Egg Harbor. A small creek, originally named Pohatcong by the Indians and later known as Mill Stream or Tuckerton Creek, runs through the borough's center.

The Tuckerton area was one of the earliest settlements in South Jersey. Late in the 17th century the first white settlers came to the Little Egg Harbor area, including Edward Andrews, who purchased 500 acres along the creek. Andrews, a Quaker, found what is now Tuckerton, and all the surrounding country, at that time inhabited only by a few Indians.¹ By 1702 a number of families had settled in the area and in that year the first Quaker Meetinghouse was constructed. In 1704, Andrews built a grist mill at the creek's head where a 19th century mill still exists. Leah Blackman writes that only a handful of homesteads, the meetinghouse and the mill could be found on either side of the creek in 1715.²

The settlement, although not yet a village, was known by a number of names including, Andrew Mills, Quakertown, Egg Harbor Meeting and Middle of the Shore. Farming, fishing, hunting, oystering, and gristmilling played an important part in Tuckerton's early development. Due to the abundance of trees (mostly cedar, pine and oak), shipbuilding, tarmaking and lumbering became important trades later in the 18th century.

The village remained a Quaker settlement until the American Revolution when other settlers of different faiths moved to the area. Also at this time the settlement began to play an important role in early American history.

During the Revolution, Little Egg Harbor was the principal port of Colonial privateering. Tuckerton Creek was used by the American privateers for shelter and for unloading their contraband.³ The seizing of British ships displeased England to the extent that in October of 1778 they sent the largest military and naval movement along the South Jersey shore. At Tuckerton, the English set fire to structures and in retaliation, General Washington sent Count Casimir Pulaski to the area where a battle occurred.

In 1789, Tuckerton (which had previously been called Fishtown or Clamtown) received its current name from Ebenezer Tucker.⁴ Tucker became the first U.S. Customs Collector at Tuckerton, appointed by President Washington in 1791 when the President made Tuckerton the third port of entry and the second port containing a United States Customs House.⁵ Many of the port's enterprises were situated on a narrow point of land which stretched out into the salt marshes. This land was owned by Ebenezer Tucker and provided him berthing for the docking of ships, hauling of nets and the building of fish pounds.⁶ Due to the establishing of the port of entry, several seafaring activities began to flourish in Tuckerton at the turn of the 19th century. Shipbuilding became an important function of the new seaport and raw materials such as lumber, charcoal and bog ore were shipped from Tuckerton's docks. Goods were also imported from New York City and foreign ports. However by 1825, Tuckerton's importance as a major seaport declined due to the construction of the Erie Canal and the gradual closing of the inlets for large ships.

In 1815 a group of New Englanders built the first saltworks outside town. The Bartlett Works and the Thatcher Works (separate enterprises) were located on Marine Street (then known as Saltwork's Lane).⁷

By 1816 a stagecoach line between Tuckerton and Philadelphia was

established, making one trip a week, (other routes had been open across the Pine Barrens as early as 1795).⁸ John D. Thompson Esq. bought a stagecoach service in 1828 and instituted daily stage service to and from Tuckerton.⁹ Stagecoaches and ships remained the only means of transportation until the construction of the Tuckerton Railroad in the years following the Civil War.

By mid century much of the raw materials of the pine forest had been depleted causing the shipping of goods from Tuckerton to decline. Tuckerton however, remained an important business center. In the 1870s the town reported 15 stores and shops, a grist mill, 2 saw mills, 2 public houses, and mechanics of various trades.¹⁰

The railroad, established in 1871, brought a new industry to the area - the beach resort. Tuckerton became the go-between and railroad connection to two major 19th century resorts -- Beach Haven and Tucker's Beach.

Tucker's Beach (Sea Haven or Short Beach) now destroyed, was one of the earliest beach resorts along the Jersey Coast. As early as 1765, Reuben Tucker opened his home to summer visitors. By 1879, Eber Rider had established the Columbia Hotel. Beach Haven, organized in 1874 on Long Beach Island later became a popular resort and had a number of hotels and Victorian houses. These towns were reached by steamboat from the Tuckerton wharf. With the establishment of the Long Beach Island Railroad in 1886 and the destruction of Sea Haven at the end of the century, Tuckerton's role as a traveling stop and connection to the barrier beaches ended.

During the remaining years of the 19th century and early in the 20th, Tuckerton remained a small village subsisting on fishing, oystering and clamming. In 1891 Tuckerton separated from Little Egg Harbor Township and formed its own government; however its residents soon turned to Little Egg Harbor for employment. Businesses outside the new borough created jobs for many local

men. In 1912 the Tuckerton Wireless, a radio tower located on Osbourne Island was constructed. The tower employed many residents of the area. By the 1930s a large fish producing factory was also created in Little Egg Harbor. The factory on Crab Island served as the largest fish producing factory in the United States until it was abandoned in the 1960s. (For further information see Little Egg Harbor Township).

Today many of Tuckerton's 18th, 19th and early 20th century structures remain. Several of its 18th century buildings are hidden behind asbestos siding or are incorporated into expanded structures. Two examples of this period are the Ryder house on Maple Avenue and the Little Red House on the Tustin property, Bartlett Lane. Both structures are 1½ story, 3 bay, gabled roof buildings with center doors. Such buildings could be found scattered throughout the area. Later in the century, larger homes were constructed and additions built onto the small saltbox structures. Late 18th century and early 19th century buildings were frame with clapboard siding and contained 6/6 windows, gabled roofs, and were usually 2-2½ stories high. A number of 18th-early 19th century commercial structures can also be found behind modern facades along Main Street. The Child Store, at the southwest corner of Main and Green Streets, is the only remaining brick structure in town. The building is one of the few commercial structures of the period still with many of its original elements.

Similar to other towns along the main road in Ocean County, Tuckerton grew along its transportation routes, -- the road and creek. Tuckerton began settlement along the Mill Pond and creek and expanded south along the creek and north and south along Main Street. Only scattered farms could be found outside this area in the 18th and early 19th century. Nineteenth century structures replaced many early buildings in the old section of town, however

most 19th century development occurred on side streets. A great variety of 19th century structures are found in Tuckerton today. Examples of the mid 19th century 2½ story, 5 bay center hall homes are found on Main Street.

The late 19th century brought L and irregular planned structures in a number of modes including Queen Anne, Tudor, Gothic Revival, Second Empire and the Italianate. Large homes were built by prominent citizens such as the Pharos, the promoters of the railroad; however few of these structures survive. The Horner House on Main Street and the structure at the corner of South Green Street and Clay Street are late 19th century structures built by wealthy Tuckerton residents.

The Horner House (#1533-28) is a good example of Second Empire architecture containing a square plan, large 2/2 windows with molded surrounds, and a mansard roof. The house at South Green and Clay Street (#1533-9) is typical of fine Queen Anne structures employing a large corner tower with a conical roof.

Smaller 19th century middle class housing with less decorative elements can be found along Church, Clay and Green Streets. Elements such as Gothic Revival pointed arch attic lights, Queen Anne windows and Second Empire mansard roofs were often employed. Most of the structures also contain front porches with turned elements and sawn brackets.

Tuckerton, although extensively altered during the last decade due to demolition and fire (such as the fire on Main Street which destroyed much of Tuckerton's business core) contains a large percentage of its 18th and 19th century structures. Areas such as the region of Center, Maple and South Main Streets and along South Green, Clay and Otis Street contain a great number of structures which may be eligible for nomination to the National Register of Historic Places as districts. Local ordinances protecting Tuckerton's architectural heritage may also be appropriate since many of the borough's buildings have been lost in the last few years.

STREETSCAPE SURVEY FORM

STREET NAME: West Main Street
MUNICIPALITY: Tuckerton

CROSS STREETS: Center, Maple, Lakeside
COUNTY: Ocean

DESCRIPTION/SIGNIFICANCE:

A number of late 18th and 19th century structures are found along West Main Street, originally the New Gretna Town Road. Today these structures are masked behind modern store fronts and enclosed porches. The buildings are located near the roadway and are scattered along both sides of the street. The buildings were originally residential and farm-houses. In the late 19th century, a sewing machine factory was built at #137. Early in the 20th century, other commercial structures could be found along the road including a small art deco gas station at the corner of Center Street. Through the years the road has remained a major route leading to and from Tuckerton.

A map of 1879 shows many of the existing structures, however other 19th century structures have been built along the northern section. Early structures usually have 2 stories, 2, 3 or 5 bays, gabled roofs and 6/6 windows or 2/2 and 1/1 replacements. Late 19th century buildings contain more decorative elements including towers, cross gabled roofs and verge-boards. Many of the buildings have been extensively altered. In the early 20th century the road became the major route to popular South Jersey resorts such as Atlantic City and Cape May.

STREETSCAPE SURVEY FORM

STREET NAME: Center Street
MUNICIPALITY: Tuckerton

CROSS STREETS: Maple
COUNTY: Ocean

DESCRIPTION/SIGNIFICANCE:

Center Street, once known as the southern section of Main Street, remains much as it did in the 19th century. Small mid and late 19th century structures on large lots line the street. The early houses such as #219 are 2 story, 3 bay structures often containing central chimneys and 6/6 windows with molded surrounds. Later 19th century buildings may have cross gables or gabled ends facing the streets, pointed or Roman arch attic lights and vergeboards. The northern end of the street has late 19th century structures with more high-styled elements, such as turrets, Queen Anne windows, and turned porch elements. However, the majority of buildings remain simple, containing minimal decorative elements. The street represents a microcosm of 19th century architecture of the area.

STREETSCAPE SURVEY FORM

STREET NAME: Maple Street & Western Ave. CROSS STREETS: Center
MUNICIPALITY: Tuckerton COUNTY: Ocean

DESCRIPTION/SIGNIFICANCE:

Known as Island Road on the 1878 map of Tuckerton, Maple Street and Western Avenue are essentially one road which runs approximately two blocks. According to the 1878 map, 20 structures existed at that time. The buildings are located close to the road, mostly on the south side and date from the 18th to late 19th century. They are small in scale and were homes of the middle class. Two structures are particularly interesting, #206 and 224 Western Avenue. Both structures are 1½ story, 3 bay saltbox cottages with gabled roofs. #206 Western Avenue also has a 6 panel door, 6/6 windows and a rear lean-to. The buildings are similar to the Little Red House (1533-) which dates from the early 18th century. Most structures on the road were constructed from the mid to late 19th century and are 2½ stories with shingled or clapboard exteriors. According to the 1849 and 1879 maps of Burlington County, a schoolhouse existed on the road near the intersection of Maple and Western. The road was populated early since it was the only path leading to Osbourne Island. Early maps show that it was lined with farms.

STREET NAME: Main Street
MUNICIPALITY: Tuckerton

CROSS STREETS: Green, Wood
COUNTY: Ocean

DESCRIPTION/SIGNIFICANCE:

The commercial center of Tuckerton, Main Street was the original stagecoach route during the 19th century. This road therefore contains some of the Borough's oldest structures. Main Street between Green and Wood Streets on the bay side has a handful of early 19th century commercial structures. Although hidden behind 20th century commercial fronts, the shapes and peaks of the structures can be seen from the rear yards. The buildings are 2 stories high, and usually 3 - 5 bays wide with shingle, clapboard and asbestos exteriors and gabled roofs. They are located close together at the streets' edge. An unusual Queen Anne structure #126 Main Street has a second floor porch with turned posts, valance and hip roof, and Queen Anne windows.

DESCRIPTION/SIGNIFICANCE:

This small street runs one block between North Green and Wood Streets. Small structures built close to the road's edge line the street. A graveyard, which dates from the late 18th century is at the southwest corner of the street. Various building types can be seen. One of the earliest buildings is #119 which is 2 stories, 3 bays with a stone foundation, gabled roof with returns, 6/6 windows, and door with transom. Later structures such as #120, circa 1880, has a cross gable roof, and paired Roman arched attic windows. #129 contains a gambrel roof and open porch with turned posts, sawn brackets and a standard railing. Many of the buildings have been altered by the replacement of clapboard and cedar shingles with aluminum and asbestos and by the enclosing of porches. According to the 1878 map, a schoolhouse and other buildings existed on the block.

MUNICIPALITY: Tuckerton

CROSS STREETS:
COUNTY: Ocean

DESCRIPTION/SIGNIFICANCE:

Wood Street, from Main Street to Railroad Avenue, contains a number of handsome 2 story Queen Anne homes. The tree lined narrow road was laid in the mid-19th century and many of the homes along the street date from that period. Intermingled with the older dwellings are 1 story contemporary structures.

Some pivotal buildings on the block include; #220, 2½ story Second Empire style house which has a mansard roof, 3 bays wide and covered with wood shingles. Another interesting building is the Mulligan house, 2 story vernacular Queen Anne with a 4 bay ornamented porch extending across the facade.

Most of the homes are on small parcels of land giving a high density streetscape. Some of the larger dwellings have been converted into 2 family homes.

STREET NAME: Water Street

CROSS STREETS:

MUNICIPALITY: Tuckerton

COUNTY: Ocean

DESCRIPTION/SIGNIFICANCE:

The structures are located close together at the road's edge. Water Street is a narrow road which curves along Tuckerton's waterfront (Tuckerton Creek) for one block. Modern structures have been built along the south side of the street, however, all of the 19th century structures except one are found on the north side. All of the buildings are simple gabled roof houses which have been altered over the years. The typical structure is 2-2½ stories, 2-4 bays wide, asbestos sided with 2/2 windows. The mill, located at the western end of the street has been the site of saw mills since 1704. The present mill, now the towns waterworks was constructed in the 19th century. The Water Street area is one of the oldest settled places in Tuckerton and was one of the major commercial areas of town during the 18th and early 19th century when shipping and boat-building were Tuckerton's major activities. The 1878 map of Tuckerton shows all of the buildings along the northside of the street, however, no road existed at that time.

STREET NAME: Green Street
MUNICIPALITY: Tuckerton

CROSS STREETS:
COUNTY: Ocean

DESCRIPTION/SIGNIFICANCE:

Green Street contains a number of structures built during the second half of the 19th century. The northern end of the street contains later structures with Queen Anne elements. These structures often have open porches, cross gabled roofs and irregular plans. Large empty lots in this block mark where buildings have been demolished or destroyed by fire. One Tudor style structure with half-timbering in its gabled peak is found in this area. The southern block has older buildings which are smaller in scale and have few decorative elements. These buildings have been altered over the years (windows and exterior materials have been replaced.) A large Queen Anne building with an onion dome dominated the southern section of the street. Like the northern end of the street, large empty lots exist. The street, however, shows the various architectural types existing in the Borough, including the Queen Anne, Greek Revival, Italianate and Second Empire. Many of the structures appear on the 1878 and 1898 maps of Tuckerton.

HISTORIC NAME: Friends Meeting House
LOCATION:COMMON NAME:
BLOCK/LOTMUNICIPALITY: Tuckerton
USGS QUAD:
OWNER/ADDRESS:COUNTY: Ocean
UTM REFERENCES:
Zone/Northing/Easting

DESCRIPTION

Construction Date: c.1863

Source of Date: see reference

Architect:

Builder:

Style: vernacular / meetinghouse

Form/Plan Type: rectangular

Number of Stories: 1

Foundation: stone, low

Exterior Wall Fabric: clapboard

Ferestration: 3 bay X 2 bays

Roof/Chimneys: gable roof

Additional Architectural Description:

A lunette is found in the facade gable end. A large double-leaf center door contains a transom and simple molded surrounds. A three-step platform leads to the entrance. Large elongated windows flank the doorway. The windows have shutters which are closed.

PHOTO

Negative File No. 1533-12

Map (Indicate North)

SITING, BOUNDARY DESCRIPTION, AND RELATED STRUCTURES:

The structure is located on an elevated lot overlooking Lake Pohatcong. A fence surrounds the property. A gas station blocks the building from the road.

SURROUNDING ENVIRONMENT: Urban Suburban Scattered Buildings
Open Space Woodland Residential Agricultural Village
Industrial Downtown Commercial Highway Commercial Other

SIGNIFICANCE:

The Friends Meeting was the first religious organization established in the area in 1704. By 1708 a meeting-house was built and graveyard plotted. In 1863 that structure was replaced by the present meetinghouse. It remains one of the few reminders of the early Quaker settlement.

Zone/Northing/Easting

DESCRIPTION

Construction Date: Poss. c.1830 with c.1900 facade addition Source of Date: see reference

Architect: Builder:

Style: vernacular / Queen Anne Form/Plan Type:

Number of Stories: 2½ story

Foundation: brick

Exterior Wall Fabric: staggered butt and fishscale shingle

Fenestration: 2 bay

Roof/Chimneys: gable

Additional Architectural Description:

An open porch contains Doric columns. 1/1 windows are employed throughout. Gabled dormers are found along the south elevation. A double leaf door is located on the facade.

PHOTO Negative File No. 1533-27

Map (Indicate North)

SITING, BOUNDARY DESCRIPTION, AND RELATED STRUCTURES:

The structure is surrounded by modern commercial buildings. Similar buildings can be found to the north.

SURROUNDING ENVIRONMENT: Urban Suburban Scattered Buildings
Open Space Woodland Residential Agricultural Village
Industrial Downtown Commercial Highway Commercial Other

SIGNIFICANCE:

The structure, originally constructed in the early 19th century, contains a Queen Anne facade, typical of late 19th and early 20th century architecture of the region. The building was owned by Samuel Predmore in the late 19th and early 20th century, who was one of the large landowners of the area and also involved with the Tuckerton Railroad.

Construction Date: c.1820 Source of Date: see references

Architect: Builder:

Style: vernacular / Greek Revival with Gothic Revival addition Form/Plan Type: 2 rectangular plans

Number of Stories: 2½

Foundation: low

Exterior Wall Fabric: clapboard

Fenestration: 3 bay (main section)

Roof/Chimneys: cross gable (main section) / 3 interior chimneys

Additional Architectural Description:

The structure is two separate buildings which were joined together. The northern section is 2 bays with a clapboard exterior, 12/12 windows and a gable roof. The south end is newer. 2/2 windows are employed. The first floor windows are elongated. An open porch contains Doric columns and turned railing. A double center door has a transom. Paired pointed arch windows are found in the cross gable end.

PHOTO Negative File No. 1533-29

Map (Indicate North)

SITING, BOUNDARY DESCRIPTION, AND RELATED STRUCTURES:

The structure is near the edge of the main road on a slightly elevated lot. A modern structure is found to the north. Similar buildings are located along the street.

SURROUNDING ENVIRONMENT: Urban Suburban Scattered Buildings
Open Space Woodland Residential Agricultural Village
Industrial Downtown Commercial Highway Commercial Other

SIGNIFICANCE:

This large structure is believed to have been a tavern, hotel, stagecoach stop and post office. Its original owner, J.D. Thompson was an attorney and post master. He later became the first sheriff of Burlington County. The building's northern wing dates from circa 1820. The main section of the structure was added later in the century.

Architect: Builder:

Style: vernacular / meetinghouse Form/Plan Type: rectangular

Number of Stories: 1

Foundation: stone, brick

Exterior Wall Fabric: clapboard

Fenestration: 3 bay

Roof/Chimneys: gable

Additional Architectural Description:

A center door with pointed arch transom and pediment surround is flanked by large pointed arch stained glass windows. All windows contain louvered shutters. Colossal end pilasters are found on the facade. A heavy modillion cornice runs along the perimeter of the church and the gable roof has returns. There is a cupola with four pointed arch openings. A one story north wing contains a false front with similar elements. A large rear addition is modern.

PHOTO Negative File No. 1533-30

Map (Indicate North)

SITING, BOUNDARY DESCRIPTION, AND RELATED STRUCTURES:

The structure is located on a corner lot in the heart of town.
A manse is adjacent to the building. (See listings).

SURROUNDING ENVIRONMENT: Urban Suburban Scattered Buildings
Open Space Woodland Residential Agricultural Village
Industrial Downtown Commercial Highway Commercial Other Village

SIGNIFICANCE:

The first Presbyterian services were held in Tuckerton in 1843, soon after which the church was organized. In 1860 a lot was purchased from Dr. T.T. Price and a church was erected. The building was completed in 1861 at a cost of \$3,700. The building is an excellent example of late 19th century church architecture of Ocean County. Modern addition has not destroyed the structure's integrity.

109 WEST STATE STREET, TRENTON, NEW JERSEY 08625 (609) 292-2023

SITING, BOUNDARY DESCRIPTION, AND RELATED STRUCTURES:

The house is located at the foot of Bartlett Lane. Adjacent to the structure is a gas station.

SURROUNDING ENVIRONMENT: Urban Suburban Scattered Buildings
Open Space Woodland Residential Agricultural Village
Industrial Downtown Commercial Highway Commercial Other

SIGNIFICANCE:

This "little red saltbox" house is a local landmark that may have been built in the later colonial period when Tuckerton was an important coastal port. The house has been restored and remodeled to an 1825 period by its present owner.

Its saltbox appearance was added to the building in the early 1960s when the structure was redesigned and a west open porch was removed and the dwelling's main facade was rotated to its present location facing east. New window placement, addition of eyebrow windows and the construction of a hood over the door were added to balance the front facade.

Typical saltbox houses in Ocean County such as #206 Western Avenue, (1533-10) and the Grier House in Manahawkin (1531-21) are of a much smaller scale than this house. Its early date of construction, however, is suggested by its massive post and beam construction, nails and other hardware and building materials.

SITING, BOUNDARY DESCRIPTION, AND RELATED STRUCTURES:

This house is located up Bartlett Lane in a secluded wooded area. There is only one house located nearby.

SURROUNDING ENVIRONMENT: Urban Suburban Scattered Buildings
Open Space Woodland Residential Agricultural Village
Industrial Downtown Commercial Highway Commercial Other Open fields

SIGNIFICANCE:

The Bartlett Homestead is one of the oldest houses in Tuckerton and sits on a parcel of land that was once the original Mordecai Andrews tract that dates back to 1699. Although local tradition claims that a portion of the house was built for Andrews, further research is needed to document this assumption.

It is known that in the 19th century, Nathan Bartlett purchased this farmhouse and expanded his nearby shipbuilding yard and charcoal docks. Now the property of the Tuckerton Historical Society, the home is being stabilized in hopes that it may someday be restored.

Its picturesque location and its historical association to one of Tuckerton's most influential families, should constitute an effort to see that the building is nominated to the National Register.

TUCKERTON LISTINGS

1533-L1

Not Available

N.W. corner of North Main at Locust Street

2½ story, 3 bay, asbestos siding, parapet roof. A large enclosed porch runs across the facade. Small second floor windows are found on the facade. The structure is one of the few Italianate houses remaining in the area.

1533-L2

S.W. corner of Main and Locust Street

2½ story, 3 bay, gable roof, asbestos siding, c.1880. An open porch, Doric columns, dentil cornice and a standard rail runs across the facade and north elevation. Windows are 1/1 and diamond shaped. A square tower is located in the northeast corner. An iron fence runs along the property line. The structure is similar to the house on Locust Street (#1533-).

1533-L3

Austin House / 317 Main Street

2½ story, 5 bay, asbestos siding, cross gable roof. A partially enclosed porch with turned posts runs across the facade. Paired Roman-arched attic windows are found in the gable peaks. The structure was the home of Frank Austin, Tuckerton's first mayor, after it became a Borough in 1901.

1533-L4

Presbyterian Manse / Main Street

2½ story, 5 bay, asbestos siding, gable roof with returns, c.1860. 6/6 windows with molded surrounds, a center door containing a transom and sidelights, and an open portico are found on the facade. The structure has been altered by the use of asbestos siding and a modern portico.

1533-L5

Main Street

2½ story, 3 bay, clapboard exterior, gable roof with returns, c.1860. This small structure still retains its door with dentiled cornice and pilaster. Modern 1/1 windows and a gabled dormer are employed. The structure has a brick foundation.

1533-L6

S.W. corner of Main and Wood

2½ story, 2 bay, clapboard exterior, gable roof with returns, built after 1878. A structure on this site is shown on the 1878 map of Tuckerton as the townhall. Windows are 6/1. The first floor contains multi-paned transoms over the door and windows.

1533-L7

West Main Street

2½ story, 2 bay, clapboard, gable roof. This late 19th century L-plan residential structure has 2/2 and 6/6 windows and an open porch with turned posts, railing and valence.

1533-L8

130 Main Street

2½ story, 2 bay, stucco with staggered-butts peaks, gable roof. A turret is located in the southeast corner. The structure is an unusual example of Victorian Queen Anne architecture. Its exterior has been extremely altered.

1533-L9

136 Main Street

2½ story, 4 bay, clapboard and staggered-butt shingle peaks, cross gable roof with returns. An open porch contains turned posts, balustrades and a valence. Windows are 1/1 throughout. The structure's first floor has been extensively altered.

1533-L10

137 West Main Street

2½ story, 2 X 4 bay, clapboard, gable roof with full return. The gable peak faces the road and contains a bull's eye in its attic level. 6/6 windows are found on the second floor. The first floor has been altered for commercial purposes. The foundation is brick.

1533-L11

Delicatessen / Main Street

2½ story, 5 bay, asbestos and shingle exterior, gable roof. Two end interior chimneys. 2/2 windows are employed throughout. This structure has been a commercial building for many years. In the early 1900s it was the Blackman's Ice Cream Shop. It is also believed to be the site of the first post office in Burlington County in 1714.

1533-L12

Tuckerton High School / Marine Street

2½ story, 11 bay, brick exterior, parapet roof, circa 1926. A modern wing is located to the west. The original school has a center doorway with limestone pilasters, dentil cornice and consoles. Limestone bands are also found at the cornice and watertable levels. A cartouche is located at the top of the center portion. Large continuous windows are employed.

1533-L13

115 Marine Street

2½ story, 4 bay, clapboard exterior, gable roof with large slope to rear. An enclosed porch runs across the facade. A group of 4 shed dormers and 1/1 windows is also found on the facade.

1533-L14

121 Marine Street

2½ story, 4 bay, natural wood shingle exterior, gable roof. A center door is flanked by 4/4 windows. Two interior chimneys can be found at either end of the main roof. A large lean-to addition is located in the rear. An open porch runs across the facade containing square posts and blind balustrade.

1533-L15

Rockhill / 350 Marine Street

2½ story, 3 bay, asbestos siding, gable roof. Built before 1878. The structure had 6/6 windows and two doors on its east elevation. The building is situated perpendicular to the road.

1533-L16

Wood Street

2½ story, 5 bay, asbestos siding, cross gable roof with returns. Windows are 2/2 and round arched with labels in the gable peaks. A center door has a transom. The structure appears on the 1878 map.

1533-L17

123 Wood Street

2 story, 2 bay, asbestos siding, gable roof. The structure is one of the earliest buildings on the street. The exterior has been extremely altered. An enclosed porch now runs across the facade.

1533-L18

Not Available

149 Wood Street

2½ story, 3 bay, asbestos siding, gable roof with returns. An off center door contains a hipped roof portico with chamfered posts and transom and sidelights. 6/6 windows are employed. The structure appears on the 1878 map of Tuckerton.

1533-L19

221 Wood Street

2½ story, 3 bay, asbestos siding, mansard roof. The structure is similar to #220 Wood Street, however, the building has been altered by the addition of an enclosed front porch. The structure is one of the few Second Empire style homes still standing.

1533-L20

Wood Street

2½ story, 4 bay, natural wood shingle, gable roof with returns. An open porch with blind balustrade and square posts runs across the facade. Windows are 2/2. The building is typical of mid-late 19th century vernacular construction in the Tuckerton area.

1533-L21

Masonic Hall / Wood and Church Streets

2 story, 3 bay, aluminum siding, gable roof. Although extensively altered the building is one of the earliest Masonic Halls in the state and appears on the 1878 map of Tuckerton.

1533-L22

Cemetery / Church and North Green Streets

This small cemetery dates from the early 19th century. It is surrounded by a small stone fence. The area's most prominent 19th century citizen, Ebenezer Tucker, is buried here.

7533-L23

224 Western

1½ story, 3 bay, clapboard exterior, gable roof. This building is similar to #-10 since it has a center door and similar scale and shape. It has been altered slightly.

TUCKERTON

STATE AND NATIONAL REGISTER OF HISTORIC PLACES

ON REGISTERS:

PENDING STATE REVIEW:

RECOMMENDED FOR STATE AND NATIONAL REGISTERS

The following list of buildings, districts or sites have been reviewed by the survey team and are considered eligible to be placed on the New Jersey and National Registers of Historic Places. For a complete explanation of the register program and criteria, contact the Office of Cultural and Environmental Services, 109 West State Street, Trenton, N.J. 08625. Telephone: (609) 292-2023.
