POLLUTION FILES	
✓ PLANT	663 X 10
SUBJECT	

Newark
Waterfall
Conroy

Bill Taylor, who is Central Engineering's outstanding authority on the subject of pollution abatement, has been giving the subject of a midwestern 2,4-D operation the benefit of his experience. In order that he may have first-hand experience with some of the problems which may arise, we have asked him to try to schedule a visit to your plant. It turns out that Bill will be at our Richmond plant during the first part of next week and plans to return with a stop-over in Newark next Friday, June 10. I would appreciate it if you could arrange to show Bill through the plant.

D. J. PORTER
