MR. F. R. KENNEDY - NEWARK

Stream Pollution Complaint

Confirming our conversation, I am attaching a copy of a letter received here in Cleveland from the Corps of Engineers relative to an inspection of the waterfront at the Newark plant.

As I told you I have given a copy of this to Bill Taylor of our Central Engineering Department, who heads up Diamond's pollution control activities. Bill's experience in this field, I am sure, will be of help to you, and you may expect to hear from him shortly on this matter.

Please keep me posted as to your progress.

J. S. CORT, JR.
