

Major Program Objectives

Upon completion of the radon-based lesson plans and extended learning activities that follow, the students will be able to:

1. Identify people's perceptions about radon
2. Describe the characteristics of radon
3. Identify ways of detecting radon
4. Select the most appropriate graph to display specific data
5. Identify how people are exposed to radon
6. Evaluate health risks from radon exposure and other common sources of risk
7. Develop an action plan to test for radon gas in their households
