

# **Appendix A**

## **Soil Cleanup Criteria**

**SOIL CLEANUP CRITERIA FOR CHROMIUM AND ITS COMPOUNDS ISSUED BY THE  
NEW JERSEY DEPARTMENT OF ENVIRONMENTAL PROTECTION**

Effective as of September 18, 1998 the New Jersey Department of Environmental Protection (Department) has approved the use as soil cleanup criteria the following values that are related to chromium and its compounds. The basis for these values is to a large extent derived from United States Environmental Protection Agency (USEPA) toxicological information, exposure pathway models, exposure assumptions, risk calculations, and air model utilization.

<b>Pathway</b>	<b>Land Use Scenario</b>	
	<b>Residential</b>	<b>Nonresidential</b>
<i>For trivalent chromium and its compounds:</i>		
Dermal <sup>1</sup>	None <sup>2</sup>	None <sup>2</sup>
Inhalation	None <sup>3</sup>	None <sup>3</sup>
Ingestion	120,000 ppm	Not regulated <sup>4</sup>
Impact to ground water	None <sup>2</sup>	None <sup>2</sup>
<i>For hexavalent chromium and its compounds:</i>		
Dermal <sup>1</sup>	Under development <sup>5</sup>	Under development <sup>5</sup>
Inhalation	270 ppm	20 ppm (preliminary) <sup>6</sup>
Ingestion	240 ppm	6,100 ppm
Impact to ground water	Site-specific <sup>7</sup>	Site-specific <sup>7</sup>

*NOTES:*

1. The specific human health endpoint considered for the dermal pathway is allergic contact dermatitis. This has been determined by the Department to be an endpoint requiring regulation. The USEPA does not use allergic contact dermatitis as a basis for determining the need to remediate a site.
2. Under normal environmental conditions, trivalent chromium is insoluble in water. Therefore exposure via this pathway is not relevant.
3. Toxicological data for trivalent chromium do not exist for this exposure pathway. Therefore, soil cleanup criteria can not be established.
4. For the nonresidential land use scenario, ingestion of insoluble trivalent chromium does not pose an unacceptable risk. Therefore, a soil cleanup criterion is not proposed.
5. Exposure models and assumptions have been developed or are being finalized. Generic soil cleanup criteria are also being developed by the Department. The Department currently allows the determination of site-specific soil cleanup criteria. Residential and nonresidential land use scenario soil cleanup criteria are the same due to the acute nature of the endpoint.
6. Exposure models and assumptions have been developed or are being finalized. The Department currently allows the determination of site-specific soil cleanup criteria. Due to the effects of vehicular traffic, the nonresidential land use scenario soil cleanup criterion will be lower than the residential land use scenario soil cleanup criterion.
7. Due to the highly variable soil conditions throughout New Jersey, it is not possible at this time to develop a generic impact to ground water criterion. However, the site-specific criterion would be the same for both residential and nonresidential land use scenarios.

In addition to the above, ecological impacts must also be considered. As the Department is presently precluded by public law from developing ecologically based cleanup criteria for statewide use, each situation will be handled on a site-specific basis.

Supporting documentation for these criteria are in, "Summary of the Basis and Background of the Soil Cleanup Criteria for Trivalent and Hexavalent Chromium" which is dated September 18, 1998. This document is in the process of being placed on the Internet and will be available for viewing shortly at [www.state.nj.us/dep/srp/index.htm](http://www.state.nj.us/dep/srp/index.htm). It is available in printed form upon request from Dr. Teruo Sugihara, New Jersey Department of Environmental Protection, 401 East State Street, P.O. Box 413, Trenton, New Jersey 08625-0413. Questions concerning the above can also be directed to Dr. Sugihara via telephone at (609) 633-1356.

## Soil Cleanup Criteria (mg/kg) (Last Revised — 7/11/96)

This listing represents the combination of Tables 3-1 and 7-1 from the Department of Environmental Protection's February 3, 1992, proposed rule entitled *Cleanup Standards for Contaminated Sites*, N.J.A.C. 7:26D. It includes noted corrections based upon errors identified by the department during or subsequent to the comment period as well as new toxicological information obtained since the rule proposal. Please refer to the respective footnotes for more detail. Notwithstanding, where the following criteria are based on human health impacts, the Department shall still consider environmental impacts when establishing site specific cleanup criteria. This, along with other site specific factors including background conditions, may result in site-specific cleanup criteria which differ from the criteria listed below. Therefore, this list shall not be assumed to represent approval by the Department of any remedial action or to represent the department's opinion that a site requires remediation.

Note: Material bracketed [**thus**] is deleted and material underlined **thus** is added.

<u>Contaminant</u>	<u>CASRN</u>	<b>Residential Direct Contact Soil Cleanup Criteria(a)(b)</b>	<b>Non Residential Direct Contact Soil Cleanup Criteria(a)(b)</b>	<b>Impact to Ground water Soil Cleanup Criteria(b)</b>
Acenaphthene	83-32-9	3400	10000 (c)	100

#### **Footnotes**

- (a) criteria are health based using an incidental ingestion exposure pathway except where noted below
- (b) criteria are subject to change based on site specific factors (e.g., aquifer classification, soil type, natural background, environmental impacts, etc.)
- (c) health based criterion exceeds the 10000 mg/kg maximum for total organic contaminants
- (d) health based criterion exceeds the 1000 mg/kg maximum for total volatile organic contaminants
- (e) cleanup standard proposal was based on natural background
- (f) health based criterion is lower than analytical limits; cleanup criterion based on practical quantitation level
- (g) criterion has been recalculated based on new toxicological data
- (h) the impact to ground water values for inorganics will be developed based upon site specific chemical and physical parameters
- (i) original criterion was incorrectly calculated and has been recalculated
- (j) typographical error
- (k) criterion based on inhalation exposure pathway which yielded a more stringent criterion than the incidental ingestion exposure pathway
- (l) new criterion derived using methodology in the basis and background document
- (m) criterion based on ecological (phytotoxicity) effects
- (n) level of the human health based criterion is such that evaluation for potential environmental impacts on a site by site basis is recommended
- (o) level of the criterion is such that evaluation for potential acute exposure hazard is recommended
- (p) criterion based on the USEPA Integrated Exposure Uptake Biokinetic (IEUBK) model utilizing the default parameters. The concentration is considered to protect 95% of target population (children) at a blood lead level of 10 ug/dl.
- (q) criteria was derived from a model developed by the Society for Environmental Geochemistry and Health (SEGH) and was designed to be protective for adults in the workplace
- (r) Insufficient information available to calculate impact to ground water criteria

## **Appendix B**

### **Contaminants**

## A. Contaminant Groups

(Environmental Protection Agency. Remediation Technologies Screening Matrix and Reference Guide. EPA 542/B-94-013. October 1994)

Major contaminant groups used in the Matrix are:

- (1) Halogenated volatiles
- (2) Halogenated semivolatiles
- (3) Non-halogenated volatiles
- (4) Non-halogenated semivolatiles
- (5) Fuel Hydrocarbons
- (6) Pesticides
- (7) Inorganics

These major groups include the contaminants listed below. These are not comprehensive lists, but they contain examples of contaminants encountered at many sites.

### (1) Halogenated Volatiles

Bromodichloromethane  
Bromoform  
Bromomethane  
Carbon tetrachloride  
Chlorodibromomethane  
Chloroethane  
Chloroform  
Chloromethane  
Chloropropane  
Cis- 1,2-dichloroethylene  
Cis- 1,3-dichloropropene  
Dibromomethane  
1,1-Dichloroethane  
1,2-Dichloroethane  
1,2-Dichloroethene  
1,1-Dichloroethylene  
Dichloromethane  
1,2-Dichloropropane  
Ethylene dibromide  
Fluorotrichloromethane (Freon 11)  
Hexachloroethane  
Monochlorobenzene  
1,1,2,2-Tetrachloroethane  
Tetrachloroethylene (Perchloroethylene)  
1,2-Trans-dichloroethylene  
Trans-1,3-dichloropropene  
1,1,1-Trichloroethane

1,1,2-Trichloroethane  
Trichloroethylene  
1,1,2-Trichloro- 1,2,2-trifluoroethane (Freon 113)  
Vinyl chloride

### (2) Halogenated Semivolatiles

Bis(2-chloroethoxy)ether  
1,2-Bis(2-chloroethoxy)ethane  
Bis(2-chloroethoxy)methane  
Bis(2-chloroethoxy)phthalate  
Bis(2-chloroethyl)ether  
Bis(2-chloroisopropyl)ether  
4-Bromophenyl phenyl ether  
4-Chloroaniline  
p-Chloro-m-cresol  
2-Chloronaphthalene  
2-Chlorophenol  
4-Chlorophenyl phenylether  
1,2-Dichlorobenzene  
1,3-Dichlorobenzene  
1,4-Dichlorobenzene  
3,3-Dichlorobenzidine

### **Halogenated Semivolatiles (Continued)**

2,4-Dichlorophenol  
Hexachlorobenzene  
Hexachlorobutadiene  
Hexachlorocyclopentadiene  
Pentachlorophenol  
Polychlorinated biphenyls (PCBs)  
Tetrachlorophenol  
1,2,4-Trichlorobenzene  
2,4,5-Trichlorophenol  
2,4,6-Trichlorophenol

### **(3) Non-Halogenated Volatiles**

Acetone  
Acrolein  
Acrylonitrile  
n-Butyl alcohol  
Carbon disulfide  
Cyclohexanone  
Ethyl acetate  
Ethyl ether  
2-Hexanone  
Isobutanol  
Methanol  
Methyl ethyl ketone  
Methyl isobutyl ketone  
4-Methyl-2-pentanone  
Styrene  
Tetrahydrofuran  
Vinyl acetate

### **(4) Non-Halogenated Semivolatiles**

Benzidine  
Benzoic acid  
Benzyl alcohol  
Bis(2-ethylhexyl)phthalate  
Bis phthalate  
Butyl benzyl phthalate  
Dibenzofuran  
Di-n-butyl phthalate  
Diethyl phthalate

Dimethyl phthalate  
4,6-Dinitro-2-methylphenol  
2,4-Dinitrophenol  
2,4-Dinitrotoluene  
2,6-Dinitrotoluene  
Di-n-octyl phthalate  
1,2-Diphenylhydrazine  
Isophorone  
2-Nitroaniline  
3-Nitroaniline  
4-Nitroaniline  
2-Nitrophenol  
4-Nitrophenol  
n-Nitrosodimethylamine  
n-Nitrosodiphenylamine  
n-Nitrosodi-n-propylamine  
Phenyl naphthalene

### **(5) Fuel Hydrocarbons**

Acenaphthene  
Anthracene  
Benz(a)anthracene  
Benzene  
Benzo(b)fluoranthene  
Benzo(k)fluoranthene  
Benzo(ghi)perylene  
Benzo(a)pyrene  
Chrysene  
Cis-2-butene  
Cresols  
Cyclohexane  
Cyclopentane  
Dibenzo(a,h)anthracene  
2,3-Dimethylbutane  
3,3-Dimethyl-1-butene  
Dimethylethylbenzene  
2,2-Dimethylheptane  
2,2-Dimethylhexane  
2,2-Dimethylpentane  
2,3-Dimethylpentane  
2,4-Dimethylphenol  
Ethylbenzene  
3-Ethylpentane  
Fluoranthene  
Fluorene

Indeno(1,2,3-c,d)pyrene  
Isobutane  
Isopentane  
2-Methyl-1,3-butadiene  
3-Methyl-1,2-butadiene  
2-Methyl-butene  
2-Methyl-2-butene  
3-Methyl-1-butene  
Methylcyclohexane  
Methylcyclopentane  
2-Methylheptane  
3-Methylheptane  
3-Methylhexane  
Methylnaphthalene  
2-Methylnaphthalene  
2-Methylpentane  
3-Methylpentane  
3-Methyl-1-pentene  
2-Methylphenol  
4-Methylphenol  
Methylpropylbenzene  
M-Xylene  
Naphthalene  
N-Butane  
N-Decane  
N-Dodecane  
N-Heptane  
N-Hexane  
N-Hexylbenzene  
Nitrobenzene  
N-Nonane  
N-Octane  
N-Pentane  
N-Propylbenzene  
N-Undecane  
O-Xylene  
1-Pentene  
Phenanthrene  
Phenol  
Propane  
P-Xylene  
Pyrene  
Pyridine  
1,2,3,4-Tetramethylbenzene  
1,2,4,5-Tetramethylbenzene  
Toluene  
1,2,4-Trimethylbenzene

1,3,5-Trimethylbenzene  
1,2,4-Trimethyl-5-ethylbenzene  
2,2,4-Trimethylheptane  
2,3,4-Trimethylheptane  
3,3,5-Trimethylheptane  
2,4,4-Trimethylhexane  
3,3,4-Trimethylhexane  
2,2,4-Trimethylpentane  
2,3,4-Trimethylpentane  
Trans-2-butene  
Trans-2-pentene

## (6) Pesticides

Aldrin  
Bhc-alpha  
Bhc-beta  
Bhc-delta  
Bhc-gamma  
Chlordane  
4,4'-DDD  
4,4'-DDE  
4,4'-DDT  
Dieldrin  
Endosulfan I  
Endosulfan II  
Endosulfin sulfate  
Endrin  
Endrin aldehyde  
Ethion  
Ethyl parathion  
Heptachlor  
Heptachlor epoxide  
Malathion  
Methylparathion  
Parathion  
Toxaphene

## (7) Inorganics

Aluminum  
Antimony  
Arsenic  
Asbestos  
Barium  
Beryllium

Bismuth  
Cadmium  
Calcium  
Chromium  
Cobalt  
Copper  
Cyanide  
Fluorine  
Iron  
Lead  
Magnesium  
Manganese  
Mercury  
Metallic cyanides  
Nickel  
Potassium  
Selenium  
Sodium  
Tin  
Vanadium  
Zinc

## B. Alphabetical Listing of Contaminants

(Environmental Protection Agency. Remediation Technologies Screening Matrix and Reference Guide. EPA 542/B-94-013. October 1994)

Acenaphthene (see Fuel Hydrocarbons)  
Acetone (see Non-Halogenated Volatiles)  
Acrolein (see Non-Halogenated Volatiles)  
Acrylonitrile (see Non-Halogenated Volatiles)  
Aldrin (see Pesticides)  
Aluminum (see Inorganics)  
Anthracene (see Fuel Hydrocarbons)  
Antimony (see Inorganics)  
Arsenic (see Inorganics)  
Asbestos (see Inorganics)  
Barium (see Inorganics)  
Benz(a)anthracene (see Fuel Hydrocarbons)  
Benzene (see Fuel Hydrocarbons)  
Benzidine (see Non-Halogenated Semivolatiles)  
Benzo(a)pyrene (see Fuel Hydrocarbons)  
Benzo(b)fluoranthene (see Fuel Hydrocarbons)  
Benzo(ghi)perylene (see Fuel Hydrocarbons)  
Benzo(k)fluoranthene (see Fuel Hydrocarbons)  
Benzoic acid (see Non-Halogenated Semivolatiles)  
Benzyl alcohol (see Non-Halogenated Semivolatiles)  
Beryllium (see Inorganics)  
Bhc-alpha (see Pesticides)  
Bhc-beta (see Pesticides)  
Bhc-delta (see Pesticides)  
Bhc-gamma (see Pesticides)  
Bis phthalate (see Non-Halogenated Semivolatiles)  
1,2-Bis(2-chloroethoxy)ethane (see Halogenated Semivolatiles)  
Bis(2-chloroethoxy)ether (see Halogenated Semivolatiles)  
Bis(2-chloroethoxy)methane (see Halogenated Semivolatiles)  
Bis(2-chloroethoxy)phthalate (see Halogenated Semivolatiles)  
Bis(2-chloroethyl)ether (see Halogenated Semivolatiles)  
Bis(2-chloroisopropyl)ether (see Halogenated Semivolatiles)  
Bis(2-ethylhexyl)phthalate (see Non-Halogenated Semivolatiles)  
Bismuth (see Inorganics)  
Bromodichlommethane (see Halogenated Volatiles)  
Bromoform (see Halogenated Volatiles)  
Bromomethane (see Halogenated Volatiles)  
4-Bromophenyl phenyl ether (see Halogenated Semivolatiles)  
Butyl benzyl phthalate (see Non-Halogenated Semivolatiles)  
Cadmium (see Inorganics)  
Calcium (see Inorganics)  
Carbon disulfide (see Non-Halogenated Volatiles)  
Carbon tetrachloride (see Halogenated Volatiles)  
Chlordane (see Pesticides)  
4-Chloroaniline (see Halogenated Semivolatiles)  
Chlorodibromomethane (see Halogenated Volatiles)  
Chloroethane (see Halogenated Volatiles)

## Alphabetical Listing of Contaminants (continued)

Chloroform (see Halogenated Volatiles)  
Chloromethane (see Halogenated Volatiles)  
2-Chloronaphthalene (see Halogenated Semivolatiles)  
2-Chlorophenol (see Halogenated Semivolatiles)  
4-Chlorophenyl phenylether (see Halogenated Semivolatiles)  
Chloropropane (see Halogenated Volatiles)  
Chromium (see Inorganics)  
Chrysene (see Fuel Hydrocarbons)  
Cis-1,2-dichloroethylen (see Halogenated Volatiles)  
Cis-1,3-dichloropropene (see Halogenated Volatiles)  
Cis-2-butene (see Fuel Hydrocarbons)  
Cobalt (see Inorganics)  
Copper (see Inorganics)  
Cresols (see Fuel Hydrocarbons)  
Cyanide (see Inorganics)  
Cyclohexane (see Fuel Hydrocarbons)  
Cyclohexanone (see Non-Halogenated Volatiles)  
Cyclopentane (see Fuel Hydrocarbons)  
4,4'-DDD (see Pesticides)  
4,4'-DDE (see Pesticides)  
4,4'-DDT (see Pesticides)  
Di-n-butyl phthalate (see Non-Halogenated Semivolatiles)  
Di-n-octyl phthalate (see Non-Halogenated Semivolatiles)  
Dibenzo(a,h)anthracene (see Fuel Hydrocarbons)  
Dibenzofuran (see Non-Halogenated Semivolatiles)  
Dibromomethane (see Halogenated Volatiles)  
1,2-Dichlorobenzene (see Halogenated Semivolatiles)  
1,3-Dichlorobenzene (see Halogenated Semivolatiles)  
1,4-Dichlorobenzene (see Halogenated Semivolatiles)  
3,3-Dichlorobenzidine (see Halogenated Semivolatiles)  
1,1-Dichloroethane (see Halogenated Volatiles)  
1,2-Dichloroethane (see Halogenated Volatiles)  
1,2-Dichloroethene (see Halogenated Volatiles)  
1,1-Dichloroethylene (see Halogenated Volatiles)  
Dichloromethane (see Halogenated Volatiles)  
2,4-Dichlorophenol (see Halogenated Semivolatiles)  
1,2-Dichloropropane (see Halogenated Volatiles)  
Dieldrin (see Pesticides)  
Diethyl phthalate (see Non-Halogenated Semivolatiles)  
Dimethyl phthalate (see Non-Halogenated Semivolatiles)  
3,3-Dimethyl-1-butene (see Fuel Hydrocarbons)  
2,3-Dimethylbutane (see Fuel Hydrocarbons)  
Dimethylethylbenzene (see Fuel Hydrocarbons)  
2,2-Dimethylheptane (see Fuel Hydrocarbons)  
2,2-Dimethylhexane (see Fuel Hydrocarbons)  
2,2-Dimethylpentane (see Fuel Hydrocarbons)  
2,3-Dimethylpentane (see Fuel Hydrocarbons)  
2,4-Dimethylphenol (see Fuel Hydrocarbons)  
4,6-Dinitro-2-methylphenol (see Non-Halogenated Semivolatiles)  
2,4-Dinitrophenol (see Non-Halogenated Semivolatiles)

## Alphabetical Listing of Contaminants (continued)

2,4-Dinitrotoluene (see Non-Halogenated Semivolatiles)  
2,6-Dinitrotoluene (see Non-Halogenated Semivolatiles)  
1,2-Diphenylhydrazine (see Non-Halogenated Semivolatiles)  
Endosulfan sulfate (see Pesticides)  
Endosulfan I (see Pesticides)  
Endosulfan II (see Pesticides)  
Endrin (see Pesticides)  
Endrin aldehyde (see Pesticides)  
Ethion (see Pesticides)  
Ethyl acetate (see Non-Halogenated Volatiles)  
Ethyl ether (see Non-Halogenated Volatiles)  
Ethyl parathion (see Pesticides)  
Ethylbenzene (see Fuel Hydrocarbons)  
Ethylene dibromide (see Halogenated Volatiles)  
3-Ethylpentane (see Fuel Hydrocarbons)  
Fluoranthene (see Fuel Hydrocarbons)  
Fluorene (see Fuel Hydrocarbons)  
Fluorine (see Inorganics)  
Fluorotrichloromethane (Freon 11) (see Halogenated Volatiles)  
Fuel Hydrocarbons  
Halogenated Semivolatiles  
Halogenated Volatiles  
Heptachlor (see Pesticides)  
Heptachlor epoxide (see Pesticides)  
Hexachlorobenzene (see Halogenated Semivolatiles)  
Hexachlorobutadiene (see Halogenated Semivolatiles)  
Hexachlorocyclopentadiene (see Halogenated Semivolatiles)  
Hexachloroethane (see Halogenated Volatiles)  
2-Hexanone (see Non-Halogenated Volatiles)  
Indeno(1,2,3-c,d)pyrene (see Fuel Hydrocarbons)  
Inorganics  
Iron (see Inorganics)  
Isobutane (see Fuel Hydrocarbons)  
Isobutanol (see Non-Halogenated Volatiles)  
Isopentane (see Fuel Hydrocarbons)  
Isophorone (see Non-Halogenated Semivolatiles)  
Lead (see Inorganics)  
M-Xylene (see Fuel Hydrocarbons)  
Magnesium (see Inorganics)  
Malathion (see Pesticides)  
Manganese (see Inorganics)  
Mercury (see Inorganics)  
Metallic cyanides (see Inorganics)  
Methanol (see Non-Halogenated Volatiles)  
Methyl isobutyl ketone (see Non-Halogenated Volatiles)  
Methyl ethyl ketone (see Non-Halogenated Volatiles)  
2-Methyl-1,3-butadiene (see Fuel Hydrocarbons)  
3-Methyl-1,2-butadiene (see Fuel Hydrocarbons)  
2-Methyl-2-butene (see Fuel Hydrocarbons)  
4-Methyl-2-pentanone (see Non-Halogenated Volatiles)

## Alphabetical Listing of Contaminants (continued)

2-Methyl-butene (see Fuel Hydrocarbons)  
3-Methyl-1-butene (see Fuel Hydrocarbons)  
3-Methyl-1-pentene (see Fuel Hydrocarbons)  
Methylcyclohexane (see Fuel Hydrocarbons)  
Methylcyclopentane (see Fuel Hydrocarbons)  
2-Methylheptane (see Fuel Hydrocarbons)  
3-Methylheptane (see Fuel Hydrocarbons)  
3-Methylhexane (see Fuel Hydrocarbons)  
Methylnaphthalene (see Fuel Hydrocarbons)  
2-Methylnaphthalene (see Fuel Hydrocarbons)  
Methylparathion (see Pesticides)  
2-Methylpentane (see Fuel Hydrocarbons)  
3-Methylpentane (see Fuel Hydrocarbons)  
2-Methylphenol (see Fuel Hydrocarbons)  
4-Methylphenol (see Fuel Hydrocarbons)  
Methylpropylbenzene (see Fuel Hydrocarbons)  
Monochlorobenzene (see Halogenated Volatiles)  
N-Butane (see Fuel Hydrocarbons)  
n-Butyl alcohol (see Non-Halogenated Volatiles)  
N-Decane (see Fuel Hydrocarbons)  
N-Dodecane (see Fuel Hydrocarbons)  
N-Heptane (see Fuel Hydrocarbons)  
N-Hexane (see Fuel Hydrocarbons)  
N-Hexylbenzene (see Fuel Hydrocarbons)  
n-Nitrosodi-n-propylamine (see Non-Halogenated Semivolatiles)  
n-Nitrosodimethylamine (see Non-Halogenated Semivolatiles)  
n-Nitrosodiphenylamine (see Non-Halogenated Semivolatiles)  
N-Nonane (see Fuel Hydrocarbons)  
N-Octane (see Fuel Hydrocarbons)  
N-Pentane (see Fuel Hydrocarbons)  
N-Propylbenzene (see Fuel Hydrocarbons)  
N-Undecane (see Fuel Hydrocarbons)  
Naphthalene (see Fuel Hydrocarbons)  
Nickel (see Inorganics)  
2-Nitroaniline (see Non-Halogenated Semivolatiles)  
3-Nitroaniline (see Non-Halogenated Semivolatiles)  
4-Nitroaniline (see Non-Halogenated Semivolatiles)  
Nitrobenzene (see Fuel Hydrocarbons)  
2-Nitrophenol (see Non-Halogenated Semivolatiles)  
4-Nitrophenol (see Non-Halogenated Semivolatiles)  
Non-Halogenated Semivolatiles  
Non-Halogenated Volatiles  
O-Xylene (see Fuel Hydrocarbons)  
p-Chloro-m-cresol (see Halogenated Semivolatiles)  
P-Xylene (see Fuel Hydrocarbons)  
Parathion (see Pesticides)  
Pentachlorophenol (see Halogenated Semivolatiles)  
1-Pentene (see Fuel Hydrocarbons)  
Pesticides  
Phenanthrene (see Fuel Hydrocarbons)

## Alphabetical Listing of Contaminants (continued)

Phenol (see Fuel Hydrocarbons)  
Phenyl naphthalene (see Non-Halogenated Semivolatiles)  
Polychlorinated biphenyls (PCBS) (see Halogenated Semivolatiles)  
Potassium (see Inorganics)  
Propane (see Fuel Hydrocarbons)  
Pyrene (see Fuel Hydrocarbons)  
Pyridine (see Fuel Hydrocarbons)  
Selenium (see Inorganics)  
Sodium (see Inorganics)  
Styrene (see Non-Halogenated Volatiles)  
1,1,2,2-Tetrachloroethane (see Halogenated Volatiles)  
Tetrachloroethylene (Perchloroethylene) (see Halogenated Volatiles)  
Tetrachlorophenol (see Halogenated Semivolatiles)  
Tetrahydrofuran (see Non-Halogenated Volatiles)  
1,2,3,4-Tetramethylbenzene (see Fuel Hydrocarbons)  
1,2,4,5-Tetramethylbenzene (see Fuel Hydrocarbons)  
Tin (see Inorganics)  
Toluene (see Fuel Hydrocarbons)  
Toxaphene (see Pesticides)

Trans-2-butene (see Fuel Hydrocarbons)  
Trans-2-pentene (see Fuel Hydrocarbons)  
1,2-Trans-dichloroethylene (see Halogenated Volatiles)  
1,1,2-Trichloro-1,2,2-trifluoroethane (Freon I 1 3) (see Halogenated Volatiles)  
1,2,4-Trichlorobenzene (see Halogenated Semivolatiles)  
1,1,1-Trichloroethane (see Halogenated Volatiles)  
1,1,2-Trichloroethane (see Halogenated Volatiles)  
Trichloroethylene (see Halogenated Volatiles)  
2,4,5-Trichlorophenol (see Halogenated Semivolatiles)  
2,4,6-Trichlorophenol (see Halogenated Semivolatiles)  
1,2,4-Trimethyl-5-ethylbenzene (see Fuel Hydrocarbons)  
1,2,4-Trimethylbenzene (see Fuel Hydrocarbons)  
1,3,5-Trimethylbenzene (see Fuel Hydrocarbons)  
2,2,4-Trimethylheptane (see Fuel Hydrocarbons)  
2,3,4-Trimethylheptane (see Fuel Hydrocarbons)  
3,3,5-Trimethylheptane (see Fuel Hydrocarbons)  
2,4,4-Trimethylhexane (see Fuel Hydrocarbons)  
3,3,4-Trimethylhexane (see Fuel Hydrocarbons)  
2,2,4-Trimethylpentane (see Fuel Hydrocarbons)  
2,3,4-Trimethylpentane (see Fuel Hydrocarbons)  
Vanadium (see Inorganics)  
Vinyl chloride (see Halogenated Volatiles)  
Vinyl acetate (see Non-Halogenated Volatiles)  
Zinc (see Inorganics)

## **Appendix C**

### **Hazardous Waste Levels**

## Hazardous Waste Levels

Below are the analytical parameters and their regulatory levels for waste classification purposes. The different testing parameters do not apply to all waste types. Parameters represented by EPA waste numbers D004 through D043 are determined by TCLP methods. Please contact our unit at the above telephone number for hazardous waste classification information.

EPA Waste Number	Parameters/Contaminant	Hazardous Level
D001	Ignitibility	≤140° F
D002	Corrosivity	≤2 and ≥12.5 pH
D003	Reactive Sulfide	500 mg/kg
D003	Reactive Cyanide	250 mg/kg
D004	Arsenic	5.0 mg/l
D005	Barium	100.0 mg/l
D006	Cadmium	1.0 mg/l
D007	Chromium	5.0 mg/l
D008	Lead	5.0 mg/l
D009	Mercury	0.2 mg/l
D010	Selenium	1.0 mg/l
D011	Silver	5.0 mg/l
D012	Endrin	0.02 mg/l
D013	Lindane	0.4 mg/l
D014	Methoxychlor	10.0 mg/l
D015	Toxaphene	0.5 mg/l
D016	2,4-D	10.0 mg/l
D017	2,4,5-TP Silvex	1.0 mg/l
D018	Benzene	0.5 mg/l
D019	Carbon tetrachloride	0.5 mg/l
D020	Chlordane	0.03 mg/l
D021	Chlorobenzene	100.0 mg/l
D022	Chloroform	6.0 mg/l
D023	o-Cresol	200.0 mg/l
D024	m-Cresol	200.0 mg/l
D025	p-Cresol	200.0 mg/l
D026	Cresol	200.0 mg/l
D027	1,4-Dichlorobenzene	7.5 mg/l
D028	1,2-Dichloroethane	0.5 mg/l
D029	1,1-Dichloroethylene	0.7 mg/l
D030	2,4-Dinitrotoluene	0.13 mg/l
D031	Heptachlor	0.008 mg/l
D032	Hexachlorobenzene	0.13 mg/l
D033	Hexachlorobutadiene	0.5 mg/l
D034	Hexachloroethane	3.0 mg/l
D035	Methyl ethyl ketone	200.0 mg/l
D036	Nitrobenzene	2.0 mg/l
D037	Pentachlorophenol	100.0 mg/l
D038	Pyridine	5.0 mg/l
D039	Tetrachloroethylene	0.7 mg/l
D040	Trichloroethylene	0.5 mg/l
D041	2,4,5-Trichlorophenol	400.0 mg/l
D042	2,4,6-Trichlorophenol	2.0 mg/l
D043	Vinyl chloride	0.2 mg/l

**Appendix D**  
**District Solid Waste Management Officials**

New Jersey Department of Environmental Protection  
Division of Solid And Hazardous Waste

**District Solid Waste Management Officials – February 1998**

**Atlantic**

Mr. Brian Lefke  
Solid Waste Coordinator  
Atlantic County Utilities Authority  
6700 Delilah Road  
Egg Harbor Township, NJ 08234  
609/646-5500 Fax 272-6941

**Bergen**

Mr. Richard Wierer, Director  
Solid Waste Management Division  
Bergen County Utilities Authority  
Foot of Mehrhof Road Box 9  
Little Ferry, NJ 07643  
201/807-5823 Fax 641-3509

**Burlington**

Mr. Robert Simkins  
Solid Waste Coordinator  
Burlington County Waste Management  
PO Box 429  
Columbus, NJ 08022  
609/499-1001 Fax 499-5212

**Camden**

Mr. Jack Sworaski, Director  
Camden County Solid Waste Mgmt.  
1301 Park Boulevard  
Cherry Hill, NJ 08002-3752  
609/216-2113 Fax 216-2146

**Cape May**

Mr. Thomas Hroncich  
Solid Waste Manager  
Cape May Co. Municipal Util. Authority  
PO Box 610  
Cape May Courthouse, NJ 08210  
609/465-9026 Fax 465-9025

**Cumberland**

Mr. Steven Wymbs, Director  
Cumberland County Improvement Auth.  
2 West Vine Street  
Millville, NJ 08332  
609/825-3700 Fax 825-8121

**Essex**

Mr. Martin Lund  
Director of Operations  
Essex County Utilities Authority  
120 Fairview Avenue  
Cedar Grove, NJ 07009  
973/857-2350 Fax 857-9361

**Gloucester**

Mr. David Shields, Director  
Gloucester County Improvement Auth.  
109 Budd Boulevard  
Woodbury, NJ 08096  
609/848-4002 Fax 384-1262

**H.M.D.C.**

Mr. Thomas Marturano  
Director of Solid Waste  
Hackensack Meadowlands Development  
Commission  
PO Box 640  
Lyndhurst, NJ 07071  
201/460-1700 Fax 460-1722

**Hudson**

Mr. Thomas Calvanico, Director  
Hudson County Improvement Authority  
2 Journal Square Plaza, 8th Floor  
Jersey City, NJ 07306  
201/795-4555 Fax 795-0240

**Hunterdon**

Mr. Alan Johnson  
Hunterdon County Utilities Authority  
Division of Solid Waste  
Victorian Plaza, 1 E. Main Street  
Flemington, NJ 08822  
908/788-1110 Fax 788-1662

**Mercer**

Mr. Al Collins  
Solid Waste Supervisor  
Mercer County Improvement Authority  
640 South Broad Street  
PO Box 8068  
Trenton, NJ 08650  
609/695-1200 Fax 695-1452

**Middlesex**

Mr. Richard Hills, Director  
Middlesex County Department of  
Solid Waste Management  
96 Bayard Street  
New Brunswick, NJ 08901  
732/745-4170 Fax 745-3010

**Monmouth**

Mr. Lawrence Zaayenga  
Solid Waste Coordinator  
Monmouth County Planning Board  
Hall of Records Annex  
PO Box 1255  
Freehold, NJ 07728-1255  
732/431-7460 Fax 431-7795

**Morris**

Mr. Larry Gindoff  
Solid Waste Coordinator  
Morris County Municipal Util. Authority  
PO Box 370  
Mendham, NJ 07945-0370  
973/285-8390 Fax 285-8397

**Ocean**

Mr. Alan Avery, Director  
Ocean County Solid Waste Dept.  
129 Hooper Avenue  
Box 2191  
Toms River, NJ 08754-2191  
732/506-5047 Fax 244-8396

**Passaic**

Mr. James Rogers  
Planning Director  
Passaic County Planning Department  
Admin. Building, 401 Grand Street  
Paterson, NJ 07505-2023  
201/881-4490 Fax 881-4484

**Salem**

Mr. Peter Dewilde, Director  
Salem County Utilities Authority  
PO Box 890  
52 McKillip Road  
Alloway, NJ 08001-0890  
609/935-7900 Fax 935-7331

**Somerset**

Ms. Diana Vigilante  
Manager  
Somerset County  
Solid Waste Management Division  
PO Box 3000  
Somerville, NJ 08876-1262  
908/231-7031 Fax 707-1749

**Sussex**

Mr. Fred Suljic  
Administrator  
Sussex County Dept. of Planning  
County Administration Building  
Plotts Road, PO Box 709  
Newton, NJ 07860

**Union**

Mr. Joe Spatola, Director  
Union County Utilities Authority  
1499 Routes 1 & 9 North  
Rahway, NJ 07065  
908/382-9400 Fax 382-5862

**Warren**

Mr. David Dech, Director  
Warren County Planning Department  
Dumont Administration Building  
Belvidere, NJ 07823  
908/475-6531 Fax 475-6555

## **Appendix E**

### **Permit Identification**

# Permit Identification

## A. Introduction

The information contained in this section is designed to provide a Responsible Party or its agent with guidance regarding the permits that may be required to implement a specific remedial action. However, this section should not be viewed as a final identification of all permits required to implement a site-specific remedial action work plan. In order to fully identify the permits required for a site-specific project, the Responsible Party or its agent should utilize the Permit Identification Form (see Appendix H) and the services of the Office of Permit Information and Assistance (609/292-3600).

Upon completion of the Permit Identification Form, the Responsible Party will initiate a process wherein it will receive assistance in identifying all applicable permits and reviews required by NJDEP. In addition, the Office of Permit Information and Assistance will schedule a preapplication meeting with all of the pertinent NJDEP review entities and continue to assist the Responsible Party when necessary throughout the permit/review process.

## B. Potential Permits and Reviews

The attached Permit Identification Chart has been assembled to indicate the “Probably Needed” and “Possibly Needed” permits for each of the Soil Treatment Technologies described in Section IV of the *Guidance Document for the Remediation of Contaminated Soils*. If a particular permit is listed as “Probably Needed,” it is almost certain that this permit will be required to implement this remedial action. If a particular permit is listed as “Possibly Needed,” this permit **may be** required in certain situations and the Responsible Party will need to contact the permit program for a final determination. Listed below are descriptions of the permit categories on the attached chart.

1. **NJPDES:** When this category has been marked on the chart, it indicates that a New Jersey Pollution Discharge Elimination System (NJPDES) permit may be required, based upon the description of that particular process. However, given the varied types of NJPDES permits, the specific type will not be indicated, as this will depend on the method of discharge chosen. For example, if you have chosen to discharge to ground water, a NJPDES Discharge to Ground Water (DGW) permit would be required. However, if you are going to an existing publicly owned treatment works or you are going to pretreat the discharge prior to going to a publicly owned treatment works, then you may only be required to get an NJPDES SIU (Significant Industrial User) permit.

If you are choosing to build and operate your own treatment facility which will discharge to a surface water body, you will need to obtain a NJPDES Discharge to Surface Water (DSW) permit. Given the various types of NJPDES permits, if the remedial action you have chosen indicates that you probably need a permit, you should contact the appropriate bureau within the Wastewater Facilities Program to determine the exact permit you will need.

2. **TWA (Treatment Works Approval):** This category, when marked on the chart, indicates that a Treatment Works Approval (TWA) may be required, based on the description of the particular process. A TWA may be issued for a variety of reasons such as: a newly approved or substantially modified treatment facility; newly approved or substantially modified pretreatment equipment; or, the construction of a new lateral, main or pump station. In fact, whenever a process involves the treatment or disposal of wastewater, the applicant should contact the Bureau of Construction and Connection for a formal determination on whether or not a TWA will be required.
3. **Air Quality Regulation Permits:** This category, when marked on the chart, indicates that some type of Air permit may be required, based upon the description of that particular process. Air permits are extremely varied. For example, the Air Quality regulations require a permit to construct new equipment, as well as a separate permit to operate newly installed equipment. Also, the permits are divided into five different levels, based on the type of pollution control a particular piece of equipment is supposed

to provide. Whenever the process you have chosen involves an air pollution control device or a basic air filtration system, you should contact the Bureau of New Source Review for a formal determination on which type of permit is required.

4. **Land Use Regulation Program (LURP), Wetlands Permits:** When this category is marked on the chart, it indicates some type of wetlands permit may be required. In fact, on the chart a wetlands permit is always marked in the “Possibly Needed” category, as a wetlands permit would be required only if wetlands are present on the specific location where a remedial action is to be taken. Absent specific site locations, each of the remedial action sections indicates a possible need for a wetlands permit. The category “wetlands permit” actually refers to the following permit or review categories:
  - 1) Letters of Exemption (LOE)
  - 2) Letters of Interpretation (LOI)
  - 3) Statewide General Permits (SGP)
  - 4) Open Water Fill Permits
  - 5) Individual Permits
  - 6) Transition Area Waivers
5. **Land Use Regulation Program (LURP), Stream Encroachment:** A Stream Encroachment permit is always marked in the “Possibly Needed” category, as a Stream Encroachment permit would be required if any construction or installation activities were to occur along, in, or across a channel or the floodplain of a stream. Also, a Stream Encroachment permit would be required for any alteration of the floodplain or the stream. If there are questions regarding a specific project or site location, contact the Land Use Regulation Program for a formal determination on whether a permit will be required.
6. **Well Drilling Permits:** When this category is marked on the chart, it indicates that a well drilling permit may be required. This permit is obtained by the well driller, whether for a potable well or a monitoring well. Should you need a well installed, contact a New Jersey licensed well driller.
7. **Bureau of Water Allocation Permits:** When this category is marked on the chart, it indicates that a Water Supply Allocation permit may be required. A water supply allocation permit is required only when you will be diverting 100,000 gallons of water per day (70 gpm) or more from surface or ground waters for non-agricultural purposes. If your activity qualifies under this criteria, or you wish an applicability determination, contact the Bureau of Water Allocation.

It is suggested that you contact the specific bureau or office should you have questions regarding the applicability of a particular permit. However, should your project require two or more permits, you are encouraged to contact the Office of Permit Information and Assistance by completing and mailing the attached Permit Identification Form or by calling 609/292-3600. The Office of Permit Information and Assistance will schedule a preapplication meeting with all of the pertinent NJDEP review entities and continue to assist the Responsible Party when necessary throughout the permit/review process. The Permit Identification Form is meant only to inform applicants of the potential permits which may be needed, but is not meant to provide the actual permits required to proceed with your project.

In addition to the Permit Identification Form, Appendix I is a list of the technical manuals that are available through the DEP’s Office of Maps and Publications. These technical manuals are produced by the permit programs, and offer technical and policy guidance to applicants to prepare submissions for permits. You may reach this office by mail at:

Map Sales and Publications Office  
PO Box 438  
Trenton, NJ 08625-0438

or by calling 609/777-1038.

## Permit Identification Chart

<b>Remedial Actions:</b>	<b>Permits Probably Needed:</b>	<b>Permits Possibly Needed:</b>
1) Slurry Biodegradation	NJPDES TWA Air	Stream Encroachment Wetlands
2) Ex Situ Bioremediation and Landfarming	NJPDES TWA Air	Stream Encroachment Wetlands
3) In Situ Biological	NJPDES/DGW TWA	Air Stream Encroachment Wetlands
4) Soil Vapor Extraction	NJPDES TWA Air Well Drilling	Stream Encroachment Wetlands Water Allocation
5) Soil Washing	Air	NJPDES TWA Stream Encroachment Wetlands
6) Soil Flushing	NJPDES/DGW TWA Well Drilling	Stream Encroachment Wetlands Water Allocation
7) Solvent and Chemical Extraction	Air	NJPDES TWA Stream Encroachment Wetlands
8) Incineration	Air	NJPDES TWA Stream Encroachment Wetlands
9) Thermal	Air	NJPDES TWA Stream Encroachment Wetlands
10) Cement/Pozzolanic based Stabilization	Air	NJPDES TWA Stream Encroachment Wetlands

### Permit Identification Chart (continued)

<b>Remedial Actions:</b>	<b>Permits Probably Needed:</b>	<b>Permits Possibly Needed:</b>
11) Vitrification Electric Process Heating	Air	NJPDES TWA Stream Encroachment Wetlands
12) Capping		NJPDES TWA Air Stream Encroachment Wetlands
13) Excavation		NJPDES TWA Air Stream Encroachment Wetlands Dewatering
