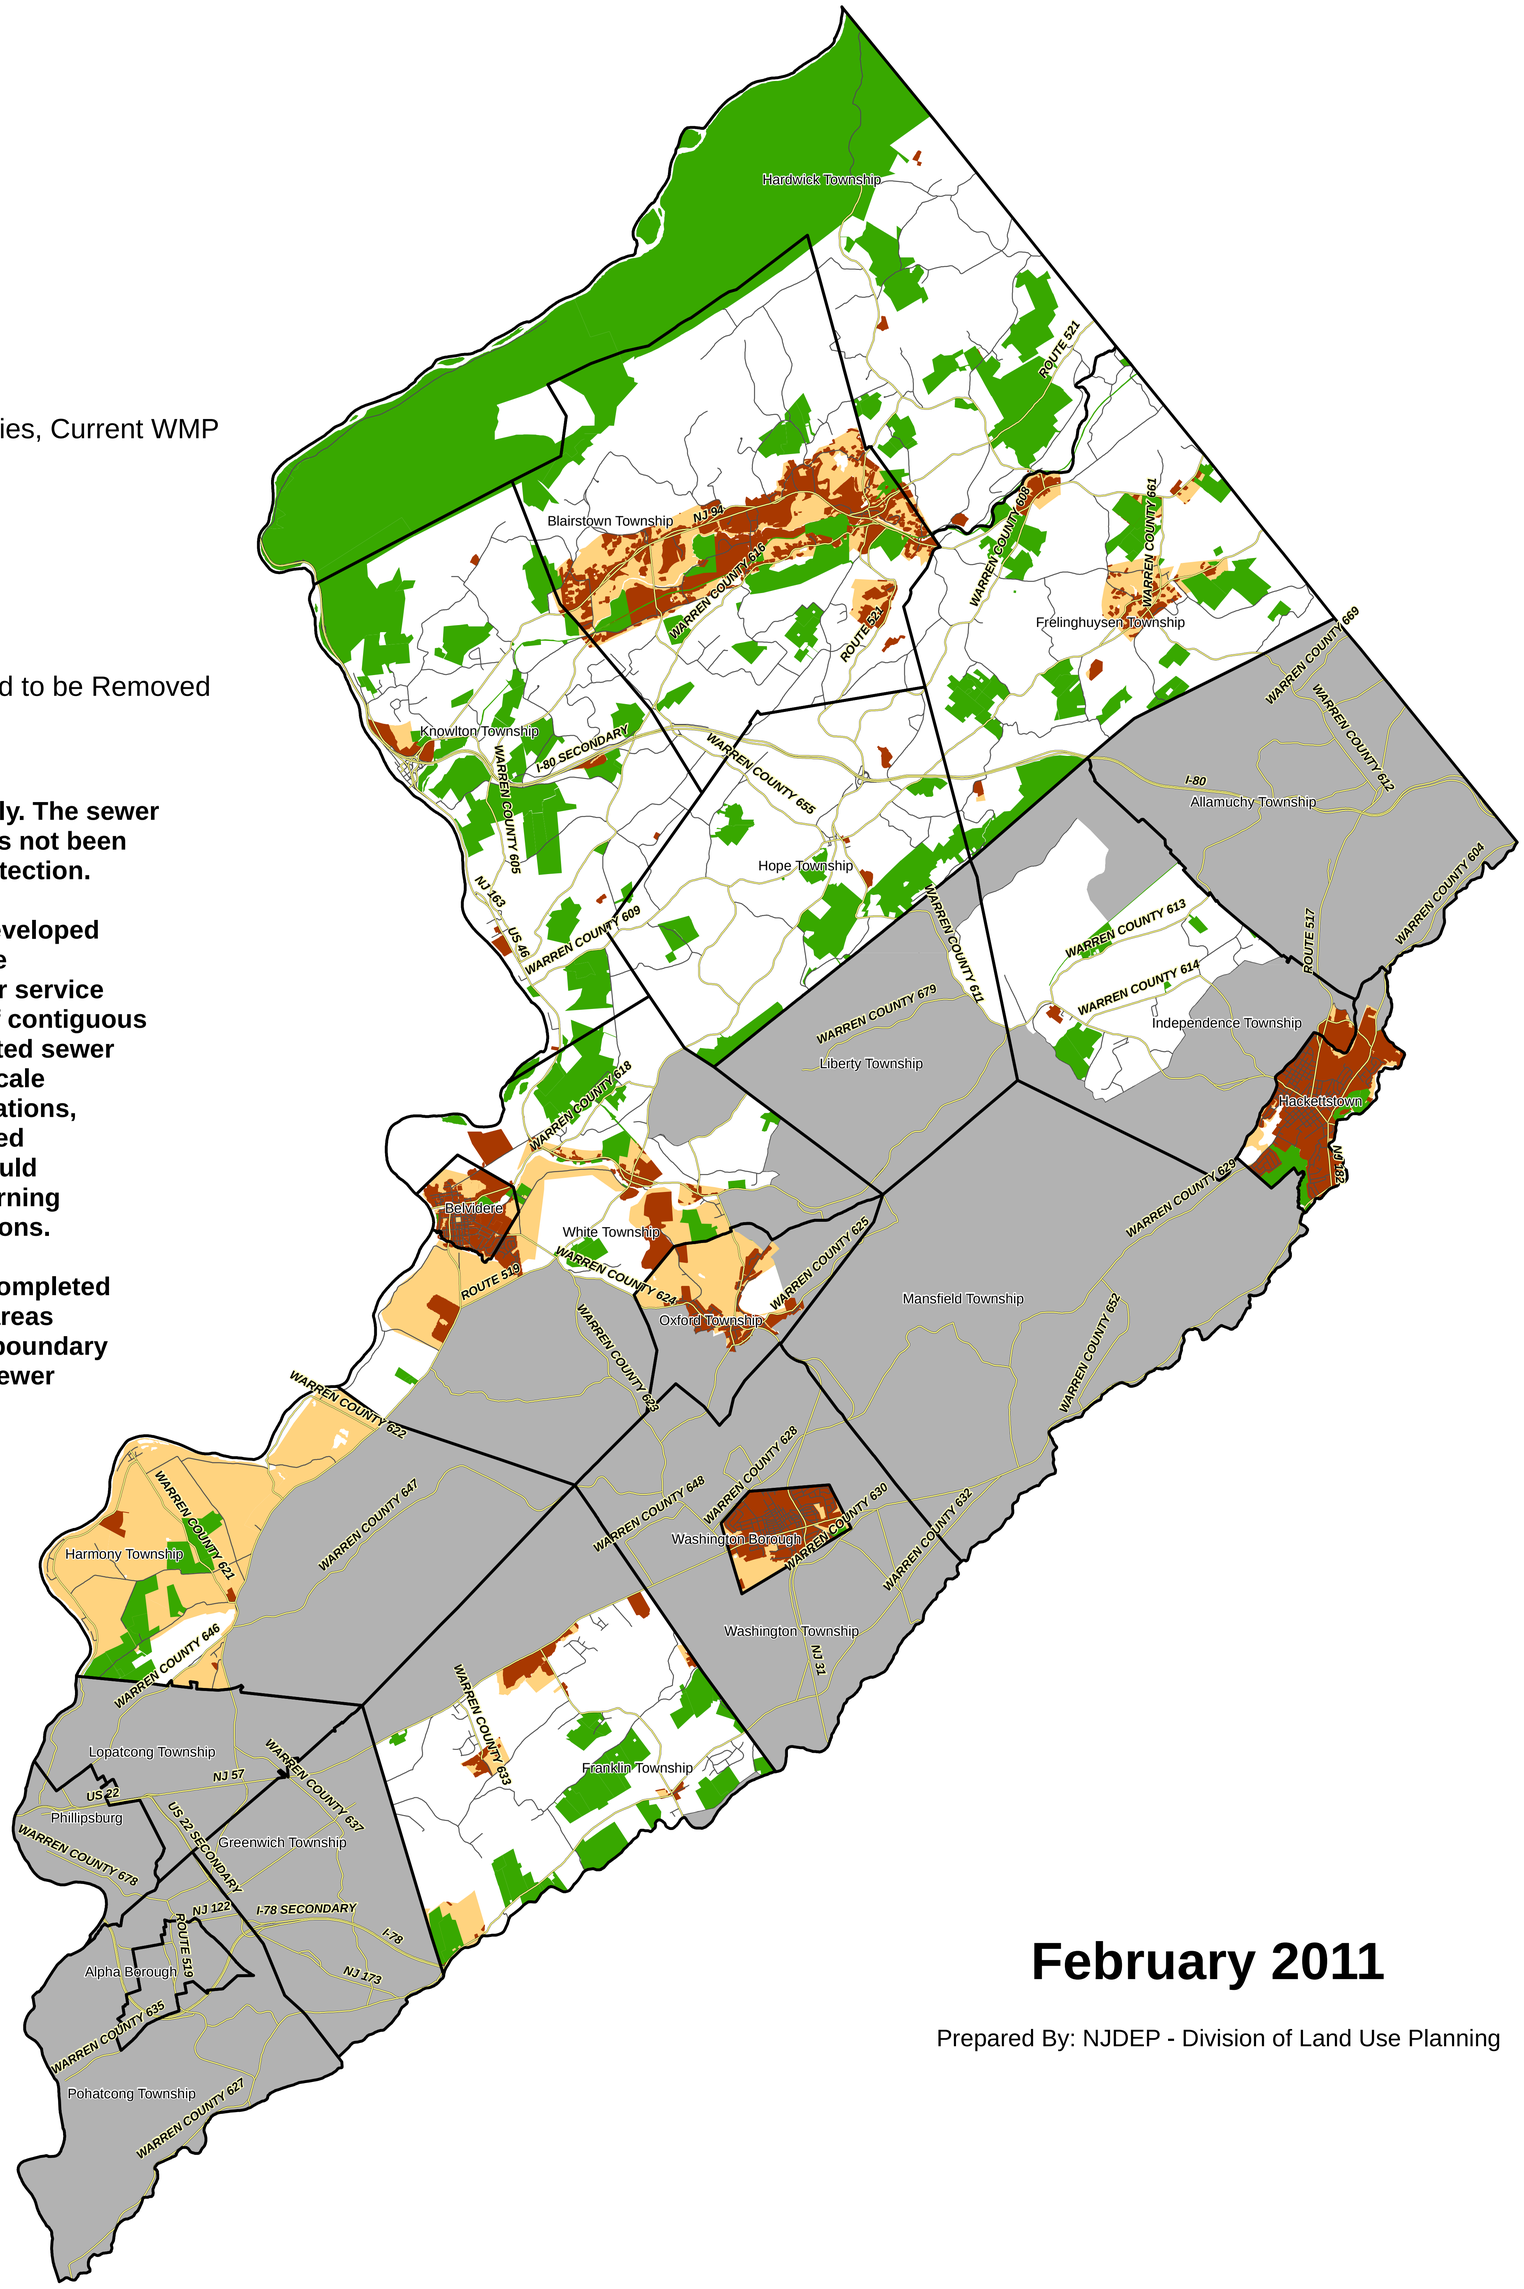
- Preserved Lands
- Warren County Proposed Sewer Service Area
- Warren County Current Sewer Service Area Proposed to be Removed



This map is to be used for general informational purposes only. The sewer service areas depicted on this map are working drafts and has not been adopted by the New Jersey Department of Environmental Protection.

Some draft sewer service areas depicted on this map were developed by approximating locations from paper maps submitted to the Department from Municipal representatives. Other draft sewer service areas were developed removing areas of 25-acres or larger of contiguous environmentally sensitive areas from the Department's adopted sewer service area coverage. This work was completed at a gross scale without municipality quality control. As a result of these limitations, the current map needs to be further updated with more detailed municipal level digital data. No claims or representations should be made that imply any level of accuracy or specificity concerning these draft sewer service areas that exceed the above limitations.

At the municipal level, additional mapping steps need to be completed to finalize the draft sewer service areas. Draft sewer service areas on this map are approximate at a regional level. For detailed boundary determinations refer only to the municipal prepared drafted sewer service area maps.
