NA = Appropriate toxicological information not available

1 – Standard is based on natural background

2 – Standard set at soil reporting limit

3 – Special calculation for EPH – see Appendix 2

4 – Sample-specific calculation using EPH calculator – see Appendix 2

5 – Standard based on the Integrated Exposure Uptake Biokinetic (IEUBK) model for lead in children

6 – This standard is used for comparison to site soil data that have been converted to sample-specific TCDD-TEQ values through application of the Toxicity Equivalence Factor Methodology (USEPA 2010) and using the WHO 2005 Mammalian Toxic Equivalency Factors (TEFs).

NA = Appropriate toxicological information not available or standard not applicable

1 – Standard not applicable because health-based criterion exceeds one million mg/kg

2 – Standard is based on natural background

3 – Special calculation for EPH– see Appendix 2

4 – Sample-specific calculation using EPH calculator – see Appendix 2

5 – Standard based on the Adult Lead Model (ALM)

6 – This standard is used for comparison to site soil data that have been converted to sample-specific TCDD-TEQ values through application of the Toxicity Equivalence Factor

Methodology (USEPA 2010) and using the WHO 2005 Mammalian Toxic Equivalency Factors (TEFs).

NA = Not available/applicable

1 – Appropriate toxicological information not available

2 – Health-based criterion exceeds one million parts per million

3 – Exceeds soil saturation limit

4 – Exceeds soil saturation limit; however, human health-based criterion based on particulate portion of the equation

Table 5

NA = Not available/not applicable

1 – Standard not applicable because criterion is above soil saturation limit

2 – Standard not applicable because Ground Water Remediation Standard is a secondary standard

3 – Standard is based on natural background

4 – Standard set to soil reporting limit

5 – Ground Water Remediation Standard not available

6 – This standard is used for comparison to site soil data that have been converted to sample-specific TCDD-TEQ values through application of the Toxicity Equivalence Factor Methodology (USEPA 2010) and using the WHO 2005 Mammalian Toxic Equivalency Factors (TEFs).
