PURPOSE:

As we approach the 5-year mark for our stewardship program, we are seeking constructive feedback from external parties participating in the current program and others who have an interest in stewardship and sustainability.

We want to discuss ideas and possibilities for:

- Increasing the breadth and depth of participation
- Increasing the environmental benefit realized
- Increasing relevance and incentive for participants
- Decreasing obstacles, deficiencies, or disincentives for participants

We also wish to discuss the potential of the program to support or lead us to additional future innovations in the context of our ongoing transformation.
