6A:8-1.1 Purpose

- (a) To prepare students for success in life, future education, and work in an economy driven by information, knowledge, and innovation requires a public education system where teaching and learning are aligned with 21st century learning outcomes. These outcomes move beyond a focus on basic competency in core subjects and foster a deeper understanding of academic content at much higher levels by promoting critical thinking, problem solving, and creativity through:
1. The Core Curriculum Content Standards that specify expectations in nine academic content areas: the visual and performing arts, comprehensive health and physical education, language arts literacy, mathematics, science, social studies, world languages, technological literacy, and 21st century life and careers;
 2. Cumulative progress indicators at benchmark grade levels delineated in the standards that further clarify expectations for student achievement; and
 3. Twenty-first century themes and skills integrated into all content standards areas as follows:
 - i. Themes:

- (d) The Statewide assessment system is designed to measure student progress in the attainment of the Core Curriculum Content Standards.
- (e) The results of the Statewide assessments shall facilitate program evaluation based on student performance and shall enable district boards of education, the public, and government officials to evaluate the educational delivery systems of all public schools.
