

Technical Notes for December 30, 2012 – December 28, 2013 New Jersey Reportable Communicable Disease Summary Report (excludes sexually transmitted diseases [chancroid, chlamydia, granuloma inguinale, gonorrhea, lymphogranuloma venereum, syphilis], HIV/AIDS and tuberculosis)

- The report includes **NJDOH-approved confirmed** cases for the following diseases.  
AMOEBIASIS  
BOTULISM – FOODBORNE  
BOTULISM – INFANT  
BOTULISM - OTHER, UNSPECIFIED  
BOTULISM - WOUND  
CAMPYLOBACTERIOSIS  
CHOLERA - O1  
CHOLERA - O139  
EBOLA  
HANTAVIRUS PULMONARY SYNDROME  
HEPATITIS A  
HEPATITIS B – ACUTE  
HEPATITIS B – CHRONIC  
HEPATITIS B - PERINATAL  
HEPATITIS C – ACUTE  
HEPATITIS C – CHRONIC  
LASSA FEVER  
LEGIONELLOSIS  
LEPROSY (HANSEN DISEASE)  
LISTERIOSIS  
MALARIA  
MEASLES  
MARBURG  
POLIOMYELITIS  
RABIES  
RUBELLA - NON-CONGENITAL  
STREPTOCOCCUS AGALACTIAE (GBS)  
STREPTOCOCCUS PNEUMONIAE  
STREPTOCOCCUS PYOGENES (GAS) - WITHOUT TOXIC SHOCK SYNDROME  
TETANUS  
TRICHINOSIS  
VANCOMYCIN-INTERMEDIATE STAPHYLOCOCCUS AUREUS (VISA)  
VANCOMYCIN-RESISTANT STAPHYLOCOCCUS AUREUS (VRSA)  
VIRAL HEMORRHAGIC FEVERS OTHER (NOT MARBURG, EBOLA, LASSA)  
YERSINIOSIS
- This report includes both **NJDOH-approved confirmed AND probable** cases for the following diseases.  
ANTHRAX  
ANTHRAX - CUTANEOUS  
ANTHRAX - INHALATION  
ANTHRAX - INTESTINAL  
ANTHRAX - OROPHARYNGEAL  
BABESIOSIS  
BRUCELLOSIS

CALIFORNIA ENCEPHALITIS(CE)  
CREUTZFELDT-JAKOB DISEASE  
CREUTZFELDT-JAKOB DISEASE - FAMILIAL  
CREUTZFELDT-JAKOB DISEASE - IATROGENIC  
CREUTZFELDT-JAKOB DISEASE - NEW VARIANT  
CREUTZFELDT-JAKOB DISEASE - SPORADIC  
CREUTZFELDT-JAKOB DISEASE - UNKNOWN  
CRYPTOSPORIDIOSIS  
CYCLOSPORIASIS  
DENGUE FEVER  
DIPHThERIA  
EASTERN EQUINE ENCEPHALITIS(EEE)  
EHRlichIOSIS/ANAPLASMOSIS - ANAPLASMA PHAGOCYTOPHILUM  
(PREVIOUSLY HGE)  
EHRlichIOSIS/ANAPLASMOSIS - EHRlichIA CHAFFEENSIS (PREVIOUSLY  
HME)  
EHRlichIOSIS/ANAPLASMOSIS - EHRlichIA EWINGII  
EHRlichIOSIS/ANAPLASMOSIS - UNDETERMINED  
GIARDIASIS  
HAEMOPHILUS INFLUENZAE  
HEMOLYTIC UREMIC SYNDROME  
LACROSSE ENCEPHALITIS(LSE)  
LYME DISEASE  
MENINGOCOCCAL DISEASE (NEISSERIA MENINGITIDIS)  
MUMPS  
PERTUSSIS  
POWASSAN ENCEPHALITIS  
PSITTACOSIS  
Q FEVER – ACUTE  
Q FEVER – CHRONIC  
ROCKY MOUNTAIN SPOTTED FEVER  
RUBELLA - CONGENITAL  
SALMONELLOSIS - NON TYPHOID  
SARS  
SHIGA TOXIN–PRODUCING E.COLI (STEC) - NON O157:H7  
SHIGA TOXIN–PRODUCING E.COLI (STEC) - O157:H7  
SHIGELLOSIS  
SMALLPOX  
ST LOUIS ENCEPHALITIS (SLE)  
STREPTOCOCCUS PYOGENES (GAS) - WITH TOXIC SHOCK SYNDROME  
TOXIC SHOCK SYNDROME – STAPHYLOCOCCAL  
TULAREMIA  
TYPHOID FEVER  
VARICELLA  
VIBRIO INFECTIONS (OTHER THAN V.CHOLERAE SPP.)  
WEST NILE VIRUS (WNV)  
WESTERN EQUINE ENCEPHALITIS(WEE)  
YELLOW FEVER

- This report includes **NJDOH-approved confirmed, probable AND possible** cases for the following diseases.

## PLAGUE

- This report includes **NJDOH-approved confirmed** and **NJDOH-E-closed** cases for the following diseases.

INFLUENZA, HUMAN ISOLATES - NOVEL INFLUENZA A

INFLUENZA, HUMAN ISOLATES - TYPE 2009 H1N1

INFLUENZA, HUMAN ISOLATES - TYPE A (SUBTYPING NOT DONE)

INFLUENZA, HUMAN ISOLATES - TYPE A H1

INFLUENZA, HUMAN ISOLATES - TYPE A H3

INFLUENZA, HUMAN ISOLATES - TYPE B

- Diseases listed above which are designated as nationally notifiable by the Centers for Disease Control are reported to CDC per MMWR print criteria. Some exceptions include:
  - DIPHTHERIA, HAEMOPHILUS INFLUENZAE, MUMPS, PERTUSSIS, ROCKY MOUNTAIN SPOTTED FEVER, RUBELLA – CONGENITAL, and VARICELLA should include confirmed, probable, and unknown cases for CDC reporting. However, New Jersey does not utilize “unknown” case status in disease reporting. New Jersey reports confirmed and probable cases only.
  - New Jersey reports confirmed MEASLES, RUBELLA - NON-CONGENITAL, and TETANUS cases only.
  - New Jersey reports confirmed, probable, and possible PLAGUE cases.
- CREUTZFELDT-JAKOB DISEASE -- Cases are classified as confirmed or probable according to date of death. With Creutzfeldt-Jakob disease, date of death may be in the calendar year following identification of suspect cases. As such, the total number of cases in the CDRSS report is preliminary and may change when additional suspect cases are classified.
- CRYPTOSPORIDIOSIS – Confirmed and probable case classification will be distinguished from each other in the MMWR annual summary, not weekly tables.
- DENGUE FEVER – Cases are no longer included in the CDC MMWR notifiable disease statistics.
- **FOODBORNE INTOXICATIONS – CIGUATERA, FOODBORNE INTOXICATIONS - MUSHROOM POISONING, FOODBORNE INTOXICATIONS - PARALYTIC SHELLFISH POISONING, and FOODBORNE INTOXICATIONS - SCOMBROID**  
There are no formal case definitions for foodborne poisonings. These counts represent all reported cases of foodborne poisonings diagnosed by a healthcare provider and any clinically compatible cases epidemiologically linked to a diagnosed case.
- HEPATITIS A - The NJDOH case definition for a confirmed case of acute HEPATITIS A was revised as of 1/1/05. Thus, HEPATITIS A statistics cannot be compared to data prior to 2005.
- HEPATITIS B - PERINATAL– There are 228 perinatal hepatitis B cases that remain open in CDRSS for MMWR Year 2013 due to follow-up needed on infants to ensure correct prophylaxis is administered over 24 month timeframe.

- INFLUENZA - There are no formal case definitions for influenza. NJDOH accepts any positive influenza test (i.e., rapid antigen, PCR, culture) as a confirmed report of influenza. Reports are received from commercial laboratories, acute care laboratories and the state public health laboratory. Reports received electronically from laboratories are entered into CDRSS as confirmed and E-closed. These counts represent only reported cases and do not represent all influenza positive influenza cases occurring in the state.
- INFLUENZA, HUMAN ISOLATES - Type 2009 H1N1 - These reports are not counted in the CDC MMWR notifiable disease statistics.
- KAWASAKI DISEASE – No longer reportable in New Jersey.
- LYME – The case definition was changed in 2008 to report confirmed, probable and possible cases to NJDOH. Only confirmed cases were reported to NJDOH and CDC prior to 2008. Only confirmed and probable cases are currently reported to CDC.
- Q FEVER - ACUTE and Q FEVER - CHRONIC were added to the nationally notifiable disease list in 2008 to report confirmed and probable. Only Q FEVER, with no subcategory, was reported to NJDOH prior to 2008.
- SHIGA TOXIN–PRODUCING E.COLI (STEC) - NON O157:H7 and SHIGA TOXIN–PRODUCING E.COLI (STEC) - O157:H7 were reported to CDC as Confirmed and Probable only from 2011. All cases were reported to CDC prior to 2011.
- STREPTOCOCCUS PYOGENES (GAS) - WITHOUT TOXIC SHOCK SYNDROME – 230 cases of GAS – without toxic shock syndrome was included in the CDRSS historical database. There were 5 additional cases of GAS classified as GAS – without toxic shock syndrome after CDRSS historical database created. A total of 235 cases were reported in New Jersey in 2013. This disease was deleted from nationally notifiable disease list in 2010.
- Please consult the Communicable Disease Service at 609-826-5964 or <http://nj.gov/health/cd/find.shtml> for case definitions of reportable diseases listed in the report.
- Data source: New Jersey DOH's CDRSS 2013 historical report (database created on May 1, 2014)
- This report is for public health use only. **DATA WITH VALUES LESS THAN FIVE SHOULD NOT BE RELEASED TO THE PUBLIC WITHOUT ACCOMPANYING INTERPRETATION.** Rates calculated from these numbers are statistically unreliable for interpretation.
