INTRODUCTION TO THE NEW JERSEY STATE CANCER REGISTRY

The New Jersey State Cancer Registry (NJSCR) is a population-based registry and includes all cancer cases diagnosed in New Jersey residents since October 1, 1978. The NJSCR serves the entire State of New Jersey, which includes a population of approximately 8.9 million people.

The purpose of the NJSCR is to track cancer in New Jersey in an effort to promote the following activities: scientific research; public and professional education programs; and planning and implementation of cancer control and prevention activities. The NJSCR strives to improve the quality and enhance the usefulness of its data.

The NJSCR was established by legislation (NJSA 26:2-104 et. seq.) in 1977 in response to concern that New Jersey was suffering from the highest cancer incidence and mortality rates in the country. New Jersey regulations require the reporting of all newly-diagnosed cancer cases to the NJSCR within six months of diagnosis. All primary malignant and in situ neoplasms are reportable to the NJSCR, except carcinoma in situ of the cervix (since 1995) and basal and squamous cell carcinoma of the skin. Benign and borderline intracranial and central nervous system tumors are reportable if diagnosed January 1, 2004 and later. Hospitals, physicians, dentists, ambulatory care facilities, radiation facilities, independent laboratories, and any other facility that diagnoses and/or treats cancer patients also file reports with the NJSCR. In addition, reporting agreements are maintained with other states so that New Jersey residents diagnosed in facilities out of state are identified.

The information collected by the NJSCR includes demographic characteristics of the patient, medical information about each cancer such as primary site, histologic type, stage and cancer-directed treatment information. The vital status of each patient is followed annually until death. The cause of death is also incorporated into the data set if the information is available.

In February 2001, the NJSCR became a member of the National Cancer Institute's SEER (Surveillance, Epidemiology and End Results) Program. The SEER Program is the most authoritative source of information on cancer incidence and survival in the United States. Geographic areas selected for inclusion in the SEER Program are based on the Registries' ability to operate and maintain a high-quality population-based cancer reporting system and for the epidemiologically significant population subgroups. The SEER Program currently collects and publishes cancer incidence and survival data from 15 population-based cancer registries (Connecticut, Detroit, Georgia, Greater Bay Area–California, Greater California, Hawaii, Iowa, Kentucky, Los Angeles, Louisiana, New Jersey, New Mexico, Seattle–Puget Sound, and Utah) and three supplemental registries (Alaska Natives, Arizona Indians, Cherokee Nation) covering approximately 30 percent of the US population. Information on more than 8 million in situ and invasive cancer cases is included in the SEER database, and approximately 450,000 new cases are added each year within the SEER coverage areas.

The NJSCR also participates in the National Program of Cancer Registries (NPCR), established by the Centers for Disease Control and Prevention (CDC) in 1992 by the Federal Cancer Registries Amendment Act (Public Law 102-515). NPCR promotes statewide, population-based registries to collect uniform data

elements in a standardized format. The NJSCR is also a member of the North American Association of Central Cancer Registries (NAACCR). NAACCR is a professional organization that develops and promotes uniform data standards for cancer registration; provides education and training; certifies population-based registries; and publishes data from central cancer registries. The NJSCR is also a member of the International Association of Cancer Registries (IACR), a professional society dedicated to fostering the aims and activities of cancer registries worldwide.

The NJSCR reviews and evaluates the quality of the data it collects through edit programs and re-abstracting studies and strives to improve data collection activities through targeted training programs. The NJSCR has been awarded the NAACCR Gold Standard, the highest standard possible. The criteria used to judge the quality of the data are timeliness, completeness of cancer case ascertainment, completeness of specific information on the cancer cases, percent of death certificate only cases, percent of duplicate cases, in addition to passing the data through a stringent edit program.

SECTION I: GENERAL INSTRUCTIONS AND CASE ELIGIBILITY

CONFIDENTIALITY

The New Jersey Cancer Registry Statute N.J.S.A.26:2-107 stipulates that reports of individual patients made to the NJSCR are held in the strictest confidence. Reports made pursuant to this act are used only by the State Department of Health and such other agencies as designated by the Commissioner of Health. N.J.S.A.26:2-108 stipulates that no individual or organization providing information to the State Department of Health in accordance with this act shall be held liable for divulging confidential information. Please note: reporting information about cases of cancer in accordance with the NJSCR authorizing statute and regulations *is permitted* by the Health Insurance Portability and Accountability Act. The privacy rule contains a specific provision authorizing covered entities to disclose protected health information as required by law. Public health reporting under the authority of State law is specifically exempted from the Privacy Rule regulations 45CFR154.512(b)(1)(i). A copy of the Cancer Reporting Statute, Regulations and Reportable List can be found on the NJSCR Website at <http://www.state.nj.us/health/ces/njscr.shtml>.

REPORTING FACILITY CONTACT INFORMATION

Communication between NJSCR and reporting facilities is important. The NJSCR makes every attempt to maintain accurate and up-to-date contact information for key personnel within the reporting facility. If the contact information for the facility changes, registries should complete the Health Care Facility Contact Information form (Appendix A) and fax it to NJSCR at 609-633-7509.

GENERAL REQUIREMENTS FOR REPORTING TO THE NEW JERSEY STATE CANCER REGISTRY (NJSCR)

The New Jersey State Cancer Registry Manual 2015 contains coding instructions for all cases diagnosed January 1, 2015 and later. Documentation and codes for historical items can be found in The New Jersey State Cancer Registry Manual 2005, 2008 and 2010.

Registrars and reporting facilities should refer to Appendix B for a full list of manuals required for collecting and submitting data.

A case *must* be reported to the NJSCR if it is **diagnosed on or after October 1, 1978**.

Note: The data collection standards of SEER may differ from those of the Commission on Cancer. In the case of a conflict, NJ health care facilities must follow SEER rules.

As a member of the SEER Program, NJSCR follows SEER coding rules. Registrars who collect data for health care facilities operating in New Jersey should refer to the appropriate SEER Program Coding and Staging Manual for specific instructions on collecting required data items, based on the year that cancer was diagnosed.

WHAT CANCER SHOULD BE REPORTED TO THE NJSCR?

All diseases listed in the List of Reportable Diseases and Conditions in Appendix C, "Cancer Registry Legislation and Regulations" should be reported to the NJSCR.

Benign and Borderline Conditions

Benign and **borderline** primary **intracranial** and **CNS** tumors with a behavior code of /0 or /1 in ICD-O-3 are collected effective with cases diagnosed 1/1/2004 and later.

- **Pilocytic/Juvenile astrocytomas** are reportable; code the histology and behavior code 9421/3. **Note:** Benign and borderline tumors of the cranial bones (C410) are **not reportable**.

Certain benign and borderline conditions are reportable. Refer to the reportable list in Appendix C or on the NJSCR website <http://www.state.nj.us/health/ces/njscr.shtml> for a list of these conditions.

Inpatient/Outpatient

All cancer patients diagnosed or treated in the **inpatient or outpatient department, emergency room, clinic, ambulatory care centers, radiation therapy centers**, or any other healthcare facility, must be reported including patients receiving **transient care**.

Residency

New Jersey **residents** and **non-residents** must be reported, including residents of foreign countries.

Cancer Diagnosed on Autopsy

Cases diagnosed at **autopsy** must be reported and patients dead on arrival (DOA) with a cancer diagnosis must be reported.

In Utero Diagnoses

Diagnoses made in utero (prior to birth) are reportable only when the pregnancy results in a live birth. In the absence of documentation of stillbirth, abortion or fetal death, assume there was a live birth and report the case.

Analytic/Non-Analytic Cases

Both analytic and non-analytic cases with active disease are required to be reported to the NJSCR. Registrars are responsible for including all required data items in the abstract, regardless of class of case.

Patients diagnosed elsewhere and admitted for additional work-up and/or treatment, cancer-directed or non cancer-directed must be reported.

Patients with a **clinical diagnosis** of cancer which was based on clinical judgment only must be reported.

Patients with a **history of cancer with active disease** must be reported.

Consult-only cases are reportable. A consult may be done to confirm a diagnosis or treatment plan.

Private outpatient specimens are reportable. Generally, these specimens are submitted from a physician's office to be read by the hospital pathologist and the patient is not registered as an inpatient or outpatient at the hospital.

Slide reviews are **encouraged** to be reported but are not required. Slide review cases are slides that have been sent to your hospital's pathologist for an opinion. Please do not confuse these with private outpatient or consult-only cases.

Multiple Primaries

If more than one primary cancer is diagnosed in a patient, based on the Multiple Primary and Histology Coding Rules Manual (<http://seer.cancer.gov/tools/mphrules/download.html>), **a separate report must be submitted for each primary.**

Ambiguous Terminology

Ambiguous terms that must be reported include the following: **apparent(ly), appears, appears to, comparable with, compatible with, consistent with, favor(s), malignant appearing, most likely, presumed, probable, suspected, suspicious, typical of.**

- **Note:** The terms “neoplasm” and “tumor” are reportable for benign nervous system tumors only.
- **Note:** If the **ambiguous** diagnosis is proven to be **not reportable** by biopsy, cytology, or physician’s statement, **do not accession** the case.
- **Exception:** If a cytology is reported as *suspicious*, do not interpret it as a diagnosis of cancer. Abstract the case only if a positive biopsy or a physician’s clinical impression of cancer supports the cytology findings. (*FORDS: Revised for 2015 page 3*)

Exclusions

The following conditions are not required to be reported:

- Carcinoma in situ (any/2) and CIN III of the cervix (C5.30-C53.9) (cases diagnosed after April 1, 1995)
- Benign and borderline neoplasms of the ovary
- Gastrointestinal stromal tumors (GIST), unless stated to be malignant
- Prostatic intraepithelial neoplasia (PIN III) of the prostate (C619) (collection stopped effective with cases diagnosed 1/1/2001 and later)
- Basal and squamous cell carcinomas of the skin (C44.0-C44.9)

*Note: Effective March 2011, basal and squamous cell carcinomas of the skin are no longer reportable to NJSCR with the exception of the skin of the following **genital** sites that **are** reportable regardless of stage: vagina, clitoris, vulva, prepuce, penis, and scrotum (sites C52.9, C5.10-C51.9, C60.0, C60.9, C63.2).*

WHEN TO REPORT TO THE NJSCR

All cases of cancer and other specified tumors and precancerous diseases must be reported to the NJSCR within six months of diagnosis or within three months of the date of discharge from the reporting facility, whichever is sooner. (*Chapter 57A, Cancer Registry Reporting of Cancer; General Requirements, 8:57A-1.1 (b)*) Facilities are encouraged to submit to NJSCR on a monthly basis.

A health care facility that fails to report cases of cancer electronically, as required by regulation, within six months of the confirmed diagnosis shall be liable to pay a penalty as stated in N.J.S.A. 26:2-106. You may reference the NJSCR website <http://www.state.nj.us/health/ces/njscr.shtml> for the Statute, Regulations and Reportable List, or refer to Appendix C in this manual.

HOW TO REPORT TO THE NJSCR

A cancer registry abstract must be completed for each reportable case of malignancy, as well as certain benign and borderline conditions. A separate abstract must be completed for each malignancy and required benign or borderline condition. All abstracts from health care facilities must be submitted electronically in the latest NAACCR format. See Section IV: Instructions for Electronic Transmissions for detailed information on submitting to the NJSCR.

Cancer registry software is available free of charge for reporting cancer cases to the NJSCR electronically. NJSCR staff will assist in the installation of this software and provide training. Cancer registry software can be run on a free-standing computer, network or via the Internet. Available software is user-friendly and can assist your practice to meet your cancer reporting requirements. To obtain this software, please contact the NJSCR at 609-633-0500.

WHO REPORTS TO THE NJSCR

Health care facilities, physicians, dentists, independent clinical laboratories, ambulatory care facilities and other health care providers that diagnose or provide treatment for cancer patients must report cancer cases to the NJSCR.

When the distinction between a free-standing facility and hospital-based department cannot be made, such as a radiation therapy group practice versus a hospital unit, the ownership of the medical record should be used to determine who is responsible for reporting the case.

All abstracting work performed by a health care facility which diagnoses or treats 100 or more cases per year must be submitted electronically and abstracted by a Certified Tumor Registrar (CTR) who is certified by the National Cancer Registrars Association's Council on Certification. For more information on certification, visit www.ncra-usa.org.

METHODS OF REPORTING CHANGES, UPDATES, DELETIONS, AND FOLLOW-UPS TO THE NJSCR

Changes or updates to cases must be resubmitted electronically. Only changes to demographic information, diagnosis, staging, or treatment should be resubmitted in NAACCR Modified abstract format. Hospital registrars should contact their software vendors for information on creating NAACCR Modified records. Changes to date of last contact, recurrence, and other information is not to be resubmitted. It is important that you notify the NJSCR of any changes in your database so that the NJSCR can maintain an up-to-date registry.

METHODS TO RECEIVE FOLLOW-UP INFORMATION FROM THE NJSCR

Twice each year, in June and December, the NJSCR can provide hospitals with vital status and dates of last follow-up on cases submitted by their own facilities. Refer to [Section VII: Requesting Follow-up Information](#) for more information.

***The NJSCR
requires the
submission of
text information
to validate coded
data items***

NJSCR GUIDELINES FOR THE SUBMISSION OF TEXT INFORMATION

The NJSCR requires the submission of text information to validate coded data items. Text is used for quality control purposes to justify codes for various data items. Text is also used to identify errors, determine multiple primaries, and resolve discrepancies in data submitted on the same patient by multiple facilities. Refer to [Section III: Documenting Text](#) for detailed information of the submission of text to NJSCR.

CASE ASCERTAINMENT

Case ascertainment (case finding) is the system used to identify patients with reportable neoplasms. Case finding involves thorough, systematic monitoring of records maintained by various departments throughout the hospital. Multiple sources must be used to ensure complete reporting of all cases.

Case ascertainment sources include, but are not limited to:

- Admission and discharge documents
- Disease indices/discharge diagnosis lists
- Surgery schedules/logs
- Pathology and Cytology reports
- Hematology reports
- Autopsy reports
- Outpatient medical records/logs, including Radiation Oncology and Medical Oncology logs
- Radiology/Nuclear medicine documents
- Billing data

Records from all case finding sources should be screened for reportable diagnoses using the appropriate ICD case finding list. Beginning October 1, 2015, facilities should use the FY2016 ICD-10-CM Case Finding List. The current and previous versions of the ICD case finding list are available at <http://seer.cancer.gov/tools/casefinding/>.

For information on how to use ambiguous terminology for case ascertainment, refer to the SEER Program Coding and Staging Manual.

ELECTRONIC PATHOLOGY REPORTING

All health care facilities are encouraged to report electronic pathology reports to NJSCR in Health Level 7 (HL7) format. Electronic pathology reporting software (e-path) automates case finding of reportable cancer conditions in electronic pathology reports, saving the hospital the time and expense of a staff person to perform the manual tasks of case finding. The system also automates the process of entering demographic and diagnostic information into the cancer registry database, reducing staff time spent on data entry, preserving data integrity from source records, and improving data quality. The software also improves case finding completeness, which potentially reduces the need for NJSCR to conduct pathology audits of the reporting facility. Funding may be available from NCI/SEER that allows electronic pathology reporting software to be provided to hospitals free of charge. For more information about electronic pathology reporting, please call 609-633-0500. Training is available upon request to optimize the use of this software.

PATTERNS OF CARE (POC) STUDY

Each year, the NJSCR receives funding from NCI/SEER to participate in a nationwide study of cancer treatments. The Patterns of Care/Quality of Care Study is part of the National Cancer Institute's effort to document and verify types of treatment that patients are receiving for specific types of cancer in different geographic areas of the United States. Each year the study reviews different cancer sites. Each Fall, the NJSCR will notify reporting facilities of the cancer types to be included in the upcoming POC study. A list of selected cases to be re-abstracted by NJSCR staff will be sent to each hospital. The hospital is required to provide NJSCR representatives with access to the medical record for each selected patient. Access to these records can be provided by (in preferred order):

- Remote electronic access to hospital medical record system
- Sending the selected records via secure email ops.njscr@doh.state.nj.us
- Faxing the selected records to 609-633-7509
- Mailing the selected records (paper or on CD)
- Scheduling an on-site visit to review medical records at the facility

For more information about the NCI/SEER Patterns of Care studies, visit <http://appliedresearch.cancer.gov/poc/>.

OTHER SPECIAL STUDIES

Periodically, the NJSCR receives additional funding through NCI/SEER or other institutions to conduct special studies. These studies may require NJSCR staff to obtain or confirm information from the hospital medical record. The NJSCR will contact the hospital cancer registry to make arrangements for obtaining the necessary information.

A listing of special studies currently being conducted is available at http://www.nj.gov/health/ces/sp_studies.shtml.

RAPID CASE ASCERTAINMENT

Rapid Case Ascertainment (RCA) is used to enhance research by maximizing participation in population-based research, especially in rapidly fatal or debilitating disease (i.e., lung, ovary, pancreas) or highly mobile populations (i.e., younger, oldest, immigrants). By contacting individuals close to the time of their diagnosis recall bias is minimized, especially in issues surrounding diagnosis and treatment. At the Cancer Research Program, we use a two stage reporting mechanism for RCA. We visit facilities with high incidence to obtain the initial pathology report and identify the site, histology, patient identifiers, patient and provider contact information. These data are supplemented with more specific diagnosis and treatment information when the case is submitted to the Cancer Registry by normal reporting methods.

SECTION II: CODING INSTRUCTIONS

The following section includes coding instructions for selected data elements that are in addition to instructions in the manuals listed in Appendix B. The NJSCR Program Manual is not intended to be a comprehensive coding manual, but to highlight instructions of specific importance to the NJSCR. Refer to the current SEER Program Coding and Staging Manual for detailed instructions on coding each data element. The NJSCR Program Manual is intended to supplement, not replace, the SEER Manual.

Refer to Appendix D for a complete list of data items required to be submitted to the NJSCR.

Demographics

Social Security Number

The Social Security number is an important patient identifier. It allows the NJSCR to identify duplicate records and to match records from multiple reporting sources on the same patient. Record the Social Security number as it is reported in the medical record. Social Security number may be found in separate data sources such as the hospital billing system. Registrars should make every effort to obtain the patient's Social Security number.

If the medical record contains only a partial Social Security number (i.e., last 4 digits), record them with the remaining digits coded as 9's.

If a Social Security number is not available in any part of the medical record, including hospital billing system, code the Social Security number using 9's. You must also document the reason for no Social Security number in the abstract text. In the Remarks section of the abstract text document, write "No SSN –" followed by the reason. Acceptable reasons for no Social Security number include "patient refused," "undocumented resident," and "foreign resident." "Not available" is not an acceptable reason.

Date of Birth

If an exact date of birth is not available, estimate the year of birth using any available information about the patient (i.e., current age). Estimating a year of birth is preferable to using 9999. Document in the text of the abstract that the year of birth is an estimate, including any information you used in the estimation.

Race

Code race according to instructions in the SEER Program Coding and Staging Manual. Use the following sources to determine race:

- Patient's self-declared identification
- Medical record
- Face sheet
- Physician and nursing notes
- Photographs
- Any other available sources

Race is independent of ethnicity or Spanish origin. Do not code 98 (Other race) for a patient of Spanish ethnicity. **Code 01 (White) when there is a statement that the patient is Hispanic or Latino(a) and no further information is available.**

If race is unknown or not documented in the patient record and no other information is available, nationality may be used to code race. Refer to the [SEER Program Coding and Staging Manual Appendix D](#).

Spanish/Hispanic Origin (Ethnicity)

Coding Spanish/Hispanic Origin is **not** dependent on race. A person of Spanish descent may be white, black, or any other race.

Use all information to determine the Spanish/Hispanic Origin, including:

- The ethnicity stated in the medical record
- Hispanic origin stated on the death certificate
- Birthplace
- Information about life history and/or language spoken
- A last name or maiden name found on a list of Hispanic/Spanish names

When there is no documentation of Spanish origin in the patient record, but the patient has a Hispanic surname (last name or maiden name) assign code 7. Refer to Appendix E for a list of Hispanic surnames

Address at Diagnosis

Because only patients who were residents of New Jersey at the time of diagnosis are reportable to SEER by the NJSCR, it is important that the address at diagnosis be recorded accurately. Record the patient's residence when the tumor was first diagnosed. It should be noted the patient's address at diagnosis may be different than the patient's current address. The address should be the residence, not the mailing address. If the patient has multiple tumors, the address at diagnosis may be different for each subsequent primary. If the address is unknown, record UNKNOWN.

Special Notes About Address:

In general, use the address of the location where a person lives and sleeps **most** of the time, or the place the person says is his or her usual home. Please note that a patient's citizenship has no bearing on residency rules.

- A patient originally diagnosed in a foreign country may come to the United States for a second opinion and/or treatment. If possible, the patient's home address should be recorded. Do not record a temporary NJ residence, such as a friend's or relative's address.
- Use a street address if available when a P.O. Box is given. Post Office Box is not a reliable source to identify the residency at diagnosis; it does not provide accurate geographical information for analyzing cancer incidence.
- Homeless people and transients are examples of persons with no usual residence. Code the patient's residence at the time of diagnosis such as the shelter or the hospital where the diagnosis was confirmed.
- For "snowbirds", code the residence where the patient spends the majority of time (usual residence). If the usual residence is not known or the information is not available, code the residence the patient specifies at the time of diagnosis.
- For **armed forces military personnel** and their family members, code the address of the military installation or surrounding community as stated by the patient.
- For personnel assigned to **Navy, Coast Guard, and Maritime Ships**, the U.S. Census Bureau has detailed rules for determining residency. Refer to www.census.gov for detailed rules.
- Code the place of usual residence rather than the temporary address for:
 - Migrant workers
 - Educators temporarily assigned to a university in the SEER area
 - Persons temporarily residing with family during cancer treatment
 - Military personnel on **temporary** duty assignments (TDY)
 - **Boarding school** students below college level (code the parent's residence)
 - Code the residence where the student is living while attending **college**
 - Code the address of the institution for persons in institutions

Usual Occupation

Record the patient's usual occupation **regardless of whether the patient is currently employed or retired**. Usual occupation refers to the type of job the individual performed during most of his/her working life. If the patient was a housewife/house husband and did **NOT** work outside the home for most of her/his adult life, record housewife or house husband. If the patient is a student and has never been employed, record as "never worked." If no information is available record "unknown." This data item applies only to patients who are 14 years or older at the time of diagnosis.

Note: Please refer to the CDC's publication A Cancer Registrar's Guide to Collecting Industry and Occupation, available at <http://www.cdc.gov/cancer/npcr/registry/index.htm>.

Usual Industry

Record the type of activity carried on by the business/industry where the patient was employed for the longest time before diagnosis of this tumor (e.g., school, auto repair, food preparation). Try to distinguish among "manufacturing," "wholesale," "retail," and "service." If type of industry is unknown, record the name of company. If no information is available, code as unknown. **Do not record retired.**

Note: Please refer to the CDC's publication A Cancer Registrar's Guide to Collecting Industry and Occupation, available at <http://www.cdc.gov/cancer/npcr/registry/index.htm>.

Cancer Description

Date of Diagnosis

The date of diagnosis is the month, day and year the tumor was first diagnosed, clinically or microscopically, by a recognized medical practitioner. If date of diagnosis is unknown, **year of diagnosis must be known or estimated**. Leave the month and/or day blank when they cannot be estimated or are unknown; year of diagnosis **cannot be blank or unknown**.

Stage at Diagnosis

Stage at diagnosis must be reported for all cancers, where applicable. There are three staging schemas collected by NJSCR. Refer to the table below for which schemas are required for which diagnosis years:

	Collaborative Stage	SEER Summary Stage	TNM Stage
Cases diagnosed before 1/1/2015	Required	Recommended	Recommended
Cases diagnosed between 1/1/2015 and 12/31/2015	Required	Required	Recommended
Cases diagnosed 1/1/2016 and forward	Not required*	Required	Required

*Additional variables and Site-Specific Factors will be required, to be determined by national standard setting agencies. Please visit <http://www.nj.gov/health/ces/njsr.shtml> or speak to your facility's NJSCR representative for updates and more information.

SECTION III: DOCUMENTING TEXT

General Instructions

The NJSCR requires the submission of text information to validate coded data items. Text is used for quality control purposes to justify codes for various data items. Text is also used to identify errors, to determine multiple primaries and to resolve discrepancies in data submitted on the same patient by multiple facilities.

All cancer registry software must include specific fields, which have been designed to record text information. These fields are transmitted to the NJSCR along with the other required data fields when you make your monthly electronic submission. Please refer to the table in Appendix D, Table of Required Data Items, for the maximum number of characters per field. Please refer to Appendix F for a list of recommended abbreviations. Recording text information should include but not be limited to the following:

- Record text to support primary site, laterality, histology, grade, stage, and treatment codes.
- Record text to justify any unusual information about the case that could result in potential questions, e.g., record text to support unusual site/histology combinations, such as age/site combinations, gender/site combinations, name/gender combinations, pediatric age.
- Record text to clarify modifications or dates on the abstract.
- If limited information is available in the medical record about a case, utilize the text field to state that limited information was available in the medical record.
- Document dates as M/D/YY.

Text Documentation Instructions

Field	Length	Instructions	Text to Include
Text—DX Proc—PE	1000	Use this field to document information from the history and physical exam.	<ul style="list-style-type: none"> • Date of physical exam • Age, sex, race/ethnicity • History that relates to cancer diagnosis • Primary site • Histology (if diagnosis prior to this admission) • Palpable lymph nodes • Record positive and negative clinical findings. Record positive results first • Impression (when stated and pertains to cancer diagnosis) • Date of diagnosis
Text—DX Proc—X-ray/Scan	1000	Use this field to document information from all X-rays, scans, and/or other imaging examinations that provide information about diagnosis and	<ul style="list-style-type: none"> • Date(s) and type(s) of X-ray/Scan(s) • Primary site • Histology (if given) • Tumor location • Tumor size

Field	Length	Instructions	Text to Include
		staging.	<ul style="list-style-type: none"> • Lymph nodes • Record positive and negative clinical findings. Record positive results first • Distant disease or metastasis

RX Text—Other	1000	Use this field to document information regarding treatment that cannot be defined as surgery, radiation or systemic therapy. This includes experimental treatments and blinded clinical trials where the mechanism of the experimental drug is not known.	<ul style="list-style-type: none"> Date treatment was started Name of physician providing treatment Where treatment was given, e.g., at this facility, at another facility Type of other treatment, e.g., blinded clinical trial, hyperthermia Other treatment information, e.g., treatment cycle incomplete; unknown if other treatment was given
Text—Remarks	1000	Use this field to document coded information not documented in another field. May be used for overflow text from another field.	<ul style="list-style-type: none"> Smoking history Family and personal history of cancer Comorbidities Reason for unknown social security number Information on sequence numbers if a person was diagnosed with another primary out-of-state or before the registry's reference date Place of birth Justification of over-ride flags Information clarifying anything unusual such as reason for reporting a case seemingly not reportable for that facility or reason for coding numerous fields as "unknown."
Text—Place of	60	Use this field to document the	<ul style="list-style-type: none"> The complete name of the hospital or the physician office where

Field	Length	Instructions	Text to Include
Diagnosis		facility, physician office, city, state or country where the diagnosis was made.	diagnosis occurred. The initials of a hospital are not adequate. <ul style="list-style-type: none">• For out-of-state residents and facilities, include the city and the state where the medical facility is located.

SECTION IV: INSTRUCTIONS FOR ELECTRONIC SUBMISSION

All hospitals in New Jersey are required to submit data records electronically in an approved data format in the current NAACCR version. NJSCR also accepts electronic records from non-hospital sources and encourages non-hospital sources to submit electronically.

Files are to be of predetermined length and contain all current data fields. Individual vendors that supply cancer data base software are required to keep up with changes. Records must be sent as full abstract type records. Files' names must begin with the NJSCR-assigned three letters facility identifier. All files submitted electronically must be encrypted either at file level attached to email or be placed on secure encrypted email server. PGP and GPG Encryption software are the only approved encryption applications for encrypting individual files.

Secure email servers must be reviewed for security, ease of use and dependability by LAN administrator. Files that do not meet these criteria are rejected and facilities are requested to resubmit data.

The NJSCR requires all data submitted to the program be in latest NAACCR version of full abstract type, encrypted and sent electronically.

Hospitals must follow this process when transmitting data to NJSCR. All records must pass edits using the GenEDITS Plus software prior to submission. See [Section V: Quality Control](#) for more information on validating data using GenEDITS Plus.

1. Data files are sent to NJSCRDAT@doh.state.nj.us or are made available for download from a secure email server.
2. Files must be either encrypted with approved software or on an approved encrypted email server.
3. An email confirming receipt of the file and the number of cases submitted will be sent to the reporting facility within three (3) business days. This email receipt should be kept as proof of submission. If a receipt is not received within 3 business days, the reporting facility should contact the NJSCR.
4. The NJSCR will review the file for format, length and errors. NJSCR will reject any file that does not pass validation. The reporting facility is required to correct and resubmit the file.
5. Files that pass validation are accepted and imported into the NJSCR database.

For more information or questions regarding electronic submission, please contact the NJSCR at 609-633-0500.

SECTION V: QUALITY CONTROL

GENERAL

The NJSCR is expected to meet certain data quality criteria as a deliverable of funding from the CDC/NPCR and NCI/SEER. The North American Association of Central Cancer Registries (NAACCR) has also instituted certification metrics in order to ensure the completeness, accuracy, and timeliness of the data. The NJSCR strives to ensure the highest quality of its cancer data, relying on hospital cancer registries to submit quality, timely data. The data quality criteria and standards are outlined in the table below.

Table 5.1: Data Quality Criteria and Standards for Central Registries

Criteria	CDC/NPCR	NCI/SEER	NAACCR
Completeness	≥95%	≥98%	95%
Records Passing Edits	≥99%	100%	100%
Death Certificate Only	≤3.0%	<1.5%	≤3.0%
Duplicates per 1,000	≤1.0	n/a	≤1.0
Missing COD	n/a	<2.5%	n/a
Unknown/ill-defined Primary Site	n/a	<2.5%	n/a
Non-specific Histology	n/a	<2.5%	n/a
Unknown Laterality	n/a	<6.0%	n/a
Unknown Historic Stage	n/a	<10.0%	n/a
Records Missing Age	≤2.0%	n/a	≤2.0%
Records Missing Sex	≤2.0%	n/a	≤2.0%
Records Missing Race	≤3.0%	≤3.0%	≤3.0%
Records Missing County	≤2.0%	n/a	≤2.0%
Invalid/missing Census Tract	n/a	<2.0%	n/a
1 Year Reporting Delay	n/a	<2.5%	n/a
Follow-up age <20	n/a	≥90%	n/a
Follow-up age 20-64	n/a	≥90%	n/a
Follow-up age 65+	n/a	≥95%	n/a
Follow-up all in situs	n/a	≥90%	n/a

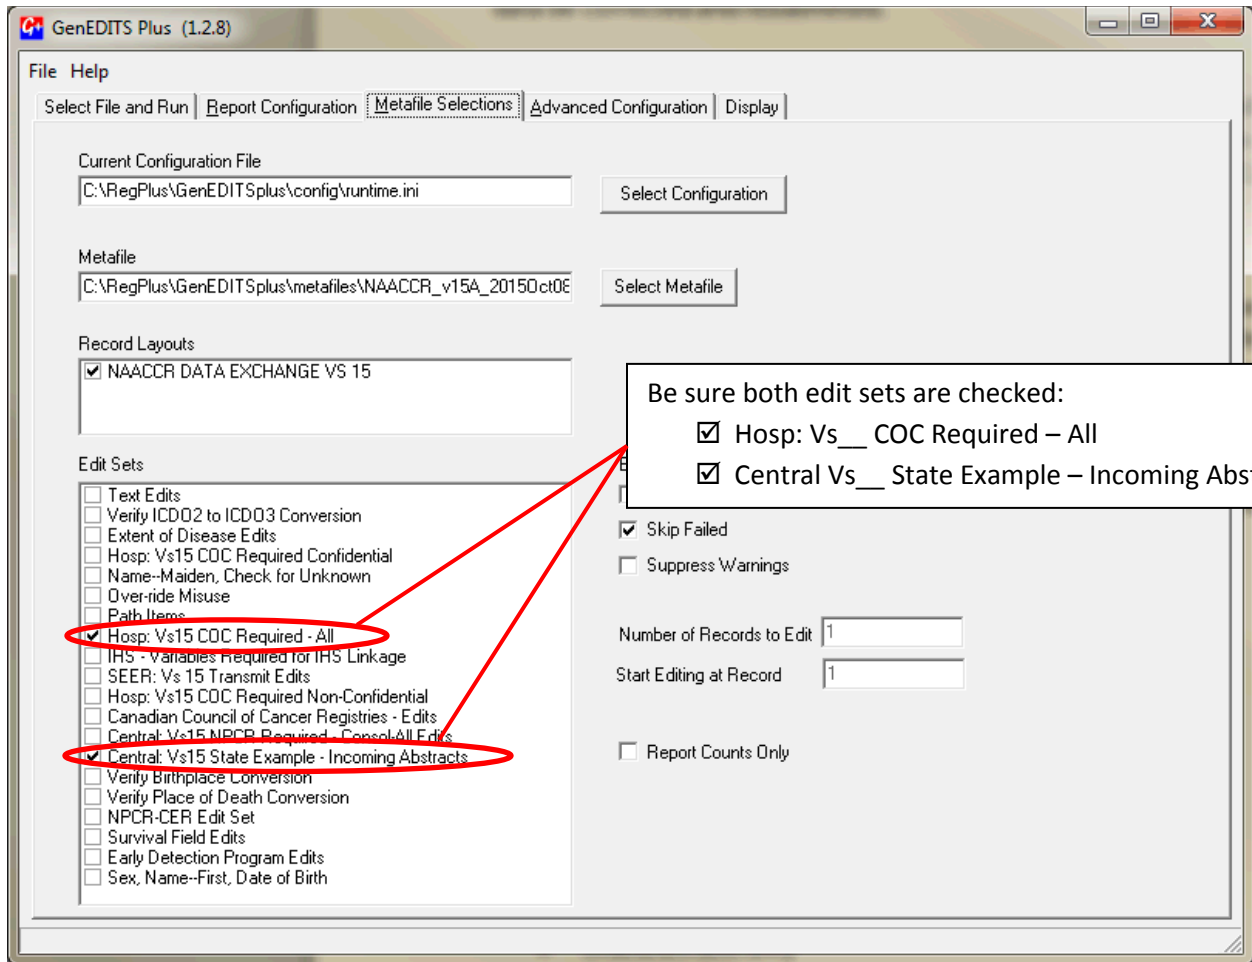

DATA VALIDATION

Prior to submitting cases to the NJSCR, all cases must pass proscribed edit checks. The GenEDITS Plus program, a free software available from the CDC that reads a data file, checks all of the records in it according to rules in a metafile, and reports the results. Steps for using GenEDITS Plus:

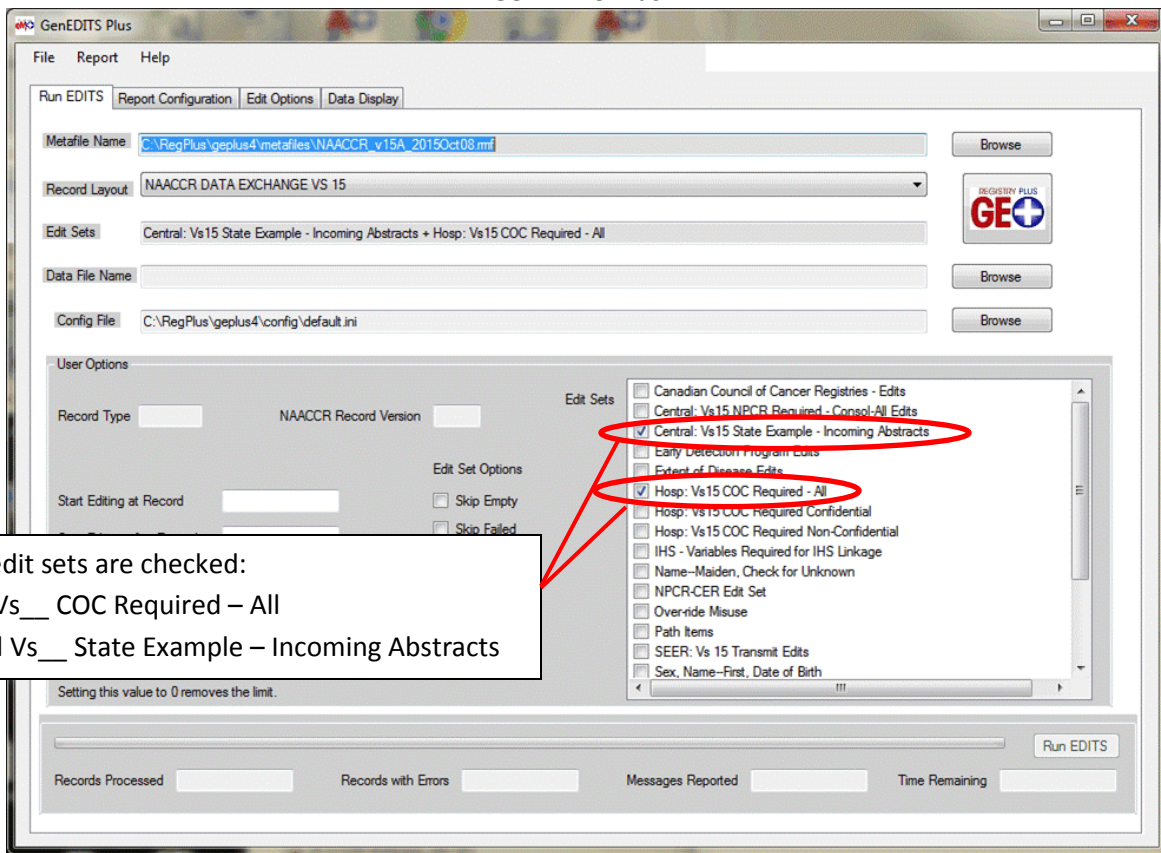

1. Download and install GenEDITS Plus from <http://www.cdc.gov/cancer/npcr/tools/edits/versionanddownload.htm>
2. Download and install the current NAACCR metafile and configuration file from <http://www.naacrr.org/StandardsandRegistryOperations/VolumeIV.aspx>
3. Export the submission file from the registry software database
4. Run the exported file through GenEDITS Plus using both the CoC and state edit sets (see below)
5. Fix any identified errors in the registry database
6. Repeat steps 3-5 until GenEDITS reports no errors

Proper GenEDITS Plus configuration:

GenEDITS Plus v1.2.8

GenEDITS Plus 4

Be sure both edit sets are checked:

- Hosp: Vs__ COC Required – All
- Central Vs__ State Example – Incoming Abstracts

VALIDATION BY NJSCR

When files are received by NJSCR they undergo inspection to validate the format. Files that do not pass validation are rejected by NJSCR. The reporting facility must correct and resubmit the file.

The NJSCR may identify additional errors within the data submitted by a facility and may request the data be corrected and resubmitted.

QUARTERLY HOSPITAL QUALITY AND COMPLETENESS REPORTS (QUACR)

The QuaCR is a document generated by NJSCR using cases submitted by each facility. The reports are sent to each facility four times a year. The final report, sent in July, is used to identify facilities eligible for the NJSCR Award for Excellence in Timely and Complete Cancer Case Reporting. The QuaCR assesses submitted cases in three areas:

Completeness

Completeness for each facility is calculated using a weighted five-year average. The weighted average gives more weight (importance) to more recent years and less weight to earlier years. This helps to account for real changes in volumes experienced by some facilities in recent years.

Timeliness

Timeliness is defined as the percentage of cases that are submitted to NJSCR within 6 months of the date of first contact. For example, a case with a date of first contact of February 12, 2015 must be submitted to NJSCR by August 31, 2015 in order to be counted as timely.

Quality

Quality is measured as adherence to ten quality benchmarks:

- Unknown Social Security number
- Unknown year of diagnosis
- Unknown/other race
- Unknown/other Hispanic ethnicity
- Unknown class of case
- Unknown gender
- Unknown/ill-defined primary site
- Unknown laterality
- Non-specific histology
- Unknown county at diagnosis

For more information on the QuaCR, please visit <http://www.nj.gov/health/ces/njscr.shtml>.

AWARD FOR EXCELLENCE IN TIMELY AND COMPLETE CANCER REPORTING

Beginning with accession year 2014, the New Jersey State Cancer Registry has developed new criteria for the Award for Excellence in Timely and Complete Cancer Reporting. Only hospitals that meet these criteria will be eligible for the Award. There will be three levels of awards: Gold, Silver and Bronze. Each level requires that the facility meet the benchmark for each of the three criteria categories: completeness, timeliness, and quality. The benchmarks are listed in Table 5.2.

Table 5.2: Award for Excellence Benchmarks

	Completeness	Timeliness	Quality
Bronze	90%	90%	**
Silver	95%	95%	**
Gold	98%	98%	**

**See Table 5.3

Table 5.3: Quality Measure Benchmarks

Measure	Bronze	Silver	Gold
Unknown Social Security Number	<3%	<2%	<1%
Unknown Year of Diagnosis	<1.5%	<1%	<0.5%
Unknown/Other Race (99, 98)	<5%	<4%	<3%
Unknown/Other Hispanic Ethnicity (9, 8)	<5%	<4%	<3%
Unknown Class of Case (99)	<1%	<0.5%	<0.1%
Unknown Gender	<3%	<2%	<1%
Unknown/Ill-defined Primary Site (C76, C80)	<2.5%	<2%	<1.5%
Unknown Laterality (9, 3)	<6%	<4%	<2%
Non-Specific Histology (8000, 8001)	<3%	<2.5%	<2%
Unknown County at Diagnosis	<3%	<2%	<1%

Awards will be given in October of each year. Recipients will be recognized at the annual meeting of the Oncology Registrars Association of New Jersey. In order to assist each facility in assessing its progress toward the benchmarks, NJSCR will provide each facility with a quarterly report of its completeness, timeliness and quality.

SECTION VI: AUDITS OF REPORTING COMPLETENESS

Each year, the NJSCR conducts audits of selected facilities. The goal of these audits is to ensure completeness of reporting and to identify any unreported cases. **Audits are not conducted in order to perform casefinding services for a facility.**

Facilities are selected for audit in August of each year based on estimates of completeness for the previous reporting year. Facilities with an estimated completeness between 75% and 90% will be selected for audit. Audits will follow the procedure outlined below.

1. Primary contact for the facility's cancer registry is notified by the NJSCR Audit Coordinator that an audit will take place.
2. The facility has 45 calendar days from the date of the letter to submit its discharge diagnosis list (a/k/a disease index) to NJSCR.
3. The index must be submitted electronically, in .csv or .xls format, via secure email, and must contain the following fields:
 - a. Last name
 - b. First name
 - c. Date of birth
 - d. Social Security number
 - e. Medical record number
 - f. Date of service/discharge
 - g. Diagnosis/procedure code
4. Within 14 calendar days of receipt of the disease index, NJSCR will provide the facility with a list of unreported cases.
5. The facility has 45 calendar days to review the list for reportability.
6. Cases that are not reportable will be removed from the list after validation by NJSCR. The facility may be required to provide documentation (i.e., pathology report, history and physical, discharge summary) of non-reportability.
7. The facility has 30 calendar days to submit the remaining unreported cases.
8. Once all outstanding cases have been received by NJSCR, the facility will be notified in writing that the audit has been completed satisfactorily.

Any facility that does not respond promptly and within the given time frame to requests for data during an audit or that does not submit all identified cases within thirty (30) days of notification will be issued a Notice of Violation and may be subject to assessment of penalty under N.J.A.C. 8:57A-1.12.

No facility will be audited for two consecutive diagnosis years. **A facility that does not achieve at least 90% completeness by July 1 for a year following an audit may be subject to assessment of penalty under N.J.A.C. 8:57A-1.12.**

SECTION VII: REQUESTING FOLLOW-UP DATA

The NJSCR will provide a follow up report, by request, to each New Jersey reporting facility two times per year. The purpose of the report is to assist cancer registries with maintaining current and accurate follow-up data.

New Jersey health care facilities may request a follow-up report in June and December each year.

One additional report will be provided for hospitals undergoing Commission on Cancer (CoC) hospital cancer program survey.

Hospitals requests will be honored in the order in which requests are received, though priority will be given to facilities with a scheduled CoC survey date.

To request a follow up report, email NJSCR with the following information:

- Name and contact information of the person requesting the report
- Name of the facility
- Reference date of the facility cancer registry
- Date the last follow -up report was received from NJSCR
- Date of CoC survey (if applicable)

Once the report is prepared, NJSCR will email the facility with instructions for retrieving the report from a secure website. The report will be available for two weeks and is designed to be imported into the facility's cancer registry database.

The report will include follow-up information on SEER reportable, analytic cases submitted by the facility. Data fields included in the report are the original values provided by the facility to NJSCR. Date of last contact and vital status will be updated with new values from NJSCR.

For more information on requesting and using the NJSCR follow up report, go to <http://www.nj.gov/health/ces/njscr.shtml>.

APPENDIX C – NEW JERSEY CANCER REGISTRY LEGISLATION AND REPORTING REQUIREMENTS

CHAPTER 57A

CANCER REGISTRY

Authority

N.J.S.A. 26:2-104 through 109, particularly 26:2-106b.

Source and Effective Date

R.2011 d.109, effective March 10, 2011.
See: 42 N.J.R. 2529(a), 43 N.J.R. 850(a).

Expiration Date

Chapter 57A, Cancer Registry, expires on March 10, 2016. [Extended to March 10, 2018. See: 43 N.J.R. 1203(a).]

Historical Note

Chapter 57A, Cancer Registry, was originally codified in Title 8, Chapter 57, as Subchapter 6, Cancer Registry. Subchapter 6 was adopted as R.1986 d.277, effective June 16, 1986. See: 17 N.J.R. 2836(b), 18 N.J.R. 1283(a).

Subchapter 6, Cancer Registry, was recodified as N.J.A.C. 8:57A by R.1990 d.242, effective May 21, 1990. See: 21 N.J.R. 3909(a), 22 N.J.R. 1596(a).

Pursuant to Executive Order No. 66(1978), Chapter 57A, Cancer Registry, was readopted as R.1995 d.241, effective April 12, 1995. See: 27 N.J.R. 629(a), 27 N.J.R. 1988(a).

Pursuant to Executive Order No. 66(1978), Chapter 57A, Cancer Registry, was readopted as R.2000 d.193, effective April 12, 2000. See: 32 N.J.R. 214(a), 32 N.J.R. 1790(a).

Chapter 57A, Cancer Registry, was readopted by R.2005 d.367, effective October 3, 2005. See: 37 N.J.R. 1666(a), 37 N.J.R. 4257(a).

Chapter 57A, Cancer Registry, was readopted as R.2011 d.109, effective March 10, 2011. As a part of R.2011 d.109, Appendices A through M were adopted as new rules, effective April 4, 2011. See: Source and Effective Date. See, also, section annotations.

CHAPTER TABLE OF CONTENTS

SUBCHAPTER 1. CANCER REGISTRY

8:57A-1.1	Purpose and scope
8:57A-1.2	Incorporated and referenced documents
8:57A-1.3	Definitions
8:57A-1.4	Reporting of cancer; general requirements
8:57A-1.5	Health care facility reporting

8:57A-1.6	Physician, dentist and other health care provider reporting
8:57A-1.7	Clinical laboratory reporting
8:57A-1.8	Health care insurer reporting
8:57A-1.9	Supplemental information
8:57A-1.10	Access to information and records
8:57A-1.11	List of reportable diseases and conditions
8:57A-1.12	Audit, letter and notice of violations and enforcement actions
8:57A-1.13	Civil monetary penalties
8:57A-1.14	Failure to pay a penalty; remedies
8:57A-1.15	Hearings
8:57A-1.16	Settlement of enforcement actions

SUBCHAPTER 1. CANCER REGISTRY

§ 8:57A-1.1 Purpose and scope

(a) The purpose of this subchapter is to:

1. Implement N.J.S.A. 26:2-104 through 109, which authorizes the Department of Health and Senior Services to establish and maintain the New Jersey State Cancer Registry (NJSCR) as the Statewide repository of records of cases of cancer and specified cases of tumorous or precancerous disease that occur in New Jersey;

2. Set forth standards for maintaining confidentiality of information submitted to the NJSCR; and

3. Set forth standards for the establishment, use and maintenance of the NJSCR.

(b) The purpose of the NJSCR is to:

1. Monitor cancer incidence and mortality trends in New Jersey;

2. Conduct epidemiologic surveys of cancer and cancer-related diseases in New Jersey; and

3. Assist physicians, researchers, public health officials, epidemiologists and health care facility administrative officers by providing data, subject to the confidentiality provisions established at N.J.A.C. 8:57A-10, to understand cancer, improve cancer treatment, increase survival, improve long-term quality of life for cancer patients and identify the most appropriate cancer prevention and control measures.

(c) This subchapter applies to:

1. All health care facilities, physicians, dentists and other health care providers that diagnose or treat cancer patients;

2. Clinical laboratories located in New Jersey that conduct hematology examinations or examine tissue specimens that are positive for the existence of cancer or

other specified tumorous and precancerous disease; and

3. All health care insurers and other third-party health care payers providing benefit plans to residents of New Jersey that are cancer patients.

§ 8:57A-1.2 Incorporated and referenced documents

(a) The Department incorporates by reference, as amended and supplemented, the following documents in this subchapter:

1. The e-path Reporting Site Information Checklist (based on the National Cancer Institute's Surveillance Epidemiology End Results (SEER) Program Case Finding List, effective January 2010), developed by the Artificial Intelligence in Medicine Incorporated, 2 Berkeley Street, Suite 403, Toronto, Ontario, Canada M5A 2W3, which will be used by pathology laboratories to send site information in order to implement electronic cancer case-finding and pathology data gathering for the NJSCR and is available through request to the NJSCR;

2. The SEER Program Code Manual 2007, developed by the Surveillance Epidemiology and End Results (SEER) Program of the National Cancer Institute, Division of Cancer Control and Population Sciences, Surveillance Research Program, Cancer Statistics Branch/SEER Program, 6116 Executive Boulevard, Suite 504, MSC 8316, Bethesda, MD 20892-8316, Telephone: (301) 496-8510, which is used for abstracting and coding cancer data and is available online at: <http://seer.cancer.gov>;

3. The NAACCR Data Standards for Cancer Registries - Data Standards and Data Dictionary (Volume II - Version 12), developed by the North American Association of Central Cancer Registries (NAACCR), Executive Office, 2121 West White Oaks Drive, Suite B, Springfield, IL 62704-6495, Telephone: (217) 698-0800, which is used by health care facilities, physicians, dentists and other health care providers to electronically submit data to the NJSCR and is available online at: <http://www.naacccr.org/StandardsandRegistryOperations/VolumeII.aspx>; and

4. The NAACCR Standards for Cancer Registries Volume V: Pathology Laboratory Electronic Reporting, Version 2.1 (effective January 1, 2008), developed by the North American Association of Central Cancer Registries (NAACCR), Executive Office, 2121 West White Oaks Drive, Suite B, Springfield, IL 62704-6495, Telephone: (217) 698-0800, which sets forth the Health Level 7 (HL-7) Version 2.3.1 standard protocol that independent or hospital-based clinical laboratories must use if they chose to make reports to the Department electronically and is available online at: <http://www.naacccr.org/StandardsandRegistryOperations/VolumeII.aspx>.

(b) The Department references the following documents as guidance in this subchapter:

1. The NJSCR Manual: Instructions For Health Care Facilities written and published by the New Jersey Department of Health and Senior Services, Cancer Epidemiology Services to provide guidance to health care facilities on the electronic transmission of data to the Department and to provide information from Federal programs that establish standards for cancer registries and which is available online at: http://nj.gov/health/ces/cancer_reporting_hos.shtml; and

2. The NJSCR Abstract Instruction Manual For Physicians, Ambulatory Care Centers and Radiation Treatment Facilities 2008 written and published by the New Jersey Department of Health and Senior Services, Cancer Epidemiology Services to provide guidance to physicians, ambulatory care centers (ACCs) and radiation treatment facilities (RTFs) on the electronic or written transmission of data to the Department and which is available online at: http://nj.gov/health/ces/cancer_reporting_phy.shtml.

(c) The Department incorporates by reference the following forms in this subchapter:

1. The Radiation Therapy Facility Report Form (N.J.A.C. 8:57A Appendix A), which is a form required of radiation facilities to report radiotherapy treatment information for cases of cancer to the NJSCR;

2. The Ambulatory Surgery Center Report Form (N.J.A.C. 8:57A Appendix B), which is a form required of ambulatory care centers to report surgical cancer diagnosis and cancer treatment to the NJSCR;

3. The Physician Report Form (N.J.A.C. 8:57A Appendix C), which is a form required of physicians to report information on cancer diagnosis or treatment at their respective practices to the NJSCR;

4. The Dentist Report Form (N.J.A.C. 8:57A Appendix D), which is a form required of dentists to report information on non-hospitalized cases of cancer to the NJSCR;

5. The Laboratory Report Form (N.J.A.C. 8:57A Appendix E), which is a form required of laboratories to report cancer diagnoses to the NJSCR;

6. The Hospice Program Report Form (N.J.A.C. 8:57A Appendix F), which is a form required of hospice providers to report patients diagnosed with cancer to the NJSCR;

7. The Hematology/Oncology Physician Report (N.J.A.C. 8:57A Appendix G), which is a form required of physicians to report information on cases of

hematopoietic cancer to the NJSCR;

8. The Hematology/Oncology Information Request (N.J.A.C. 8:57A Appendix H), which is a form that physicians shall use to report information about their practice to the NJSCR, upon request;

9. The Cancer Registry Survey (N.J.A.C. 8:57A Appendix I), which is a form required of physicians, dentists, or health care providers to report information on their practice when they report cases of cancer to the NJSCR the first time or if they have just opened their practice in New Jersey;

10. The Diagnostic Laboratory Information Request form (N.J.A.C. 8:57A Appendix J), which is a form that clinical laboratories located in New Jersey shall use to report information about their laboratory to the NJSCR, upon request, and to request software in order to implement electronic cancer case-finding and pathology data gathering for the NJSCR;

11. The Rocky Mountain Cancer Data Software (RMCDs) Information Request (N.J.A.C. 8:57A Appendix K), which is a form required of health care facilities and providers if they choose to apply for a no-cost software program to report information on cases of cancer electronically to the NJSCR;

12. The Death Certificate Follow-Back Form (N.J.A.C. 8:57A Appendix L), which is a form used to obtain information on New Jersey residents who died with a cancer diagnosis and is only required when the NJSCR determines that there is a need for more information on a specific cancer case, which is based on cancer related cause of death information from the death certificate;

i. If the NJSCR determines that more information is needed, NJSCR staff will mail the appropriate form to the physician or health care facility; and

13. The NJSCR Follow-Back Physician Form (N.J.A.C. 8:57A Appendix M), which is a form used to obtain information on living patients with a cancer diagnosis and is only required when the NJSCR receives insufficient information and needs further details in order to complete abstraction of the case.

i. If the NJSCR determines that more information is needed, NJSCR staff will mail the appropriate form to the physician.

(d) All of the forms in (c) above are available by written request to the NJSCR mailing address.

1. The forms in (c)1 through 13 above are available online through the NJSCR webpage or the Department's Forms webpage at <http://web.doh.state.nj.us/forms/>.

§ 8:57A-1.3 Definitions

The following words and terms, when used in this chapter, shall have the following meanings, unless the context clearly indicates otherwise:

"Administrative officer" means a person at a health care facility assigned with the responsibility of ensuring that reports of every case of cancer at the health care facility are made to the Department pursuant to the reporting requirements of this chapter.

"Commissioner" means the Commissioner of the New Jersey Department of Health and Senior Services, or his or her designee.

"Department" means the New Jersey Department of Health and Senior Services.

"Health care facility" means a facility as defined at N.J.S.A. 26:2H-1 et seq., as amended and supplemented.

"Health care provider" means a health care professional who is directly involved in the provision of health care services and whose practice is regulated pursuant to Title 45 of the New Jersey Statutes and State professional board rules, who in the course and scope of work duties, independently or under the supervision of the appropriate authority, diagnoses or treats patients with cancer or other specified tumorous and precancerous diseases as set forth at N.J.A.C. 8:57A-1.11.

1. Health care provider includes physicians and dentists.

"NJSCR" means the New Jersey State Cancer Registry established by the Department pursuant to this chapter and the authority of N.J.S.A. 26:2-104 et seq.

"NJSCR mailing address" means the mailing address of the New Jersey State Cancer Registry, which is: Cancer Epidemiology Services, New Jersey State Cancer Registry, New Jersey Department of Health and Senior Services, PO Box 369, Trenton, New Jersey 08625-0369.

"NJSCR webpage" means the webpage of the New Jersey State Cancer Registry available at www.state.nj.us/health/ces/index.shtml.

§ 8:57A-1.4 Reporting of cancer; general requirements

(a) Every New Jersey health care facility, physician, dentist, other health care provider and independent clinical laboratory shall report all cases of cancer and other specified tumorous and precancerous diseases to the Department in accordance with the list of reportable diseases and conditions established at N.J.A.C. 8:57A-

1.11.

(b) Every New Jersey health care facility, physician, dentist, other health care provider and independent clinical laboratory shall submit all case reports within six months of the date of diagnosis or within three months of the date of discharge from the reporting facility, whichever is sooner.

(c) Every New Jersey health care facility shall submit follow-up reports on each cancer case, as requested by the Department, to confirm the patient's vital status until the patient's death.

(d) Every New Jersey health care facility, physician, dentist and other health care provider shall use the SEER Program Code Manual 2007 when abstracting and coding cancer data.

(e) If health care facilities and physicians choose to apply for a no-cost software program, which would be used to report information on cases of cancer electronically to the NJSCR, they shall use the Rocky Mountain Cancer Data Software Information Request, available at N.J.A.C. 8:57A Appendix K.

§ 8:57A-1.5 Health care facility reporting

(a) The administrative officer of every health care facility shall report to the Department every case of cancer or other specified tumorous and precancerous disease when it is initially diagnosed or when the patient is first admitted or treated for any reason in that facility.

1. The administrative officer of the health care facility shall also submit to the Department a report for each subsequent primary cancer diagnosed in that patient.

(b) A certified tumor registrar shall perform all abstracting work from a health care facility that diagnoses or treats 100 or more cancer cases per year.

1. The certified tumor registrar shall be certified by the National Cancer Registrars Association's Council on Certification, 1340 Braddock Place, Suite 203, Alexandria, VA 22314, <http://www.ctrexam.org>, telephone: (703) 299-6640; telefacsimile: (703) 299-6620, e-mail: ctrexam@ncra-usa.org;

2. The certified tumor registrar shall be either employed by the health care facility or employed by an abstract-coding service under contract by the health care facility; and

3. The health care facility shall have until August 3, 2000 to comply with the provisions of (b) above.

(c) The information to be reported, as set forth in (a)

above, shall:

1. Be submitted electronically using the NAACCR Data Standards for Cancer Registries - Data Standards and Data Dictionary (Volume II - Version 12); and

2. Include patient identifying information, medical history, cancer treatment and cancer stage at diagnosis.

(d) Health care facilities may use the NJSCR Manual: Instructions For Health Care Facilities for guidance in abstracting.

(e) Health care facilities that lack adequate internal capabilities to report cases in accordance with the requirements of (b) and (c) above shall contract with the Department to provide abstracting services.

(f) The Department shall charge a fee, based upon the fair market value of services, to health care facilities for the provision of services set forth at (e) above.

(g) A health care facility which fails to comply with the provisions of this subchapter shall be liable for a penalty of up to \$ 500.00 per unreported case of cancer or other specified tumorous and precancerous disease.

(h) A health care facility, which fails to report cases of cancer or other specified tumorous and precancerous diseases electronically shall be liable for a penalty not to exceed \$ 1,000 per business day.

§ 8:57A-1.6 Physician, dentist and other health care provider reporting

(a) Every physician, dentist or other health care provider who diagnoses or provides treatment for cancer patients shall report to the Department an initial diagnosis of each case of cancer or other specified tumorous and precancerous disease not referred to or previously diagnosed in a health care facility in the State of New Jersey.

1. The physician, dentist or health care provider shall also submit to the Department a report for each subsequent primary cancer diagnosed in that individual.

(b) The information to be reported in (a) above shall:

1. Be submitted electronically using the NAACCR Data Standards for Cancer Registries - Data Standards and Data Dictionary (Volume II - Version 12); or

2. Be submitted using the following forms:

i. Physicians shall use the Physician Report Form, available at N.J.A.C. 8:57A Appendix C;

ii. Dentists shall use the Dentist Report Form, available at N.J.A.C. 8:57A Appendix D; and

iii. Other health care providers shall use the forms set forth at N.J.A.C. 8:57A-1.2(c) 1 and 2 and 6 and 7, as appropriate for the type of health care provider; and

3. Include patient identifying information, medical history, cancer treatment and cancer stage.

(c) The physician, dentist or health care provider shall report information on their practice when they report cases of cancer to the NJSCR the first time or if they have just opened their practice in New Jersey using the Cancer Registry Survey, available at N.J.A.C. 8:57A Appendix I.

i. If applicable, physicians shall use the Hematology/Oncology Information Request, available at N.J.A.C. 8:57A Appendix H, to provide information to the Department upon request.

(d) The physician, dentist or other health care provider may use the NJSCR Abstract Instruction Manual For Physicians, Ambulatory Care Centers and Radiation Treatment Facilities 2008 as guidance when reporting.

(e) A physician, dentist, or other health care provider who fails to comply with the provisions of this subchapter shall be liable for a penalty of up to \$ 500.00 per unreported case of cancer or other specified tumorous and precancerous disease.

§ 8:57A-1.7 Clinical laboratory reporting

(a) The director of every independent or hospital-based clinical laboratory shall report to the Department the results of examinations of tissue specimens and/or hematology examinations that are positive for the existence of cancer or other specified tumorous and precancerous disease not previously reported from that laboratory.

(b) The information to be reported shall:

1. Be submitted using the Laboratory Report Form, available at N.J.A.C. 8:57A Appendix E; and

2. Include all available patient identifying information, the tissue examined and the results of the pathologic examination, and the name, address and/or telephone number of the referring physician.

(c) The director of the independent or hospital-based clinical laboratory may submit the reports electronically in accordance with:

1. The e-path Reporting Site Information Checklist; and

2. The HL-7 standard protocol set forth in the NAACR Standards for Cancer Registries Volume V: Pathology Laboratory Electronic Reporting, Version 2.1.

(d) The director of the independent or hospital-based clinical laboratory shall use the Diagnostic Laboratory Information Request Form, available at N.J.A.C. 8:57A Appendix J, to report information about the laboratory to the NJSCR, upon request, and to request software in order to implement electronic cancer case-finding and pathology data gathering for the NJSCR.

(e) A hospital-based clinical laboratory, which fails to comply with the provisions of this subchapter shall be liable for a penalty of up to \$ 500.00 per unreported case of cancer or other specified tumorous and precancerous disease.

§ 8:57A-1.8 Health care insurer reporting

(a) Health care insurers and other third-party health care payers providing benefit plans to residents of the State shall report to the Department information on cases of cancer or other specified tumorous and precancerous diseases based upon selection criteria, established at N.J.A.C. 8:57A-1.11, upon request of the Department.

(b) The information shall:

1. Be submitted electronically in the format specified by the Department in the request set forth in (a) above; and

2. Include patient identifying information and medical information, including but not limited to, medical history, cancer treatment, cancer stage at diagnosis information and co-morbid conditions.

§ 8:57A-1.9 Supplemental information

(a) Every New Jersey health care facility, physician, dentist, other health care provider and independent clinical laboratory shall supply information necessary to clarify medical or demographic data upon request of the Department.

1. This supplemental information shall include, but not be limited to: copies of pathology and/or hematology reports, operative reports, treatment information, history and physical sections of the medical records and discharge summaries.

(b) If the NJSCR determines that more information is needed, NJSCR staff will mail one of the following forms, as appropriate, to the physician or health care facility:

1. The Death Certificate Follow-Back Report form,

available at N.J.A.C. 8:57A Appendix L; or

2. The NJSCR Follow-Back Physician Form, available at N.J.A.C. 8:57A Appendix M.

§ 8:57A-1.10 Access to information and records

(a) Every health care facility, independent clinical laboratory, physician, dentist or other health care provider who diagnoses or provides treatment for cancer patients and health care insurers and other third-party health care payers providing benefit plans to residents of the State shall allow representatives of the Department, or its designee, to obtain information from all medical, pathological and other pertinent records and logs related to cancer cases, as necessary for fulfilling the functions of the NJSCR.

(b) Every health care facility, independent clinical laboratory, physician, dentist or other health care provider who diagnoses or provides treatment for cancer patients and health care insurers and other third-party health care payers providing benefit plans to residents of the State shall permit representatives of the Department access to information or provide necessary information on specified cancer patients and other patients specified by characteristics for research studies related to cancer etiology, prevention and control, which are conducted by the Department subject to the following:

1. The Department's designated Institutional Review Board shall:

i. Review the studies to assure protection of human subjects; and

ii. Approve or disapprove the studies, as appropriate, based on the outcome of the review.

2. This access or provision of information shall include patients who came under the care of the health care facility, physician, dentist or other health care provider prior to November 18, 1977.

(c) Representatives of the Department shall:

1. Provide advance notice to the health care facility, physician, dentist or other health care provider, independent clinical laboratory, health care insurer or other third-party health care payer in order to access patient records of cancer patients pursuant to (a) and (b) above; and

2. Present valid identification at the time of access, including, but not limited to, Department or designee issued identification, if on-site access to patient records is necessary.

(d) Only the Department and such other agencies as may be designated by the Commissioner shall use the reports made pursuant to this subchapter.

1. These reports shall not be:

i. Otherwise divulged or made public; or

ii. Subject to public inspection and copying pursuant to the Open Public Records Act, N.J.S.A. 47:1A-1 et seq.

(e) No individual or organization providing information to the Department in accordance with this subchapter shall be deemed to be, or held liable for, divulging confidential information.

(f) The Department shall not make public any information reported to the NJSCR that discloses the identity of any person to whom the information relates.

1. The Department will refer individuals wishing to confirm the inclusion of their medical information in the NJSCR to their health care provider or treating health care facility.

(g) The Department shall report all violations of (c) above by any individual or organization to the appropriate professional licensing authorities and public financing programs.

(h) Failure to permit access to information and records to representatives of the Department shall be cause for legal action.

§ 8:57A-1.11 List of reportable diseases and conditions

(a) If a diagnosis includes any of the following words, every New Jersey health care facility, physician, dentist, other health care provider or independent clinical laboratory shall report the case to the Department in accordance with the provisions of this subchapter:

Cancer;
Carcinoma;
Leukemia;
Lymphoma;
Malignant; and/or
Sarcoma.

(b) Every New Jersey health care facility, physician, dentist, other health care provider or independent clinical laboratory shall report any case having a diagnosis listed at (g) below and which contains any of the following terms in the final diagnosis to the Department in accordance with the provisions of this subchapter:

Apparent(ly);

Appears;
Compatible/Compatible with;
Consistent with;
Favors;
Malignant appearing;
Most likely;
Presumed;
Probable;
Suspect(ed);
Suspicious (for); and/or
Typical (of).

(c) Basal cell carcinomas of the skin shall not be reported to the Department, except when they are diagnosed in the labia, clitoris, vulva, prepuce, penis or scrotum.

(d) Carcinoma *in situ* of the cervix and/or cervical squamous intraepithelial neoplasia III (CIN III) shall not be reported to the Department.

(e) Insofar as soft tissue tumors can arise in almost any body site, the primary site of the soft tissue tumor shall also be examined for any questionable neoplasm.

(f) If any uncertainty regarding the reporting of a particular case exists, the health care facility, physician, dentist, other health care provider or independent clinical laboratory shall contact the Department for guidance at (609) 588-3500 or view information on the following website <http://www.nj.gov/health/ces/njsr.shtml>.

(g) Every New Jersey health care facility, physician, dentist, other health care provider or independent clinical laboratory shall report the following conditions to the Department in accordance with the provisions of this subchapter:

ADRENAL

Adrenal cortical carcinoma
Ganglioneuroblastoma
Neuroblastoma
Neuroendocrine carcinoma
Neuroepithelioma
Paranglioma (+)
Pheochromocytoma, malignant only
Sympathicoblastoma

ANUS (see G-I tract)

APPENDIX (see G-I tract)

BILE DUCTS (see gall bladder and bile ducts)

BLOOD (see Hematopoietic/Lymphoid)

BLOOD VESSELS (see soft tissues)

BONE AND JOINTS

Adamantinoma
Ameloblastoma, malignant
Angioblastoma (+)
Angiosarcoma
Chondrosarcoma
Chordoma
Ewing's Sarcoma
Fibrosarcoma (medullary, periosteal, central, endosteal)
Giant cell tumor of bone (+)
Giant cell tumor, malignant
Hemangioendothelioma, malignant
Mesenchymal chondrosarcoma
Myeloma
Osteoclastoma (+)
Osteogenic Sarcoma
Osteosarcoma
Parosteal osteoma
Plasmacytoma

BONE MARROW (see Hematopoietic/Lymphoid)

BRAIN, SPINAL CORD, CRANIAL NERVES, MENINGES, AND CENTRAL NERVOUS SYSTEM

Acoustic neuroma (O)
Angiolipoma (O)
Angiomatous meningioma (O)
Astroblastoma
Astrocytoma, any type
Atypical choroid plexus papiloma (+)
Atypical lipoma (+)
Atypical meningioma (+)
Capillary hemangioma (O)
Cavernous hemangioma (O)
Central neurocytoma (+)
Chordoid glioma (+)
Choroid plexus papilloma, malignant
Choroid plexus papilloma (O)
Clear cell meningioma (+)
Dermoid cyst (O)
Demoplastic infantile astrocytoma (+)
Diffuse melanocytosis (O)
Dysembryoplastic neuroepithelial tumor (O)
Dyplastic gangliocytoma of cerebellum (O)
(Lhermitte-Duclos)
Ependymoblastoma
Ependymoma
Fibrolipoma (O)
Fibroma (O)
Fibrous meningioma (O)
Gangliocytoma (O)
Ganglioglioma (+)
Ganglioneuroblastoma
Ganglioneuroma (O)
Germinoma
Glioblastoma multiforme
Gliofibroma (+)
Glioma, all types
Gliomatosis cerebri (+)

Hemangioblastoma (+)
 Hemangioendothelioma, benign (O)
 Hemangioendothelioma (+)
 Hemangioma (O)
 Hemangiopericytoma, benign (O)
 Hemangiopericytoma (+)
 Hemangiopericytoma, malignant
 Leiomyoma (O)
 Leiomyomatosis (+)
 Lipoma (O)
 Medulloblastoma
 Medulloepithelioma
 Melanotic neurofibroma (O)
 Meningeal melanocytoma (+)
 Meningioma, malignant
 Meningioma (O)
 Meningiomatosis (+)
 Meningiotheliomatous meningioma (O)
 Meningiothelial meningioma (O)
 Myxopapillary ependymoma (+)
 Neoplasm, benign (O)
 Neoplasm, uncertain whether benign or malignant (+)
 Neurilemoma (O)
 Neurinomatosis (+)
 Neuroblastoma
 Neurofibroma (O)
 Neurofibromatosis (+)
 Neuroma (O)
 Neurothekeoma (O)
 Oligodendrocytoma or Oligodendroblastoma
 Oligodendroglioma
 Papillary meningioma
 Paraganglioma (+)
 Perineurioma (O)
 Pinealoma
 Pineal teratoma, malignant
 Pineoblastoma
 Pineocytoma
 Plexiform neurofibroma (O)
 Polarespongioblastoma
 Psammomatous meningioma (O)
 Rhabdomyoma (O)
 Schwannoma (any)
 Smooth muscle tumor (+)
 Soft tissue tumor, benign (O)
 Solitary fibrous tumor (O)
 Spongioblastoma
 Subependymal astrocytoma
 Subependymal giant cell astrocytoma (+)
 Supependymoma (+)
 Teratoma, benign (O)
 Teratoma (+)
 Transitional meningioma (O)
 Tumor cells, benign (O)
 Tumor cells, malignant
 Venous hemangioma (O)

BREAST

Adenocarcinoma

Apocrine carcinoma
 Colloid carcinoma
 Comedocarcinoma
 Cribriform carcinoma
 Cystosarcoma phyllodes, malignant only
 Ductal carcinoma, in situ
 Fibroadenoma, malignant only
 Glycogen rich carcinoma
 Infiltrating carcinoma of the breast such as:
 Carcinoma, NOS
 Duct adenocarcinoma
 Duct and lobular
 Duct carcinoma
 Duct and Paget's disease
 Ductular
 Lobular
 Lipid-rich carcinoma
 Lobular carcinoma, in situ
 Lobular and intraductal, in situ
 Lobular neoplasia
 Medullary carcinoma
 Papillary carcinoma, in situ
 Paget's disease
 Phyllodes tumor, malignant
 Stromal sarcoma of breast
 Tubular carcinoma

BRONCHUS (see lung)

CERVIX (see uterus)

COLON (see G-I tract)

EAR (see skin, soft tissue)

ENDOMETRIUM (see uterus)

ESOPHAGUS (see G-I tract)

EYE

Epidermoid carcinoma
 Melanoma, malignant
 Retinoblastoma
 Squamous cell carcinoma
 Squamous cell epithelioma
 (Tumors of the orbit:
 See soft tissues and Hematopoietic/Lymphoid)

EXTRA-ADRENAL PARAGANGLIA (see adrenal)

FALLOPIAN TUBE (see uterus)

GALL BLADDER AND BILE DUCTS

Adenocarcinoma
 Carcinoma (other)

GASTRO-INTESTINAL TRACT

(esophagus, stomach, intestine, appendix, colon, anus)

Adenoacanthoma
 Adenocarcinoma
 Adenoidcystic carcinoma
 (Adeno) carcinoma in Adenomatous polyp with or without invasion of stalk
 Adenosarcoma
 Anal intraepithelial neoplasia (AIN III)
 Apudoma (+)
 Argentaffinoma (+)
 Bowen's disease of anus
 Carcinoid (except benign—e.g. appendix)
 Carcinosarcoma
 Cloacogenic carcinoma
 Epidermoid carcinoma
 Gastrinoma (+)
 Immunoproliferative disease, small intestinal
 Kaposi's Sarcoma
 Leiomyosarcoma, malignant only
 Linitis plastica
 Lymphoma
 Mixed tumor of esophagus, malignant only
 Neuroendocrine carcinoma
 Paget's disease of anus
 Polypoid adenoma, malignant only
 Signet ring cell carcinoma
 Squamous cell carcinoma
 Squamous cell epithelioma
 Transitional cell carcinoma

HEMATOPOIETIC/LYMPHOID

(Including blood, bone marrow, lymph nodes, spleen and tumors of hematopoietic or lymphoid histogenesis found in other sites.)

Acute erythremic myelosis
 Acute megakaryocytic myelosis
 Blastic plasmacytoid dendritic cell neoplasm
 Chronic lymphoproliferative disorder of NK cells
 Dendritic cell sarcoma
 DiGuglielmo syndrome
 Erythroleukemia
 Essential thrombocythemia
 Extracranial plasmacytoma
 Fibroblastic reticular cell tumor
 Heavy chain disease, all such as:
 Alpha
 Gamma (Franklin's Disease)
 Mu
 Not otherwise specified
 Histiocytic medullary reticulosis
 Histiocytosis, malignant
 Histiocytosis-X, malignant only
 Hodgkin's Disease, all such as:
 Histiocyte predominant
 Lymphocyte depleted
 Lymphocyte predominant
 Mixed cellularity
 Nodular sclerosing
 Hypereosinophilic syndrome
 Idiopathic thrombocythemia

Immunoproliferative Disease, NOS
 Letterer-Siwe's Disease
 Leukemia, all
 Leukemic reticuloendotheliosis
 Lymphoid neoplasm
 Lymphoma, all
 Lymphosarcoma
 Lymphoreticular process, malignant
 Megakaryocytosis, malignant
 Multiple myeloma
 Mycosis fungoides
 Myelodysplastic neoplasm, unclassifiable
 Myelodysplastic syndrome
 Myelofibrosis with myeloid metaplasia, malignant only
 Myeloid neoplasm
 Myeloma
 Myeloproliferative disease (+)
 Myelosclerosis
 Panmyelosis, acute
 Primary myelofibrosis
 Polycythemia Vera
 Refractory anemia
 Refractory neutropenia
 Refractory thrombocytopenia
 Reticulosis, malignant
 Reticulum cell sarcoma/tumor
 Sezary's disease or syndrome
 Systemic mastocytosis
 Therapy related myelodysplastic syndrome
 Waldenstrom's macroglobulinemia or syndrome

HYPOPHARYNX (see oral cavity)

KIDNEY

Adenocarcinoma
 Adenomyosarcoma

Pilomatrix carcinoma
Superficial spreading melanoma
Sweat gland carcinoma

SOFT TISSUE (including retroperitoneum, peripheral nerve)

Alveolar rhabdomyosarcoma
Alveolar soft parts sarcoma
Angiofibrosarcoma
Angiosarcoma
Angiomyxoma (+)
Chondrosarcoma
Clear cell sarcoma of tendons
Dermatofibrosarcoma protuberans
Embryonal rhabdomyosarcoma
Fibromyxosarcoma
Fibrosarcoma
Fibrous histiocytoma, malignant
Granular cell tumor, malignant
Hemangioendothelial sarcoma
Hemangioendothelioma, malignant only
Hemangiopericytoma, malignant only
Juvenile rhabdomyosarcoma
Kaposi's sarcoma
Leiomyosarcoma
Liposarcoma
Lymphangioendothelioma, malignant
Lymphangiosarcoma
Mesenchymoma, malignant
Metastasizing leiomyoma
Myosarcoma
Myxosarcoma
Neuroblastoma
Neurogenic sarcoma
Neurilemmoma, malignant
Neurilemmosarcoma
Osteosarcoma
Paraganglioma, malignant
Pigmented dermatofibrosarcoma protuberans bednar tumor

Reticulum cell sarcoma
Rhabdomyoma, malignant
Rhabdomyosarcoma
Sarcoma botryoides
Schwannoma, malignant
Schwannoma, malignant with rhabdomyoblastomatous differentiation
Synovial sarcoma
Xanthofibroma, malignant

SPINAL CORD (see brain)

SPLEEN (see Hematopoietic/Lymphoid)

STOMACH (G-I Tract)

TESTIS

Carcinoid tumor (+)
Choriocarcinoma
Chorioepithelioma
Embryoma
Embryonal carcinoma
Embryonal teratoma
Endodermal sinus tumor
Germ cell carcinoma
Gonadal stromal tumor, malignant only
Gonadoblastoma (+)
Interstitial cell carcinoma
Leydig cell carcinoma
Mesonephric adenocarcinoma (infantile, juvenile embryonal carcinoma)
Polyembryoma
Seminoma
Sertoli cell carcinoma
Spermatoblastoma
Spermatocytic seminoma
Spermatocytoma
Teratoblastoma
Teratocarcinoma
Teratoma (+)
Vitelline tumor
Yolk sac tumor

THYMUS

Epithelioid thymoma, malignant only
Lymphocytic thymoma, malignant only
Seminoma
Spindle cell thymoma, malignant only
Thymic carcinoid
Thymoma, malignant

THYROID

Adenocarcinoma
Anaplastic carcinoma
Follicular carcinoma
Giant cell carcinoma
Hurthle cell adenoma, malignant only
Hurthle cell tumor, malignant only
Medullary carcinoma

Occult sclerosing carcinoma
Papillary carcinoma
Undifferentiated carcinoma

TRACHEA (see Larynx)

URINARY BLADDER, URETER, URETHRA

Adenocarcinoma
Adenosarcoma
Carcinosarcoma
Chemodectoma, malignant only
Mullerian mixed tumors
Papillary transitional cell carcinoma
Paraganglioma (+)
Pheochromocytoma, malignant only
Rhabdomyosarcoma
Squamous cell carcinoma
Transitional cell carcinoma

UTERUS, UTERINE TUBES, CERVIX

Adenoacanthoma
Adenocarcinoma
Adenosarcoma
Adenosquamous carcinoma
Endolymphatic stromal myosis (low grade sarcoma)
Endometrial stromal sarcoma
Endometrioid carcinoma
Leiomyosarcoma
Mesonephric carcinoma
Mixed mesodermal tumor
Squamous cell carcinoma

VULVA AND VAGINA

Basal cell carcinoma of vulva, clitoris, and labia
Clear cell carcinoma
Mesonephroid carcinoma
Paget's disease
Squamous cell carcinoma
Vaginal intraepithelial neoplasia (VAIN III)
Vulvar intraepithelial neoplasia (VIN III)

NOTE: The following superscript indicates the nature of other than overtly malignant reportable tumors listed:

(+) Borderline, reportable

(O) Benign, reportable

§ 8:57A-1.12 Audit, letter and notice of violations and enforcement actions

(a) A health care facility, physician's, dentist's, other health care provider's office, or independent clinical laboratory shall be subject to audit at the discretion of the Commissioner by authorized representatives of the Department.

(b) The Department or its designee shall evaluate completeness and timeliness of reporting as specified by this subchapter by reviewing documents including, but

not be limited to, the following: medical records, diagnostic indices, such as radiation, laboratory, cytology and/or pathology reports and discharge records.

(c) Authorized representatives of the Department shall conduct the audit during normal operating hours.

(d) The Department's authorized representatives may cite a deficiency upon a determination that the health care facility, physician's, dentist's, other health care provider's office or independent clinical laboratory does not comply with the reporting requirements established in this subchapter.

(e) At the conclusion of the audit or within 10 business days thereafter, the Department or its designee shall provide the health care facility, physician's, dentist's, other health care provider's office or independent clinical laboratory with a written Letter of Potential Violation and Potential Assessment (Letter) summarizing any factual findings used as a basis to determine that reporting has not been complete or timely.

1. The Department or its designee shall set forth in the Letter the proposed assessment of civil monetary penalties, and as applicable, the specific reasons for the action.

2. The Department or its designee shall serve the Letter on a facility, physician, dentist, other health care provider or independent clinical laboratory or its, his or her registered agent in person or by certified mail.

(f) A health care facility, physician, dentist, other health care provider or independent clinical laboratory shall have 30 business days after receipt of the Letter by certified mail or personal service in which to correct all deficiencies in its reporting that were discovered during the audit and cited in the Letter.

1. If a health care facility, physician, dentist, other health care provider or independent clinical laboratory fails to correct deficiencies in its reporting that were discovered during the audit and cited in the Letter within 30 days, the Department or its designee will act as registrar and shall charge the facility, physician, dentist, other health care provider or independent clinical laboratory for all costs related to these services, including, but not limited to, the retrieval of case information and the cost of the audit.

i. This fee shall be based upon the fair market value of such services.

ii. All checks for fees for the Department's audit services shall be made payable to "Treasurer, State of New Jersey" and forwarded to:

Office of Cancer Epidemiology

New Jersey State Cancer Registry
New Jersey Department of Health and Senior Services
PO Box 369
Trenton, New Jersey 08625-0369

2. If a health care facility, physician, dentist or other health care provider fails to correct deficiencies in its reporting that were discovered during the audit and cited in the Letter within 30 days, the Department or its designee shall serve the entity or provider with a written Notice of Violation and Penalty Assessment.

3. If an independent clinical laboratory fails to correct deficiencies in its reporting that were discovered during the audit and cited in the Letter within 30 days, the Department or its designee shall report the deficiency to the Department's Clinical Laboratory Improvement Service, which may initiate enforcement actions.

§ 8:57A-1.13 Civil monetary penalties

(a) Pursuant to N.J.S.A. 26:2-106f(3) and notwithstanding the provisions of N.J.A.C. 8:57A-1.12(f) 1, the Commissioner may assess a penalty for violation of reporting requirements in accordance with the following standards:

1. For failure of a health care facility, physician, dentist or other health care provider to report pursuant to the provisions of this chapter, up to \$ 500.00 per unreported case of cancer or other specified tumorous and precancerous disease; and/or

2. For failure of a health care facility to report electronically, up to \$ 1,000 per business day.

(b) The Department or its designee may decrease the penalties in (a) above based upon compliance history, the number and frequency of the deficiencies, the measures taken to mitigate or prevent future deficiencies, the deterrent effect of the penalty and/or other specific circumstances of the facility, office or violation.

§ 8:57A-1.14 Failure to pay a penalty; remedies

(a) Upon receipt of a Notice of Violation and Penalty Assessment (Notice), a health care facility, physician, dentist or other health care provider has 30 days in which to notify the Department or its designee in writing of its, his or her answer to the Notice and request for a hearing pursuant to the Administrative Procedure Act, N.J.S.A. 52:14B-1 et seq.

(b) The penalty becomes due and owing upon the 31st day from receipt of the Notice if the Department or its designee has not received a written answer and request for a hearing.

1. If the recipient of the Notice has requested a

hearing, the penalty is due 45 days after the issuance of a Final Agency Decision by the Commissioner, if the Department or its designee has not withdrawn, rescinded or reversed its assessment, and an appeal has not been timely filed with the Appellate Division pursuant to Rule 2:2-3 of the New Jersey Court Rules.

(c) Failure to pay a penalty within 30 days of the date it is due and owing pursuant to (b) above may result in the institution of a summary civil proceeding by the Department or its designee pursuant to the Penalty Enforcement Law, N.J.S.A. 2A:58-10 et seq.

§ 8:57A-1.15 Hearings

(a) Upon request, a hearing shall be afforded to a health care facility, physician, dentist or other health care provider pursuant to N.J.A.C. 8:57A-1.14.

(b) A health care facility, physician, dentist or other health care provider shall notify the Department or its designee, in writing, of its request for a hearing within 30 days of receipt of a Notice of Violation and Penalty Assessment.

(c) The Department or its designee shall transmit the hearing request to the Office of Administrative Law, which will conduct the hearing pursuant to the Administrative Procedure Act, N.J.S.A. 52:14B-1 et seq., and the Uniform Administrative Procedure Rules, N.J.A.C. 1:1.

§ 8:57A-1.16 Settlement of enforcement actions

(a) A health care facility, physician, dentist or other health care provider may request that the matter be settled in lieu of conducting an administrative hearing concerning an enforcement action.

(b) If the Department or its designee and the health care facility, physician, dentist or other health care provider agree on the terms of a settlement, a written agreement specifying these terms shall be executed.

(c) The Department or its designee may agree to accept payment of penalties over a schedule not exceeding 18 months where a health care facility, physician, dentist or other health care provider demonstrates financial hardship.

(d) All funds received in payment of penalties shall be recovered by and in the name of the Department and shall be dedicated to the New Jersey State Cancer Registry.

APPENDIX D – TABLE OF REQUIRED DATA ITEMS

APPENDIX D: TABLE OF REQUIRED DATA ITEMS

From NAACCR Standards for Cancer Registries, Volume II, Data Standards and Data Dictionary, Version 16
<http://www.naacr.org/Applications/ContentReader/Default.aspx?c=8>

CHAPTER VIII:

REQUIRED STATUS TABLE (ITEM # ORDER)

The following table presents Version 16 of the NAACCR required status summarizing the requirements and recommendations for collection of each item by standard-setting groups. Differences from Version 15 are marked “Revised” or “New” in the “Note” column of the table and are highlighted in the body of the table. Text of previous versions is revealed by hovering over the highlighted cell.

- NPCR** Refers to requirements and recommendations of the NPCR regarding data items that should be collected or computed by NPCR state registries. The NPCR transmit column in the Required Status Table has been removed with Version 11.2. Transmit instructions will be provided by NPCR. *Note: Patient identifying data items collected are not transmitted to CDC.*
- CoC** Refers to requirements of CoC. CoC-accredited cancer program registries are required to collect the indicated items in the “Collect” column and are required to report items indicated in the “Transmit” column to the NCDB. Facilities should refer to the *CoCFORDS* manual for further clarification of required fields. *Note: Patient identifying data items collected are not transmitted to the NCDB.*
- SEER** Refers to requirements of NCI’s SEER Program. Central registries are required to collect the indicated items in the “Collect” column and are required to report the items indicated in the “Transmit” column to NCI-SEER. Facilities and central registries should refer to the *SEER Program Code Manual* for further clarification of required fields.
- CCCR** Refers to requirements of CCCR for cases submitted to the Canadian Cancer Registry. Provincial/Territorial registries should refer to the *Canadian Cancer Registry System Guide* for further clarification of fields. Items indicated in the “Collect” column are required to be collected at the registry level and items indicated in the “Transmit” column are required to be reported to the Canadian Cancer Registry. CCCR requirements have been added to the Required Status Table with Version 11.2.

Exchange Elements for Hospital to Central and Central to Central

The target audience for this set of requirements is comprised of the various designers of registry software, at the hospital, central registry, and national levels. In the Exchange Elements columns, data items marked are either required by key national organizations for cancer reporting or are of special importance in the unambiguous communication of reports and the proper linking of records. A clear distinction is made between items required for facilities reporting to central registries (labeled Hosp → Central), and those items that central registries should use when sending cases to other central registries (labeled Central → Central). “T” is used when the data are vital to a complete exchange record. If a data item is unknown, it should have the proper code for unknown assigned. It is not specified how registries should handle records that have empty T fields. “T*” means the vendor should convey the data if they are available for any of the cases; otherwise, they can leave the field empty. The receiving end (central registry) may, of course, ignore these items if they so choose. “TH” means only certain historical cases may require these fields. Some central registries have additional required data fields. For these, vendors should contact the central registry directly.

Codes for Recommendations:

- . No recommendation
- D Derived
- D* Derived, when available
- D+ Derived; central registries may collect either SEER Summary Stage 2000 or Collaborative Stage
- DH Historically derived and currently transmitted
- R Required
- R# Required; central registries may code available data using either SEER or CoC data items and associated rules
- R#* Required, when available; central registries may code available data using either SEER or CoC data items and associated rules
- R\$ Requirements differ by year
- R* Required, when available
- R^ Required, these text requirements may be met with one or several text block fields
- R+ Required, central registries may collect either SEER Summary Stage 2000 or Collaborative Stage
- RC Collected by SEER from CoC-accredited hospitals

- RH Historically collected and currently transmitted
- RH* Historically collected and currently transmitted when available
- RN Collect according to NPCR stage transition schedule
- RS Required, site specific
- RS# Required, site specific; central registries may code available data using either SEER or CoC data items and associated rules
- RS* Required, site specific; when available
- S Supplementary/recommended
- T Data is vital to complete exchange record
- T* Transmit data if available for any case in exchange record
- TH Only certain historical cases may require these fields
- TH* Only certain historical cases may require these fields; transmit data if available for any case in exchange record

APPENDIX F – LIST OF ACCEPTABLE MEDICAL ABBREVIATIONS

This list is from NAACCR Standards for Cancer Registries, Volume II, Data Standards and Data Dictionary, Version 13

<http://www.naacr.org/Applications/ContentReader/Default.aspx>

RECOMMENDED ABBREVIATIONS FOR ABSTRACTORS

The use of abbreviations in cancer abstraction is becoming more commonplace as the demands on abstractors increase. Abbreviations often are used by cancer abstractors to shorten the written narratives entered into text fields to facilitate the electronic storage and transmission of the information. However, abbreviations can generate confusion, because abbreviations may vary among different institutions and even between different specialties within the same institution. To be useful, an abbreviation must be clearly understood by any individual who encounters it. Consequently, the use of abbreviations is a useful abstracting practice only if universally recognized and understood abbreviations are used.

The NAACCR Recommended Abbreviations Listings were developed for utilization by cancer report abstractors and the agencies to which they submit their data. These lists were compiled to reduce some of the confusion that can result from the use of common and not-so-common abbreviations when abstracting reports of cancer from the medical record. Although the lists may shed some light on abbreviations used in the medical record, please note that these lists are intended to be used as a primary reference by the cancer abstractor, to help abstract necessary information into a limited number of text fields for storage and transmission of cancer information.

The NAACCR Recommended Abbreviations Listings consist of two main lists of almost 500 word/terms and their recommended abbreviations/symbols, as well as a special table delineating context-sensitive abbreviations. The first main listing is ordered by word/term to enable the look-up of a recommended abbreviation for a particular word or term, and the second main listing is ordered by abbreviation/symbol to enable the look-up of the word or term for a particular abbreviation or symbol. The context-sensitive abbreviations list consists of a subset of the abbreviations from the main lists where a different context for the same abbreviation conveys a different meaning (for example, CA may mean calcium or carcinoma/ML may mean milliliter or middle lobe). For these context-sensitive abbreviations, the meaning of the abbreviation should be readily apparent from the context in which it is used.

The listings were compiled from abbreviation lists from SEER Book 3, the NAACCR Pathology Committee, the Veterans Administration, Dr. Jay Piccirillo's comorbid conditions training materials, the Florida Cancer Data System, and the California Cancer Registry. Terms included in the lists are limited to those that are commonly utilized when abstracting cancer information. The listings are not exhaustive, but many of the most commonly used terms were included. Abbreviations for chemotherapy drugs and/or regimens are not included. Please note that although abbreviations are presented in uppercase, either upper- or lowercase may be utilized when entering abbreviations within abstraction software. When abstracting into text fields, the use of abbreviations should be limited to those that appear on these lists whenever practical. Abbreviations and symbols should be used carefully.

**NAACCR RECOMMENDED ABBREVIATION LIST
ORDERED BY WORD/TERM(S)**

WORD/TERM(S)	ABBREVIATION/SYMBOL
Abdomen (abdominal)	ABD
Abdominal perineal	AP
Abnormal	ABN
Above	^
Above knee (amputation)	AK(A)
Absent/Absence	ABS
Abstract/Abstracted	ABST
Achilles tendon reflex	ATR
Acid phosphatase	ACID PHOS
Acquired Immune Deficiency Syndrome	AIDS
Activities of daily living	ADL
Acute granulocytic leukemia	AGL
Acute lymphocytic leukemia	ALL
Acute myelogenous leukemia	AML
Acute myocardial infarction	AMI
Acute Respiratory Distress (Disease) Syndrome	ARDS
Acute tubular necrosis	ATN
Acute renal failure	ARF
Adenocarcinoma	ADENOCA
Adenosine triphosphate	ATP
Adjacent	ADJ
Adult-onset Diabetes Mellitus	AODM
Admission/Admit	ADM
Adrenal cortical hormone	ACH
Adrenal cortex	AC
Adrenocorticotrophic hormone	ACTH
Affirmative	AFF
Against medical advice	AMA
AIDS-related condition (complex)	ARC
AIDS-related disease	ARD
Air contrast barium enema	ACBE
Albumin	ALB
Alcohol	ETOH
Alkaline phosphatase	ALK PHOS
Alpha-fetoprotein	AFP
Also known as	AKA
Ambulatory	AMB
Amount	AMT
Amputation	AMP
Amyotrophic lateral sclerosis	ALS

WORD/TERM(S)	ABBREVIATION/SYMBOL
Anal intraepithelial neoplasia, grade III	AIN III
Anaplastic	ANAP
And	&
Angiography/Angiogram	ANGIO
Anterior	ANT
Anteroposterior	AP
Antidiuretic hormone	ADH
Antigen	AG
Aortic stenosis	A-STEN
Appendix	APP
Apparently	APPL'Y
Approximately	APPROX
Arrhythmia	ARRHY
Arterial blood gases	ABG
Arteriosclerotic cardiovascular disease	ASCVD
Arteriosclerotic heart disease	ASHD
Arteriosclerotic Peripheral Vascular Disease	ASPVD
Arteriosclerosis/Arteriosclerotic	AS
Arteriovenous	AV
Arteriovenous malformation	AVM
Artery (ial)	ART
Ascending colon	A-COLON
Aspiration	ASP
Aspirin, Acetylsalicylic acid	ASA
As soon as possible	ASAP
At	@
Atrial fibrillation	A FIB
Atrial flutter	A FLUTTER
Atrial stenosis/insufficiency/incompetence	AI
Atrial premature complexes	APC
Auscultation & percussion	A&P
Autonomic nervous system	ANS
Autopsy	AUT
Autoimmune hemolytic anemia	AIHA
Average	AVG
Axilla(ry)	AX
Bacillus Calmette-Guerin	BCG
Barium	BA
Barium enema	BE
Bartholin's, Urethral & Skene's	BUS
Basal cell carcinoma	BCC
Before noon	AM

WORD/TERM(S)	ABBREVIATION/SYMBOL
Below knee (amputation)	BK(A)
Benign prostatic hypertrophy/hyperplasia	BPH
Bilateral	BIL
Bilateral salpingo-oophorectomy	BSO
Bile duct	BD
Biological response modifier	BRM
Biopsy	BX
Bipolar affective disorder	BAD
Black female	B/F
Black male	B/M
Bladder tumor	BT
Blood pressure	BP
Blood urea nitrogen	BUN
Blood volume	BV
Bone marrow	BM
Bone marrow transplant	BMT
Bowel movement	BM
Brother	BRO
Calcium	CA
Capsule (s)	CAP(S)
Carcinoembryonic antigen	CEA
Carcinoma	CA
Carcinoma <i>in situ</i>	CIS
Cardiovascular disease	CVD
CAT/CT scan/Computerized axial tomography	CT
Centimeter	CM
Central nervous system	CNS
Cerebrospinal fluid	CSF
Cerebrovascular accident	CVA
Cervical intraepithelial neoplasia	CIN
Cervical intraepithelial neoplasia, grade III	CIN III
Cervical vertebrae	C1-C7
Cervical spine	C-SPINE
Change	CHG
Chemotherapy	CHEMO
Chest X-ray	CXR
Chronic	CHR
Chronic granulocytic leukemia	CGL
Chronic lymphocytic leukemia	CLL
Chronic myeloid (myelocytic) leukemia	CML
Chronic obstructive lung disease	COLD
Chronic obstructive pulmonary disease	COPD

WORD/TERM(S)	ABBREVIATION/SYMBOL
Chronic renal failure	CRF
Chronic ulcerative colitis	CUC
Cigarettes	CIG
Clear	CLR
Cobalt 60	CO60
Collaborative stage	CS
Colon, Ascending	A-COLON
Colon, Descending	D-COLON
Colon, Sigmoid	SIG COLON
Colon, Transverse	TRANS-COLON
Colony-stimulating factor	C-SF
Complaint (-ning) of	C/O
Complete blood count	CBC
Congenital heart disease	CHD
Congestive heart failure	CHF
Consistent with	C/W
Continue/continuous	CONT
Contralateral	CONTRA
Coronary artery bypass graft	CABG
Coronary artery disease	CAD
Coronary care unit	CCU
Cubic centimeter	CC
Cystoscopy	CYSTO
Cytology	CYTO
Cystic fibrosis	CF
Date of birth	DOB
Date of death	DOD
Dead on arrival	DOA
Decrease(d)	DECR
Deep tendon reflex	DTR
Deep vein thrombosis	DVT
Deoxyribonucleic acid	DNA
Descending colon	D-COLON
Dermatology	DERM
Diabetes mellitus	DM
Diagnosis	DX
Diameter	DIAM
Diethylstilbestrol	DES
Differentiated/differential	DIFF
Digital rectal examination	DRE
Dilatation and curettage	D&C
Discharge	DISCH

WORD/TERM(S)	ABBREVIATION/SYMBOL
Discontinue(d)	DC
Disease	DZ
Disseminated intravascular coagulopathy	DIC
Ductal carcinoma <i>in situ</i>	DCIS
Dyspnea on exertion	DOE
Ears, nose, and throat	ENT
Electrocardiogram	ECG/EKG
Electroencephalogram	EEG
Electromyogram	EMG
Emergency room	ER
Endoscopic retrograde cholangiopancreatography	ERCP
End stage renal disease	ESRD
Enlarged	ENLGD
Equal(s)	=
Esophagogastro-duodenoscopy	EGD
Estrogen receptor (assay)	ER, ERA
Evaluation	EVAL
Every	Q
Every day	QD
Examination	EXAM
Excision/excised	EXC(D)
Expired	EXP
Exploratory	EXPL
Exploratory laparotomy	EXPL LAP
Extend/extension	EXT
Fever of unknown origin	FUO
Fine needle aspiration	FNA
Fine needle aspiration biopsy	FNAB
Floor of mouth	FOM
Fluid	FL
Fluoroscopy	FLURO
Follow-up	FU
For example	E.G.
Fracture	FX
Frequent/Frequency	FREQ
Frozen section	FS
Full thickness skin graft	FTSG
Gallbladder	GB
Gastroesophageal	GE
Gastroesophageal reflux disease	GERD

WORD/TERM(S)	ABBREVIATION/SYMBOL
Gastrointestinal	GI
General/Generalized	GEN
Genitourinary	GU
Grade	GR
Greater/Greater than	>
Gynecology	GYN
Hematocrit	HCT
Hemoglobin	HGB
Hepatitis A (virus)	HAV
Hepatitis B (virus)	HBV
Hepatitis C (virus)	HCV
Hepatitis D (virus)	HDV
Hepatosplenomegaly	HSM
History	HX
History and physical	H&P
History of	H/O
Hormone	HORM
Hospital	HOSP
Hour/Hours	HR(S)
Human chorionic gonadotropin	HCG
Human Immunodeficiency Virus	HIV
Human Papilloma Virus	HPV
Human T-Lymphotropic Virus, (Type III)	HTLV
Hypertension	HTN
Hypertensive cardiovascular disease	HCVD
Hypertensive vascular disease	HVD
Hysterectomy	HYST
Idiopathic hypertrophic subaortic stenosis	IHSS
Idiopathic thrombocytopenia	ITP
Immunoglobulin	IG
Immunohistochemical	IHC
Impression	IMP
Incision & drainage	I&D
Includes/Including	INCL
Increase(d)	INCR
Inferior	INF
Inferior vena cava	IVC
Infiltrating	INFILT
Inflammatory bowel disease	IBD
Inpatient	IP
Insulin-dependent diabetes mellitus	IDDM

WORD/TERM(S)	ABBREVIATION/SYMBOL
Intensive care unit	ICU
Intercostal margin	ICM
Intercostal space	ICS
Intermittent positive pressure breathing	IPPB
Internal	INT
Interstitial lung disease	ILD
Intramuscular	IM
Intrathecal	IT
Intravenous	IV
Intravenous cholangiogram	IVCA
Intravenous pyelogram	IVP
Invade(s)/invading/invasion	INV
Involve(s)/involvement/involving	INVL
Ipsilateral	IPSI
Irregular	IRREG
Jugular venous distention	JVD
Juvenile rheumatic arthritis	JRA
Kaposi sarcoma	KS
Kidneys, ureters, bladder	KUB
Kilogram	KG
Kilovolt	KV
Laboratory	LAB
Lactic dehydrogenase	LDH
Laparotomy	LAP
Large	LRG
Last menstrual period	LMP
Lateral	LAT
Left	LT
Left bundle branch block	LBBB
Left costal margin	LCM
Left lower extremity	LLE
Left lower lobe	LLL
Left lower quadrant	LLQ
Left salpingo-oophorectomy	LSO
Left upper extremity	LUE
Left upper lobe	LUL
Left upper quadrant	LUQ
Left upper outer quadrant	LUOQ
Less/Less than	<
Licensed practical nurse	LPN

WORD/TERM(S)	ABBREVIATION/SYMBOL
Linear accelerator	LINAC
Liver/spleen scan	LS SCAN
Lower extremity	LE
Lower inner quadrant	LIQ
Lower outer quadrant	LOQ
Lumbar vertebra	L1-L5
Lumbar spine	L-SPINE
Lumbosacral	LS
Lymphadenopathy-associated virus	LAV
Lymph node(s)	LN(S)
Lymph node dissection	LND
Lupus erythematosus	LUP ERYTH
Lymph/vascular invasion	LVI
Macrophage colony-stimulating factor	M-CSF
Magnetic resonance imaging	MRI
Magnetic resonance cholangiopancreatography	MRCP
Main stem bronchus	MSB
Malignant	MALIG
Mandible/mandibular	MAND
Maximum	MAX
Medical center	MC
Medication	MED
Metastatic/Metastasis	METS
Methicillin Resistant Staphylococcus Aureus	MRSA
Microgram	MCG
Microscopic	MICRO
Middle lobe	ML
Millicurie (hours)	MC(H)
Milligram (hours)	MG(H)
Milliliter	ML
Millimeter	MM
Million electron volts	MEV
Minimum	MIN
Minus	-
Minute	MIN
Mitral valve prolapse	MVP
Mixed combined immunodeficiency	MCID
Mixed connective tissue disease	MCTD
Moderate (ly)	MOD
Moderately differentiated	MD, MOD DIFF
Modified radical mastectomy	MRM

Papillary	PAP
Past/personal (medical) history	PMH
Pathology	PATH
Patient	PT
Pediatrics	PEDS
Pelvic inflammatory disease	PID

WORD/TERM(S)	ABBREVIATION/SYMBOL
Peptic ulcer disease	PUD
Percutaneous	PERC
Percutaneous transhepatic cholecystogram	PTC
Peripheral vascular disease	PVD
Prescription	RX
Primary medical physician	PMP
Phosphorus 32	P32
Physical examination	PE
Physiotherapy/Physical therapy	PT
Platelets	PLT
Plus	+
Poorly differentiated	PD, POOR DIFF
Positive	POS
Positive	+
Positron emission tomography	PET
Possible	POSS
Posterior	POST
Postoperative (-ly)	POST OP
Pound(s)	LB(S)
Pound(s)	#
Premature atrial contraction	PAC
Preoperative (-ly)	PRE OP
Previous	PREV
Prior to admission	PTA
Probable (-ly)	PROB
Proctoscopy	PROCTO
Progesterone receptor (assay)	PR, PRA
Prostatic intraepithelial neoplasia, grade III	PIN III
Prostatic specific antigen	PSA
Pulmonary	PULM
Quadrant	QUAD
Radiation absorbed dose	RAD
Radiation therapy	RT
Radioimmunoassay	RIA
Received	REC'D
Red blood cells (count)	RBC
Regarding	RE
Regional medical center	RMC
Regular	REG
Regular sinus rhythm	RSR
Resection (ed)	RESEC

WORD/TERM(S)	ABBREVIATION/SYMBOL
Review of outside films	ROF
Review of outside slides	ROS
Rheumatoid arthritis	RA
Rheumatic heart disease	RHD
Right	RT
Right bundle branch block	RBBB
Right costal margin	RCM
Right inner quadrant	RIQ
Right lower extremity	RLE
Right lower lobe	RLL
Right lower quadrant	RLQ
Right middle lobe	RML
Right outer quadrant	ROQ
Right salpingo-oophorectomy	RSO
Right upper extremity	RUE
Right upper lobe	RUL
Right upper quadrant	RUQ
Rule out	R/O
Sacral spine	S-SPINE
Sacral vertebra	S1-S5
Salpingo-oophorectomy	SO
Satisfactory	SATIS
Serum glutamic oxaloacetic transaminase	SGOT
Serum glutamic pyruvic transaminase	SGPT
Severe combined immunodeficiency syndrome	SCID
Short(ness) of breath	SOB
Sick sinus syndrome	SSS
Sigmoid colon	SIG COLON
Small	SM
Small bowel	SB
Specimen	SPEC
Spine, Cervical	C-SPINE
Spine, Lumbar	L-SPINE
Spine, Sacral	S-SPINE
Spine, Thoracic	T-SPINE
Split thickness skin graft	STSG
Squamous	SQ
Squamous cell carcinoma	SCC
Status post	S/P
Subcutaneous	SUBCU
Summary stage	SS
Superior vena cava	SVC

WORD/TERM(S)	ABBREVIATION/SYMBOL
Surgery/Surgical	SURG
Suspicious/suspected	SUSP
Symptoms	SX
Syndrome of inappropriate ADH	SIADH
Systemic lupus erythematosus	SLE
Thoracic spine	T-SPINE
Thromboticthrombocytopenia purpura	TTP
Times	X
Total abdominal hysterectomy	TAH
Total abdominal hysterectomy- bilateral salpingo-oophorectomy	TAH-BSO
Total vaginal hysterectomy	TVH
Transient ischemic attack	TIA
Transitional cell carcinoma	TCC
Transurethral resection	TUR
Transurethral resection bladder	TURB
Transurethral resection prostate	TURP
Transverse colon	TRANS-COLON
Treatment	TX
True vocal cord	TVC
Tuberculosis	TB
Twice a day (daily)	BID
Ultrasound	US
Undifferentiated	UNDIFF
Unknown	UNK
Upper extremity	UE
Upper gastrointestinal (series)	UGI
Upper inner quadrant	UIQ
Upper outer quadrant	UOQ
Upper respiratory infection	URI
Urinary tract infection	UTI
Vagina/Vaginal	VAG
Vaginal hysterectomy	VAG HYST
Vaginal intraepithelial neoplasia (grade III)	VAIN III
Vulvar intraepithelial neoplasia (grade III)	VIN III
Well differentiated	WD, WELL DIFF
White blood cells (count)	WBC
White female	W/F
White male	W/M
With	W/

**NAACCR RECOMMENDED ABBREVIATION LIST
ORDERED BY ABBREVIATION/SYMBOL**

ABBREVIATION/SYMBOL	WORD/TERM(S)
^	above
@	at
&	and
<	less, less than
=	equals
>	greater than, more, more than
-	negative, minus
#	number, pound(s)
+	plus, positive
X	times
A-COLON	Ascending colon
A FIB	Atrial fibrillation
A FLUTTER	Atrial flutter
A-STEN	Aortic stenosis
A&P	Auscultation & percussion
ABD	Abdomen (abdominal)
ABG	Arterial blood gases
ABN	Abnormal
ABS	Absent/Absence
ABST	Abstract/Abstracted
AC	Adrenal cortex
ACBE	Air contrast barium enema
ACH	Adrenal cortical hormone
ACID PHOS	Acid phosphatase
ACTH	Adrenocorticotrophic hormone
ADENOCA	Adenocarcinoma
ADH	Antidiuretic hormone
ADJ	Adjacent
ADL	Activities of daily living
ADM	Admission/Admit

ABBREVIATION/SYMBOL	WORD/TERM(S)
AFF	Affirmative
AFP	Alpha-fetoprotein
AG	Antigen
AGL	Acute granulocytic leukemia
AI	Atrial stenosis/insufficiency/incompetence
AIDS	Acquired Immune Deficiency Syndrome
AIHA	Autoimmune hemolytic anemia
AIN III	Anal intraepithelial neoplasia, grade III
AK(A)	Above knee (amputation)
AKA	Also known as
ALB	Albumin
ALK PHOS	Alkaline phosphatase
ALL	Acute lymphocytic leukemia
ALS	Amyotrophic lateral sclerosis
AM	Before noon
AMA	Against medical advice
AMB	Ambulatory
AMI	Acute myocardial infarction
AML	Acute myelogenous leukemia
AMP	Amputation
AMT	Amount
ANAP	Anaplastic
ANGIO	Angiography/Angiogram
ANS	Autonomic nervous system
ANT	Anterior
AODM	Adult-onset Diabetes Mellitus
AP	Abdominal perineal
AP	Anteroposterior
APC	Atrial premature complexes
APP	Appendix
APPL'Y	Apparently
APPROX	Approximately
ARC	AIDS-related condition (complex)
ARD	AIDS-related disease
ARDS	Acute Respiratory Distress (Disease) Syndrome
ARF	Acute renal failure
ARRHY	Arrhythmia
ART	Artery (ial)
AS	Arteriosclerosis/Arteriosclerotic
ASA	Aspirin, Acetylsalicylic acid
ASAP	As soon as possible
ASCVD	Arteriosclerotic cardiovascular disease
ASHD	Arteriosclerotic heart disease

ABBREVIATION/SYMBOL	WORD/TERM(S)
ASP	Aspiration
ASPVD	Arteriosclerotic Peripheral Vascular Disease
ATN	Acute tubular necrosis
ATP	Adenosine triphosphate
ATR	Achilles tendon reflex
AUT	Autopsy
AV	Arteriovenous
AVG	Average
AVM	Arteriovenous malformation
AX	Axilla(ry)
B/F	Black female
B/M	Black male
BA	Barium
BAD	Bipolar affective disorder
BCC	Basal cell carcinoma
BCG	Bacillus Calmette-Guerin
BD	Bile duct
BE	Barium enema
BID	Twice a day (daily)
BIL	Bilateral
BK(A)	Below knee (amputation)
BM	Bone marrow
BM	Bowel movement
BMT	Bone marrow transplant
BP	Blood pressure
BPH	Benign prostatic hypertrophy/hyperplasia
BRM	Biological response modifier
BRO	Brother
BSO	Bilateral salpingo-oophorectomy
BT	Bladder tumor
BUN	Blood urea nitrogen
BUS	Bartholin's, Urethral & Skene's
BV	Blood volume
BX	Biopsy
C/O	Complaint (-ning) of
C/W	Consistent with
C1-C7	Cervical vertebrae
CA	Calcium
CA	Carcinoma
CABG	Coronary artery bypass graft
CAD	Coronary artery disease

ABBREVIATION/SYMBOL	WORD/TERM(S)
CAP(S)	Capsule (s)
CBC	Complete blood count
CC	Cubic centimeter
CCU	Coronary care unit
CEA	Carcinoembryonic antigen
CF	Cystic fibrosis
CGL	Chronic granulocytic leukemia
CHD	Congenital heart disease
CHEMO	Chemotherapy
CHF	Congestive heart failure
CHG	Change
CHR	Chronic
CIG	Cigarettes
CIN	Cervical intraepithelial neoplasia
CIN III	Cervical intraepithelial neoplasia, grade III
CIS	Carcinoma <i>in situ</i>
CLL	Chronic lymphocytic leukemia
CLR	Clear
CM	Centimeter
CML	Chronic myeloid (myelocytic) leukemia
CNS	Central nervous system
CO60	Cobalt 60
COLD	Chronic obstructive lung disease
CONT	Continue/continuous
CONTRA	Contralateral
COPD	Chronic obstructive pulmonary disease
CRF	Chronic renal failure
CS	Collaborative stage
CSF	Cerebrospinal fluid
C-SF	Colony stimulating factor
C-SPINE	Cervical spine
CT	CAT/CT scan/Computerized axial tomography
CUC	Chronic ulcerative colitis
CVA	Cerebrovascular accident
CVD	Cardiovascular disease
CXR	Chest X-ray
CYSTO	Cystoscopy
CYTO	Cytology
D-COLON	Descending colon
D&C	Dilatation and curettage
DC	Discontinue(d)
DCIS	Ductal carcinoma <i>in situ</i>

ABBREVIATION/SYMBOL	WORD/TERM(S)
DECR	Decrease(d)
DERM	Dermatology
DES	Diethylstilbestrol
DIAM	Diameter
DIC	Disseminated intravascular coagulopathy
DIFF	Differentiated/differential
DISCH	Discharge
DM	Diabetes mellitus
DNA	Deoxyribonucleic acid
DOA	Dead on arrival
DOB	Date of birth
DOD	Date of death
DOE	Dyspnea on exertion
DRE	Digital rectal examination
DTR	Deep tendon reflex
DVT	Deep vein thrombosis
DX	Diagnosis
DZ	Disease
E.G.	For example
ECG/EKG	Electrocardiogram
EEG	Electroencephalogram
EGD	Esophagogastro-duodenoscopy
EMG	Electromyogram
ENLGD	Enlarged
ENT	Ears, nose, and throat
ER	Emergency room
ER, ERA	Estrogen receptor (assay)
ERCP	Endoscopic retrograde cholangiopancreatography
ESRD	End stage renal disease
ETOH	Alcohol
EVAL	Evaluation
EXAM	Examination
EXC(D)	Excision/excised
EXP	Expired
EXPL	Exploratory
EXPL LAP	Exploratory laparotomy
EXT	Extend/extension
FL	Fluid
FLURO	Fluoroscopy
FNA	Fine needle aspiration
FNAB	Fine needle aspiration biopsy

ABBREVIATION/SYMBOL	WORD/TERM(S)
FOM	Floor of mouth
FREQ	Frequent/Frequency
FS	Frozen section
FTSG	Full thickness skin graft
FU	Follow-up
FUO	Fever of unknown origin
FX	Fracture
GB	Gallbladder
GE	Gastroesophageal
GEN	General/Generalized
GERD	Gastroesophageal reflux disease
GI	Gastrointestinal
GR	Grade
GU	Genitourinary
GYN	Gynecology
H&P	History and physical
H/O	History of
HAV	Hepatitis A (virus)
HBV	Hepatitis B (virus)
HCG	Human chorionic gonadotropin
HCT	Hematocrit
HCV	Hepatitis C (virus)
HCVD	Hypertensive cardiovascular disease
HDV	Hepatitis D (virus)
HGB	Hemoglobin
HIV	Human Immunodeficiency Virus
HORM	Hormone
HOSP	Hospital
HPV	Human Papilloma Virus
HR(S)	Hour/Hours
HSM	Hepatosplenomegaly
HTLV	Human T-Lymphotropic Virus, (Type III)
HTN	Hypertension
HVD	Hypertensive vascular disease
HX	History
HYST	Hysterectomy
I&D	Incision & drainage
IBD	Inflammatory bowel disease
ICM	Intercostal margin
ICS	Intercostal space

ABBREVIATION/SYMBOL	WORD/TERM(S)
ICU	Intensive care unit
IDDM	Insulin-dependent diabetes mellitus
IG	Immunoglobulin
IHC	Immunohistochemical
IHSS	Idiopathic hypertrophic subaortic stenosis
ILD	Interstitial lung disease
IM	Intramuscular
IMP	Impression
INCL	Includes/Including
INCR	Increase(d)
INF	Inferior
INFILT	Infiltrating
INT	Internal
INV	Invade(s)/invading/invasion
INVL	Involve(s)/involvement/involving
IP	Inpatient
IPPB	Intermittent positive pressure breathing
IPSI	Ipsilateral
IRREG	Irregular
IT	Intrathecal
ITP	Idiopathic thrombocytopenia
IV	Intravenous
IVC	Inferior vena cava
IVCA	Intravenous cholangiogram
IVP	Intravenous pyelogram
JRA	Juvenile rheumatic arthritis
JVD	Jugular venous distention
KG	Kilogram
KS	Kaposi sarcoma
KUB	Kidneys, ureters, bladder
KV	Kilovolt
L-SPINE	Lumbar spine
L1-L5	Lumbar vertebra
LAB	laboratory
LAP	Laparotomy
LAT	Lateral
LAV	Lymphadenopathy-associated virus
LB	Pound
LBBB	Left bundle branch block
LCM	Left costal margin

ABBREVIATION/SYMBOL	WORD/TERM(S)
LDH	Lactic dehydrogenase
LE	Lower extremity
LINAC	Linear accelerator
LIQ	Lower inner quadrant
LLE	Left lower extremity
LLL	Left lower lobe
LLQ	Left lower quadrant
LMP	Last menstrual period
LN(S)	Lymph node(s)
LND	Lymph node dissection
LOQ	Lower outer quadrant
LPN	Licensed practical nurse
LRG	Large
LS	Lumbosacral
LS SCAN	Liver/spleen scan
LSO	Left salpingo-oophorectomy
LT	Left
LUE	Left upper extremity
LUL	Left upper lobe
LUOQ	Left upper outer quadrant
LUP ERYTH	Lupus erythematosus
LUQ	Left upper quadrant
LVI	Lymph/vascular invasion
M-CSF	Macrophage colony-stimulating factor
MALIG	Malignant
MAND	Mandible/mandibular
MAT	Multifocal arterial tachycardia
MAX	Maximum
MC	Medical center
MC(H)	Millicurie (hours)
MCG	Microgram
MCID	Mixed combined immunodeficiency
MCTD	Mixed connective tissue disease
MD	Moderately differentiated
MED	Medication
METS	Metastatic/Metastasis
MEV	Million electron volts
MG	Myasthenia gravis
MG(H)	Milligram (hours)
MI	Myocardial infarction
MICRO	Microscopic
MIN	Minimum

ABBREVIATION/SYMBOL	WORD/TERM(S)
MIN	Minute
ML	Middle lobe
ML	Milliliter
MM	Millimeter
MM	Multiple myeloma
MOD	Moderate (ly)
MOD DIFF	Moderately differentiated
MPVC	Multifocal premature ventricular contraction
MRCP	Magnetic resonance cholangiopancreatography
MRI	Magnetic resonance imaging
MRM	Modified radical mastectomy
MRSA	Methicillin Resistant Staphylococcus Aureus
MS	Multiple sclerosis
MSB	Main stem bronchus
MULT	Multiple
MVP	Mitral valve prolapse
NA	Not applicable
NED	No evidence of disease
NEG	Negative
NEOPL	Neoplasm
NEURO	Neurology
NH	Nursing home
NHL	Non-Hodgkins lymphoma
NL	Normal
NOS	Not otherwise specified
NR	Not recorded
NSCCA	Non small cell carcinoma
NSF	No significant findings
NVD	Neck vein distention
OB	Obstetrics
OBS	Organic brain syndrome
OBST	Obstructed (-ing, -ion)
OP	Outpatient
OP RPT	Operative report
OR	Operating room
ORTHO	Orthopedics
OTO	Otology
OZ	Ounce
P32	Phosphorus 32
PAC	Premature atrial contraction

ABBREVIATION/SYMBOL	WORD/TERM(S)
PALP	Palpated (-able)
PAP	Papanicolaou smear
PAP	Papillary
PATH	Pathology
PD	Poorly differentiated
PE	Physical examination
PEDS	Pediatrics
PERC	Percutaneous
PET	Positron emission tomography
PID	Pelvic inflammatory disease
PIN III	Prostatic intraepithelial neoplasia, grade III
PLT	Platelets
PMH	Past/personal (medical) history
PMP	Primary medical physician
POOR DIFF	Poorly differentiated
POS	Positive
POSS	Possible
POST	Posterior
POST OP	Postoperative (-ly)
PPD	Packs per day
PR, PRA	Progesterone receptor (assay)
PRE OP	Preoperative (-ly)
PREV	Previous
PROB	Probable (-ly)
PROCTO	Proctoscopy
PSA	Prostatic specific antigen
PT	Patient
PT	Physiotherapy/Physical therapy
PTA	Prior to admission
PTC	Percutaneous transhepatic cholecystogram
PUD	Peptic ulcer disease
PULM	Pulmonary
PVD	Peripheral vascular disease
Q	Every
QD	Every day
QUAD	Quadrant
R/O	Rule out
RA	Rheumatoid arthritis
RAD	Radiation absorbed dose
RBBB	Right bundle branch block
RBC	Red blood cells (count)

ABBREVIATION/SYMBOL	WORD/TERM(S)
RCM	Right costal margin
RE	Regarding
REC'D	Received
REG	Regular
RESEC	Resection (ed)
RHD	Rheumatic heart disease
RIA	Radioimmunoassay
RIQ	Right inner quadrant
RLE	Right lower extremity
RLL	Right lower lobe
RLQ	Right lower quadrant
RMC	Regional medical center
RML	Right middle lobe
ROF	Review of outside films
ROQ	Right outer quadrant
ROS	Review of outside slides
RSO	Right salpingo-oophorectomy
RSR	Regular sinus rhythm
RT	Radiation therapy
RT	Right
RUE	Right upper extremity
RUL	Right upper lobe
RUQ	Right upper quadrant
RX	Prescription
S/P	Status post
S1-S5	Sacral vertebra
S-SPINE	Sacral spine
SATIS	Satisfactory
SB	Small bowel
SCC	Squamous cell carcinoma
SCID	Severe combined immunodeficiency syndrome
SGOT	Serum glutamic oxaloacetic transaminase
SGPT	Serum glutamic pyruvic transaminase
SIADH	Syndrome of inappropriate ADH
SIG COLON	Sigmoid colon
SLE	Systemic lupus erythematosus
SM	Small
SO	Salpingo-oophorectomy
SOB	Short(ness) of breath
SPEC	Specimen
SQ	Squamous
SS	Summary stage

ABBREVIATION/SYMBOL	WORD/TERM(S)
SSS	Sick sinus syndrome
STSG	Split thickness skin graft
SUBCU	Subcutaneous
SURG	Surgery/Surgical
SUSP	Suspicious/suspected
SVC	Superior vena cava
SX	Symptoms
T-SPINE	Thoracic spine
TAH	Total abdominal hysterectomy
TAH-BSO	Total abdominal hysterectomy- bilateral salpingo-oophorectomy
TB	Tuberculosis
TCC	Transitional cell carcinoma
TIA	Transient ischemic attack
TRANS-COLON	Transverse colon
TTP	Thromboticthrombocytopenia purpura
TUR	Transurethral resection
TURB	Transurethral resection bladder
TURP	Transurethral resection prostate
TVC	True vocal cord
TVH	Total vaginal hysterectomy
TX	Treatment
UE	Upper extremity
UGI	Upper gastrointestinal (series)
UIQ	Upper inner quadrant
UNDIFF	Undifferentiated
UNK	Unknown
UOQ	Upper outer quadrant
URI	Upper respiratory infection
US	Ultrasound
UTI	Urinary tract infection
VAG	Vagina/Vaginal
VAG HYST	Vaginal hysterectomy
VAIN III	Vaginal intraepithelial neoplasia (grade III)
VIN III	Vulvar intraepithelial neoplasia (grade III)
W/	With
W/F	White female
W/M	White male
W/O	Without
W/U	Work-up

ABBREVIATION/SYMBOL	WORD/TERM(S)
WBC	White blood cells (count)
WD	Well differentiated
WELL DIFF	Well differentiated
WNL	Within normal limits
WPW	Wolff-Parkinson-White syndrome
XR	Xray
YR	Year

**NAACCR RECOMMENDED ABBREVIATION LIST
